(2) The holder of a provisional or continuing certificate, elementary or secondary, may qualify at a new certificate level, elementary or secondary, by presenting evidence that he has completed a minimum 12 semester hour planned program appropriate to the new certificate level. The applicant qualifying for the new certificate shall present evidence that he has a distribution of majors and minors appropriate to teaching at that new level. When directed teaching at the new level is required, the minimum of 2 years of successful teaching experience at the appropriate level as determined by the state board may be substituted for the requirement. Credit completed in qualifying at a new certificate level may be applied on the requirements for the continuing certificate.

(3) A Michigan institution approved for teacher education or an institution out of this state as authorized by R 390.1132(1)(c) may recommend the additional certificate endorsement.

History: 1954 ACS 52, p. 51, Eff. Nov. 15, 1967; 1954 ACS 74, p. 71, Eff. Jan. 19, 1973.

R 390.1129a Procedures at expiration of provisional certificates.

Rule 29a. (1) To be qualified for teaching at expiration of an elementary or secondary provisional certificate, an applicant shall qualify within the provisional period for a continuing certificate. If the applicant does not so qualify, a 3-year renewal of the provisional certificate may be granted if the applicant presents evidence that he has completed 10 semester hours of credit since issuance of the provisional certificate or that he holds an earned master's or doctor's degree. A second 3-year renewal may be granted if the applicant presents evidence that he has earned 18 semester hours after issuance of the provisional certificate in a planned course of study applicable toward requirements for a continuing certificate or that he holds an earned master's or doctor's degree.

(2) The sponsoring institution shall make recommendation concerning the certificate.

History: 1954 ACS 74, p. 71, Eff. Jan. 19, 1973.

R 390.1130 Reciprocity.

Rule 30. The state board may issue a provisional certificate to a person who has, or who is reported eligible for, a teaching certificate issued by the certificating authority of any other state in which requirements for certification are deemed equivalent to those in effect in this state. The state board may enter into written agreements with the states for the mutual acceptance of 1 or more types of teaching certificates issued by each state. The department of education shall publish and distribute annually a list of states with which reciprocity agreements are signed, or whose certificates are accepted in such manner.

History: 1954 ACS 52, p. 52, Eff. Nov. 15, 1967; 1954 ACS 74, p. 71, Eff. Jan. 19, 1973.

PART 3. STATE CONTINUING CERTIFICATES

R 390.1131 Rescinded.

History: 1954 ACS 52, p. 52, Eff. Nov. 15, 1967; rescinded 1954 ACS 74, p. 68, Eff. Jan. 19, 1973.

R 390.1132 State elementary and secondary continuing certificates.

Rule 32. (1) A state elementary or secondary continuing certificate may be issued to an applicant who presents evidence that he has completed the following requirements:

(a) He has taught successfully for 3 years according to the validity of his provisional certificate and since the issuance of the provisional certificate, as determined by the state board upon recommendation of the sponsoring institution and the local school district.

(b) He has earned 18 semester hours after the issuance of the state provisional certificate in a planned course of study. This advanced course of study is applicable to the applicant's professional development as determined by the state board upon recommendation of the sponsoring institution and, if appropriate, the local school district. A person with an earned master's or higher degree is not required to complete the 18 semester hour planned program.

(c) A continuing certificate may be recommended by a teacher education institution out of this state accredited by a national teacher accreditation agency approved by the state board provided that credits comprising a planned course of study are applicable toward a master's or higher degree at the institution.

(2) This rule is mandatory for all persons seeking certification after July 1, 1976.

History: 1954 ACS 52, p. 52, Eff. Nov. 15, 1967; 1954 ACS 74, p. 71, Eff. Jan. 19, 1973.

R 390.1133 State elementary and secondary 30-hour continuing certificates.

Rule 33. (1) A state elementary or secondary continuing certificate is not required but is available to the teacher who qualifies and requests it.

(2) This certificate may be issued to an applicant who presents evidence that he has completed the following requirements:

(a) He has taught successfully for 3 years, under the terms of his provisional, continuing or permanent certificate as determined by the state board upon recommendation of the sponsoring institution and the local school district.

(b) Thirty semester hours in a planned course of study beyond the bachelor's degree or that he holds a master's degree. This advanced course of study is applicable to the applicant's professional development and shall consist of a planned program contributing specifically to his professional improvement as determined by the state board upon recommendation of the sponsoring institution.

(c) When recommendation for this certificate is made by an institution which is located out of this state and accredited by a national teacher accreditation agency approved by the state board, the credits comprising a planned course of study shall be applicable on a master's or higher degree at the institution.

History: 1954 ACS 52, p. 52, Eff. Nov. 15, 1967; 1954 ACS 74, p. 72, Eff. Jan. 19, 1973.

R 390.1134 Validity.

Rule 34. (1) A permanent or continuing certificate or full vocational authorization retains its validity providing the holder is employed in an educational capacity for a minimum of 100 days in any given 5-year period.

(2) A permanent or continuing certificate or full vocational authorization is suspended automatically if the holder is not employed in an educational capacity for the minimum of 100 days in the 5-year period.

(3) A suspended permanent or continuing certificate or full vocational authorization may be reinstated for an applicant who presents evidence that he meets either of the following requirements:

(a) Holds a master's or higher degree from an approved teacher education institution.

(b) Has completed, subsequent to the suspension, 6 semester hours of satisfactory college credit from an approved teacher education institution.

(4) A suspended permanent or continuing certificate or full authorization may be reinstated provisionally for 1 year by the state board upon request of a public or private school employer that is willing to employ and sponsor the holder full time for 1 year. The provisional reinstatement shall be authorized to the sponsoring school employer in the name of the holder under the following conditions:

(a) During the reinstatement period the school employer shall provide appropriate classroom supervision to the teacher candidate for reinstatement of the certificate or authorization. The employer shall submit a written evaluation to the state board at the end of the 1 year reinstatement period.

(b) When the employer reports completion of 1 year of successful experience during the reinstatement period the permanent or continuing certificate or full vocational authorization shall be fully reinstated.

(c) When the employer reports that the reinstatement year of experience was unsuccessful, the holder of the suspended certificate or authorization may enroll in a teacher education institution of his choice and complete a minimum of 6 semester hours of credit selected to improve the teaching skills identified by the sponsoring employer as deficient during the 1 year reinstatement period. Upon

successful completion of that additional credit, the permanent or continuing certificate or full vocational authorization shall be fully reinstated.

(5) A permanent, continuing or full authorization certificate is valid for teaching in this state in the grades, subjects or levels specified on the certificate.

History: 1954 ACS 52, p. 53, Eff. Nov. 15, 1967; 1954 ACS 74, p. 72, Eff. Jan. 19, 1973; 1954 ACS 83, p. 34, Eff. May 7, 1975.

PART 4. STATE SPECIAL PERMITS

R 390.1141 General provisions.

Rule 41. (1) On application, the state board will issue a special permit for a person who has the statutory qualifications and has completed, or had accepted by transfer, the prescribed amount of satisfactory college credit on an approved teacher education program. The permit will be a full-year permit or substitute permit.

(2) A permit or renewal is issued to the recommending superintendent or personnel officer who shall apply therefor and affirm under oath that a certificated teacher is not available for employment. The recommending superintendent or personnel officer receiving the permit or renewal shall hold the permit or renewal for the person.

History: 1954 ACS 52, p. 53, Eff. Nov. 15, 1967; 1954 ACS 54, p. 46, Eff. May 15, 1968; 1954 ACS 74, p. 73, Eff. Jan. 19, 1973.

R 390.1142 Full-year special permits.

Rule 42. (1) An applicant for a full-year special permit shall present evidence that the person has completed 120 semester hours of satisfactory college credit, including 15 semester hours of credit in professional education.

(2) A full-year special permit is valid for teaching in the grades or subjects specified on the permit or both until June 30 of the school year for which the permit is issued.

(3) A full-year special permit will be renewed upon presentation of evidence that the person has completed 6 semester hours of satisfactory additional credit applying on requirements for regular certification.

History: 1954 ACS 52, p. 53, Eff. Nov. 15, 1967.

R 390.1143 Substitute permits.

Rule 43. (1) An applicant for a substitute permit shall present evidence that the person has completed at least 60 semester hours of satisfactory college credit until September 1, 1970, and 90 semester hours of satisfactory college credit after September 1, 1970.

(2) After September 1, 1973, the person who presents less than 15 semester hours of credit in professional education, but at least 120 semester hours of satisfactory college credit, is eligible for a substitute permit.

(3) A substitute permit is valid for teaching on a substitute basis for a maximum of 90 days during any school year for a person with a minimum of 60 semester hours of satisfactory college credit, and for a maximum of 90 days during any semester for a person with a minimum of 90 semester hours of satisfactory college credit, except that to be eligible to teach for 90 days, the person with less than 120 semester hours shall have completed 30 semester hours of satisfactory college credit within the last 10 years.

(4) After September 1, 1973, a substitute permit is valid for teaching on a substitute basis for a maximum of 90 days during any school year.

History: 1954 ACS 52, p. 53, Eff. Nov. 15, 1967; 1954 ACS 54, p. 46, Eff. May 15, 1968.

R 390.1144 Substitute permits; renewal.

Rule 44. (1) For a person with 60 semester hours or more of satisfactory college credit who does not teach more than 90 days during any school year, the substitute permit is renewable the following year upon recommendation of the superintendent of schools and without additional credit, but no substitute permit shall be issued for any person with less than 90 semester hours after September 1, 1970.

(2) For a person with 90 but less than 120 semester hours of satisfactory college credit who does not teach more than 180 days during any school year, the substitute permit is renewable the following year upon recommendation of the superintendent of schools and upon presentation of evidence that the person is participating in a planned program approved by the sponsoring institution and has completed 10 semester hours of satisfactory college credit during the preceding 12 months.

(3) For a person with 120 or more semester hours of satisfactory college credit, the substitute permit is renewable the following year.

History: 1954 ACS 52, p. 53, Eff. Nov. 15, 1967; 1954 ACS 54, p. 46, Eff. May 15, 1968.

R 390.1145 Permits in emergency situations.

Rule 45. On recommendation of the superintendent of a local or intermediate school district, the state board may issue a permit for a person with reasonable qualifications when failure to authorize the permit will deprive children of an education. The permit shall be issued for a specific period of time under emergency circumstances not including labor disputes.

History: 1954 ACS 74, p. 73, Eff. Jan. 19, 1973.

PART 5. EDUCATIONAL INSTITUTIONS

R 390.1151 Approved teacher education institutions; report; program review; selection techniques; majors and minors; specific subjects.

Rule 51. (1) The state board approves certain institutions and their programs for the purposes of preparing applicants for certification. Upon request of the state board, a teacher education institution shall present a report of its teacher education curricula and definitions of majors and minors. The programs of an approved teacher education institution are subject to periodic review by the state board.

(2) A sponsoring institution recommending applicants for teachers' certificates shall establish selection techniques which insure that only qualified students are admitted to the teacher education program and that only qualified students are sponsored for certification.

(3) Unless otherwise approved by the state board, all majors and minors offered by an approved teacher education institution shall be in subject matter fields pertinent to teaching at the level for which certification is to be recommended. The state board reserves the right to determine the acceptability of majors and minors recommended by out-of-state institutions.

(4) An applicant who has been graduated from a specific teaching curriculum, such as fine arts, industrial arts, library science, music, physical education, health education, or foreign language, may be certified to teach that specific subject in elementary and secondary grades when, upon recommendation of the sponsoring institution, the applicant qualifies at both levels.

History: 1954 ACS 52, p. 53, Eff. Nov. 15, 1967; 1954 ACS 74, p. 73, Eff. Jan. 19, 1973; 1954 ACS 93, p. 31, Eff. Oct. 5, 1977.

R 390.1152 Approved teacher education institutions; equivalence option.

Rule 52. An applicant may satisfy any educational requirement for certification by presenting evidence of an equivalent as determined by the state board. In granting such equivalence the state board shall consider college graduation and scores made on standarized examinations or prior teaching experience, or any combination of these or other appropriate criteria. Evaluation of equivalence shall be under direction of the state board. The sponsoring institution may award semester hours of credit based upon equivalence in partial fulfillment of requirements for a major or minor or for any of the required credits for certification.

History: 1954 ACS 52, p. 54, Eff. Nov. 15, 1967; 1954 ACS 74, p. 73, Eff. Jan. 19, 1973.

R 390.1153 Approved teacher education institutions; experimental programs.

Rule 53. The state board at the request of an approved teacher education institution may waive for a specific time particular requirements of this code for experimental teacher education programs. A request for such a waiver shall provide sufficient detail as prescribed to allow the state board to approve such provisions in order that substantial experimentation with patterns of teacher education may be encouraged. Upon adequate evidence, the state board may give continuing status to an experimental teacher education program of demonstrated superiority.

History: 1954 ACS 52, p. 54, Eff. Nov. 15, 1967.

R 390.1154 Out-of-state institutions.

Rule 54. (1) An applicant for certification in this state who has been educated in an accredited institution out of this state shall present evidence of having fulfilled all of the requirements established for residents of this state. The state board may accept credit from an institution accredited by its regional accrediting association.

(2) An applicant for certification in this state who presents credit from a teacher education institution not accredited by its regional accrediting association may validate such credit by gaining unconditional admission to full standing in the graduate department, division or school of a college or university fully accredited by the regional accrediting association, or completing 6 semester hours of acceptable graduate credit in an accredited institution or meeting such requirements as are specified by the state board.

(3) Credits from institutions in foreign countries will be adjudged by the United States office of education and by the state board in determining eligibility for certification.

(4) A state elementary or secondary provisional certificate may be issued to an applicant from another state who presents evidence that he has been graduated from a teacher education institution approved by that state's appropriate education agency and has completed a program in elementary or secondary education as prescribed by that teacher education institution, if the institution is accredited at the time of his graduation by a national teacher accreditation agency approved by the state board.

History: 1954 ACS 52, p. 54, Eff. Nov. 15, 1967; 1954 ACS 74, p. 73, Eff. Jan. 19, 1973.

R 390.1155 Non-teacher education institutions.

Rule 55. An applicant presenting credits from an institution of higher education not approved for teacher education purposes shall complete such credits as may be required by the state board in his individual case.

History: 1954 ACS 52, p. 54, Eff. Nov. 15, 1967.

R 390.1156 Correspondence credits.

Rule 56. A correspondence credit may not apply toward requirements for a continuing certificate, renewal of a provisional certificate, nor conversion of a provisional or continuing certificate.

History: 1954 ACS 52, p. 55, Eff. Nov. 15, 1967.

PART 6. VOCATIONAL ENDORSEMENT AND AUTHORIZATION

R 390.1161 State secondary provisional certification with vocational endorsement.

Rule 61. (1) An applicant for vocational endorsement shall meet the requirements for state secondary provisional certification as described in part 2 of these rules as well as presenting evidence of completing:

(a) A program in vocational teacher education at an institution approved by the state board for the preparation of vocational teachers in the occupational area of the endorsement.

(b) A major or a minor in an approved program in the occupational area of the endorsement.

(c) Two years of work experience in the occupational area of the endorsement or completion of a planned equivalent program of directed supervised occupational experience approved by the department of education. The occupational experience shall be characterized by its relevancy and recency.

(2) Vocational endorsement is valid for teaching in the stated occupational area in approved vocational education programs.

History: 1954 ACS 74, p. 74, Eff. Jan. 19, 1973.

R 390.1162 State secondary continuing certification with vocational endorsement.

Rule 62. A state continuing certificate with a vocational endorsement may be issued to an applicant who has met the requirements for continuing certification as described in part 3 of these rules as well as presenting evidence that he has completed the following requirements:

(a) Taught successfully for 3 years according to the validity of his provisional certificate and vocational endorsement and since the issuance of the provisional certificate and vocational endorsement, as determined by the state board upon recommendation of the sponsoring institution and the local school district.

(b) Earned 18 semester hours after the issuance of his state provisional certificate and vocational endorsement in a planned course of study which includes a minimum of 10 semester hours of relevant vocational education. This advanced course of study is applicable to the applicant's professional development as determined by the state board upon recommendation of the sponsoring institution and, if appropriate, the local school district. A person with an earned master's or higher degree is not required to complete the 18 semester hour planned program.

History: 1954 ACS 74, p. 74, Eff. Jan. 19, 1973.

R 390.1163 Temporary vocational authorization.

Rule 63. (1) A temporary vocational authorization document may be issued upon the report of a designated vocational teacher education institution to an applicant presenting evidence that he has met the following requirements:

(a) Possesses a baccalaureate degree.

Generated for Susan K Kendall (Michigan State University) on 2018-09-05 16:48 GMT / http://hdl.handle.net/2027/mdp.49015002898253

(b) Has a major or minor in the field of specialization in which vocational authorization is being requested or equivalent graduate credits to substitute for the required major or minor.

(c) Has a minimum of 2 years of experience in the occupational area concerned or has completed a planned program of directed supervised occupational experience approved by the state board. The occupational experience shall be characterized by its relevancy and recency.

(2) Temporary vocational authorization is valid for teaching in those courses in which instruction is limited to the occupation specified on the authorization in approved vocational programs. It is valid for 6 years.

History: 1954 ACS 74, p. 74, Eff. Jan. 19, 1973.

R 390.1164 Full vocational authorization.

Rule 64. (1) A full vocational authorization document shall be issued to qualified candidates and shall be valid for continued teaching in those courses in which instruction is limited to the occupation specified on the authorization in approved vocational programs.

(2) Applications for full vocational authorization shall contain evidence that the candidate:

(a) Has taught successfully for 3 years according to the validity of his temporary vocational authorization as determined by the state board upon recommendation of the sponsoring institution and the local school district.

(b) Has completed a minimum of 10 semester hours of professional vocational education as determined by the state board and approved by the sponsoring institution and the local school district.

(3) The validity of a full vocational authorization is specified in R 390.1134.

History: 1954 ACS 74, p. 75, Eff. Jan. 19, 1973.

R 390.1165 Annual vocational authorization.

Rule 65. (1) If a candidate does not meet the standards outlined for temporary vocational authorization, an evaluation of competency shall be made by the department of education. The department shall determine the adequacy of his combined education and occupational and teaching experience in relation to the requirements set forth. A candidate shall have work experience at the journeyman level in apprenticeable trades. If the candidate is deemed competent, a 1-year vocational authorization shall be issued to the school district. This annual vocational authorization is planned primarily for persons who will be teaching only vocationally approved trade and industrial and health occupation courses in grades 9 to 12.

(2) This annual authorization is valid for teaching those courses in approved programs, in which instruction is limited to the occupation specified on the authorization.

(3) A vocational authorization is renewable annually upon the recommendation of the employing local school district.

History: 1954 ACS 74, p. 75, Eff. Jan. 19, 1973.

R 390.1166 Credit from institutions not designated for preparation of vocational teachers.

Rule 66. Candidates for vocational endorsement or authorization who present credit from a teacher education institution not approved by the state board for the preparation of vocational teachers may validate the credit by gaining unconditional admission to full standing in the graduate department, division, or school of

R 390.1181—R 390.1189 Expired.

History: 1954 ACS 52, pp. 56-58, Eff. Nov. 15, 1967; expired 1954 ACS 52, p. 58, Eff. June 30, 1976.

PART 9. EFFECTIVE DATE AND RESCISSION

R 390.1198 Effective date.

Rule 98. These rules are effective July 1, 1967.

History: 1954 ACS 52, p. 58, Eff. Nov. 15, 1967.

Editor's note: Under former §24.74 of the Michigan Compiled Laws, a rule did not become effective until filed with the secretary of state and until published in the supplement to the Michigan Administrative Code. These rules were published November 15, 1967, in Administrative Code Supplement No. 52.

R 390.1199 Rescission.

Rule 99. The teacher's certification code of the state board of education, being R 390.401 to R 390.533 of the Michigan Administrative Code, and appearing on pages 4001 to 4012 of the 1954 volume of the Code, with amendments to rules appearing on pages 109 and 110 of the 1955 Annual Supplement to the Code, pages 3258 and 3259 of the 1964-65 Annual Supplements to the Code, and page 65 of Supplement No. 46 to the Code, is rescinded. The state board rule pertaining to fees for certificates and duplicates, being R 390.691 of the Michigan Administrative Code, and appearing on page 2622 of the 1962 Annual Supplement to the Code, is rescinded.

History: 1954 ACS 52, p. 58, Eff. Nov. 15, 1967.

PART 10. ADMINISTRATIVE HEARINGS

R 390.1201 Certificates; denial, suspension, or revocation; reinstatement.

Rule 101. (1) The state board may refuse to grant or renew, or may revoke or suspend for a fixed term, or may impose reasonable conditions on, a teaching certificate granted pursuant to these rules for the following reasons:

(a) Fraud, material misrepresentation, or concealment in the application for a certificate.

(b) Failure or ineligibility of the applicant or certificate holder to meet the criteria for eligibility for the certificate.

(c) Conviction, as an adult, of an act of immoral conduct contributing to the delinquency of a child, or of a felony involving moral turpitude.

(2) A certificate shall not be denied, suspended, or revoked solely on the basis of a prior felony conviction, unless it is related reasonably and adversely to the ability of the person to serve in an elementary or secondary school.

(3) Upon application and a showing of good cause, the state board may reinstate a suspended or revoked certificate or may grant a new certificate. The applicant or certificate holder shall be permitted to demonstrate that, at the present time, he has the ability to serve in a teaching position without adversely affecting children or other members of the profession, and shall provide proof that he is rehabilitated.

History: 1954 ACS 93, p. 31, Eff. Oct. 5, 1977.

R 390.1202 Contested case; grounds.

Rule 102. A contested case may be instituted pursuant to chapter 4 of Act No. 306 of the Public Acts of 1969, being §24.271 et seq. of the Michigan Compiled Laws, in the event of a refusal to grant or renew a teacher's certificate, or in the event of a suspension or revocation of a teacher's certificate.

History: 1954 ACS 93, p. 31, Eff. Oct. 5, 1977.

R 390.1203 Investigation.

Rule 103. Upon receipt of information which may serve as the basis for a refusal to grant or renew a teacher's certificate, or as the basis for the suspension or revocation of a teacher's certificate, the superintendent of public instruction shall initiate an investigation of that information.

History: 1954 ACS 93, p. 31, Eff. Oct. 5, 1977.

R 390.1204 Written charges; service; notice of opportunity to show compliance.

Rule 104. (1) If the superintendent of public instruction determines that probable cause exists for the suspension or revocation of a teacher's certificate, the superintendent shall initiate the preparation and filing of written charges with the state board and shall cause a copy thereof and a notice of opportunity to show compliance to be served upon the teacher in question.

(2) Within 20 days of service of the notice of opportunity to show compliance, a teacher may request an informal conference to show compliance. The informal conference shall be with an authorized representative of the state board.

(3) After the informal conference, the state board may, after considering the recommendation of its authorized representative, make a finding of compliance, enter into a written settlement of the matter with the teacher without a hearing, or direct that a notice of hearing issue.

History: 1954 ACS 93, p. 31, Eff. Oct. 5, 1977.

R 390.1205 Notification of rights; copies of rules and laws.

Rule 105. Upon receipt of written charges, the state board shall inform the teacher of hearing rights under these rules, and under sections 71 to 92 of Act No. 306 of the Public Acts of 1969, being §§24.271 to 24.292 of the Michigan Compiled Laws, and known as the administrative procedures act of 1969, and section 10 of Act No. 287 of the Public Acts of 1964, being §388.1010 of the Michigan Compiled Laws. A complete copy of the rules and laws shall be furnished the teacher.

History: 1954 ACS 93, p. 32, Eff. Oct. 5, 1977.

R 390.1206 Notice of hearing; written charges; settlement; absence of party; hearing as public or private.

Rule 106. (1) Within 30 days of service of the notice of opportunity to show compliance, if the teacher does not request an informal conference, a notice of hearing and a copy of the written charges shall be served upon the teacher.

(2) After an informal conference and a decision by the state board to proceed to hearing, a notice of hearing and a copy of the written charges shall be served upon the teacher.

(3) The written charges may be amended between the time of the notice of opportunity to show compliance and the notice of hearing.

(4) If the teacher fails to attend the hearing, the hearing may proceed and the decision may be made in the absence of the teacher.

(5) The teacher and the state board may agree in writing to a settlement of the matter without a hearing.

(6) A hearing shall be public or private at the request of the teacher.

History: 1954 ACS 93, p. 32, Eff. Oct. 5, 1977.

R 390.1207 Answer to formal charges; bill of particulars.

Rule 107. (1) A teacher may file an answer to formal charges with the state board. The answer shall be filed not less than 10 days prior to the hearing.

(2) If the formal charges are believed by the teacher to be so ambiguous that an answer cannot be adequately prepared, the teacher may file a motion for a bill of particulars with the hearing officer. The request for a bill of particulars shall be granted upon a demonstration of good cause.

History: 1954 ACS 93, p. 32, Eff. Oct. 5, 1977.

R 390.1208 Representation; appearance by legal counsel; service on attorneys of record.

Rule 108. (1) A teacher may represent himself or be represented by legal counsel or another duly authorized representative.

(2) An appearance by legal counsel shall be filed in writing and at the earliest possible time. Thereafter, service upon the attorneys of record shall be deemed service upon the parties.

History: 1954 ACS 93, p. 32, Eff. Oct. 5, 1977.

R 390.1209 Hearing officer; duties.

Rule 109. A hearing officer designated by the state board shall promptly establish hearing dates, inquire fully into all facts relevant to each proceeding, and submit proposals for decision to the state board and the parties.

History: 1954 ACS 93, p. 32, Eff. Oct. 5, 1977.

R 390.1210 Hearing officer; qualification; prohibited communications.

Rule 110. (1) The hearing officer shall be from an office completely separated from any person involved in investigatory or prosecutorial functions regarding contested cases pertaining to teacher certification.

(2) A hearing officer shall not directly or indirectly communicate with a party, a representative of a party, or other person who has been engaged in investigatory or prosecutorial functions regarding any issue of fact or law, except on notice and opportunity for all parties to participate, unless otherwise provided by law.

History: 1954 ACS 93, p. 32, Eff. Oct. 5, 1977.

R 390.1211 Witnesses; fees and expenses; exclusion from hearing; communication.

Rule 111. (1) A witness, except a state employee, requested by the hearing officer shall be paid an appropriate witness fee and expenses by the party that had the hearing officer request the presence of the witness. Fees and expenses shall be consistent with those provided in circuit court.

(2) Upon motion and a showing of good cause, a prospective witness may be excluded from a hearing. Witnesses may be instructed not to communicate with a prospective witness.

History: 1954 ACS 93, p. 33, Eff. Oct. 5, 1977.

R 390.1212 Transcript; evidence; exhibits.

Rule 112. (1) A hearing reporter shall transcribe the testimony taken at a hearing and file the certified original with the state board upon request of the hearing officer or the state board. A party may request a copy of the transcript at his own expense. When a transcript is prepared, the certified original shall be filed with the state board and all parties shall be notified.

(2) Evidence in a contested case may be retained in the custody of a person designated by the hearing officer or the state board upon such terms as are just, practicable, and designed to preserve the evidence without undue interference on any other legal proceeding.

(3) Exhibits shall be retained by the hearing officer until such time as they are certified and filed with the state board, along with the proposal for decision.

History: 1954 ACS 93, p. 33, Eff. Oct. 5, 1977.

R 390.1213 Exceptions, cross exceptions, and briefs.

Rule 113. (1) Within 20 days after service of the proposal for decision, a party may file a written statement with the state board setting forth exceptions thereto or to any other part of the record or proceeding, including rulings upon motions and objections. A brief in support of these exceptions may be filed with the state board. A copy of the exceptions and any brief shall be served on each party to the proceedings.

(2) Within 10 days after service of an exception, a party may file a cross exception and a brief in support thereof, or a brief in support of the proposal for decision. A copy of the cross exceptions and any brief shall be served on each party to the proceedings.

History: 1954 ACS 93, p. 33, Eff. Oct. 5, 1977.

R 390.1214 Oral arguments.

Rule 114. If a party desires to present oral arguments to the state board, a written request therefor shall be made to the state board at the time an exception, cross exception, or brief is filed. The state board, on its own motion, may direct oral argument.

History: 1954 ACS 93, p. 33, Eff. Oct. 5, 1977.

R 390.1215 Advice of attorney general or designated assistant.

Rule 115. The state board may seek the legal advice of the attorney general, or a designated assistant other than a person who may have engaged in investigatory or prosecutorial functions, with regard to the contested case under consideration or a factually related case.

History: 1954 ACS 93, p. 33, Eff. Oct. 5, 1977.

R 390.1216 Proposal for decision; action by state board.

Rule 116. The state board may adopt, modify, or reverse the proposal for decision.

History: 1954 ACS 93, p. 33, Eff. Oct. 5, 1977.

ENDORSEMENT OF TEACHERS AS COUNSELORS

(By authority conferred on the state board of education by sections 10 and 15 of Act No. 287 of the Public Acts of 1964, as amended, and section 570 of Act No. 269 of the Public Acts of 1955, as amended, being §§388.1010, 388.1015, and 340.570 of the Michigan Compiled Laws)

R 390.1301 Definitions.

Rule 1. As used in these rules:

(a) "Valid Michigan teaching certificate" means a provisional, continuing, permanent or life teaching certificate issued by the state board of education enabling the holder to teach at the elementary or secondary school level during the school year in which he wishes to serve as a counselor.

(b) "Counselor" means an individual who has successfully completed an approved counselor education program and performs a counseling role.

(c) "Counseling role" or "guidance" means specialized activities performed by an individual when assisting students to identify, plan and attain those goals consistent with their aptitudes, needs, abilities and interests; when coordinating and integrating services directly related to students' mental, physical, social and emotional well-being; and when consulting with parents, teachers and other specialists regarding pupil growth, learning and development.

(d) "Sponsoring institution" means a higher education institution approved for teacher education by the state board of education and which is willing to make recommendations as to applicants for the several certificates provided for in the teacher certification code, being R 390.1101 to R 390.1199 of the Michigan Administrative Code.

(e) "Elementary level" means grades kindergarten through 9.

(f) "Secondary level" means grades 7 through 12.

History: 1954 ACS 68, p. 31, Eff. June 21, 1971.

R 390.1302 Persons required to hold counselor endorsements.

Rule 2. A person employed in a public elementary or secondary school in a counseling role shall hold a valid Michigan teaching certificate with a counseling endorsement.

History: 1954 ACS 68, p. 32, Eff. June 21, 1971.

R 390.1303 Qualifications for counselors.

Rule 3. (1) An applicant for endorsement shall possess a current valid Michigan teaching certificate. The sponsoring institution shall make recommendation concerning counselor endorsement at the appropriate level or levels, elementary and secondary, for which he qualifies.

(2) An applicant shall have successfully completed an approved counselor education program of not less than 18 semester hours of credit. The program shall be approved by the state board of education and shall include the following skills and content areas or their equivalent:

(a) Guidance services—philosophy, principles and practices.

(b) Individual and group analysis—nature and range of human characteristics, and appraisal methods.

(c) Guidance information—vocational development theory, educational and occupational information.

(d) Counseling theory and practice—individual and group procedures, administration and coordination relationships, professional relationships and ethics.

(e) Supervised experiences—laboratory, practicum or internship.

(f) Evaluation—statistics and research methodology, follow-up evaluation and measurement methods.

History: 1954 ACS 68, p. 32, Eff. June 21, 1971.

R 390.1304 Experimental counselor education programs.

Rule 4. The state board of education, at the request of an approved teacher education institution, may waive for a specific time any requirement set forth in R 390.1303 for experimental counselor education programs. A request for a waiver shall provide sufficient detail to allow the board to approve such provisions in order that substantial experimentation with patterns of counselor education may be encouraged. Upon adequate evidence, the board may give continuing status to an experimental counselor education program of demonstrated superiority.

History: 1954 ACS 68, p. 32, Eff. June 21, 1971.

R 390.1305 Applications and credits.

Rule 5. (1) An application for school counselor endorsement shall be directed to the state board of education on a form supplied or approved by the board. An application may be submitted after January 1, 1971.

(2) Credits toward school counselor endorsement shall be completed through an approved sponsoring institution or accepted in transfer by such an institution. The board reserves the right to determine the acceptability of credits presented for endorsement from approved counselor education institutions located in other states.

(3) A person with a valid Michigan teaching certificate, employed as a school counselor for a period of not less than 1 year prior to July 1, 1971, may apply for school counselor endorsement, provided that he shall have earned a minimum of 12 semester hours of graduate credit in the field of guidance and counseling or its equivalent as determined by the board. Applications for endorsement for the school year 1971-1972 shall be filed with the board before July 15, 1971. For good cause shown, the board may receive applications for endorsement after July 15, 1971. Applications for endorsement based on work experience and a minimum of 12 semester hours of graduate credit in the field of guidance and counseling or its equivalency shall be filed prior to July 1, 1973.

History: 1954 ACS 68, p. 32, Eff. June 21, 1971.

HIGHER EDUCATION ASSISTANCE AUTHORITY

GUARANTEED STUDENT LOANS

(By authority conferred on the higher education assistance authority and the state administrative board by section 5 of Act No. 77 of the Public Acts of 1960, being §390.955 of the Michigan Compiled Laws)

PART 1. GENERAL PROVISIONS

R 390.1401 Definitions; A to C.

Rule 1. (1) "Academic year" means a period of time during which a student borrower progresses from 1 level of class standing to the next higher level.

Digitized by Google

(2) "Adjusted family income" means income used to establish a condition whether the lender need contact the financial aid officer or simply note in his record if he intends to increase the amount of loan recommended by the financial aid officer as eligible for federal interest subsidy and determined on the basis of family financial information submitted to the participating lender on forms approved by the United States office of education.

(3) "Class standing" means the traditional classification such as freshman, sophomore, junior or senior given to a student by a college or university. A vocational or practical nursing student shall be considered a freshman for the first 9 months of full-time study or its equivalent, a sophomore for the second 9 months, a junior for the third 9 months if the eligible institution does not employ the traditional method of determining class standing. A student attending a school offering only correspondence programs of study shall be considered as at least a half-time vocational student and his class standing shall be determined accordingly.

(4) "Commissioner" means the United States commissioner of education or his designee.

History: 1954 ACS 75, p. 48, Eff. May 2, 1973; 1954 ACS 81, p. 42, Eff. Oct. 31, 1974.

R 390.1402 Definitions; D.

Rule 2. (1) "Death and disability claim" means a form a participating lender sends to the department to request reimbursement for a loan in default by reason of death or disability.

(2) "Default" means failure to make an installment payment when due or noncompliance with other terms of a note or other written evidence of agreement which is not cured by payment or other appropriate arrangements in case of a loan payable in monthly installments, for 120 days, or in the case of a loan or interest payable in less frequent installments, for 180 days.

(3) "Deferment agreement" means a request for deferment of payment, completed by a borrower and approved by a lending institution and the department, which defers payment of principal and may defer payment of interest.

(4) "Department" means the Michigan department of education.

History: 1954 ACS 75, p. 48, Eff. May 2, 1973.

R 390.1403 Definitions; E.

Rule 3. (1) "Educational expenses" means the estimated costs for a student to pursue his education for the period of the loan specified in the application.

(2) "Eligible institution" means (a) an institution of higher education, (b) a vocational school or (c) with respect to students who are citizens of the United States, an institution outside the United States comparable to an institution of higher education or to a vocational school which has been approved by the state board of education and by the commissioner for purposes of the guaranteed loan program.

(3) "Eligible lender" means an eligible institution of higher education, an agency or instrumentality of the state, or a financial or credit institution, including an insurance company or pension fund which has been approved by the commissioner, subject to examination and supervision by the state or an agency of the United States.

(4) "Eligible loan" means a student loan guaranteed by the department, including a loan for which a portion of the interest charge is payable by the commissioner under terms of the department's agreement with the commissioner.

or would be payable under those terms except for the adjusted family income of the borrower, or would be payable by the commissioner but is waived by the borrower.

History: 1954 ACS 75, p. 48, Eff. May 2, 1973; 1954 ACS 81, p. 42, Eff. Oct. 31, 1974.

R 390.1404 Definitions; F, G.

Rule 4. (1) "Forbearance" means reducing, extending or delaying payments when scheduled payments would place an undue burden on a student borrower which, without relief, would result in default.

(2) "Full-time student" means a student enrolled in an eligible institution and carrying a sufficient number of credits or clock hours to qualify as such a student as determined by the institution. A vocational school student shall be engaged in a program of studies which requires no less than 300 clock hours of supervised instruction and at least 25 hours per week in supervised classroom instruction. A correspondence school student is not considered a full-time student under the guaranteed student loan program.

(3) "Good standing for loan purposes" means that a student may reasonably be expected to successfully complete his program of study.

(4) "Grace period" means a period of not less than 9 nor more than 12 months from the time a student ceases at least half-time study at an eligible school until the date regular repayment on his loan is required.

(5) "Guarantee agency" means the Michigan department of education.

History: 1954 ACS 75, p. 49, Eff. May 2, 1973; 1954 ACS 81, p. 42, Eff. Oct. 31, 1974.

R 390.1405 Definitions; H to L.

Rule 5. (1) "Half-time student" means a student carrying at least ½ the normal full-time academic workload as determined by the eligible institution in which he is enrolled. A student engaged in a program of study by correspondence requiring at least 12 hours' preparation per week is considered a half-time student.

(2) "Interim note" means a promissory note executed at the time the loan proceeds are disbursed.

(3) "Late fee" means a charge of 5% of an installment payment or $5.00, whichever is less, which may be charged on a payout note payment more than 10 days past due.

(4) "Letter of notification" means the form sent to a lender, student and the eligible institution by the department indicating action taken on a loan guarantee request.

History: 1954 ACS 75, p. 49, Eff. May 2, 1973; 1954 ACS 81, p. 43, Eff. Oct. 31, 1974.

R 390.1406 Definitions; N.

Rule 6. (1) "Notice of default and request for reimbursement" means the form a participating lender sends to the department to request reimbursement for a loan in default because of delinquency.

(2) "Notice of payment in full" means the form a participating lender sends to the department when a borrower has repaid his debt.

History: 1954 ACS 75, p. 49, Eff. May 2, 1973.

R 390.1407 Definitions; P to T.

Rule 7. (1) "Participating lender" means an eligible lender which has signed an agreement with the department to make student loans.

(2) "Participating institution" means an eligible institution with a student recipient of a guaranteed loan.

(3) "Payout note" means a promissory note executed when a loan is converted to regular repayment status.

(4) "Student fee payment loan disbursement information form" means the form a participating lender sends to the department when a loan has been disbursed and the student fee has been collected.

(5) "Totally and permanently disabled" means a medically determinable impairment due to which the student is unable to engage in any substantial gainful activity and which is expected to continue for a long and indefinite period or to result in death.

History: 1954 ACS 75, p. 49, Eff. May 2, 1973; 1954 ACS 81, p. 43, Eff. Oct. 31, 1974.

R 390.1409 Primary documents.

Rule 9. The department shall distribute documents used in servicing student loans and is responsible for their uniform use.

History: 1954 ACS 75, p. 49, Eff. May 2, 1973.

R 390.1411 Civil rights.

Rule 11. (1) The guaranteed loan program is available to all eligible students without regard to race, color, creed, or national origin.

(2) A participating institution shall not discriminate in the admission and treatment of students because of race, color, creed, or national origin.

(3) A participating lender shall not discriminate in making a student loan to an eligible borrower because of race, color, creed, or national origin.

History: 1954 ACS 75, p. 50, Eff. May 2, 1973.

R 390.1412 Lenders' policies.

Rule 12. A participating lender may determine its own lending policy except as prescribed by these rules.

History: 1954 ACS 75, p. 50, Eff. May 2, 1973.

R 390.1413 Records and reports of participating lenders.

Rule 13. (1) A participating lender shall keep such records as may be necessary and as the commissioner may require, and shall afford access thereto at any reasonable time to the department, the commissioner or a representative of the department or commissioner to assure correctness and to verify reports and records.

(2) A participating lender shall maintain complete and accurate records of all department guaranteed loan accounts reflecting each transaction, ready identification of each borrower's account and its status. The records shall contain full and proper documentation to support claims for losses.

(3) A participating lender shall retain all records pertaining to each applicant to whom a guaranteed student loan has been disbursed until the commissioner has no further need for such records but for not less than 36 months after the date the loan is paid in full or has been defaulted and the lender has been reimbursed by the department.

(4) A participating lender shall submit such reports and information as the department or commissioner may require in administration of the loan program.

History: 1954 ACS 75, p. 50, Eff. May 2, 1973.

R 390.1415 Records of eligible institutions.

Rule 15. (1) A participating institution shall keep necessary records and afford access thereto at any reasonable time to the department, the commissioner or a

representative of the department or commissioner to assure correctness and to verify reports and records.

(2) A participating institution shall maintain complete and accurate records of all department guaranteed loan accounts and shall inform the department when a student borrower reduces his schedules to less than half-time, withdraws from school, transfers to another school or graduates earlier or later than anticipated.

(3) Periodically, the department shall require each participating institution to verify the enrollment status of students having outstanding loans.

History: 1954 ACS 75, p. 50, Eff. May 2, 1973.

R 390.1417 Student transfers.

Rule 17. (1) When a student transfers to an eligible institution, the original eligible institution when the loan was granted will continue to have the loan recorded against its total loans until repaid. The eligible institution to which the student transfers shall furnish periodic reports to the department concerning the student's continuing loan eligibility.

(2) For the effect of a transfer to an ineligible institution, see R 390.1452.

History: 1954 ACS 75, p. 50, Eff. May 2, 1973.

R 390.1419 Termination of participation by lenders.

Rule 19. Participation by a lender in the guaranteed student loan program may be terminated upon 60 days' written notice by a lender or department to the other party. In the event that termination of a participating lender is considered by the department, the lender shall be provided notice and an opportunity for a hearing. Termination does not affect obligations incurred pursuant to the agreement to guarantee loans and these rules before the time the termination notice becomes effective.

History: 1954 ACS 75, p. 50, Eff. May 2, 1973.

R 390.1421 Eligibility of applicants.

Rule 21. (1) To be eligible to receive a loan, a student shall:

(a) Have been accepted for enrollment at an eligible institution or, in case of a student already attending an eligible institution, shall be in good standing as determined by the institution.

(b) Carry at least ½ of the full-time workload as determined by the institution.

(c) Be a citizen of the United States or have declared his intention to become a citizen. A noncitizen may be required to file with the department an official copy of his declaration of intention to become a citizen of the United States.

(d) Attest to or sign a notarized affidavit that the loan proceeds will be used only for educational costs at the eligible institution listed in the application for a guaranteed loan.

(2) The education certificate portion of the loan application shall be completed by the financial aids officer at that institution.

(3) A student pursuing course work at a hospital but enrolled in a 4-year course leading to a bachelor of science degree is considered a student of the eligible institution with which the hospital is affiliated.

History: 1954 ACS 75, p. 50, Eff. May 2, 1973; 1954 ACS 81, p. 43, Eff. Oct. 31, 1974.

R 390.1422 Age of applicants.

Rule 22. A person otherwise qualifying for a student loan is not disqualified because he is under age 18. A person under age 18 is deemed to have full legal

capacity to apply for, receive and repay a loan, and has all the rights, powers, privileges and obligations of a person 18 years or older.

History: 1954 ACS 75, p. 51, Eff. May 2, 1973.

R 390.1423 Adjusted family income used to determine eligibility for federal interest payment.

Rule 23. (1) A person with an adjusted family income of less than $15,000.00 and whose loan application was received by the department after November 7, 1965, and before March 1, 1973, is eligible to have a portion of the interest accruing to his student loan paid to the lender on his behalf of the federal government as set forth in R 390.1441(5).

(2) A person whose application is received by the department of education after February 28, 1973, and who submits income and asset information to the financial aid officer for computation of the expected family contribution toward such person's educational costs is eligible to have interest accruing to his student loan paid to the lender on his behalf by the federal government as set forth in part 3.

History: 1954 ACS 75, p. 51, Eff. May 2, 1973; 1954 ACS 81, p. 43, Eff. Oct. 31, 1974.

R 390.1424 Adjusted family income; computation.

Rule 24. (1) Adjusted family income shall be computed by adding 90% of the adjusted gross income of the student borrower, his spouse and his parents as reported on federal income tax returns for the tax year immediately preceding execution of the interim note and deducting the amount for personal exemptions claimed on the returns.

(2) Income of the borrower, his spouse or his parents, which is not subject to taxation under the internal revenue code or the commonwealth tax act of 1954 (Puerto Rico) because the individual is residing abroad or is a nonresident alien, shall be included in the borrower's adjusted family income.

(3) Income for a person residing abroad shall be treated as if subject to taxation under the internal revenue code and computed together with any income subject to taxation. Income of a nonresident alien shall be computed in accordance with instructions issued by the commissioner.

History: 1954 ACS 75, p. 51, Eff. May 2, 1973.

R 390.1425 Exclusion of income of parents or spouses.

Rule 25. (1) The income of a parent, or parents living together, shall be excluded from consideration under R 390.1424(1) and (2) if the borrower is not and, during the preceding tax year, has not been residing with, and is not claimed as a dependent for federal income tax purposes, nor the recipient of an amount in excess of $600.00 from a parent or parents.

(2) The income of a spouse shall be excluded where there is a legal separation approved by a court or which has existed in fact during the preceding tax year.

(3) A person whose income is so excluded under subrules (1) and (2) shall not be required to complete or sign any forms designed for computing adjusted family income.

History: 1954 ACS 75, p. 51, Eff. May 2, 1973.

R 390.1426 Adjusted family income; responsibility for; intervals of determining.

Rule 26. (1) Determination of adjusted family income shall be made in a manner and on the basis of financial information submitted on forms supplied or approved by the commissioner. The determination shall be made each time funds

are disbursed, except that a new determination need not be made with respect to funds advanced within the same tax year in which the last determination was made.

(2) If the borrower elects not to participate in federal interest benefits, financial information need not be supplied. A statement to this effect shall be entered on the determining form and the student borrower shall sign the form.

(3) If adjusted family income is $15,000.00 or more or the borrower elects not to participate in federal interest benefits, financial information need not be supplied. A statement to this effect shall be entered on the determining form and the student borrower shall sign the form.

History: 1954 ACS 75, p. 51, Eff. May 2, 1973; 1954 ACS 81, p. 43, Eff. Oct. 31, 1974.

R 390.1427 Financial analysis.

Rule 27. (1) A student shall provide to the department a listing of his educational costs and resources to meet these costs.

(2) A loan amount request will be reduced by the department to provide for the difference between excessive educational costs and the amount of loan which has been requested.

(3) Normal family living costs of a married student shall be considered by an eligible institution in determining the loan recommendation.

(4) Participation in the loan insurance program shall not be denied to a student because of his adjusted family income as determined at the time of execution of the interim note.

(5) A loan amount request will be reduced by the department to provide the difference between educational costs and financial assistance provided to meet such educational costs.

History: 1954 ACS 75, p. 52, Eff. May 2, 1973; 1954 ACS 81, p. 43, Eff. Oct. 31, 1974.

R 390.1429 Cancellation of loans.

Rule 29. The department will cancel a loan not disbursed in full or in part within 90 days of approval except in instances of approval prior to date funds will be used. In instances of early approval, cancellation notices are mailed no earlier than 30 days nor later than 60 days after the date loan funds were to be used.

History: 1954 ACS 75, p. 52, Eff. May 2, 1973; 1954 ACS 81, p. 44, Eff. Oct. 31, 1974.

PART 2. LOAN PROVISIONS AND PROCEEDS

R 390.1431 Primary parties and notes.

Rule 31. (1) Negotiations and execution of guaranteed loans are limited to participating lenders and institutions dealing with eligible students and the department.

(2) A guaranteed loan shall be evidenced by a promissory note approved by the department. The department shall not require a co-signer on the note. The eligible lender may require a co-signer.

History: 1954 ACS 75, p. 52, Eff. May 2, 1973.

R 390.1432 Fees.

Rule 32. (1) The department shall charge a student fee of 1% of the loan amount approved. This fee shall be levied upon the student when the interim note is signed and the guaranteed loan is disbursed. The lender shall collect the fee and forward it to the department after disbursement of the loan.

(2) The student fee is refundable only if a borrower returns the full loan amount to the lender within 10 days of disbursement.

History: 1954 ACS 75, p. 52, Eff. May 2, 1973; 1954 ACS 81, p. 44, Eff. Oct. 31, 1974; 1954 ACS 87, p. 42, Eff. June 3, 1976.

R 390.1433 Loan amounts.

Rule 33. (1) The maximum amount, exclusive of interest, for which a full-time undergraduate higher education student or a vocational school student may apply is $2,500.00 for a single academic year.

(2) The maximum amount, exclusive of interest, for which a full-time graduate or professional level student may apply is $2,500.00 for a single academic year.

(3) A half-time undergraduate or vocational school student during an academic year is eligible for a total maximum of $2,500.00. A half-time graduate or professional level student during an academic year is eligible for a total maximum of $2,500.00. The maximum amount which may be approved on a single application may not exceed ½ of the amount for which the student is eligible to receive in an academic year.

(4) The maximum total amount for which a student may apply in an academic year in full-time status, less than full-time but not less than half-time status, or a combination of full-time and not less than half-time status, may not exceed $2,500.00.

(5) The aggregate insured unpaid principal of all loans made to an undergraduate or vocational school student under state and private nonprofit student loan insurance programs, guaranteed student loan programs, federal loan insurance program or direct state loan programs, eligible for federal interest benefits shall not exceed $7,500.00 at any time.

(6) The insured unpaid principal of all loans made to a graduate or professional level student under state and private nonprofit student loan insurance programs, guaranteed student loan programs, federal loan insurance program or direct state loan programs, eligible for federal interest benefits shall not exceed $10,000.00 at any time, including loans received as undergraduate or vocational school student.

(7) The department shall authorize an eligible student borrower to obtain guaranteed loans for at least 6 academic years of study, except that a student borrower may not receive guaranteed loans which exceed the maximum loan amount for any single academic year or the cumulative maximum.

(8) A borrower transferring from a higher education school to a vocational school or from a vocational school to a higher education school is considered to have the class standing assigned by the school to which he transfers. Previous loans shall be considered only to the extent that they contribute to the aggregate maximum.

History: 1954 ACS 75, p. 52, Eff. May 2, 1973; 1954 ACS 81, p. 44, Eff. Oct. 31, 1974; 1954 ACS 87, p. 43, Eff. June 3, 1976.

R 390.1434 Interim note maturity dates.

Rule 34. (1) An interim note maturity date shall be not less than 9 nor more than 12 months after the graduation date, the anticipated date of completion of a vocational or technical training program, or termination of at least half-time study at an eligible institution, whichever date occurs first.

(2) In case of a correspondence student, the interim note maturity date shall not be earlier than 9 months nor later than 1 year after expiration of a 90-day period following the student borrower's failure to submit a required assignment or the expiration of a 90-day period following the stated normal time for completion of the program.

History: 1954 ACS 75, p. 53, Eff. May 2, 1973

R 390.1435 Payout note maturity dates.

Rule 35. A payout note maturity date shall be not more than 10 years after the date of execution of the payout note nor more than 15 years after the date of execution of the first outstanding note, whichever is earlier, except that periods of deferment of payment as described in R 390.1456(1) and (2) shall not be included in the 10-year or 15-year repayment period limitations. The minimum maturity date shall be not less than 5 years after the date of execution of the payout note, if such maturity date does not exceed the 15-year limitation and if the total of all payments to be made by the borrower during any year of a repayment period with respect to all student loans which are common to the federal higher education act of 1965, as amended, is not less than $360.00 or the balance of all such loans, together with interest thereon payable by the borrower, whichever is the lesser amount.

History: 1954 ACS 75, p. 53, Eff. May 2, 1973; 1954 ACS 81, p. 44, Eff. Oct. 31, 1974.

R 390.1436 Disbursement of loan proceeds.

Rule 36. (1) The department shall not require an eligible lender to loan funds to any applicant.

(2) Disbursement of loan proceeds by a participating lender shall occur at times and in amounts as the lender and student borrower agree best meet the student's needs, except that disbursement shall not be made more than 2 weeks before the date the borrower requires all or part of the loan funds to meet his educational expenses.

History: 1954 ACS 75, p. 53, Eff. May 2, 1973.

R 390.1437 Use of loan proceeds.

Rule 37. (1) Loan funds shall be used to pay only those obligations which are direct educational expenses such as tuition, fees and books, and for room and board. Other educational expenses that may be included are justifiable travel and personal expenses. The school financial aid officer shall be the primary determiner of reasonable educational expenses, subject to review by the department.

(2) Department guaranteed loans shall not be used to retire debts incurred before the academic year covered by the application.

(3) The student shall attest to or sign in the presence of a notary public a statement that the loan proceeds will not be used for any purpose other than payment of educational expenses at the eligible institution listed in the application for the academic year covered by the application.

(4) If the department determines that ownership of an automobile is necessary for transportation to school or for part-time employment, automobile payments may be included under travel expenses in addition to reasonable amounts for automobile operation.

(5) The eligible lender may require a brief summary to be attached to the application from the student when more than average expenses are involved.

(6) The same procedures apply to a married student as to an unmarried student. Normal additional family living costs of a married student may be considered by a lender in determining the amount of a loan. The eligible lender may require an itemization of estimated income and expenses of a married student.

History: 1954 ACS 75, p. 53, Eff. May 2, 1973; 1954 ACS 81, p. 45, Eff. Oct. 31, 1974.

R 390.1438 Loan purchases.

Rule 38. A guaranteed loan may be purchased by another participating lender and reported on forms provided by the department. Notice of a merger of

financial institutions on forms provided by the department are sufficient to enable the United States office of education and the department to make proper loan changes.

History: 1954 ACS 75, p. 53, Eff. May 2, 1973.

PART 3. INTEREST ON LOANS

R 390.1441 Interest benefits.

Rule 41. (1) A borrower who obtained a loan after November 7, 1965, may be eligible for federal interest payments on his behalf if he meets the eligibility requirements set forth in the higher education act of 1965, as amended, and detailed in regulations promulgated by the United States office of education by means of regulations published in the Federal Register.

(2) A student loan disbursed before November 8, 1965, is not eligible for federal interest payment. Interest accruing on such an interim note shall be deferred during the interim note period and made a part of the payout note principal.

(3) For a loan disbursed before November 8, 1965, payment of 3% simple interest on an accrued interim note shall be made by the department if the borrower has graduated or completed his originally intended course of study and has signed his payout note. The borrower shall pay the entire 6% simple interest during the repayment period.

History: 1954 ACS 75, p. 53, Eff. May 2, 1973; 1954 ACS 81, p. 45, Eff. Oct. 31, 1974; 1954 ACS 87, p. 43, Eff. June 3, 1976.

R 390.1442 Interest rates and payment during interim note periods.

Rule 42. (1) The interest rate on a loan disbursed on or after November 8, 1965, may not exceed the maximum rate as determined by federal law or regulations. The maximum rate permitted is exclusive of any allowable fee which may be charged to the student borrower.

(2) In case of a student who is not eligible for, or who elects not to participate in, the federal interest provisions of the loan program, the interest payment to the lender may be:

(a) Deferred during the interim note period and paid separately by the student at the time the payout note is signed.

(b) Paid by the borrower in amounts and at times as if the note were eligible for federal interest payment.

History: 1954 ACS 75, p. 54, Eff. May 2, 1973; 1954 ACS 87, p. 43, Eff. June 3, 1976.

R 390.1443 Interest rates and payment during payout note periods.

Rule 43. (1) A loan not eligible for federal interest payment during interim status is not eligible during payout status.

(2) The maximum interest charge on a payout note for a loan disbursed before November 8, 1965 is 6% simple interest. The borrower shall pay the full interest charge.

History: 1954 ACS 75, p. 54, Eff. May 2, 1973; 1954 ACS 87, p. 44, Eff. June 3, 1976.

R 390.1445 Termination of federal government's obligation to pay interest.

Rule 45. (1) If the repayment period has not begun, federal interest payment will continue no longer than 120 days after the lender has been notified of a borrower's death or official determination of total and permanent disability.

(2) If the loan was disbursed on or after December 15, 1968, the federal government's obligation to pay interest will terminate at the conclusion of the grace period except for periods of authorized deferment. See R 390.1455(1).

(3) If the repayment period has begun or should have begun, interest payment will continue no longer than 120 days after failure to receive a regularly scheduled monthly installment payment, 180 days after failure to receive an installment payment scheduled less frequently than monthly, or 120 days after the borrower has failed to comply with the terms of the note requiring conversion to repayment status.

(4) The federal government's obligation to pay interest will terminate upon default because of bankruptcy or delinquency, or upon determination of death or total and permanent disability of a borrower.

History: 1954 ACS 75, p. 54, Eff. May 2, 1973.

PART 4. PAYMENTS, EXTENSIONS, AND DEFERMENTS

R 390.1451 Repayment.

Rule 51. (1) A student borrowing under the guaranteed loan program shall arrange on or before the interim note maturity date for repayment, extension of the maturity date or deferment of payment.

(2) The interim note and the payout note may be paid in full or in part at any time without penalty to the borrower.

(3) A student shall have the interim note maturity date accelerated when his studies are reduced to less than a half-time study load before graduation or anticipated completion of study. Repayment of the principal amount of an accelerated loan shall begin not earlier than 9 months or later than 1 year after the student ceases to carry at least ½ the normal full-time academic workload as determined by the eligible institution, or the student graduates or completes his course of study.

History: 1954 ACS 75, p. 55, Eff. May 2, 1973.

R 390.1452 Advancing interim note maturities.

Rule 52. (1) When a student transfers to an institution not approved as an eligible institution, the interim note due date shall be advanced to 9 months after the date of termination of enrollment at the eligible institution.

(2) For procedure when a student transfers to an eligible institution, see R 390.1417.

(3) When a student terminates his studies at an eligible institution before the anticipated graduation date or anticipated completion date of his training program, the interim note maturity date shall be advanced to 9 months after the date of termination of enrollment.

(4) When a student, enrolled in an eligible institution offering only correspondence programs of study, fails to submit a required assignment within 90 days after the date the assignment was due, the interim note maturity date shall be advanced to 12 months after the date the assignment was due.

History: 1954 ACS 75, p. 55, Eff. May 2, 1973.

R 390.1453 Extension of maturity dates.

Rule 53. (1) Extension of an interim note maturity date to a maximum of 12 months from the date of graduation or termination of studies at an eligible institution is permissible if prior approval of the extension is granted by the department.

(2) The repayment period of a payout note may be extended by rewriting the payout note. The repayment period may be made to conform with the provisions of the payout note maturity dates as stated in R 390.1435.

(3) Further extensions may be warranted for unusual circumstances. Forbearance for the benefit of the student borrower is recognized and appropriate extensions may be granted upon approval by the department.

History: 1954 ACS 75, p. 55, Eff. May 2, 1973.

R 390.1455 Deferment of payments; eligibility.

Rule 55. (1) A deferment of payment on principal shall be approved by the department and payment of interest, on loans eligible for federal interest benefits at disbursement, shall be made by the United States office of education.

(2) On loans eligible for federal interest payment under the $15,000.00 adjusted family income provision or which would have been eligible except that the adjusted family income was $15,000.00 or more, periodic installments of principal need not be paid at the option of the lender and interest will be paid by the federal government if the borrower was eligible for federal interest payment at the time of loan disbursement, if the borrower is on (a) active duty in the armed forces of the United States, (b) a volunteer under the peace corps act, (c) a full-time volunteer under Title VIII of the economic opportunity act of 1964 (VISTA), or (d) returned to full-time study at an eligible institution. Such service or study shall occur on or after December 15, 1968.

(3) On loans approved on applications received by the department after February 28, 1973, a deferment shall be available to each borrower who requests it without the lenders option to decline the request.

(4) Deferment of a principal payment only is available to a borrower returning to an eligible institution on less than full-time but at least half-time study if the lender approves the deferment. Such a borrower shall not become eligible for full interest benefits.

(5) A deferment of principal and interest payments may be extended to a borrower not eligible for federal interest benefits. Interest will continue to accrue and shall be payable by the borrower either during the principal payment deferment or upon termination of the deferment period, at the option of the lender.

History: 1954 ACS 75, p. 55, Eff. May 2, 1973; 1954 ACS 81, p. 45, Eff. Oct. 31, 1974.

R 390.1456 Deferment of payments; periods.

Rule 56. (1) The period of deferment for a student on active duty in the armed forces of the United States, or a volunteer in the peace corps or VISTA shall not be included in the 10-year or 15-year repayment period limitations in R 390.1435. Deferred payments shall be resumed and full interest benefits shall cease immediately upon termination of the deferment period.

(2) A deferment of principal shall be approved by the department and payment of interest, on loans eligible for federal interest benefits at disbursement, shall be made by the United States office of education to the end of the full term of the borrower's enlistment in the armed forces, peace corps or VISTA, or for a period of 3 years, whichever occurs first.

(3) A period of deferment shall begin with the expiration of the grace period.

History: 1954 ACS 75, p. 56, Eff. May 2, 1973.

R 390.1457 Deferment of payments; effect.

Rule 57. (1) A loan on a reduced interest benefit payable by the federal government may be returned by the lender to a full interest benefit during a period of deferment, even if a principal payment is being made by the borrower.

(2) Interest shall continue to accrue and become a part of the new payout note principal on a loan granted before November 8, 1965. A loan granted on or after November 8, 1965, and not subject to federal interest benefits, shall accrue interest which shall be payable by the borrower periodically.

(3) A loan in payout status may be returned to interim note status without grace period to facilitate full federal interest payment during authorized periods of deferment of principal payment. An interim note written to convert a payout note to interim note status shall bear the same rate of interest as the payout note or a lower rate as determined by the lender. Principal balance shall be determined at the time loan is returned to interim balance and shall be recorded for interest billing purposes. Rule of 78's may be used to determine outstanding balance. The rule of 78's is the method commonly used by banking establishments to determine a payoff amount when a loan is paid in full prior to the maturity date and repayment interest has been added to the loan principal. A new payout note shall be prepared when the deferment period is ended.

History: 1954 ACS 75, p. 56, Eff. May 2, 1973; 1954 ACS 81, p. 45, Eff. Oct. 31, 1974.

PART 5. DEFAULTED LOANS

R 390.1461 Death or permanent disability of student borrowers.

Rule 61. (1) If a student borrower dies or becomes permanently and totally disabled, his liability for a loan is discharged.

(2) The department, upon verification or information provided, shall proceed to purchase the borrower's note or notes.

(3) A claim for payment shall be filed immediately upon notice of the death or disability and shall be paid immediately by the department.

History: 1954 ACS 75, p. 56, Eff. May 2, 1973.

R 390.1462 Reimbursement to lending institutions.

Rule 62. (1) The department shall reimburse the lending institution 100% of unpaid principal and interest up to the date of death or determination of permanent and total disability of a student borrower on loans disbursed before November 8, 1965.

(2) The department shall reimburse the lending institution 100% of unpaid principal as of the date of death or determination of permanent and total disability of a student borrower on loans disbursed on or after November 8, 1965.

(3) The department shall pay to the lending institution interest due from and unpaid by a student borrower up to the date the lending institution files the claim with the department, subject to the following limitations:

(a) If the repayment period has not begun, the interest claim shall not exceed a period of 120 days after the date the lender is notified of a student borrower's death or the determination of total and permanent disability.

(b) If the repayment period has begun or should have begun, the interest claim shall not exceed a period of 120 days after failure to receive a regularly scheduled monthly installment payment or after the scheduled date for conversion to repayment status.

(c) If installment payments are scheduled less frequently than monthly, the interest limitation period shall be 180 days after failure to receive a regularly scheduled installment payment.

(4) Payment of interest shall not be made if a statement of adjusted family income is not filed with the department.

(5) Reimbursement of loans disbursed on or after December 15, 1968, shall include payment of any late charges due and unpaid by the borrower.

History: 1954 ACS 75, p. 56, Eff. May 2, 1973.

R 390.1463 Defaults by bankruptcy; filing and content of claims.

Rule 63. (1) A claim may be filed immediately upon notice of filing of the bankruptcy petition and is eligible for immediate payment.

(2) A claim shall include all notices to the lender from the court, including notice of first meeting of creditors.

(3) A claim shall include documented evidence substantiating the amount of unpaid principal balance claimed and the amount of interest due from the borrower, and the dates involving interest amounts.

(4) The department may request from the court a copy of the schedule of creditors holding securities and creditors whose claims are unsecured and a summary of debts and assets of the bankrupt borrower, and may file a claim in the name of the department with the bankruptcy court in the amount paid to the lender plus interest due and unpaid by the borrower to date of the bankruptcy.

History: 1954 ACS 75, p. 57, Eff. May 2, 1973.

R 390.1465 Defaults by delinquency; filing and content of claims.

Rule 65. (1) A claim may be filed within 90 to 120 days after either termination of the eligible status of the borrower on an interim note not otherwise satisfactorily acted upon, or the date of the last unpaid scheduled monthly payment on a payout note.

(2) The filing period shall be 150 to 180 days for loans on a payout note status with scheduled payments less frequent than monthly and for loans in default because of interest charges due from, billed to, and unpaid by the borrower. The filing period shall commence with the date of the last unpaid scheduled payment or interest billing to the borrower.

(3) A claim shall include documented evidence substantiating the amount of unpaid principal balance claimed and the amount of interest due from the borrower, and the dates involving interest amounts.

(4) A claim caused by a delinquency in executing a payout note with scheduled payments or in payment of billed interest shall include evidence of notice by either the eligible lender or the department to the last known address of the borrower. The borrower shall be informed that, in absence of an executed payout note or a reason for eligible deferment of principal or interest acceptable to the eligible lender and to the department, the eligible lender will declare the loan in default and the borrower will not be eligible for further federal interest benefits.

(5) A delinquency claim is eligible for payment at the expiration of the 120 to 180-day default period.

History: 1954 ACS 75, p. 57, Eff. May 2, 1973.

R 390.1466 Reimbursement of lending institutions and assignment of notes.

Rule 66. (1) The department shall reimburse the eligible lending institution 100% of the unpaid principal balance as of the date a borrower is adjudicated a bankrupt.

(2) The department shall reimburse the eligible lending institution 100% of the unpaid principal balance of a loan declared in default by reason of delinquency after determining eligibility for reimbursement.

(3) Upon receipt of payment from the department for purchase of a note, an eligible lender shall assign all of its rights in the note to the department and send it promptly by certified or registered mail to the department.

History: 1954 ACS 75, p. 57, Eff. May 2, 1973.

R 390.1467 Guaranty fund.

Rule 67. (1) The department shall hold moneys from private contributions, deposits by participating institutions, appropriations from the state and advances from the federal government funds which are used to provide loan insurance and guaranty of 100% of unpaid principal balances of defaulted loans.

(2) The department shall hold, as a capital reserve, cash or marketable securities having a market value equal to at least 10% of the aggregate amount of unpaid principal of all approved notes guaranteed by the department, exclusive of that portion reinsured or guaranteed by the United States, or an agency, department or instrumentality thereof.

History: 1954 ACS 75, p. 57, Eff. May 2, 1973.

R 390.1468 Guarantees.

Rule 68. A guarantee authorized by a letter of notification is valid until cancelled by a lender, student, or the department.

History: 1954 ACS 75, p. 58, Eff. May 2, 1973; 1954 ACS 81, p. 46, Eff. Oct. 31, 1974.

PART 6. FORBEARANCE

R 390.1471 Agreements and approval.

Rule 71. These rules do not preclude a forbearance for the benefit of a student borrower agreed upon by the parties to a guaranteed loan and approved by the department.

History: 1954 ACS 75, p. 58, Eff. May 2, 1973.

LEGISLATIVE MERIT AWARD PROGRAM

(By authority conferred on the higher education assistance authority by section 7 of Act No. 228 of the Public Acts of 1976, being §390.1307 of the Michigan Compiled Laws)

R 390.1501 Definitions.

Rule 1. As used in these rules:

(a) "Authority" means the Michigan higher education assistance authority.

(b) "Award" means a legislative merit award.

(c) "Postsecondary institution" means a postsecondary institution listed in the publication entitled "Basic Educational Opportunity Grant Directory of Eligible Postsecondary Institutions," or an institution otherwise approved by the state board of education.

History: 1954 ACS 92, p. 38, Eff. Sept. 8, 1977.

R 390.1502 Eligibility.

Rule 2. A person shall be eligible for a scholarship award if the person meets the following qualifications:

(a) Is a resident of this state at the time of graduation from high school.

(b) Has not enrolled in a postsecondary institution at the time of the scholarship examination.

(c) Enrolls in a recognized postsecondary educational institution within 4 years after graduation from high school.

History: 1954 ACS 92, p. 38, Eff. Sept. 8, 1977.

R 390.1503 Consideration of applicant for award.

Rule 3. An applicant shall be considered for an award after taking the scholarship examination designated by the authority, on a date specified by the authority. After authorizing release of test scores to the authority, an applicant shall be considered with all other award applicants who graduate at the end of the applicant's senior academic year. Midyear awards shall not be granted.

History: 1954 ACS 92, p. 39, Eff. Sept. 8, 1977.

R 390.1504 Effect of applicant's financial resources on eligibility for award.

Rule 4. (1) Financial resources of an applicant, or of an applicant's family, shall not be used to determine award eligibility.

(2) Other financial aid awards received by an applicant shall not affect the applicant's eligibility for a legislative merit award.

History: 1954 ACS 92, p. 39, Eff. Sept. 8, 1977.

R 390.1505 Certification of postsecondary institution enrollment and recipient's intent.

Rule 5. A recipient shall receive the award when certification, in writing, is received by the authority that enrollment in a named postsecondary institution has been accomplished, and that the recipient's intent is to use the award exclusively for educational expenses at the specified institution.

History: 1954 ACS 92, p. 39, Eff. Sept. 8, 1977.

R 390.1506 Payment of award.

Rule 6. (1) Award moneys shall be forwarded to the specified postsecondary institution by the authority for disbursement to the award recipient.

(2) Payment of an award shall be made, at the option of the recipient, in a single payment at the time of enrollment in a postsecondary institution, or in periodic payments during the recipient's attendance at the institution. A payment shall not be less than 25% of the total award granted the recipient and shall not exceed the educational cost for the recipient's enrollment period as determined by the authority.

History: 1954 ACS 92, p. 39, Eff. Sept. 8, 1977.

R 390.1507 Transfer to another postsecondary institution.

Rule 7. An award recipient receiving award moneys in periodic payments of not less than 25% of the total award may elect to transfer to another postsecondary institution, and may use the unused portion of the award at the second institution.

History: 1954 ACS 92, p. 39, Eff. Sept. 8, 1977.

R 390.1508 Refund of award moneys.

Rule 8. (1) An award recipient leaving a postsecondary institution prior to full utilization of an award shall waive any refund rights. Any unused award moneys, not to exceed payment for the enrollment period, shall be refunded by the institution to the authority. However, a recipient may opt to use any refunded award money during subsequent enrollment periods.

(2) An award recipient who enrolls in, but fails to attend, a postsecondary institution after funds are advanced, is legally bound by the acceptance contract to refund to the authority the full amount of the payment advanced for that enrollment period.

History: 1954 ACS 92, p. 39, Eff. Sept. 8, 1977.

R 390.1509 Renewal awards.

Rule 9. An award recipient who fails to utilize a full award during the first academic year of enrollment in a postsecondary institution shall indicate intent to enroll the following year by making an award renewal application to the authority. Any renewal award payment for subsequent academic years shall be mailed by the authority to the eligible postsecondary institution pursuant to the award recipient's request.

History: 1954 ACS 92, p. 39, Eff. Sept. 8, 1977.

R 390.1510 Acceptance contract between award recipient and authority.

Rule 10. An acceptance contract shall be entered into by an eligible award recipient and the authority prior to release of an award. The contract shall specify conditions upon which the award is granted.

History: 1954 ACS 92, p. 39, Eff. Sept. 8, 1977.

R 390.1511 Amount and number of awards.

Rule 11. Awards of $1,000.00, up to a maximum of 1,000 awards, shall be granted annually by the authority according to the order of descending test scores of applicants. The number of awards to be granted each year shall be determined by the amount of moneys appropriated by the legislature for the program. If inclusion of the lowest eligible score results in more awards than allowable for a particular year, a drawing shall be utilized as a tiebreaker.

History: 1954 ACS 92, p. 39, Eff. Sept. 8, 1977.

R 390.1512 Furnishing roster of award recipients; certification of enrolled award recipients.

Rule 12. The authority shall furnish a roster of eligible award recipients, who have indicated intent to enroll, to each postsecondary institution which has accepted award recipients for enrollment. The postsecondary institutions shall certify to the authority, within 30 days, the names of the eligible award recipients who have enrolled as students.

History: 1954 ACS 92, p. 40, Eff. Sept. 8, 1977.

HIGHER EDUCATION STUDENT LOAN AUTHORITY

DIRECT STUDENT LOANS

(By authority conferred on the Michigan higher education student loan authority by sections 4 and 12 of Act No. 222 of the Public Acts of 1975, being §§390.1154 and 390.1162 of the Michigan Compiled Laws)

R 390.1601 Definitions; A to E.

Rule 1. As used in these rules:

(a) "Academic year" means a period of time during which a student borrower progresses from 1 level of class standing to the next higher level.

(b) "Authority" means the Michigan higher education student loan authority created by section 3 of Act No. 222 of the Public Acts of 1975, being §390.1153 of the Michigan Compiled Laws.

(c) "Certificate of refusal" means a form provided by the authority on which a private lending institution certifies that it has refused or otherwise been unable to make a guaranteed loan to a specified student applicant.

(d) "Commissioner" means the United States commissioner of education, or a designee of the commissioner.

(e) "Educational expense" means the estimated cost for a student to pursue an education program for the period of the loan specified in the application.

(f) "Educational need" or "financial need" means the amount of money needed for educational expenses, less any appropriate family contribution and financial aid from another source, as determined by a uniformly applied analysis, and as required by federal interest benefits.

(g) "Eligible institution" means an institution of higher education; a vocational school; or, with respect to students who are citizens of the United States, an institution outside the United States comparable to an institution of higher education or to a vocational school approved by the state board of education and by the United States commissioner of education for purposes of the guaranteed loan program.

(h) "Eligible loan" means a student loan guaranteed by the guarantee agency and for which the interest charge is payable by the federal government as prescribed by the higher education act of 1965, as amended, being 20 U.S.C. §1001 et seq.

(i) "Eligible student" means a resident of Michigan who meets the criteria for eligibility of the authority and the guarantee agency.

History: 1954 ACS 92, p. 40, Eff. July 6, 1977.

R 390.1602 Definitions; F to S.

Rule 2. As used in these rules:

(a) "Forbearance" means reduction, extension, or delay of loan repayment when scheduled payments place an undue burden on a student borrower and result in a default.

(b) "Guarantee agency" means the Michigan higher education assistance authority.

(c) "Participating institution" means an eligible institution that has entered into an agreement with the authority.

(d) "Resident of this state" means a person who is dependent upon the support of parents or guardians who reside in and are legal residents of Michigan at the time of application for a loan, or who is independent of the support of parents or guardians and has resided in Michigan for not less than 12 consecutive months immediately prior to application for a direct student loan.

(e) "Statement of student borrower responsibilities and options" means a form provided by the authority, which lists the responsibilities of a student obtaining a loan and the options available to the student as regards repayment of a loan.

History: 1954 ACS 92, p. 40, Eff. July 6, 1977.

R 390.1603 Rights of applicants.

Rule 3. Direct student loans are available to all eligible students without regard to race, color, sex, creed, or national origin.

History: 1954 ACS 92, p. 41, Eff. July 6, 1977.

R 390.1604 Documents and records.

Rule 4. (1) The authority shall distribute documents used in the direct student loan program, and shall be responsible for their uniform use.

(2) The authority shall maintain records necessary for the administration of the direct student loan program, and as required by the guarantee agency and the commissioner.

(3) A participating institution shall maintain records necessary to support the terms of agreement with the authority.

History: 1954 ACS 92, p. 41, Eff. July 6, 1977.

R 390.1605 Eligibility of student applicants.

Rule 5. A person eligible for a direct student loan shall:

(a) Be a Michigan resident.

(b) Complete all application forms required and supplied by the authority, including:

(i) A direct loan program supplementary application.

(ii) Certification of an unsuccessful attempt to secure a guaranteed loan from the financial institution where the student or the parents or guardians of the student maintain an account relationship, if the student has not received a prior loan in the Michigan guaranteed student loan program.

(iii) A statement of responsibilities and options as a student borrower.

(c) Provide information necessary to assure qualification for federal interest benefits.

(d) Meet all requirements of the guarantee agency.

History: 1954 ACS 92, p. 41, Eff. July 6, 1977.

R 390.1606 Procedures; loan denial.

Rule 6. (1) The authority shall develop and maintain procedures necessary to carry out applicable provisions of Title IV, part B, of the higher education act of 1965, as amended, and the regulations therefor, and as may be required in the exercise of reasonable care and diligence in the making and collection of loans. If the authority determines that there is sufficient evidence to indicate that the applicant will not exercise reasonable diligence in completing repayment of a loan, the loan request may be denied. In determining that sufficient evidence for denial exists, the authority shall use such ethical methods and practices as are acceptable and proven in the collection of credit information in the commercial banking community.

(2) Evidence of an applicant's unreasonable diligence may include:

(a) Defaults on previous debts.

(b) Bankruptcy.

(c) Repossessions of tangible properties for reason of nonpayment.

(d) Excessive and existing indebtedness beyond present and anticipated means of payment.

(e) Incarceration for a felony.

(f) Physical or mental disability in a degree that employment and repayment may not reasonably be expected.

(3) If a loan application is denied, the applicant shall be advised, in writing, by the authority of the reason for the denial.

History: 1954 ACS 92, p. 41, Eff. July 6, 1977.

R 390.1607 Amount and terms of loan.

Rule 7. (1) The maximum loan for an academic year shall be the least of the 3 following amounts:

(a) The maximum prescribed by the guarantee agency.

(b) The amount of educational need as certified by the designated financial aid officer in the participating institution.

(c) One-half the total educational expenses for the period specified in the loan application.

(2) The maximum aggregate outstanding principal balance of guaranteed student loans shall be the maximum as prescribed by the guarantee agency.

(3) The minimum loan to a student for any academic year shall be $100.00.

(4) The authority, after consultation with the designated financial aid officer in the participating institution, may alter the terms and amounts in subrules (1) to (3) if the altered terms and the amounts are not in violation of the regulations of the guarantee agency and the commissioner.

(5) Each loan shall be evidenced by a promissory note and shall bear interest at a rate designated by the authority not exceeding the maximum rate prescribed by the higher education act of 1965, as amended.

(6) Terms and conditions for repayment of a student loan shall be established by the authority in accordance with regulations of the guarantee agency.

History: 1954 ACS 92, p. 41, Eff. July 6, 1977.

R 390.1608 Guarantee requirement.

Rule 8. All loans initiated by the authority shall be eligible for guarantee by the guarantee agency.

History: 1954 ACS 92, p. 42, Eff. July 6, 1977.

R 390.1609 Fund disbursement.

Rule 9. (1) The principal amount of an approved loan shall be payable jointly to the student borrower and the institution in approximately equal installments within the academic year.

(2) The loan payment shall be directed to the designated institution official, as defined in the institutional participation agreement, for delivery to the student.

(3) Disbursement shall not be made to the student borrower more than 2 weeks before the beginning of each school period for which the loan is made.

(4) The authority shall deduct from the initial payment any fee due the guarantee agency, and pay to the guarantee agency on behalf of the student borrower.

(5) A loan shall be declared due and payable immediately if a student borrower does not attend school for the academic year for which the loan is disbursed.

History: 1954 ACS 92, p. 42, Eff. July 6, 1977.

R 390.1610 Interest benefit requirement.

Rule 10. All loans initiated by the authority shall be eligible for federal interest benefits as prescribed by the higher education act of 1965, as amended.

History: 1954 ACS 92, p. 42, Eff. July 6, 1977.

R 390.1611 Delegation of authority.

Rule 11. (1) The executive director of the higher education student loan authority shall have authority and responsibility for administration of the direct student loan program as prescribed in these rules, Michigan statutes, and applicable federal laws and regulations.

(2) The executive director's authority shall include, but not be limited to:

(a) Issuance of public information relative to the program.

(b) Design of necessary application and other regulatory forms.

(c) Prescription of application procedures.

(d) Prescription of procedures and terms for collection and repayment of loans, including the purchase of other individual student guaranteed loans for consolidation purposes.

STATE BOARD OF CONTROL FOR VOCATIONAL EDUCATION

VOCATIONAL REHABILITATION

(By authority of Act No. 211 of the Public Acts of 1921, being §395.51 et seq. of the Michigan Compiled Laws)

PART 1. ELIGIBILITY FOR REHABILITATION SERVICE

R 395.1 Residence.

Rule 1. Any disabled person living in Michigan shall be considered for vocational rehabilitation service. When a disabled person who has not lived in the state longer than 6 months applies for service, it shall be the responsibility of the rehabilitation field agent to ascertain through a complete investigation the intention of the individual to become a resident of the state of Michigan.

History: 1944 ACS 4, p. 32; 1954 AC, p. 4101.
Editor's note: For former related provisions, see 1944 AC, pp. 1463-1528.

R 395.2 Rescinded.

History: 1944 ACS 4, p. 32; 1954 AC, p. 4101; rescinded 1954 ACS 24, p. 25, Eff. Nov. 12, 1960.

R 395.3 Economic circumstances of individual.

Rule 3. (1) Consideration shall be given the financial responsibilities of each disabled person furnished a cost service. Basically every disabled person or his family shall be encouraged to provide for the costs of the individual program insofar as possible. All direct cost services with the exception of training, diagnostic examinations, and specialized consultation services shall be given on the basis of the degree to which the individual may participate financially.

(2) Maintenance:

(a) Assistance of this type will be provided for relatively short periods of time. Generally, it will not be extended beyond a year.

(b) No maintenance will be available for the personal needs of the dependents of the disabled person served.

(c) A person deemed eligible for maintenance aid may possess a homestead or a farmstead and additional essential property. It is not the intent of the financial investigation to jeopardize the basic economic security of the client or his family.

(d) The disabled person, preliminary to the granting of maintenance, will be expected to secure necessary aid from the family group upon which he is dependent and to use for his living costs any income from such sources as pensions, insurance benefits, and compensation.

(3) Appliances, physical restoration, transportation, placement equipment, and other services:

(a) With the exception of training, diagnostic examinations, and specialized consultation services, all disabled persons shall be required to pay for cost services insofar as they are able.

(b) The same criteria of determining financial ability as listed under maintenance shall be applicable.

History: 1944 ACS 4, p. 32; 1954 AC, p. 4101; 1954 ACS 24, p. 25, Eff. Nov. 12, 1960.

R 395.4 Informational background.

Rule 4. (1) Case data shall be secured from reliable and competent sources such as interviews or reports from teachers, employers, relatives, friends, and cooperating agencies. These data shall be supplemented by field agent interviews with the disabled person, some of which are home interviews.

(2) Material shall be assembled pertaining to the disabled person covering physical, mental, educational, personality, occupational experience, aptitude, and social factors.

History: 1944 ACS 4, p. 32; 1954 AC, p. 4101.

R 395.5 Diagnostic procedures.

Rule 5. (1) Competent medical diagnosis shall be obtained in every case, and where reasonably necessary to a decision in doubtful cases, the problem shall be referred to a recognized specialist in the specific field indicated by the medical diagnosis. Such diagnosis shall undertake to establish the general health condition and history of the individual, including mental conditions by a competent psychiatrist when the need thereof is indicated. Any abnormal condition, organic or functional, shall be analyzed against this background and a prognosis made as to its future course and effects considered in relation to its susceptibility to treatment. The diagnosis shall be accompanied by recommendations as to the means and method of restoration.

(2) Intelligence, aptitude, and interest tests may be used in individual cases to determine feasible employment objectives. These may be secured through established psychological clinics, guidance centers, or administered by those on the staff qualified to do so.

(3) Appliances shall be fitted according to the recommendations of the medical specialist. The actual use of the appliances shall be noted by the medical specialist to guarantee maximum results.

(4) Physical restoration service shall be granted only when the disability has been reasonably static or may become worse if not treated. The physician's prognosis must show the disability will be minimized or removed by treatment or hospitalization. The test of whether this service should be secured or granted is whether the disabled persons will likely become more employable.

(5) Training may be offered only when the disability, interests, and aptitudes indicate the disabled person may improve his vocational level of performance by such training.

History: 1944 ACS 4, p. 33; 1954 AC, p. 4102.

R 395.6 Confidential information.

Rule 6. All information as to personal facts and circumstances given or made available to the state board and obtained by it in the course of administration shall constitute privileged communications and shall be held confidential. The board will restrict the use or disclosure thereof to persons directly connected with the administration of vocational rehabilitation under the plan.

History: 1944 ACS 4, p. 33; 1954 AC, p. 4102.

R 395.7 Determination of eligibility.

Rule 7. The responsibility for the decision as to eligibility shall be delegated to qualified members of the staff and may not be delegated to any other individual or agency.

History: 1944 ACS 4, p. 33; 1954 AC, p. 4102.

R 395.8 No discrimination.

Rule 8. There shall be no discrimination against any applicant because of sex, race, color, or national origin, and there shall be equitable provision of facilities and training of like qualities where separate facilities are required by law for separate population groups.

History: 1944 ACS 4, p. 33; 1954 AC, p. 4102; 1954 ACS 24, p. 25, Eff. Nov. 12, 1960.

PART 2. PROVISION OF REHABILITATION SERVICES

R 395.21 Selection of facilities.

Rule 21. (1) It shall be the policy of the board to use the facilities best suited to the needs of the disabled person. These may be public or private but in all cases are to be fully accredited in their respective fields. The disabled person shall be granted the privilege of choosing the service facilities insofar as feasible. Generally services shall be secured in the state. The only time out of state facilities may be used is when the individual can be served to better advantage. When 2 similar facilities have markedly different costs, the more reasonable facility shall be used.

(2) The principal training agencies used shall be of a varied nature. Colleges, universities, and technical schools; public vocational, commercial, and technical schools of less than college grade; private trade and business schools; correspondence and extension facilities; tutorial and other facilities giving special training; and business and industrial establishments used for employment training shall be used depending upon the individual requirements of the trainee. The board may establish and maintain training facilities as needed.

(3) Physical restoration shall be secured through the services of physicians, physical therapists, occupational therapists, clinics, sanatoria, convalescent homes, and hospitals. These physical restoration facilities are to be duly accredited. The work done in this area shall be coordinated with the efforts of the public health services, crippled children agencies, state and county medical societies, and welfare agencies.

History: 1944 ACS 4, p. 33; 1954 AC, p. 4102.

R 395.22 Counseling and supervision.

Rule 22. Counseling shall be considered to be that service of rehabilitation which provides an appraisal of the disabled person's abilities, limitations, interests, and resources in order to achieve his maximum potentialities. The policies and procedures for counseling and supervision shall require a frequent contact be maintained between the field agent and the disabled person.

History: 1944 ACS 4, p. 34; 1954 AC, p. 4103.

R 395.23 Placement.

Rule 23. Placement shall be recognized as 1 of the essential services of vocational rehabilitation.

History: 1944 ACS 4, p. 34; 1954 AC, p. 4103

R 395.24 Workshops ties.

PART 3. PAYMENT OF SERVICE COSTS

R 395.31 Training.

Rule 31. Training costs shall conform with the usual rates charged by the training agencies. It shall be the policy of the board to pay for training after the service has been approved. Such payments may be made periodically during the period of training. Costs for training on the job shall be computed in terms of the actual costs of such training.

History: 1944 ACS 4, p. 34; 1954 AC, p. 4103; 1954 ACS 24, p. 26, Eff. Nov. 12, 1960.

R 395.32 Professional fees.

Rule 32. Professional fees, costs of medical examination, and corrective surgery or therapeutic treatment shall be consistent with the accepted fee schedule for these services.

History: 1944 ACS 4, p. 34; 1954 AC, p. 4103.

R 395.33 Transportation.

Rule 33. Transportation costs may be provided to and from training, the hospital, the appliance company, or other rehabilitation service agency. These costs shall not exceed the costs established by the department of administration.

History: 1944 ACS 4, p. 34; 1954 AC, p. 4103; 1954 ACS 24, p. 26, Eff. Nov. 12, 1960.

R 395.34 Prosthetic appliances.

Rule 34. Prosthetic appliances will be supplied the disabled person at prices consistent with those fixed for these items. Appliances shall be purchased from accredited appliance dealers.

History: 1944 ACS 4, p. 34; 1954 AC, p. 4103.

R 395.35 Maintenance.

Rule 35. A supplementary amount of maintenance aid may be granted to meet the individual's needs after the resources of the disabled person are computed.

History: 1944 ACS 4, p. 34; 1954 AC, p. 4103; 1954 ACS 24, p. 26, Eff. Nov. 12, 1960.

PART 4. DISABILITY DETERMINATION SERVICE

R 395.41 Disability determinations.

Rule 41. By contractual agreement with the social security administration of the department of health, education and welfare, the board shall provide the determinations on extent of disability and employment incapacity of claimants for disability insurance benefits as provided under the federal social security act. Wherever state procedures shall apply in conducting such disability determinations, these shall be in conformity with the same rules of procedure as pertain to the operations of the general program of vocational rehabilitation under the state board of control for vocational education.

History: 1954 ACS 24, p. 26, Eff. Nov. 12, 1960.

R 395.42 Referrals.

Rule 42. In the process of making disability determinations on applicants for disability insurance benefits, individuals who are believed to have potential for employment through vocational rehabilitation services shall be referred to the vocational rehabilitation program.

REIMBURSED PROGRAMS FOR VOCATIONAL EDUCATION

R 395.101—R 395.152 Rescinded.

History: 1944 ACS 37, pp. 32-50; 1944 ACS 39, pp. 30-46; 1954 AC, pp. 4104-4140; rescinded 1954 ACS 31, pp. 24-44.
Editor's note: For former related provisions, see 1944 AC, pp. 1462-1528 and 1944 ACS 16.

R 395.161—R 395.227 Rescinded.

History: 1954 ACS 31, pp. 24-44, Eff. Aug. 14, 1962; rescinded 1954 ACS 50, p. 26, Eff. May 15, 1967.

REIMBURSED PROGRAMS OF VOCATIONAL-TECHNICAL EDUCATION

(By authority conferred on the state board of education by section 6 of Act No. 149 of the Public Acts of 1919, section 5 of Act No. 312 of the Public Acts of 1957, as amended, Act No. 28 of the Public Acts of 1964 and sections 9 and 302 of Act No. 380 of the Public Acts of 1965, being §§395.6, 388.615, 395.21, 16.109, and 16.402 of the Michigan Compiled Laws)

PART 1. GENERAL PROVISIONS

R 395.231 Local administrators.

Rule 1. (1) Titles of administrators of local educational agencies may be director of vocational education, supervisor or other administrator or consultant.

(2) Local administrators of vocational education shall promote, organize, coordinate, supervise, evaluate, and give general direction to a total comprehensive program of vocational education in accordance with the legal provisions and policies of the state board. They shall be responsible for determining the needs for vocational education in the various occupational areas and the establishment of programs in keeping therewith. They shall be responsible for the preparation of periodic reports.

(3) Local administrators shall have the following qualifications:

(a) They shall be graduates of a recognized college or university with a master's degree and shall have completed vocational education courses in the administration, supervision, and organization of vocational education programs. They shall hold or be eligible to hold a valid Michigan teachers' certificate.

(b) They shall have had at least 3 years of experience in administration and/or teaching in vocational education programs. They shall have had at least 2 years of occupational experience, other than teaching or educational administration. In the case of trade and industry supervisors, they shall have had 3 years of occupational experience, other than teaching or educational administration.

(c) Under certain circumstances, if a candidate does not fully qualify, a competency examination may be arranged. The state board of education, hereinafter referred to as the state board, will determine the adequacy of his combined education and experience as equivalent to the requirements set forth in subdivisions (a) and (b) of this subrule.

History: 1954 ACS 50, p. 26, Eff. May 15, 1967.

R 395.232—R 395.235 Rescinded.

History: 1954 ACS 50, pp. 27, 28, Eff. May 15, 1967; rescinded 1954 ACS 74, p. 69, Eff. Jan. 19, 1973.

R 395.236 Local vocational guidance supervisors and counselors.

Rule 6. (1) Duties of local vocational guidance supervisors and counselors shall be as follows:

(a) He shall provide adequate vocational guidance and counseling designed to enable vocational and potential vocational education students to plan individual programs of vocational preparation.

(b) He shall provide adequate guidance and counseling for students enrolled in and pursuing a program of vocational education.

(c) He shall provide, or assist in providing, adequate job placement services.

(d) He shall carry out, or assist in carrying out, systematic follow-up studies of former vocational education students.

(e) He shall provide such other guidance and counseling services as will assist students in vocational education to profit from their occupational training.

(2) Qualifications shall be as follows:

(a) He shall possess at least a baccalaureate degree with specialization in the field of guidance.

(b) He shall have had at least 2 years of teaching or counseling experience.

(c) Additional wage earning experience in some field other than education is desirable.

History: 1954 ACS 50, p. 28, Eff. May 15, 1967.

PART 2. PROGRAM OF VOCATIONAL INSTRUCTION

R 395.241 Instruction, training, and work experience.

Rule 11. The program of instruction under the vocational educational act of 1963, Public Law 88-210, combines and coordinates related instruction with field, shop, and laboratory training, as well as cooperative work experience of sufficient duration to develop the competencies required in a specific vocational objective.

History: 1954 ACS 50, p. 28, Eff. May 15, 1967.

R 395.242 Persons to be served.

Rule 12. (1) Programs are for persons 14 years or older attending high school full-time who have an occupational objective of record.

(2) Programs are for persons 16 years of age or older who have completed or left high school and are available for full-time study in preparation for entering the labor market. Such instruction may be preparatory or supplementary in nature.

(3) Programs are for persons who have already entered the labor market and who need training or retraining to achieve stability or advancement in employment.

(4) Programs are for persons who have academic, socio-economic, or other handicaps that prevent them from succeeding in the regular vocational programs provided.

History: 1954 ACS 50, p. 28, Eff. May 15, 1967.

R 395.243 Occupations to be served.

Rule 13. Education shall be designed to fit persons for useful or gainful employment in recognized occupations. The scope of such occupational fields may include those occupations for which funds are currently being allotted under the Smith-Hughes and George-Barden acts, business and office occupations, and any other recognized occupations except those generally considered to be professional or as requiring a baccalaureate or higher degree.

History: 1954 ACS 50, p. 28, Eff. May 15, 1967.

R 395.244 Standards and requirements.

Rule 14. (1) Instruction must meet the following criteria:

(a) It is organized and operated under the direction of the state board or a local educational agency responsible for expenditure of public education agency funds for vocational education in the state or community.

Generated for Susan K Kendall (Michigan State University) on 2018-09-05 16:48 GMT / http://hdl.handle.net/2027/mdp.49015002898253

(b) The teachers are employed as public school teachers under the conditions generally applicable to the employment of other public school teachers employed by the state board or local educational agency responsible for vocational education.

(2) Instruction under contract must meet the following criteria:

(a) Whenever any portion of the vocational education program under the state plan is being administered by a public or nonpublic agency or institution other than the state board or local educational agency pursuant to an arrangement made with it by the state board or local educational agency, there shall be a written agreement between the parties of such agreement. Such agreement shall describe the portion of the vocational education program to be administered by such agency or institution and incorporate those standards and requirements set forth in the state plan and prescribed by the state board which are applicable to such portion. Such agreement shall be reviewed annually by the parties concerned.

(b) All written agreements shall include an assurance that federal, state, and local funds allocated to an agency or institution will be used only to cover those additional costs which are necessary to administer that portion of the vocational education program under the state plan which the parties have agreed would be administered by such agency or institution, or to lower the rate of or eliminate tuition, fees, and other charges collected from persons benefiting from such portion of the program or both; and that federal, state, and local funds will not be used to cover those costs which would otherwise be covered by the institution's own resources, thereby diverting those resources to other purposes.

(c) The state board or local educational agency may not enter into any agreement with an agency or institution which collects tuition, fees, and other charges, and which is able to cover with its own resources substantially all the necessary costs of administering that portion of the vocational education program which the state board or local educational agency desires to have carried out by such agency or institution, unless the agency or institution agrees to use federal, state, and local funds allocated to it to cover the cost of reducing the rate or eliminating tuition, fees, and other charges collected from those benefiting from such portion.

(3) Objectives of instruction shall be as follows:

(a) Vocational instruction shall be designed to fit individuals for employment in recognized occupations. Such instruction shall include vocational or technical training or retraining for those preparing to enter a recognized occupation upon the completion of instruction and those who have already entered an occupation, but desire to upgrade or update their occupational skills and knowledge in order to achieve stability or advancement in employment.

(b) Vocational instruction shall be designed only to fit individuals for gainful employment.

(c) All students receiving vocational instruction in preparatory classes will have an occupational objective which is a matter of record. The objective may either be a specific occupation or a cluster of closely related occupations in an occupational field.

(4) Instruction must meet these provisions:

(a) Instruction must be related to the occupation for which the student is being trained and be designed to fit individuals for employment in recognized occupations. It must be particularly suited to the needs of those engaged in or preparing to engage in such occupations. Such instruction shall include classroom instruction and field, shop, laboratory, and cooperative occupational work experience.

(b) Instruction in special classes for persons with special needs will be provided if such individuals have academic, socio-economic, and other handicaps that have

prevented or would prevent them from succeeding in the other vocational education programs and therefore require instruction which is especially designed to enable such individuals to develop competencies adequate for employment in a recognized occupation. Such instruction shall be provided in courses which are an integral part of the vocational program in which the student is enrolled.

(5) Reimbursement for instruction has the following limitations:

(a) Funds will be available for instruction in general education subjects only if such subjects meet conditions as set forth for vocational classes. A program of vocational instruction may be supplemented with such general education subjects as may be necessary to develop a well rounded individual regardless of whether they are eligible for federal financial participation.

(b) Funds will not be available for instruction which is designed to fit individuals for employment in recognized occupations which are generally considered to be professional or requiring a baccalaureate or higher degree. Semi-professional or technical occupations are not excluded for reimbursement.

(c) Funds will not be available for instruction designated by the institution offering it as providing credit leading to a baccalaureate or higher degree; or if offered by an institution which does not grant a baccalaureate degree, is applied for credit toward such a degree as indicated by transfer policies of the degree granting institutions to which students of the offering institution generally transfer.

(6) In establishing, continuing, or terminating a program of vocational instruction, the following shall be considered:

(a) The interests, needs, and abilities of all persons in the community or area who have need for, desire and can benefit from the instruction.

(b) The need and opportunity in the employment market for the occupational skills and knowledge for which instruction is being provided.

(7) Access to instruction will be offered to persons outside the area of the local educational agency according to these criteria:

(a) All individuals residing in the state who are available and qualified to receive instruction will have access to programs being offered. If it is not economically or administratively feasible to provide each type of program in all areas and communities served by a local educational agency, individuals residing in an area served by 1 local educational agency will be permitted to enroll, in accordance with policies and procedures established by the state board or by the local educational agencies involved, in a program of instruction offered by another local educational agency so long as the local educational agency serving the area in which the individual resides does not offer a reasonably comparable type of program, the student is otherwise available and qualified to receive such instruction, and facilities are reasonably available for additional enrollees in the program offered by the receiving local educational agency.

(b) Access to vocational instruction offered within the area served by the state board or local educational agency shall be provided to the extent that facilities are available so that each type of program of vocational instruction offered by the state board will be made available to all individuals residing in the state, and each program of instruction offered by a local educational agency will be made available to all individuals residing in the district or community served by the local educational agency offering such instruction, if such individual is otherwise available and qualified to receive such instruction in accordance with the standards and requirements of the state plan. The fact that an individual resides in a certain attendance area within such district or community shall not preclude his access to a program of instruction available to other individuals residing in other attendance areas within the district or community, if access to a reasonably

comparable program is not otherwise available to him. If a school district is the local educational agency offering vocational instruction, it must agree in writing to accept nonresident individuals if such vocational instruction is not available to such pupils and if such school district has facilities available.

(8) Students will be selected according to these criteria:

(a) Individuals will be admitted for enrollment in classes and provided instruction for each type of occupation or occupational field on the basis of their potential for achieving competence in the occupation or occupational field through such instruction, except that

(b) Individuals will be admitted to and provided instruction in special classes for persons with special needs if such individuals have academic, socio-economic, and other handicaps that have prevented or would prevent them from succeeding in the other vocational education programs and therefore require instruction which is especially designed to enable such individuals to develop competencies adequate for employment in a recognized occupation.

(9) The following standards will be followed to assure soundness and quality of instruction:

(a) The program of instruction must be based on a consideration of the skills and knowledge required in the occupation for which the instruction is being provided, and includes a planned logical sequence of those essentials of education or experience deemed necessary for the individual to meet his occupational objective.

(b) The program of instruction will be developed and conducted in consultation with potential employers and other individuals or groups of individuals having skills in and substantive knowledge of the occupation or occupational field representing the occupational objective.

(c) The program of instruction will include the most up-to-date knowledge and skills necessary for competencies required in the occupation or occupational field in which the individual is being prepared, upgraded, or updated.

(d) The program of instruction will be sufficiently extensive in duration and intensive within a scheduled unit of time to enable the student to develop competencies necessary to fit him for employment in the occupation or occupational field for which he is being trained.

(e) The program of instruction will combine and coordinate related instruction with field, shop, laboratory, cooperative work, or other occupational experience which is appropriate to the vocational objective of the student, is of sufficient duration to develop competencies necessary to fit him for employment in the occupation or occupational field for which he is being trained, and supervised, directed, or coordinated by a person qualified under the state plan.

(10) Related vocational instruction shall be provided for apprentices which is supplemental to their on-the-job training. The term "apprentice" means a worker who is learning a recognized apprenticeable occupation in accordance with a written apprentice training agreement between the apprentice and an individual employer or group of employers which either provides for or makes reference to a document which provides for a given length of planned work experience through employment on the job, supplemented by appropriate related instruction, and other recognized standards and requirements of apprenticeship.

(11) The cooperative program is designed for persons enrolled in a school who, through a cooperative arrangement between the school and employers, receive part-time vocational instruction in the school and on-the-job training through part-time employment. It provides youth with basic competencies in occupations which fit their interests, needs, and abilities. A written cooperative training plan

mutually agreeable to the school and the employer shall set forth the job activities, related subjects, standards of attainment, length of the program, and wages to be paid the student learner. Conditions of employment shall be in conformity with federal, state, and local laws and regulations. At no time shall there be exploitation of the student learner for private gain. The student learner shall be employed for an average of not less than 15 hours per week during the effective time of the individual's program. The school shall have the responsibility of providing coordinating and supervising services during such time. The program is of sufficient duration to develop competencies necessary to prepare the learner for employment. It provides a coordinated instructional program combining supervised part time employment and classroom instruction related to the learner's job. Related vocational instruction in classes limited to the cooperative group shall be scheduled for an average of at least 1 class period per day.

(12) The following facilities, equipment, and materials must be provided:

(a) Classrooms, libraries, shops, laboratories, and other facilities, including instructional equipment, supplies, teaching aids, and other materials will be adequate in supply and quality to meet the standards approved by the state board so that such facilities are adequate to enable those who are to be trained to meet the occupational objective for which the education is intended.

(b) If the state board or local educational agency cannot provide adequate facilities and materials, and such are available in a business or industrial establishment, funds may be used to reimburse the local public educational agency for training programs conducted in private industry when it complies with the training standards and regulations established by the state board. Such instruction shall be under the supervision and administration of a local public educational agency.

(13) The program of instruction will be conducted by qualified teachers and supervisors.

(14) When the activities of vocational education youth organizations complement the vocational instruction offered, such activities will be supervised by persons who are qualified as vocational education teachers or supervisors in the respective vocational fields within the state.

History: 1954 ACS 50, p. 29, Eff. May 15, 1967.

PART 3. ANCILLARY SERVICES AND ACTIVITIES

R 395.251 Vocational guidance and counseling policies and standards.

Rule 21. Policies and standards for local programs of vocational guidance and counseling are as follows:

(a) Local schools operating reimbursed vocational education programs shall cooperate with the state staff in developing and maintaining adequate vocational guidance and counseling services for vocational and potential vocational education students.

(b) Counselors with assigned responsibility for providing vocational guidance and counseling shall possess a baccalaureate degree with specialization in the field of guidance.

(c) It is desirable that counselors assigned responsibility for providing vocational guidance and counseling have had work experience in some occupation other than education.

(d) Vocational guidance and counseling shall identify and encourage the enrollment of students needing vocational education; provide students with information necessary for realistic vocational planning; provide adequate guidance and counseling designed to enable vocational and potential vocational

education students to plan realistic programs of vocational preparation; provide adequate guidance and counseling for students enrolled in or anticipating enrolling in a program of vocational education; provide adequate job placement services either directly or in cooperation with the Michigan employment security commission or other appropriate community or state agencies; and carry out systematic follow-up studies of former vocational education students at least annually, or as may be otherwise required by the state board. Local schools participating in a reimbursed program of vocational education shall submit such reports as may be required by the state board relating to vocational guidance and counseling activities and achievements.

History: 1954 ACS 50, p. 32, Eff. May 15, 1967.

R 395.252 Vocational teacher training.

Rule 22. (1) The program of vocational teacher training shall include both preemployment and inservice training and shall provide for qualified teachers, supervisors and other vocational education personnel in the state.

(2) The teacher training program shall be sufficiently extensive to provide trained vocational personnel in the recognized occupations and occupational fields. It shall include both preservice and inservice training for teachers, supervisors, directors, administrators, counselors, and others.

(3) Provisions for meeting teacher training standards are as follows:

(a) Representatives of the teacher training institution(s), in cooperation with the state supervisory staff, shall provide for supervised student teaching and other experiences for prospective teachers. Student teaching centers shall be selected by the designated institution with the approval of the state board and in accordance with policies determined by the state board.

(b) The teacher training faculty shall be professionally qualified, and of sufficient number and diversity to give prospective teachers the necessary preparation for teaching effectively in the areas assigned to them.

(c) Professional teacher education courses and subject matter courses essential for an understanding and competence in the occupational field shall be provided.

(d) Classrooms, libraries, shops, laboratories, and other facilities, including instructional equipment, supplies, teaching aids, and other materials, shall be adequate in supply and quality to meet the standards prescribed by the state board.

(e) An evaluation of the vocational teacher education programs shall be made annually by the state director to determine that programs are being operated in compliance with the provisions of the state plan. Such evaluation shall be used as the basis for changes and strengthening of the program.

(4) Teacher training shall be provided either by the state board through conferences, meetings, and other inservice training activities, or by public teacher education institutions designated by the state board. Such training shall include both preservice and inservice training for teachers, supervisors, directors, administrators, counselors, and others. Public teacher education institutions shall be designated by the state board to conduct vocational teacher education programs with the use of federal funds. Such designations shall be in accordance with criteria and policies established by the state board. Institutions so designated shall maintain standards and requirements necessary for the preparation of vocational teachers and administrative personnel needed in providing vocational education programs.

Nonpublic teacher education institutions may be designated by the state board to provide teacher training. When teacher training is provided by such institutions,

a written agreement developed cooperatively between the state board and the institution providing such training shall be required. Such agreements shall be initiated by the state board and shall describe the program for teacher training and the standards, policies, and procedures to be met. These agreements shall be reviewed annually by both parties concerned and revised as needed.

(5) Institutions shall submit to the state director proposals showing proposed use of funds. Funds for the program of teacher education may be used to reimburse the costs of instruction for preservice and inservice programs, clerical assistance, travel expenses, research projects, and workshops; cost of publications and instructional materials prepared in connection with the vocational teacher education program; supervision of teacher training; and for other approved preservice and inservice teacher education costs. The state board may enter into contractual agreements with designated teacher education institutions for the acquisition or production, dissemination and evaluation of curricular and instructional materials, and information and data related to vocational education and the labor market.

(6) Vocational teacher training shall be offered only to persons who have entered or are preparing to enter the profession of teaching vocational education students or who have entered or are preparing to enter employment or other professional personnel involved in vocational education programs to whom such education would be useful professionally. Vocational teacher training supported with funds under Smith-Hughes and supplementary acts will be given only to persons who have had adequate vocational experience or contact in the line of work for which they are preparing themselves as teachers and other vocational education personnel who are acquiring such experiences or contact as a part of their training.

History: 1954 ACS 50, p. 33, Eff. May 15, 1967.

R 395.253 Research, demonstration, and experimental programs.

Rule 23. (1) Research, studies, investigations, demonstration projects, and experimentation are an acceptable function of the state board staff and of the professional staff of cooperating local public educational agencies. When conducted by other than the state board, such activity shall be provided for through a regularly executed agreement which specifies all details concerning the tasks to be accomplished. Professional staff involved in directing such activities will be required to have appropriate competencies acceptable to the state board. Prior approval for studies or projects shall be granted by the state board.

(2) All research, demonstration, and experimental programs must meet all applicable standards and requirements set forth in the state plan for that particular program except for a waiver of standards and requirements in special cases. Projects must meet the following criteria to be eligible for approval:

(a) The project must be significant and have direct application to the problems in vocational education.

(b) The anticipated outcomes should have potential value to vocational education.

(c) The design and procedures for conducting the project must be adequate.

(d) Facilities and personnel for conducting the project must be adequate.

(e) The funds requested must be reasonable in terms of expected outcomes.

(3) Standards and requirements that may be waived.

(a) In special cases as a part of program development, the state board may with respect to a research, demonstration, or experimental program waive any standards and requirements in its state plan if such standards and requirements are

not specifically prescribed by the acts and the federal regulations. In such cases, the state board, upon approval of such program, will submit to the United States office of education information regarding the purpose and duration of the program and the provisions in the state plan to be waived. The state board agrees that it will use no federal funds to support such a program until receipt of its proposal is acknowledged by the United States commissioner of education.

(b) In special cases as a part of program development, the state board will submit to the United States commissioner of education a request for approval of a research, demonstration, or experimental program which requires a waiver of standards and requirements prescribed by the federal regulations. Such request will include information regarding the purpose and duration of the program and the provision in the federal regulations, and corresponding provision in the state plan, if any, to be waived. The state board agrees that it will use no federal funds to support a program until it has received notice of approval by the United States commissioner of education, and then only to the extent of such approval.

History: 1954 ACS 50, p. 34, Eff. May 15, 1967.

R 395.254 Agreements, reports, and evaluation.

Rule 24. The state board shall require from public school districts and other educational institutions written agreements relating to ancillary services and activities and such periodic reports as are deemed necessary to determine the status of these services and activities. The state staff will be responsible for continuously evaluating the results of all research, demonstration, and experimental projects approved for funding.

History: 1954 ACS 50, p. 34, Eff. May 15, 1967.

PART 4. CONSTRUCTION OF AREA VOCATIONAL EDUCATION SCHOOLS

R 395.261 Applications, eligibility, and approval.

Rule 31. (1) Applications will be submitted by local educational agencies to the state board. Such applications will contain information sufficient for approval and the determination of priorities as determined by the state board. Applications will be reviewed by the state board staff and recommendations regarding approval and priorities will be made to the executive officer.

(2) Application may be made by local educational agencies for projects meeting the criteria and conditions set forth. Such applications shall be made on forms provided and shall be submitted according to submission dates as established by the executive officer.

Educational agencies eligible for designation by the state board to operate vocational education facilities include:

(a) A specialized high school used exclusively or principally for the provision of vocational education to persons who are available for full-time study in preparation for entering the labor market, or

(b) The department of a high school exclusively or principally used for providing vocational education in no less than 5 different occupational fields to persons who are available for full-time study in preparation for entering the labor market, or

(c) A technical or vocational school used exclusively or principally for the provision of vocational education to persons who have completed or left high school and who are available for full-time study in preparation for entering the labor market, or

(d) The department or division of a junior college or community college or university which provides vocational education in no less than 5 different

occupational fields, under the supervision of the state board, leading to immediate employment but not leading to a baccalaureate degree.

(3) Construction proposals will be accepted from local public educational agencies that have been designated and approved by the state board to operate area vocational school facilities. Such area schools must accept as students residents of the state, or an area of the state, designated and approved by the state board. The state board staff will review applications and make recommendations to the executive officer regarding priorities and approval. The state board will assure itself that the terms and conditions as outlined in this part and those contained in the general school laws will be complied with.

(4) Construction projects must adhere to standards and specifications of the state. In addition to complying with the state standards and specifications, the projects must be approved by the fire marshal of the department of state police and the director of public health. Approval procedures also require state building plans shall be submitted to and approved by the controller of the state department of administration in the manner outlined in section 13 of Act No. 51 of the Public Acts of the First Extra Session of 1948, being §18.13 of the Michigan Compiled Laws. Projects undertaken by local educational agencies will follow the procedures set forth in the state plan.

History: 1954 ACS 50, p. 35, Eff. May 15, 1967.

R 395.262 Criteria.

Rule 32. (1) Funds will be granted on a priority basis to those educational agencies designated to operate area vocational education facilities. In determining priorities of projects primary consideration will be given to educational needs within the area as determined by survey, the ability of the area to provide facilities, and the number of districts included in the area; and secondary consideration will be given to the number of persons to be benefited, the occupational opportunities, and utilization of the facility.

(2) Local educational agencies will make application for construction projects on forms provided. Evidence shall be supplied by the local educational agency that each of the following terms and conditions have been complied with before approval will be given. The state board staff will review each local educational agency application and any construction projects undertaken by the state board in order to assure the state board that all terms and conditions have been met. During the time construction is underway, the state board staff will make periodic on site inspections to determine that the terms and conditions listed below are being complied with. Such periodic reports as necessary will be required to further assure that the terms and conditions are being met. Terms and conditions to be met:

(a) The facility will be functional and will meet the needs of those persons and communities to be served.

(b) The projects will be undertaken in an economic manner and will not be elaborate or extravagant in design or materials.

(c) Sufficient funds will be available to meet the state and local share of the cost of constructing the facility.

(d) When construction is completed, sufficient state and local funds will be available for effective use of the facility for the purposes for which it is being constructed.

(e) The interest of the state board or the local educational agency in the facility and in the land on which the facility is located will be sufficient to assure undisturbed use and possession for the purpose of construction and operation of

the school facility covered in the project during the expected usable life of such facility.

(f) Representatives of the U.S. office of education and such other persons as the commissioner may designate will have access at all reasonable times to the project wherever it is in preparation or progress, and the contractor will provide proper facilities for such access and inspection.

(g) All laborers and mechanics employed by contractors and subcontractors on all construction projects assisted under the 1963 act will be paid wages at rates not less than those prevailing as determined by the secretary of labor in accordance with the Davis-Bacon act (Act of March 3, 1931, P.L. 798, 71st Congress, 46 Stat. 1494 as amended, 40 U.S.C. 276a-276a-5) and 29 C.F.R. part 1 (see 29 F.R. 95); and shall receive overtime compensation in accordance with and subject to the provisions of the contract work hours standards act (P.L. 87-581, 76 Stat. 357, 40 U.S.C. 327-332). Such contractors and subcontractors shall comply with the provisions of 29 C.F.R. part 3 (see 29 F.R. 97), and all construction contracts and subcontracts shall incorporate the contract clauses required by 29 C.F.R 5.5 (a) and (c) (see 29 F.R. 100, 101).

(h) The state board will determine the allowable expenditures from federal funds for construction on the basis that monies available for vocational education will be spent only on vocational projects without duplication from federal sources.

(i) The state board will determine the allowable expenditures from federal funds for construction on the basis that monies available for vocational education will be spent only on vocational projects without duplication from federal sources.

History: 1954 ACS 50, p. 35, Eff. May 15, 1967.

R 395.271 General requirements and limitations.

Rule 41. (1) The work-study program is for those students who are in need of earnings from employment in order to commence or continue their vocational education programs.

(2) The work-study program shall be administered by local educational agencies and made available, to the extent of available funds, to all qualified youth, in the area served by such agencies, who meet requirements.

(3) Employment under the work-study program shall be furnished only to a student who (a) has been accepted for enrollment or, if he is already enrolled, is in good standing and in full-time attendance as a full-time student in a vocational education program which meets the standards of the state board and of the local educational agency and the requirements of the state plan, (b) is in need of the earnings from such employment to commence or continue his vocational education program, and (c) is at least 15 years of age and less than 21 years of age at the date of commencement of employment and is capable in the opinion of the appropriate school authorities of maintaining good standing in his school program while employed under the work-study program.

(4) A student shall not be employed more than 15 hours in any week during which classes in which he is enrolled are in session nor for compensation less than the minimum wage law which applies to the employing agency. Summer employment shall not exceed 40 hours per week.

(5) Employment under work-study programs shall be for the local educational agency or for some other public agency or institution, federal, state, or local; and work so performed shall be adequately supervised and coordinated and shall not supplant present employees of such agency or institution who ordinarily perform

such work. In those instances where employment under work-study programs is for a federal agency or institution, the written arrangement between the local educational agency and the federal agency or institution shall state that students so employed are not federal employees for any purpose.

(6) In each fiscal year during which the work-study program remains in effect, the local educational agency shall expend for employment of its students an amount in state and/or local funds that is not less than the average annual expenditure for work-study programs of a similar nature during the 3 fiscal years preceding in which the supplementary plan provisions for its work-study program are approved.

History: 1954 ACS 50, p. 36, Eff. May 15, 1967; 1954 ACS 71, p. 41, Eff. May 24, 1972.

R 395.272 Applications, priorities, and approval.

Rule 42. (1) Work-study programs shall be approved on an individual basis by the state board and shall be consistent with the policies and procedures set forth.

(2) Local educational agencies shall submit project proposals to the state board staff for approval in a manner similar to other vocational education programs.

(3) Work-study programs will be provided, insofar as financial resources are available, for the undertaking of such programs in the order determined by the application of criteria for determining relative priority of projects which shall include preference for local educational agencies serving communities having substantial numbers of dropouts and unemployed youths and may include other relevant factors such as the extent to which the local educational agencies are using guidance and counseling and other related services designed to achieve the purposes of the work-study program.

History: 1954 ACS 50, p. 37, Eff. May 15, 1967.

PART 6. FEDERAL FINANCIAL PARTICIPATION

R 395.281 Audits of local accounts.

Rule 51. (1) Local school districts shall have audits made of their financial records annually by certified public accountants or by intermediate district superintendents or by the auditor general of the city, or as may be required by the superintendent of public instruction.

(2) Audit standards are as follows:

(a) It shall be the duty of the superintendent of public instruction to examine and audit the official records and accounts of any school district and require corrections thereof when necessary, and require an accounting from the treasurer of any school district when deemed necessary.

(b) Local schools are required to keep records on hand for 6 years, or for 1 year after audit, depending upon the record concerned. This conforms to the minimum of 5 years that state records must be kept for federal audit purposes.

(c) Specific audit standards are outlined in program for audit of financial records of Michigan school districts, bulletin no. 1031, revised 1963, published by the department of public instruction.

History: 1954 ACS 50, p. 37, Eff. May 15, 1967.

R 395.282 Payment of funds to local educational agencies.

Rule 52. (1) Under the Smith-Hughes and George-Barden acts, federal funds will be used to reimburse local educational agencies on the basis of claims submitted for expenditures already incurred. Under the vocational education act of 1963, funds either may be advanced to local educational agencies by the state

board for approved anticipated expenditures or reimbursement may be made for actual expenditures already incurred.

(2) The state board contracts with public school districts and other public educational institutions such as community colleges for partial reimbursement of costs for secondary, postsecondary, and adult instruction, supervision, administration, and travel when standards of the state plan have been met. These local educational agencies submit claims for reimbursement in accordance with approved contracts made early in the fiscal year concerned. Prior to the fiscal year, teacher training institutions submit to the state director project proposals showing use of funds, together with applications for reimbursement.

(3) Approval of funds will be based on detailed justification to be submitted to the state board. If such expenses are prorated between reimbursable and nonreimbursable purposes, the basis for proration must be included in the justification.

History: 1954 ACS 50, p. 38, Eff. May 15, 1967.

R 395.283 Fiscal year allotments.

Rule 53. The basis for determining and establishing how and when expenditures are made by the state agency and local educational agencies are:

(a) State and local funds will be allotted on the basis of a fiscal year commencing on July 1 and ending the following June 30. An expenditure made under the state plan will be charged to that fiscal year in which the expenditure is incurred.

(b) Reimbursement to local educational agencies will be made on the basis of claims submitted as supported by contract or other evidence of legal liability. An accrual accounting basis shall be used.

(c) Reimbursement for construction and equipment will be made from funds allotted for the fiscal year in which funds were encumbered for this purpose. Reimbursement will be made only on encumbered funds following submission of reimbursement request, evidence of payment and copies of invoices from the local educational agency. If the final liquidation period extends into succeeding years, funds will be held over for payment for that portion of the project.

History: 1954 ACS 50, p. 38, Eff. May 15, 1967.

R 395.284 Proration of costs.

Rule 54. (1) When an expenditure is only partly attributable to an eligible purpose or activity under the state plan or where an expenditure is attributable to 2 or more eligible purposes or activities, such expenditures will be identified and prorated between the eligible and noneligible purposes or activities, or among the various eligible and noneligible activities, as the case may be. The state board will maintain records, documented on an after-the-fact basis, to substantiate the proration of expenditures for applicable items such as salaries, travel, rent, supplies, and equipment. When an item of expenditure is attributable to 2 or more different reimbursable purposes, the cost shall be prorated among the various purposes on the basis of the approximate time devoted to each reimbursable purpose.

(2) If the total or a portion of a proposed construction plan includes facilities which will be used for both eligible and ineligible purposes, the state board will determine what facilities or portions of facilities are assignable to purposes eligible for funds under the 1963 act. Such eligible portions of facilities will be determined on the basis of amount of space and time devoted to each reimbursable purpose. If the total proposed construction plan includes facilities which are

eligible for federal financial participation under the 1963 act and under any other federal statute, the state board gives assurance that federal financial participation under the 1963 act will not be made available for a facility or portion thereof supported by federal financial participation under such other federal statute.

History: 1954 ACS 50, p. 38, Eff May 15, 1967.

R 395.285 Disposition of facilities and equipment.

Rule 55. Whenever area vocational education school facilities, or items of equipment, each initially costing $100.00 or more, in which the United States government has participated are sold or no longer used for purposes permitted under the acts, it is agreed that the United States government is to be credited with its proportionate share of the value of such facilities and equipment at that time, the value being determined on the basis of the sale price in the case of a bona fide sale or the fair market value in the case of discontinuance of use for a vocational education purpose or other diversion. Inventories are required to be kept for all equipment in which there is a federal interest. Depreciation schedules shall be established for all inventoried equipment. Such schedules shall make provision for amortization based on a reasonable useful life for the equipment concerned. The state board agrees that all inventories and records be kept for all items of equipment or area vocational education school facilities and assumes responsibility for having available in offices of the state board of education information sufficient for a determination of whether such facilities and equipment continue to be used for a purpose provided for under the acts.

History: 1954 ACS 50, p. 39, Eff. May 15, 1967.

R 395.286 Expenditures under the state plan.

Rule 56. (1) Salaries of professional vocational education personnel will be paid for time spent on activities reasonably related to vocational education programs and services under the state plan. Such salaries shall include educational leave, contributions to retirement, workmen's compensation, and welfare funds explained here:

(a) Funds used under the state plan for salaries paid to approved vocational education personnel who have been engaged in activities eligible for federal financial participation may also be used for the money spent on educational or other leave needed to obtain additional education, occupational experience, or training of benefit to the vocational education programs under the state plan, provided that such leave is in conformity with the policy of the employing board, agency, or institution which applies also to other employees of similar rank or grade. The fact that funds are used for the salary of an employee on such leave does not preclude federal financial participation in the salary of the person employed to replace him, so long as the replacement is otherwise eligible. In the case of such leave earned by the employee on the basis of time of service, federal financial participation will be based on the prorated portion of the employee's time that was given to various reimbursable vocational education activities during the period in which the leave was earned. In the case of such leave not earned on the basis of time or service, federal financial participation will be based on the relative benefit of such leave to the various education programs under the plan.

(b) Funds used under the state plan for salaries of approved vocational education personnel engaged in activities eligible for federal financial participation may include that part of the salary that is deducted or withheld as the employee's contribution under a plan of retirement, workmen's compensation, other fringe benefits or other welfare funds maintained for 1 or more general

classes of employees of the state or local educational agency. In addition, funds may be used to support the employer's contributions to such plans.

(2) Travel of local and area directors, supervisors, coordinators, counselors, and teachers within the service area may be reimbursed as follows:

(a) Reimbursement for authorized official travel; transportation, only necessary for the maintenance or promotion of vocational education programs in local communities may be approved.

(b) Reimbursement may be approved for authorized official travel, transportation, meals, and lodging, which is necessary for the maintenance or promotion of vocational education programs serving an area larger than that served by the local school district.

(c) Reimbursement may be approved for travel, registration, meals, and lodging to conferences or meetings called by the state director.

(d) No federal or state vocational education funds will be allowed for out of state travel.

(3) Under the George-Barden and 1963 acts, funds may be used for acquisition, installation, maintenance, and repair of instructional equipment. "Instructional equipment" means equipment costing a minimum of $100.00 per unit used by authorized vocational education personnel in instructing, or by their students in learning, in an instructional situation in the classroom, laboratory, shop or field. Procedures for approving the use of funds for equipment will be based on the submission of project proposals. Supplies will not be reimbursed from federal and state vocational education funds. Teaching aids costing a minimum of $100.00 may be reimbursed if approved.

(4) Providing approval is secured in advance, funds may be used for rental of space, including the cost of utilities and janitorial services, in privately or publicly owned buildings excluding those owned by the educational agency if these conditions are met:

(a) The expenditures for the space are necessary, reasonable, and properly related to the efficient administration of the program.

(b) The state board or local educational agency will receive the benefits of the expenditure during the period of occupancy commensurate with such expenditures.

(c) The amounts paid by the state board or local educational agency are not in excess of comparable rental in a particular locality.

(d) Expenditures represent a current cost to the state board or local educational agency.

(e) In publicly owned buildings like charges are made to other agencies occupying similar space for similar purposes.

Publication costs, salaries of clerical personnel, consultant services, and communications costs directly applicable to approved research projects may be reimbursed.

History: 1954 ACS 50, p. 39, Eff. May 15, 1967.

PART 7. BUSINESS AND OFFICE EDUCATION

R 395.291 General provisions.

Rule 61. (1) Vocational education in business and office occupations shall be designed to meet the needs of persons over 14 years of age who have entered or are preparing to enter business and office occupations for which instruction in the office education field will make a contribution to employability. Such courses or units shall provide entry skills and abilities leading to gainful employment in

office occupations or shall provide refresher and/or upgrading instruction leading to advanced jobs for those persons who are employed in office occupations.

(2) Office occupations are those performed by individuals in public or private enterprise which relate to the facilitating function of the office, which includes supervision and coordination of office activities, internal and external communication, reporting, recording, interpreting, storing, and retrieval of data and information.

(3) The following special standards and requirements apply:

(a) Office education courses and curricula shall be limited to selected students who have an office occupation as their career objective; or to students who have entered upon or are preparing to enter an occupation in which office skills, knowledge, and techniques are required.

(b) Vocational instruction for those preparing to enter gainful employment in office occupations shall be provided in preparatory classes utilizing participation activities and projects geared to the interests, needs, and abilities of those enrolled; or cooperative education classes utilizing on-the-job training through part-time employment in an office occupation. Office education for out of school youth or adults already employed in office occupations shall be provided in supplementary classes designed to upgrade and update their occupational skills and knowledge.

(c) Preparatory classes for full-time students may be organized and conducted for full-time students over 14 years of age who are enrolled in, and normally may be expected to complete, an approved office education curriculum specifically designed to prepare individuals for gainful employment. Reimbursement may be requested for preparatory classes consisting of the second year unit of 2 year subject sequences in communication and recording skills, and certain single year units of laboratory or practice-type courses in which enrollment is limited to advanced students during the school year in which students will be completing their prescribed preparatory curriculum. So called general business or prevocational business education subjects are not eligible for reimbursement. Instruction in eligible preparatory classes shall be vocational in nature, utilizing participation activities and laboratory practice techniques, including devices and techniques such as directed experience projects, manuals, field trips, short term work experience in office occupations, guest speakers, role playing, visual aids, programmed instruction. Local schools requesting reimbursement for preparatory classes for full-time students shall submit in advance a written justification of the need for the class, a plan of operation, including prerequisite courses required, and such other information as required by the state board. The plan will become part of the prescribed contractual procedure.

(d) Preparatory classes may be organized and conducted for out of school youth and adults preparing to enter employment in business or office occupations or in occupations for which instruction in the office education field will make a contribution to employability. Such preparatory classes shall have the following characteristics: be specifically designed to provide those enrolled with marketable skills leading to entry employment in the business or office occupations field; the course content, length of course in hours, and number and frequency of class sessions shall be adequate to provide predetermined competency in single or multiple business or office skills based on the stated course objective; specific attainment goals such as words per minute, etc. for the individual class group shall be included in the justification of the need for the class; all students enrolled shall have an occupational objective as a matter of record in the school files; instruction in eligible preparatory classes shall be vocational in nature, utilizing participation

activities and laboratory practice techniques; and local schools requesting reimbursement of preparatory classes shall submit, in advance, written justification of the need for the class, and other data required by the state board prior to the opening date of the class. Such justification data will become part of the prescribed contractual procedure.

(e) Supplementary classes may be organized and conducted for out of school youth and adults who have entered into employment in business and office occupations or in occupations for which instruction in office subjects will make a contribution to employability. The objective of such classes is to upgrade and/or prepare such individuals for advancement on their jobs and the instruction shall be supplemental to their daily employment. Instruction in supplementary classes shall be scheduled to provide as many hours of instruction as necessary to meet the needs of persons enrolled and must be specifically designed for upgrading the skills and understandings of employed office workers. Specific attainment goals; i.e. words per minute, etc.; for the individual class group shall be included in the justification of the need for the class. Coordination of instruction with job experience may be necessary for efficient instruction of such classes and reasonable time will be allowed for coordination activities of a qualified teacher. Local schools requesting reimbursement of such classes shall submit, in advance, a written justification of the need for the class and such other data required by the state board and such justification data will become part of the prescribed contractual procedure.

(4) A cooperative education class may be organized and conducted for full time secondary or post high school students preparing to enter office occupations. Office occupational experience may be provided for students in preparatory classes if such experience is appropriate to the vocational objective of the students; is of sufficient duration to develop competencies necessary to fit them for employment in the occupation or occupational field which they are preparing to enter; is supervised by a qualified office education teacher or coordinator; and is obtained under conditions of employment, including wages paid to the students, in conformity with federal, state, and local laws and regulations.

History: 1954 ACS 50, p. 40, Eff. May 15, 1967.

PART 8. AGRICULTURAL EDUCATION

R 395.301 Provisions under Smith-Hughes and George-Barden acts.

Rule 71. (1) Vocational education in agriculture is designed to meet the needs of persons over 14 years of age who have entered upon or are preparing to enter upon the work of the farm or farm home or any occupation involving knowledge and skills in agricultural subjects, whether or not such occupation involves work of the farm or of the farm home.

(2) An "agricultural occupation" means an occupation involving knowledge and skills in agricultural subjects which has the following characteristics:

(a) The occupation is on a farm or in another business, agency, or organization which performs 1 or more of the agricultural functions of producing, processing, distributing, and servicing.

(b) The occupation employs workers who need competencies in 1 or more of the primary areas of plant science, soil science, animal science, farm management, agricultural mechanization, and agricultural leadership.

(3) The following special standards and requirements apply:

(a) Vocational instruction in agricultural education will deal with practical problems arising from agricultural activities of the students and others engaged in agriculture in the community, state, and nation. It will include subject matter and

practical experience necessary in the production, processing, marketing, and distribution of plants and animals or their products and in services involving the broad field of agriculture.

(b) Preparatory programs at the high school level are designed to meet the needs of persons enrolled in secondary schools. Their major purpose is to teach skills, abilities, attitudes, and understandings, leading to gainful employment in farming and in any other agricultural occupation. High school programs may be operated for 4 years and shall be provided for a minimum of 2 years. Any student enrolled in the ninth grade or any succeeding high school grade or who is 14 years of age or older may pursue the course of vocational agriculture. Enrollment may be for the period of time necessary to acquire knowledge and skills needed to meet the student's occupational objective. Provisions may be made for work with youth organizations. High school classes shall be of such length as to provide for effective teaching and learning in the classroom laboratory, shop, and field. The minimum length of the class shall be equivalent to the time required for other laboratory courses in the high school curriculum.

(c) Post high school preparatory programs are designed to serve persons who have completed or left high school and are seeking employment. They will be developed in areas having sufficient job opportunities. Length of program will be dependent upon the jobs for which training is needed. The program will be evaluated in terms of course content, progress in training, follow up and placement.

(d) Supplementary programs are designed to meet needs of young and adult farmers. The program of instruction for young farmers shall deal with agricultural problems encountered by young men in becoming established in farming and those who require basic agricultural education on farm problems. The program of instruction for adult farmers shall aim to increase efficiency in specific phases of farming and shall be designed to meet the needs of farmers with common interests and problems. The school shall provide follow up and supervision of new practices applied by the student on his farm.

(e) Upgrading and retraining classes in other agricultural occupations designed for persons who have entered the labor market in other agricultural occupations and who need training or retraining to achieve stability or advancement in employment may be provided. The program of instruction will include subject matter and experiences involving a knowledge and skills of agricultural subjects and will be designed to meet individual need and common interests and problems. The school shall relate classroom instruction to the work experiences of the enrollee.

(f) Classes for young and adult farmers and for persons enrolled in training or retraining programs in agricultural occupations other than farming shall be organized for such time as is needed to adequately meet the objectives of the enrollees.

(g) Preparatory programs of instruction shall provide for directed or supervised practice in agriculture on a farm for those persons who are engaged in or preparing for farming or practical field, shop, laboratory, cooperative work, or other occupational experience which is appropriate to the vocational objective of the students, and is of sufficient duration to develop competencies necessary to fit them for employment in the agricultural occupation or occupation field for which they are being trained, and is supervised, directed, or coordinated by a teacher of vocational agriculture or a coordinator in schools providing other cooperative education programs. Programs for students employed in other agricultural occupations than farming shall be based on a written training plan mutually

agreeable to the school and employer. Conditions of employment shall be in conformity with federal, state, and local laws and in a manner not resulting in exploitation of the student learner for private gain. A cooperative program should be utilized by agricultural students where available.

(4) In addition to those conditions already set forth, the following provisions shall also apply:

(a) The faculty shall include staff members who have degrees in technical agriculture and who are qualified by training and experience for teaching and research in the specific subject area to which assigned.

(b) Facilities for demonstration, research, and instruction shall be provided to develop the student's level to a "doing" ability. Facilities will include a farm owned and operated by the institution. The following additional facilities shall also be provided: major classes of livestock and poultry for instructional use in classes and classrooms; scientific laboratory facilities of recognized college standards in all basic areas of agriculture; and classrooms and laboratories in the field of related science.

(c) Student teaching centers shall be selected by the designated institution in cooperation with the state board in accordance with policies of joint agreement. Centers chosen shall maintain programs of vocational agricultural education adequate to provide teaching experiences. Student teaching will be supervised cooperatively by the teacher educators and the local staff of supervising teachers in the student teaching centers.

(5) Teachers of vocational agriculture for high school preparatory programs shall be employed on a 12-month basis to insure adequate time supervision of farming programs of students enrolled. Such teachers will be continued on the same basis for supervision of experience programs for agricultural occupations other than farming where students are employed in these occupations during the summer months.

History: 1954 ACS 50, p. 42, Eff. May 15, 1967.

PART 9. DISTRIBUTIVE EDUCATION

R 395.311 Provisions under George-Barden act.

Rule 81. (1) Vocational education in distributive occupations shall be designed to meet the needs of persons over 14 years of age who have entered or are preparing to enter a distributive occupation or other occupation for which instruction in the distributive education field will make a contribution to employability.

(2) A "distributive occupation" means an occupation that is followed by proprietors, managers, or employees engaged primarily in marketing or merchandising goods or services. These occupations are commonly found in various business establishments such as retailing, wholesaling, manufacturing, storing, transporting, financing, and risk bearing.

(3) The following special standards and requirements apply:

(a) The nature and content of the distributive education program shall be derived from the functions of marketing and a knowledge of products and services in reference to the occupational objective of the student. Vocational instruction for those preparing to enter gainful employment in a distributive occupation shall be provided in preparatory classes utilizing participation activities and projects geared to the interests, needs, and abilities of those enrolled; or in cooperative education classes utilizing on-the-job training through part-time employment in a distributive occupation.

(b) Vocational instruction for out of school youth and adults already employed in distributive occupations shall be provided in supplementary classes designed to upgrade and update their occupational skills and knowledge.

History: 1954 ACS 50, p. 43, Eff. May 15, 1967.

R 395.312 Types of distributive education; classes and experience.

Rule 82. (1) Such classes may be organized and conducted for full-time secondary or post high school students who normally may be expected to complete and approved sequence of appropriate units of instruction in distribution. Classes shall meet a minimum of not less than 1 semester with an average of 1 regular class period per day of vocational instruction in distribution. Instruction shall be vocational in nature, utilizing various participation activities, including devices and techniques such as individualized projects, product and sales manuals, field trips, short term work experience in distributive occupations, guest speakers, visual aids, role playing, sales demonstrations, and programmed instruction. Essential teacher time for coordinating student participation activities also may be approved for reimbursement. Approval for reimbursement of preparatory classes will be based on a written plan of operation, submitted in advance by the local school, which will become part of the contractual procedure prescribed by the state board.

(2) Such classes may be organized and conducted for out of school youth and adults preparing to enter distributive occupations, providing such instruction is aimed toward preparing those enrolled for gainful employment, and incorporates projects and appropriate participation activities in identifying and meeting their vocational objectives. Availability of identified opportunities for entry employment in occupations relating to the subject area of preparatory classes will be a factor in approving such classes for reimbursement. All students enrolled in such classes shall have an occupational objective as a matter of record. Approval for reimbursement of preparatory classes will be based on a written justification of the need for such classes plus a statement of operation and organization, which the local school will submit in advance and which later will become part of the contractual procedure as prescribed by the state board.

(3) Such classes may be organized and conducted for out of school youth and adults who have entered into employment in distributive occupations. The objective of such classes is to upgrade and prepare such individuals for advancement in the distributive occupations in which they are employed. The subject matter shall be supplemental to the student's daily employment. Coordination of instruction with job experience may be necessary for efficient instruction of such classes and reasonable time will be allowed for coordination activities of a qualified teacher.

(4) Cooperative education classes may be organized and conducted for full-time secondary or post high school students preparing to enter distributive occupations. Distributive occupational experience may be provided for students in preparatory classes if such experience is appropriate to the vocational objective of the students; is of sufficient duration to develop competencies necessary to fit them for employment in the occupation or occupational field which they are preparing to enter; is supervised by a qualified distributive education teacher or coordinator; and is obtained under conditions of employment, including wages paid to the students in conformity with federal, state, and local laws and regulations.

PART 10. HOME ECONOMICS EDUCATION

R 395.321 Provisions under Smith-Hughes and George-Barden acts.

Rule 91. (1) The program is designed to prepare persons for the vocation of homemaking and for gainful occupations involving knowledge and skills in home economics. Vocational education in home economics is designed to meet the needs of persons over 14 years of age who have entered upon or are preparing to enter upon any occupation involving knowledge and skills in home economics subjects.

(2) Home economics education is described as follows:

(a) "Education in homemaking" means education which provides instruction which will enable families to improve their family life through more effective development and utilization of human resources.

(b) Vocational education in home economics directed toward gainful employment provides instruction that qualifies individuals to engage in occupations involving knowledge and skills in home economics and subject matter areas, i.e., child development, clothing and textiles, family relationships, food and nutrition, health and safety, home and institutional management, housing, home furnishings and equipment. Included are such occupations as those which provide services to families in the home and similar services to others in group situations; those which provide assistance to professional home economists and professionals in fields related to home economics in business, agencies, and organizations; and other occupations directly related to 1 or more home economics subject matter areas. Such programs of instruction are designed to provide initial preparation, refresher training, or upgrading of individuals leading to gainful employment or advancement in home economics occupations. Such occupations include those which provide wage earning services in the home and in the community, and such wage earning occupations which are related to the broad field of home economics including technicians.

History: 1954 ACS 50, p. 45, Eff. May 15, 1967.

R 395.322 Special standards and requirements.

Rule 92. (1) The curriculum is concerned with fundamental values and problems in the several aspects of homemaking, and deals with these in such a way as to develop needed skills, understandings, attitudes, and appreciations. The nature and content of instruction are derived from the needs and concerns of individuals and families served, taking into consideration the maturity and experience of individuals enrolled.

(2) Such classes may be organized and conducted for full-time students 14 years of age or over who are enrolled in and may normally be expected to complete a curriculum consisting of an approved sequence of appropriate courses designed specifically to prepare them for gainful employment in home economics occupations upon completion of the curriculum. Such classes shall be planned in terms of actual or anticipated opportunities for gainful employment. Vocational instruction of such classes shall be in keeping with the needs, interests, and capabilities of those enrolled. Such classes may be organized and conducted for out of school youth and adults preparing to enter occupations for gainful employment involving knowledge and skills in home economics subjects. Availability of identified opportunities for employment in the subject area of preparatory classes under consideration will be a factor in approving them for reimbursement.

(3) Planned instruction in home economics education for out of school groups shall be organized for sufficient time to meet the needs of persons enrolled and for not less than a total of 10 hours of instruction for any 1 course.

(4) Such classes may be organized and conducted for out of school youth and adults employed in occupations involving knowledge and skills in home economics subjects. The objective of these courses shall be to upgrade and prepare enrollees for advancement in occupations in which they are employed and shall combine vocational instruction in school and supervised training on the job. Qualified students must be at least 16 years of age. Coordination of instruction with the on the job experience is essential for efficient and constructive progress in the chosen occupation.

(5) The following standards apply to the selection of students:

(a) For Smith-Hughes part-time classes, enroll only persons who have entered upon gainful employment or work in the home.

(b) For Smith-Hughes day school classes, enroll only persons who have not yet entered upon employment.

(6) The following standards for instruction apply:

(a) In homemaking education, the total program of instruction must be sufficiently intensive and extensive to enable the individual served to develop competencies necessary for effective participation in homemaking and in community activities affecting the home. A minimum of 2 years of home economics education shall be provided in grades 9 through 12. Home Economics I shall be a prerequisite to Home Economics II. Additional years may be offered. Classes shall meet for no less time than that required for a full unit of credit for other school subjects in the local school. The program shall include learning experiences in the school, home, and community.

(b) Smith-Hughes funds allocated by the states for salaries of home economics teachers in part-time classes may be used to reimburse instruction in part-time classes only if they provide 144 clock hours of classroom instruction per year for persons who have already entered gainful employment or the work of the home.

(c) When Smith-Hughes funds allocated by the states for salaries of home economics teachers, in other than part-time classes are used to reimburse preparatory instruction in full-time day school classes for persons who have not entered upon employment, such classes shall extend over not less than 9 months per year and 30 hours per week and shall have at least ½ of the total time of instruction devoted to practical work on a useful or productive basis, i.e., field laboratory, home, cooperative work, or other occupational experience, except that in cities and towns with less than 25,000 population, the state board, with the approval of the commissioner, may modify the conditions as to the length of the course and the hours per week in order to meet the particular needs of such cities and towns.

(7) The following standards apply:

(a) In homemaking education, the program of instruction for youths provides a variety of kinds of learning experiences in all of the major phases of homemaking, including participation in directed home and community experience. Provision shall be made for time in the teacher's schedule for supervision of home and community experience.

(b) In education directed toward gainful employment, cooperative education programs and occupational experience programs should be utilized. The program of instruction will combine and coordinate related instruction in home economics with field, shop, laboratory, cooperative work, or other occupational experience which is appropriate to the vocational objective of the students, and is of

R 395.323 Supervised student teaching centers.

Rule 93. Home economics supervising teacher educational and experience qualifications are as follows:

(a) She shall have met requirements for the secondary vocational home economics certificate. She may be employed with a minimum of 6 semester hours of graduate work including supervision with a plan for completing the master's degree.

(b) She shall have completed a minimum of 2 years' experience in teaching home economics education; 1 of which shall have been in a vocational all day home economics program.

History: 1954 ACS 50, p. 47, Eff. May 15, 1967.

PART 11. TRADE AND INDUSTRIAL EDUCATION

R 395.331 Provisions under Smith-Hughes and George-Barden acts.

Rule 101. (1) Vocational education in trades and industries is designed for persons over 14 years of age who have entered upon or are preparing to enter upon the work of a trade, industrial or fishery occupation.

(2) Any craft, skilled trade, semiskilled, or single skilled occupation which directly functions in the designing, producing, processing, fabricating, assembling, testing, modifying, maintaining, servicing, or repairing of any product or commodity. Any other occupation, including a fishery or service occupation which is not covered in the above paragraph, but which is usually considered to be technical or trade and industrial in nature.

History: 1954 ACS 50, p. 47, Eff. May 15, 1967.

R 395.332 Special standards and requirements.

Rule 102. (1) "Trade and industrial education" means education which includes any subject which is necessary to develop the manipulative skills, technical knowledge, and related information such as job attitudes, safety practices, and trade judgment necessary for employment in a trade and industrial occupation.

(2) The following provisions apply to type A and B day trade classes:

(a) Type A day trade related instruction is offered as units separate from the field, laboratory, shop, cooperative work, or other occupational experience.

(b) In type B day trade classes the related instruction is offered by the shop or laboratory instructor as an integral part of the shop or laboratory experience.

(c) In both type A and B day trade programs, instruction in related subjects for which funds are used shall have a direct functional value in the trade or occupation. Related subjects may be taught by the trade instructor or a person meeting the qualifications set forth in these rules.

(3) A supplementary class is defined as a class conducted during the nonworking hours of the enrollees. The class may enroll only workers 16 years of age or older who are employed in a trade, industrial, or fishery occupation. The

instruction is limited to that which will enhance the skill or knowledge of the worker in his trade or industrial occupation. Such classes may include instruction for apprentices and for personnel training for leadership positions in management, labor, and other industrial organizations. Part-time classes are for workers employed in a trade or industrial occupation who have left the full-time school and are enrolled for instruction which is supplemental to their employment. Such classes may include instruction for apprentices.

(4) The following standards apply to the selection of students:

(a) Evening industrial classes may enroll workers over 16 years of age who are employed in the trade or industrial occupation, or temporarily unemployed, for which instruction is being provided. Such classes may include instruction for apprentices.

(b) Part-time trade preparatory classes are for persons over 14 years of age who have entered upon employment and desire to prepare for employment in a trade or industrial occupation other than the 1 in which they are or have been employed.

(c) Part-time extension classes are for workers over 14 years of age employed in a trade or industrial occupation who have left the full-time school and are enrolled for instruction which is supplemental to their employment. Such class may include instruction for apprentices.

(d) Regular day trade A and B classes are preemployment classes for persons over 14 years of age who are enrolled in full-time day school.

(e) Type C classes are a special type of preemployment trade training which may be provided irrespective of whether or not the persons enrolled are employed. Training may be offered for any length of time. Such classes may be operated for less than 9 months per year and for less than 30 hours per week without the requirement that at least ½ of the total time of instruction shall be given to field, shop, laboratory, cooperative work, or other occupational experience.

Classes for single skilled or semiskilled occupations may enroll only persons who are preparing for employment in single skilled and semiskilled occupations.

Classes for out of school youth and adults, when George-Barden funds are used, may be organized for persons who have not yet entered employment and who are either out of school youth over 14 years of age or over 18 years of age.

(5) Part-time classes under the Smith-Hughes act shall provide not less than 144 hours of classroom instruction per year. Regular day trade type A instruction is to extend over not less than 9 months per year and not less than 30 hours per week in trade or technical instruction, related instruction, and general instruction. At least ½ of the instructional time will be given to work on a useful and productive basis. Type B day instruction differs from type A only in the provision for instruction in related subjects. The instruction shall be an integral part of the shop or laboratory work taught by a qualified shop or laboratory teacher. In regular day trade classes in cities of less than 25,000 population, the state board upon request may modify the conditions as to length of course and hours of instruction per week with the approval of the United States commissioner of education.

(6) In type A and B classes at least ½ of the time of instruction must be devoted to useful, productive work. Training must be in occupational areas emphasizing manipulative skills on a practical, useful, and productive basis, i.e., field, shop, laboratory, cooperative work, or other occupational experience.

R 395.334 Cooperative work experience program.

Rule 104. The cooperative program is designed for persons enrolled in a school who, through a cooperative arrangement between the school and employers, receive part-time vocational instruction in the school and on-the-job training through part-time employment. It provides youth with basic competencies in occupations which fit their interests, needs, and abilities. A written cooperative training plan mutually agreeable to the school and the employer shall set forth the job activities, related subjects, standards of attainment, length of the program, and wages to be paid the student learner. Conditions of employment shall be in conformity with federal, state, and local laws and regulations. At no time shall there be exploitation of the student learner for private gain. The student learner shall be employed for an average of not less than 15 hours per week during the effective time of the individual's program. The school shall have the responsibility of providing coordinating and supervising services during such time. The program is of sufficient duration to develop competencies necessary to prepare the learner for employment. It provides a coordinated instructional program combining supervised part-time employment and classroom instruction related to the learner's job. Related vocational instruction in classes limited to the cooperative group shall be scheduled for an average of at least 1 class period per day.

History: 1954 ACS 50, p. 49, Eff. May 15, 1967.

R 395.335 Advisory committees.

Rule 105. Representative advisory committees for trade and industrial education, joint apprenticeship committees, and technical committees may assist in the developing and maintaining of sound programs of industrial and technical education at both the local and state levels.

History: 1954 ACS 50, p. 49, Eff. May 15, 1967.

PART 12. VOCATIONAL EDUCATION IN FISHERY OCCUPATIONS

R 395.341 Provisions under George-Barden act.

Rule 111. (1) Vocational education in fishery occupations shall be designed to meet the needs of persons over 14 years of age who have entered upon or are preparing to enter upon employment in the fishery trades and industry and distributive occupations therein.

(2) "Education for fishery occupations" means education which includes any subject which is necessary to develop the manipulative skills, technical knowledge, and related information such as job attitudes, safety practice, and trade judgment necessary for employment in the fishery occupations. Regulations and conditions in distributive and trade and industrial programs apply to respective aspects of the fishery occupations.

History: 1954 ACS 50, p. 49, Eff. May 15, 1967.

PART 13. VOCATIONAL EDUCATION IN HEALTH OCCUPATIONS

R 395.351 Special provisions under George-Barden act.

Rule 121. (1) Vocational education in health occupations under this plan pursuant to title II of the George-Barden act shall be designed for persons who are preparing to enter 1 of the health occupations and for persons who are or have been employed in such occupations in hospitals or other health agencies. For purposes of this part, "other health agencies" means institutions or establishments other than hospitals which provide patients with medical or nursing services under the direction of a doctor or registered professional nurse.

(2) The health occupations render supportive services to the health professions, such as nursing, medical, and dental practice, all of which are concerned with providing diagnostic, therapeutic, preventive, restorative, and rehabilitative services to people. Occupations included are practical or vocational nursing, nurse aides, and other occupations that require basic understandings and skills required in giving nursing care or health services to people. The scope or nature of the duties rather than the title of the occupation determines whether or not the occupation qualifies.

History: 1954 ACS 50, p. 49, Eff. May 15, 1967.

R 395.352 Special standards and requirements.

Rule 122. (1) Instruction in theory shall be closely correlated with supervised practical experience in the clinical phases of the curriculum. The preparatory full-time practical nurse program established in cooperation with the Michigan state board of nursing is outlined in the publication "Minimum Standards and Educational Criteria for Programs of Practical Nursing in Michigan." It is designed to prepare persons for gainful employment as licensed practical nurses. Preparatory training for other health occupations will be organized to prepare qualified persons for gainful employment in specified health occupations. Supplementary classes are designed to provide additional knowledge and training in recognized health occupations.

(2) Course content, length of course in total hours, and number and frequency of class sessions shall be adequate to provide single or multiple health skills based upon the stated course objective.

(3) A major part of the supervised practical experience required in the curriculum shall be spent on activities directly related to patient needs.

History: 1954 ACS 50, p. 50, Eff. May 15, 1967.

R 395.353, R 395.354 Rescinded.

R 395.355 Teacher training.

Rule 125. Training of vocational education personnel in health occupations shall be limited to inservice training.

History: 1954 ACS 50, p. 50, Eff. May 15, 1967.

PART 14. TECHNICAL EDUCATION

R 395.361 Provisions under George-Barden act.

Rule 131. (1) Technical education under the state plan pursuant to title II of the George-Barden act shall be designed to train persons for employment as highly skilled technicians in recognized occupations requiring scientific knowledge in fields necessary for the national defense.

(2) The occupation will have a significant number employed, or an over all need exists or is developing in the design, development, testing, manufacture, processing, construction, installation, operation, maintenance, repair, or servicing of plant facilities, equipment, or products which are of importance for military or other defense activity, or in providing technical services to be eligible. The industry or activity in which the occupation occurs must be necessary to the defense program, such as the military, suppliers of products or services to the military, suppliers of products or services directly connected with defense and scientific research.

History: 1954 ACS 50, p. 50, Eff. May 15, 1967.

R 395.362 Special standards and requirements.

Rule 132. (1) Under title III of the George-Barden act, funds shall be used for training programs designed to fit individuals for useful employment as highly skilled technicians in recognized occupations requiring scientific knowledge, as determined by the state board, in fields necessary to the national defense. These programs are concerned primarily with the application of technical knowledge and technical understanding in contrast to manipulative skill. Course content, length of class or classes, and instructional procedures are based on an analysis of the job or cluster of jobs for which training is given.

(2) Preparatory courses must be designed to prepare persons for useful employment as highly skilled technicians in recognized occupations requiring the direct application of specialized functional aspects of science, mathematics, and advanced technical skills and information.

(3) Supplementary courses must be designed for employed persons including journeymen, to obtain additional training in the direct application of specialized functional aspects of science, mathematics, and advanced technical skills and information required to meet the demands of recognized occupations emerging from new and changing technologies.

(4) The program of instruction shall serve a geographic area sufficiently extensive considering such factors as the size of the area served and its population to qualify the program as an "area vocational education program."

(5) All enrollees shall have attained a ninth grade status and/or be at least 16 years of age.

History: 1954 ACS 50, p. 51, Eff. May 15, 1967.

R 395.363 Rescinded.

History: 1954 ACS 50, p. 51, Eff. May 15, 1967; rescinded 1954 ACS 74, p. 69, Eff. Jan. 19, 1973.

PART 15. REIMBURSEMENT FOR VOCATIONAL EDUCATION ON AN ADDED COST BASIS

R 395.371 Definitions.

Rule 141. (1) "Secondary vocational education" means occupational training for ninth to twelfth grade students given in schools or classes under the supervision of public educational agencies as prescribed in the state plan for vocational education.

(2) "Vocational program" means laboratory, simulation or instruction based upon individually designed learning experiences in a vocational subject preparing the student for competencies required in a recognized occupation coded in accordance with vocational education and occupations, United States department of health, education and welfare, office of education, publication number OE-80061.

(3) "Added cost" means expenditures incurred by a public educational agency in the operation of a vocational program which exceed the expenditures required to operate nonvocational education programs.

(4) "Area vocational center" as used in these rules, means a K-12 school district, intermediate school district or community college district specifically designated, or temporarily designated, by the state board of education to operate secondary area vocational programs pursuant to section 291a(h) of Act No. 269 of the Public Acts of 1955, as amended, being §340.291a of the Michigan Compiled Laws.

R 395.372 Added cost determination.

Rule 142. The amount of added cost funding for each vocational program shall be determined by the department of education and such amount shall be consistent with added cost expenditures of vocational programs of the same type.

History: 1954 ACS 71, p. 41, Eff. May 24, 1972.

R 395.373 Eligible agencies.

Rule 143. Area vocational centers as well as K-12 school districts which are not area vocational centers but which are operating in compliance with all applicable statutory provisions and administrative regulations are eligible agencies.

History: 1954 ACS 71, p. 41, Eff. May 24, 1972.

R 395.374 Applications.

Rule 144. Applications for grants shall be solicited publicly by the department of education. The solicitation shall be conducted in a manner which reasonably assures that all known eligible agencies in the state are aware of the application procedures. Application forms shall be provided by the department of education.

History: 1954 ACS 71, p. 41, Eff. May 24, 1972.

R 395.375 Approval.

Rule 145. In order to be funded on an added cost basis, vocational programs shall be determined by the department of education to be in compliance with all applicable statutory provisions and administrative regulations.

History: 1954 ACS 71, p. 41, Eff. May 24, 1972.

R 395.376 Administration of funds.

Rule 146. The department of education shall disburse added cost moneys to eligible agencies which operate secondary vocational programs which are in compliance with all applicable statutory provisions and administrative regulations. The state board of education shall determine priorities for funding programs after considering available funds and eligible requests. The formula for reimbursement shall include the enrollment in the approved secondary vocational program and the added cost for the specific program as determined in R 395.372.

History: 1954 ACS 71, p. 42, Eff. May 24, 1972.

STATE LIBRARY DIVISION

GENERAL RULES

(By authority conferred on the state board of education by section 15 of Act No. 287 of the Public Acts of 1964, section 309 of Act No. 380 of the Public Acts of 1965, section 2 of Act No. 106 of the Public Acts of 1937, section 9 of Act No. 59 of the Public Acts of 1964, and section 25 of Act No. 286 of the Public Acts of 1965, being §§16.409, 388.1015, 387.2, 397.39, and 397.525 of the Michigan Compiled Laws)

PART 1. GENERAL PROVISIONS

R 397.1 School-public library combinations.

Rule 1. (1) The board of education shall appoint an advisory library board or committee charged with making recommendations for the development of public library service.

Generated for Susan K Kendall (Michigan State University) on 2018-09-05 16:48 GMT / http://hdl.handle.net/2027/mdp.49015002898253

Google
Original from UNIVERSITY OF MICHIGAN

(2) The board of education shall budget separately funds for the public library program, exclusive of funds for school library service, and report expenditures to the state board for libraries on or before November 15 of each year.

(3) Penal fines and grants of state aid to public libraries shall be used for public library service only.

(4) The personnel requirements for public library service shall be those designated for the particular class of library as outlined beginning in R 397.51. If the librarian serves a dual role as school librarian and public librarian, additional adult assistance shall be provided.

(5) Libraries shall be located conveniently for community use.

(6) In order to facilitate community use of the library during school hours, the library shall include a separate reading area with seating to accommodate non-school users, according to the following minimum formula. If the total population served by the school district public library is:

2,499 or under—150 square feet— 5 seats
2,500 to 4,999—210 square feet— 7 seats
5,000 to 9,999—300 square feet—10 seats
10,000 or over—450 square feet—15 seats

(7) The library shall not be used as a classroom or study hall.

(8) The total hours of opening for public library service shall meet standards of access as set by the state board for libraries in public library standards. Public library service shall be maintained 12 months of the year. When school is in operation, the school-public library shall be open at least 10 hours per week outside the school schedule of hours.

(9) Although the total resources of the library should be available so far as feasible to the total community, the library shall acquire regularly materials suited to the needs of the pre-school child and the adult.

(10) A continuing public information program shall be planned to promote the use of the public library by the total community.

(11) A sign shall be placed outside the building announcing the name of the public library and the hours per week it is open for use by the total community. Adequate directional signs shall be provided within the building.

(12) Regular borrowing privileges shall be free to all residents of the school district.

(13) If a school district which operates a public library has within its boundaries 1 or more public libraries operated by 1 or more other municipalities serving at least 50% of the population of the school district, the school district public library shall not be certified for receipt of penal fines or state aid.

History: 1944 AC, p. 428; 1944 ACS 6, p. 55; 1954 AC, p. 4201; 1954 ACS 49, p. 41, Eff. Feb. 14, 1967.

R 397.2 Agreement to receive service through second library.

Rule 2. Whenever a public library or a governmental unit agrees to receive any or all of its library service through a second library, the board of trustees of the public library or the governing body of the governmental unit receiving such service may waive any or all allocations of state aid funds in favor of the library giving the service. A copy of the agreement shall be filed with the state board for libraries. Thereafter, and as long as the agreement is in force, for purposes of allocating state aid funds, the population of the library or governmental unit receiving such library service shall be added to the population of the governmental unit supporting the library giving the service.

R 397.3 Reorganized library.

Rule 3. For the purpose of qualifying for grants from state aid to public libraries fund for the year 1944-45 and thereafter, a reorganized library shall be considered a new library when all 3 of the following changes occur:

(a) The organization of the public library is legally changed from 1 governmental unit to another.

(b) The source of tax support is altered.

(c) A new board is appointed.

History: 1944 ACS 6, p. 56; 1954 AC, p. 4202.

R 397.4 Rescinded.

History: 1944 ACS 27, p. 20; 1954 AC, p. 4202; rescinded 1954 ACS 49, p. 42, Eff. Feb. 14, 1967.

PART 2. LIBRARY EQUALIZATION FUND

R 397.21—R 397.23 Rescinded.

History: 1944 AC, p. 428; 1944 ACS 39, p. 9; 1944 ACS 6, p. 56; 1954 AC, p. 4202; rescinded 1954 ACS 49, p. 42, Eff. Feb. 14, 1967.

PART 4. GENERAL LIBRARY FUND

R 397.42 Rescinded.

History: 1944 AC, p. 428; 1954 AC, p. 4203; rescinded 1954 ACS 49, p. 42, Eff. Feb. 14, 1967.

R 397.45 Library fiscal agent.

Rule 45. Each library shall designate a fiscal agent to attest all financial information on the state aid application.

History: 1944 ACS 6, p. 56; 1954 AC, p. 4203.

PART 5. STANDARDS FOR PUBLIC LIBRARIES AND LIBRARY SYSTEMS

R 397.51 Definitions.

Rule 51. As used in these rules:

(a) "Public library," "library system," and "unaffiliated library" are defined as provided by section 2 of Act No. 286 of the Public Acts of 1965.

(b) "Staff" includes professional, clerical, and full-time pages, but not part-time pages nor employees doing building or janitorial work.

(c) "Population served" means that determined by the latest decennial or special federal census.

History: 1944 AC, p. 429; 1944 ACS 39, p. 10; 1954 AC, p. 4203; 1954 ACS 49, p. 42, Eff. Feb. 14, 1967.

R 397.52 Personnel standards for library systems.

Rule 52. (1) A library system serving 100,000 population or more shall have:

(a) A head librarian who shall have a librarian's permanent professional certificate and at least 1 year of administrative experience.

(b) A professional staff including the head librarian consisting of at least 10 members. Professional staff giving service by contract shall be equated as part of the minimum personnel. Not more than 50% of the professional staff may hold librarian's limited certificates, professional limited certificates or special professional certificates.

(2) A library system serving at least 50,000 population with area density under 35 per square mile shall have:

(a) A head librarian who shall have a librarian's permanent professional certificate

Open Access, Google-digitized / http://www.hathitrust.org/access_use#oa-google

(b) A professional staff including the head librarian consisting of at least 5 members. Professional staff giving service by contract shall be equated as part of the minimum personnel. At least 3 out of 5 members of the total professional staff shall be graduate professional librarians. Not more than 40% of the professional staff may hold librarian's limited certificates, professional limited certificates or special professional certificates.

(3) A provisional library system serving less than 100,000 population with area density over 35 per square mile shall meet personnel standards under subrule (2) and have plans for reaching personnel standards under subrule (1).

(4) A provisional library system serving less than 50,000 population with area density under 35 per square mile shall have plans to reach personnel standards under subrule (2).

History: 1954 ACS 49, p. 42, Eff. Feb. 14, 1967.

R 397.53 Accessibility and hours for library systems.

Rule 53. (1) A library system shall provide:

(a) A system headquarters located conveniently for the majority of system members.

(b) Regional reference and service centers, or system headquarters serving as such centers, so located that users may travel from any point of area served, work at center, and return within 1 day.

(c) Community service points easily accessible to every reader within ½ hour travel time consisting of:

(i) Local library in a village, township, or small city.

(ii) Branch of a large city, county, or regional library.

(iii) Bookmobile.

(2) A library system shall maintain the following hours:

(a) Community libraries, branch libraries, and other permanent outlets shall be open a substantial part of at least 5 days per week, but not less than 30 hours per week throughout the year. Community libraries and branch libraries serving 3,000 population or less shall be open not less than 15 hours and a portion of at least 3 days per week.

(b) Regional reference and service centers shall be open at least a major portion of 5 days per week throughout the year, including some Saturday or Sunday hours and evening hours.

(c) Bookmobile service shall be regularly scheduled to fit the needs of the area.

History: 1954 ACS 49, p. 42, Eff. Feb. 14, 1967.

R 397.54 Materials standards for library systems.

Rule 54. (1) These standards are not based on quantity only since the essential criterion is the number of usable materials. A public library should develop a vital collection based on literacy, educational, informational, and recreational needs of the area served. The board recommends that the collection be treated as a living, changing organism and that worn out and dated materials be discarded regularly.

(2) A library system shall have at least 100,000 volumes of currently useful printed materials within the system, but if it has less than 100,000, it shall have a plan for regular additions to reach this total.

History: 1954 ACS 49, p. 43, Eff. Feb. 14, 1967.

R 397.55 Unaffiliated libraries; class 1—population served less than 3,000.

Rule 55. An unaffiliated library serving a population of less than 3,000 shall:

(a) Have 1 paid worker, who shall be at least a high school graduate, holding a certificate of library experience or a library technician's certificate, on duty at all service hours, except during vacation or sick leave.

(b) Be open to the public a minimum of 20 hours per week, including some Saturday and evening hours.

(c) Have a collection of currently useful library materials to meet the ordinary needs of the community, with regular and frequent additions of new titles.

History: 1954 ACS 49, p. 43, Eff. Feb. 14, 1967.

R 397.56 Unaffiliated libraries; class 2—population served 3,000-4,999.

Rule 56. An unaffiliated library serving a population of 3,000 to 4,999 shall:

(a) Have a head librarian holding a certificate of library experience or a library technician's certificate, with preferably 2 years of college education, employed as a full-time worker.

(b) Be open to the public a minimum of 30 hours per week including some Saturday and evening hours.

(c) Have a collection of currently useful library materials to meet the ordinary needs of the community, with regular and frequent additions of new titles.

History: 1954 ACS 49, p. 43, Eff. Feb. 14, 1967.

R 397.57 Unaffiliated libraries; class 3—population served 5,000-12,999.

Rule 57. An unaffiliated library serving a population of 5,000 to 12,999 shall:

(a) Have a head librarian having at least a bachelor's degree with a major in library science, eligible for or holding a librarian's limited certificate, and 1 assistant holding a certificate of library experience or a library technician's certificate.

(b) Be open to the public a minimum of 40 hours per week.

(c) Have a collection of currently useful library materials to meet the ordinary needs of the community, with regular and frequent additions of new titles.

History: 1954 ACS 49, p. 43, Eff. Feb. 14, 1967.

R 397.58 Unaffiliated libraries; class 4—population served 13,000-24,999.

Rule 58. An unaffiliated library serving a population of 13,000 to 24,999 shall:

(a) Have a head librarian holding a librarian's professional certificate and 1 assistant holding a librarian's limited certificate.

(b) Be open to the public a minimum of 48 hours per week, including some Saturday or Sunday and evening hours.

(c) Have a collection of currently useful library materials to meet the ordinary needs of the community, with regular and frequent additions of new titles.

History: 1954 ACS 49, p. 43, Eff. Feb. 14, 1967.

R 397.59 Unaffiliated libraries; class 5—population served 25,000 or over.

Rule 59. An unaffiliated library serving a population of 25,000 or over shall:

(a) Have a head librarian holding a librarian's permanent professional certificate and 1 professional staff member for each 10,000 population in the service area. Not more than 50% of the professional staff may hold special professional certificates, librarian's certificates, or limited professional certificates.

(b) Be open to the public a minimum of 52 hours per week, including some Saturday or Sunday and evening hours.

(c) Have a collection of currently useful library materials to meet the ordinary needs of the community, with regular and frequent additions of new titles.

History: 1954 ACS 49, p. 43, Eff. Feb. 14, 1967.

PART 6. CERTIFICATION FOR LIBRARIANS OF PUBLIC LIBRARIES

R 397.61 Rescinded.

History: 1944 AC, p. 429; 1944 ACS 30, p. 8; rescinded 1944 ACS 39, p. 9; 1954 AC, p. 4204.

R 397.63 Certification for positions held on July 1, 1942.

Rule 63. (1) W.P.A. workers retained by their local library boards in the positions they held on July 1, 1942, shall be issued certificates for the positions held on that date.

(2) No certificates be issued to substitute librarians.

(3) No certificates shall be issued to volunteer workers filling library positions.

(4) Libraries shall be notified that volunteers must be paid assistants, or be replaced by paid assistants before June 30, 1944.

(5) No persons holding the dual position of board member and paid library worker on July 1, 1942, shall be issued a certificate.

(6) In class V libraries, a person holding a professional position on July 1, 1942, shall be certified for that class of position and shall be counted in the 40%.

(7) In class V libraries, librarians shall be certified for the general class of position held on July 1, 1942, rather than for the specialized position held on that date. This will allow trained or untrained assistants to be shifted between departments without losing their certification status provided that they remain within their class of position.

(8) In issuing certificates for part-time personnel employed as of July 1, 1942, only those persons shall be certified who were working a minimum of half of the weekly hours that the library was open, provided that this was not less than 12 hours in class II libraries or less than 20 hours in class III, IV, and V libraries.

(9) Where 2 associate librarians existed on July 1, 1942, they shall be certified as listed, but the library board shall be notified that, when a change occurs, the positions shall be altered to librarian and assistant.

History: 1944 AC, p. 430; 1944 ACS 6, p. 56; 1944 ACS 1, p. 20; 1954 AC, p. 4204.

R 397.64 Rescinded.

History: 1944 AC, p. 431; 1944 ACS 1, p. 20; 1944 ACS 6, p. 56; rescinded 1944 ACS 39, p. 9; 1954 AC, p. 4204.

R 397.65 Effective dates of certification requirements.

Rule 65. The certification requirements are effective September 1, 1966, and shall be used as a basis of qualifying for grants during the year 1968-69 and thereafter. Certification requirements for grants prior to 1968-69 shall be as provided by these rules before the 1965 amendments thereto.

History: 1944 AC, p. 431; 1944 ACS 39, p. 10; 1954 AC, p. 4204; 1954 ACS 49, p. 44, Eff. Feb. 14, 1967.

R 397.66 State aid qualifications.

Rule 66. Libraries shall qualify for state aid grants in 1968-69 and thereafter in accordance with Act No. 286 of the Public Acts of 1965 and the following program:

(a) If the head librarian is a new appointee and meets the educational requirements, the local board will be notified that in order to qualify for state aid grants the head librarian shall obtain and maintain a valid certificate.

(b) The state board for libraries recognizes the difficulty in finding qualified personnel. If a public library board finds it necessary to hire a person who does not meet the full educational qualifications, permission may be granted by the state board to employ such a person on a temporary, year-to-year basis, upon the showing of necessity.

(c) If full requirements for staff are not being met, plans shall be made for development of personnel, which plans shall be approved by the state board for libraries.

(d) For a library that has met the financial qualifications, the grant shall be released when the minimum standards have been met or evidence is shown of improvement. Where standards are not met, the grant shall be held for further investigation. A letter shall be written to the library board pointing out the development that is necessary and asking that progress be shown before June 30 of a fisal year in order to meet the certification qualifications for a grant in the succeeding fiscal year.

History: 1944 AC, p. 431; 1944 ACS 6, p. 56; 1944 ACS 16, p. 13; 1944 ACS 39, p. 10; 1954 AC, p. 4204; 1954 ACS 49, p. 44. Eff. Feb. 14, 1967.

R 397.67 High school equivalency.

Rule 67. Three years of high school plus 1 year of county normal school shall be considered the equivalent of 4 years of high school for purposes of qualifying for a certificate of library experience.

History: 1944 ACS 1, p. 20; 1944 ACS 39, p. 11; 1954 AC, p. 4205.

R 397.68 Person meeting certification requirements.

Rule 68. It shall be the person who is dealing with the public and actually keeping the library open who must meet the certification requirements in those cases in which the title "librarian" is held by someone else.

History: 1944 ACS 1, p. 20; 1954 AC, p. 4205.

R 397.69 Educational requirements for public librarian's certificate.

Rule 69. (1) The educational directory, part III, colleges and universities, shall be the source for determining accredited colleges, universities and professional schools. The list of accredited library schools in the American library association handbook shall be the source for determining accredited library schools.

(2) An applicant for a librarian's certificate shall file proof of educational qualifications with the state board for libraries. This proof may be a transcript of the applicant's educational record or a statement from the proper official of the high school, college or library school attended, certifying his educational status.

History: 1944 ACS 6, p. 57; 1944 ACS 39, p. 11; 1954 AC, p. 4205; 1954 ACS 49, p. 45. Eff. Feb. 14, 1967.

R 397.71 Certification for librarians of library systems and public libraries.

Rule 71. (1) These requirements are effective September 1, 1966.

(2) A librarian's permanent professional certificate shall be granted to a person who has the following qualifications:

(a) A bachelor's degree from a college or university accredited by a regional accrediting body or approved by the state board for libraries.

(b) A master's degree or its equivalent from a library school accredited by the American library association.

(c) Four years of satisfactory professional experience in a library or libraries approved by the state board for libraries after completion of the educational requirements in subdivisions (a) and (b) of this subrule.

(d) As of July 1, 1965, a librarian holding a librarian's permanent certificate issued by the state board for libraries shall be granted a librarian's permanent professional certificate.

(e) A person employed as of July 1, 1965, who has had at least 10 years of approved professional library experience in a Michigan public library may be

granted a librarian's permanent professional certificate after successfully passing an examination prepared by the state board for libraries.

(3) A librarian's professional certificate shall be granted, valid for 4 years, to a person who meets the qualifications stated in (a) and (b) of subrule (2) of this rule. This may be exchanged for a librarian's permanent professional certificate as soon as the experience requirement is met.

(4) A special professional certificate shall be granted to a person having a master's degree in a special subject field, other than library science, and employed in a professional capacity in a public library.

(5) A librarian's limited certificate shall be granted to a person who is employed in a Michigan public library and who is:

(a) A college graduate with 24 semester hours of library science (major or its equivalent), or

(b) A college graduate enrolled in a library school accredited by the American library association.

(6) A limited professional certificate shall be granted to a person who is a college graduate with a major (24 semester hours) in a subject field, and is employed in a Michigan public library.

(7) A library technician's certificate shall be granted to a person upon completion of a 2-year library technician curriculum at an institution approved by the state board for libraries.

(8) A certificate of library experience shall be granted, valid for 3 years, to a person who has graduated from high school and successfully completed 1 library workshop, or has equivalent training approved by the state board for libraries, within 2 years after his appointment. This may be reissued by the state board for libraries upon submission of evidence of continuing growth through academic courses, institutes or other in-service education.

History: 1944 ACS 39, p. 11; 1954 AC, p. 4206; 1954 ACS 49, p. 44, Eff. Feb. 14, 1967.

R 397.72, R 397.73 Rescinded.

History: 1944 ACS 39, pp. 11, 12; 1954 AC, pp. 4205, 4206; rescinded 1954 ACS 49, p. 45, Eff. Feb. 14, 1967.

R 397.77 Definitions.

Rule 77. "Cooperative" and "federated" are synonymous terms for purposes of identification of the type of library system.

History: 1954 ACS 49, p. 45, Eff. Feb. 14, 1967.

R 397.78 Local support.

Rule 78. A public library shall receive minimum local library support of $\frac{3}{10}$ mill on the state equalized valuation of the supporting unit or units of government to be eligible for legal membership in a library system and to be included in the population eligible for system grants. The state equalized valuation used to determine eligibility of a library system shall be that of the current year except in such cases as it is not determined in which cases the prior year shall be used.

History: 1954 ACS 49, p. 45, Eff. Feb. 14, 1967.

R 397.79 Contractual payments.

Rule 79. Contractual agreements in a library system plan under which the payment for the contract services equals or exceeds the necessary per capita matching funds may be used to qualify the library system under section 15 of Act No. 286 of the Public Acts of 1965, being §397.515 of the Michigan Compiled Laws.

History: 1954 ACS 49, p. 45, Eff. Feb. 14, 1967.

R 397.80 Provisional systems.

Rule 80. For approval as a provisional library system, evidence of the plan to meet full population requirements shall be submitted and shall be based on 1 or more of the following:

(a) 1970 population figures projected by reliable sources, such as planning commission's studies, special census committees, Detroit Edison, or other comparable agencies.

(b) Written evidence or minutes of board meetings that show expressed interest by unaffiliated libraries or municipalities in joining the system.

(c) Concrete plans by the system to encourage extension of its service area.

History: 1954 ACS 49, p. 46, Eff. Feb. 14, 1967.

R 397.81 Basis for approval of system plans.

Rule 81. The state board of education shall base its approval of a system plan on needs as set forth in section 24 of Act No. 286 of the Public Acts of 1965, being §397.524 of the Michigan Compiled Laws. A plan may include all or part of such needs.

History: 1954 ACS 49, p. 46, Eff. Feb. 14, 1967.

R 397.91 State aid; late and amended applications.

Rule 91. The state board of education may accept an application for state aid for a library or library system after the legal filing date of November 15 on presentation of evidence of necessity, and may accept an amended or revised application after the legal filing date.

History: 1954 ACS 49, p. 46, Eff. Feb. 14, 1967.

R 397.92 State aid based on short fiscal period.

Rule 92. A public library having completed a fiscal period of less than 12 months, but of at least 2 months, prior to July 1 of the year in which distribution of state aid is to be made, shall qualify on the monthly percentage of ⅗₀ mill on the state equalized valuation of the supporting local government for such fiscal period.

History: 1954 ACS 49, p. 46, Eff. Feb. 14, 1967.

DEPARTMENT OF SOCIAL SERVICES

GENERAL RULES

(By authority of sections 1, 3, 6, 9, 10, 14, 18, 21, 24, 25, 25a, 26, 28, 29, 33, 35, 36, 37, 42, 52, 55, 56, 56c, 57, 59, 60, 66a, 66b, 66d, 67, and 114 of the Public Acts of 1939, as amended, Act No. 2 of the Public Acts of the First Extra Session of 1960, Act No. 47 of the Public Acts of the First Extra Session of 1944, section 16 of chapter 12A of Act No. 288 of the Public Acts of 1939, as amended, sections 7, 9, 451, 452, and 453 of Act No. 380 of the Public Acts of 1965, Act No. 68 of the Public Acts of 1915, as amended, section 7 of Act No. 220 of the Public Acts of 1935, as amended, section 2 of Act No. 185 of the Public Acts of 1925, as amended, section 3a of Act No. 183 of the Public Acts of 1925, and section 33 of Act No. 306 of the Public Acts of 1969, as amended, being §§400.1, 400.3, 400.6, 400.9, 400.10, 400.14, 400.18, 400.21, 400.24, 400.25, 400.25a, 400.26, 400.28, 400.29, 400.33, 400.35, 400.36, 400.37, 400.42, 400.52, 400.55, 400.56, 400.56c, 400.57, 400.59, 400.60, 400.66a, 400.66b, 400.66d, 400.67, 400.114, 400.361 et seq., 722.101 et seq., 712A.16, 16.107, 16.109, 16.551, 16.552, 16.553, 400.301 et seq., 400.207, 803.102, 804.103a, and 24.233 of the Michigan Compiled Laws)

PART 1. PUBLIC ASSISTANCE

GENERAL ASSISTANCE PROVISIONS

R 400.1 Definition.

Rule 1. The word "client" as used by the department in any of its written material shall be construed to include in its meaning the applicant for assistance and the recipient of assistance.

History: 1954 ACS 13, p. 75, Eff. Feb. 14, 1958.

Editor's note: Former R 400.1 to R 400.20, pertaining to public assistance, were rescinded by 1954 ACS 13, p. 79. For history of the rescinded rules, see 1977 AACS, p. 242.

R 400.2 Applications.

Rule 2. (1) To apply for assistance is considered a right of an individual who considers himself eligible for assistance for himself or for another, and shall not be denied or limited.

(2) Applications shall be acted upon in the chronological order of their receipt in accordance with the standard of promptness established by federal regulations.

History: 1954 ACS 13, p. 75, Eff. Feb. 14, 1958; 1954 ACS 67, p. 44, Eff. May 25, 1971.

R 400.3 Residence.

Rule 3. (1) A resident of the state is one who is living in Michigan voluntarily with the intention of making his home here and not for a temporary purpose. Residence may not depend upon the reason for which an individual entered the state, except insofar as it may bear upon whether he is here voluntarily or for a "temporary purpose."

(2) Temporary absence from the state, with subsequent return to the state, or intent to return when the purposes of the absence have been accomplished, does not interrupt continuity of residence.

(3) Temporary absence means either an absence of 90 days or less during which time a home is not maintained in Michigan, or any absence during which a home is maintained in Michigan in which the person is domiciled at least 6 months out of the year.

(4) When a recipient's move to another state is not temporary as defined in subrules (1), (2), and (3), eligibility may continue until application is made and assistance received from the other state, or for 60 days, whichever occurs first, regardless of whether he has maintained domicile in Michigan.

History: 1954 ACS 13, p. 75, Eff. Feb. 14, 1958; 1954 ACS 67, p. 45, Eff. May 25, 1971; 1954 ACS 78, p. 28, Eff. Feb. 22, 1974.

R 400.4 Need.

Rule 4. (1) Eligibility on the basis of need is considered to exist only if the net monthly requirements of an applicant or recipient (individual or family) as determined by standards established by the department exceed available income by $1.00, for old age assistance, aid to the blind, aid to the disabled, $2.00 for aid to dependent children. The monthly grant shall be the amount of the deficit computed to the nearest whole dollar amount for all category recipients.

(2) A client eligible for old age assistance, aid to the blind, or aid to the disabled is considered eligible to receive assistance for the entire monthly pay period in respect to any part of which he is found eligible and for which payment may be made.

(3) A client eligible for aid to dependent children is considered eligible for the entire semimonthly pay period in respect to any part of which he is found eligible and for which payment may be made.

History: 1954 ACS 13, p. 75, Eff. Feb. 14, 1958; 1954 ACS 34, p. 14, Eff. May 15, 1963; 1954 ACS 67, p. 45, Eff. May 25, 1971; 1954 ACS 74, p. 76, Eff. Jan. 13, 1973; 1954 ACS 76, p. 55, Eff. Aug. 22, 1973.

R 400.5 Institutional status.

Rule 5. (1) For eligibility purposes, a person in need of continual or continuing care shall be presumed to be receiving proper care outside an institution until he has been admitted to an institution.

(2) "Institution" means an establishment which furnishes food and shelter to 4 or more persons unrelated to the proprietor and provides treatment or services which meet some need beyond the basic provision of food and shelter.

(3) "Public institution" means an institution that is the responsibility of a governmental unit or over which a governmental unit exercises administrative control.

(4) "Inmate of a public institution" means a person who is living in a public institution, with the following exceptions:

(a) A person who is a patient in a medical institution as defined by Michigan statute.

(b) A person who is in a public institution which has for its primary purpose the providing of educational or vocational training, and who is there for the purpose of securing educational or vocational training.

(c) A person who is in a public institution for a temporary emergency, pending other arrangements appropriate to his need.

(5) "Patient" means a person who is in need of and receiving professional services directed by a licensed practitioner of the healing arts toward maintenance, improvement or protection of health, or alleviation of illness, disability or pain. A patient shall be considered to be in a medical institution if he has been admitted to such an institution to participate in the living arrangements and to receive treatment or services provided there which are appropriate to his requirements.

R 400.6 Confidentiality.

Rule 6. (1) All records relating to disbursements to deceased former recipients of old age assistance are hereby declared to be open to public inspection and shall be available for use as may be necessary from time to time in connection with the presentation or establishment of a claim for reimbursement against the estate of any such deceased former recipient or that of his spouse.

(2) The following information concerning applicants or recipients shall be considered confidential in nature:

(a) Names and addresses of applicants and recipients and amounts of assistance given, except as written application is made for such information as provided by statute.

(b) Data contained in applications and records of investigations, reports of medical examinations, canceled assistance warrants, correspondence, reports concerning conditions or circumstances of any person from or about whom information is obtained, including any of this information regardless of whether it is recorded; and

(c) Records of agency evaluations of such information.

(3) When necessary for purposes directly related to the administration of public assistance, confidential information may be given to public agencies, boards, departments, appointed officials, courts, or to recognized social agencies who are rendering service or who have been asked to render service to applicants for or recipients of assistance or other services.

(4) When confidential information is released, the person or organization to whom it is given must be informed that:

(a) The confidential nature of the information must be preserved;

(b) The information furnished must be used only for the purpose for which it was made available; and

(c) Assurance must be given that proper steps will be taken to safeguard the information.

History: 1954 ACS 13, p. 76, Eff. Feb. 14, 1958; 1954 ACS 67, p. 45, Eff. May 25, 1971.

R 400.6a Client reports.

Rule 6a. A client's continuing obligation to supply information to the department, as required by section 60 of Act No. 280 of the Public Acts of 1939, as amended, being §400.60 of the Michigan Compiled Laws, shall be met if the client makes an accurate report of the information which is received by the department not later than 10 calendar days after the information is known to the client.

History: 1954 ACS 67, p. 45, Eff. May 25, 1971; 1954 ACS 85, p. 31, Eff. Dec. 17, 1975.

R 400.7 Rescinded.

History: 1954 ACS 13, p. 76, Eff. Feb. 14, 1958; rescinded 1954 ACS 61, p. 50, Eff. Feb. 16, 1970.

SPECIAL ASSISTANCE PROVISIONS

R 400.9 Short name for aid to permanently and totally disabled.

Rule 9. For purposes of convenience, the department will call the program known in the social welfare act as aid to the permanently and totally disabled "aid to the disabled." Wherever aid to the disabled is used in the department's manual of procedures, correspondence, or in these rules, aid to the permanently and totally disabled shall be deemed to be intended.

History: 1954 ACS 13, p. 77, Eff. Feb. 14, 1958.

R 400.10 Eligibility factors related to disability.

Rule 10. (1) In aid to dependent children, mental or physical incapacity is considered to exist if due to mental or physical infirmity the parent is unable to engage in full-time employment, or to perform all the tasks required in a remunerative occupation for which the person under consideration is otherwise qualified, or to engage in employment without endangering life or health. However, if disability of a parent is remediable through treatment or surgery, and a suitable plan therefor is available, eligibility on the basis of incapacity does not exist if the parent refuses to accept treatment or surgery.

(2) When aid to dependent children is granted as a result of a parent's incapacity and the parent's incapacity no longer exists, assistance may continue for a period not to exceed 6 months, if the family is otherwise eligible and if the parent is currently engaged in a rehabilitation program approved by the department of social services.

(3) Eligibility for aid to the blind shall not be contingent upon the recipient's willingness to submit to an operation recommended for the possible restoration of his sight.

(4) Blindness as a basis for determining eligibility for aid to the blind shall exist when an individual is found to have a visual acuity of 20/200 or less in the better eye with correction, or is found to have a limitation of the fields of vision such that the widest diameter of the visual field subtends an angular distance not greater than 20 degrees, through an examination by an ophthalmologist or an optometrist licensed to practice in Michigan.

(5) In aid to the disabled, a person will be considered to be permanently and totally disabled if both of the following have been established by medical and other evidence:

(a) That he has a physical or mental impairment or a combination of impairments which cannot be corrected within 12 months.

(b) That by reason of such impairment he is substantially precluded from engaging in useful occupations for which he is otherwise qualified; or that by reason of such impairment he is unable without the help of another person to carry on the minimum activities essential to daily living as determined by the department of social services.

History: 1954 ACS 13, p. 77, Eff. Feb. 14, 1958; 1954 ACS 45, p. 31, Eff. Feb. 14, 1966; 1954 ACS 67, p. 46, Eff. May 25, 1971.

R 400.11 Home life eligibility factors in aid to dependent children.

Rule 11. (1) Continued absence of a parent from a home constitutes the reason for deprivation of parental care and support when:

(a) Absence is due to estranged separation of the parents for any reason.

(b) Absence is due to imprisonment, on sentence of 3 months or more, not considering allowance for parole.

(c) The parent is a patient in a hospital or institution for the mentally diseased, epileptic or feebleminded, or in a hospital or sanatorium for the treatment of tuberculosis, or confined in a hospital or institution as a sex deviate.

(d) The parent has been deported from the United States.

(e) Parental rights have been terminated and the child is a permanent ward of the juvenile division of the probate court.

(2) Temporary absence from the home of either relative or child during receipt of aid to dependent children does not affect eligibility if the absent member of the household has not established another abode of a permanent nature.

(3) For eligibility for aid to dependent children, a child meets the requirements of living with 1 of the relatives specified in the social welfare act if his home is with a person included in 1 of the following groups:

(a) Blood relatives, including those of the half blood, except cousins more remote than first cousins once removed. Relationships to persons of preceding generations as denoted by prefixes of grand, great, or great-great are within this definition.

(b) Spouses of persons specified in the social welfare act or included in the groups in subdivision (a). Such a relative may be considered within the scope of this provision although the marriage which created the relationship has been terminated by death or divorce.

(4) The home in which children live is considered suitable until a juvenile court has determined that the home is an unfit place for children to live and has removed all the children from the home. Upon identification of conditions which threaten the well-being of the children, the services of the department of social services as well as those of other available community resources shall be focused upon such conditions in order to bring about improvements. If conditions deteriorate to the extent that the children appear to come within the provisions of section 2(b)(1) and (2) of Act No. 54 of the Public Acts of 1944, as amended, being §712A.2 of the Michigan Compiled Laws, as amended, a complaint alleging neglect shall be filed by the department in the juvenile court.

(5) A parent who is receiving assistance for his children, and each other person age 16 or older whose needs are included in an aid to dependent children assistance budget, shall be registered with the employment security commission and shall accept available employment or training for employment for which the person is qualified and shall accept referral for vocational education or rehabilitation services if needed to overcome a handicap to employment unless the person is determined by the department of social services to come within any of the following provisions:

(a) The person is employed full time.

(b) The person is an eligible child and is attending school full time. A child is considered to be in school full time when absent for official school vacation, illness, convalescence, family emergency or labor dispute.

(c) The person is in a recognized training program under the auspices of a secondary agency sponsor which is likely to lead to regular employment or has a specific plan to begin such full-time activities within 90 days.

(d) The person is engaged full time in a course of study leading to a high school diploma.

(e) The person is 65 years of age or older, or ill, or needed in the home due to the illness of a family member.

(f) The mother or adult acting in place of the mother has a child in the home under age 6.

(g) The cost of child care would equal or exceed the wages the mother or other adult acting in place of the mother could be expected to earn from employment.

(h) Adequate child care is not available during absence of the parent or other adult. To be determined adequate, child care shall be appropriate to the age, special handicaps and other conditions of the individual child in need of care, and the provider of care shall meet applicable federal and state standards. Adequate care is assured when such care is in fact available and when the cost, if any, will be met by the department of social services.

(i) The person's participation in employment or training would not be in the best interests of the person or family for other reasons, as determined by the department of social services.

(6) Eligibility for aid to dependent children does not exist if a person refuses without good cause to meet the requirements of subrule (5) except for persons

enrolled in the work incentive program as provided in section 402(a)(19)(F) of the social security act. Good cause for refusal to meet these requirements shall be determined by the department of social services to exist under any of the following conditions:

(a) Accident, temporary illness or comparable emergency involving the person or his family.

(b) A plan for permanent rehabilitation or self-support is currently in process, and compliance would interrupt these services or activities, other than a course of study beyond a high school diploma for a person who is a grantee or other eligible adult.

(c) Compliance would interfere with the likelihood that the person would be reemployed at his regular full-time employment within 30 days.

(d) Child care is needed and adequate child care is not assured.

(e) The person alleges discrimination on account of race, religion, sex or national origin and is taking legal action to redress his grievance.

(f) The offer of employment is not for a specific job at a stated wage or the stated wage is below applicable minimum wage rate requirements or below the customary wage in the community for the particular kind of work.

(g) Employment or training available is not within the normal geographic work area or involves unreasonable requirements, such as excessive hours or dangerous working conditions or is not within the person's physical or mental abilities.

History: 1954 ACS 13, p. 78, Eff. Feb. 14, 1958; 1954 ACS 24, p. 27, Eff. Nov. 12, 1960; 1954 ACS 37, p. 45, Eff. Feb. 14, 1964; 1954 ACS 39, p. 12, Eff. Aug. 14, 1964; 1954 ACS 67, p. 46, Eff. May 25, 1971; 1954 ACS 68, p. 33, Eff. June 28, 1971.

R 400.12 Eligibility factors related to property and income.

Rule 12. (1) For aid to the blind and aid to the disabled, property limitations and property exemptions shall be the same as those provided by law for old age assistance. In addition, in case of a person applying for or receiving such aid who has a plan for achieving self-support, amounts of property necessary to fulfillment of the plan shall be disregarded for the period during which the person is actually undergoing vocational rehabilitation not to exceed a period of 36 months. Such plan for achieving self-support shall be approved by the department of social services.

(2) For aid to dependent children, when the only recipient is to be 1 eligible child, property limitations and property exemptions shall be the same as provided by law for a single old age assistance client. When there are 2 or more eligible persons, children or adults or both, in the assistance group, property limitations and exemptions shall be the same as provided by law for the old age assistance client who is married and not separated from the spouse.

(3) In aid to dependent children the property of other relatives acting in the place of parents must also be considered under this rule in determining eligibility if any of the requirements of such relatives are included in the assistance budget.

(4) In case of an applicant for or recipient of aid to the blind, aid to the disabled, or aid to dependent children who does not qualify for the exemption of farm stock or implements and who has a plan, approved by the department of social services, for attaining or retaining remunerative employment, tools, and equipment necessary to fulfillment of the plan shall be disregarded in the amount of $750.00, in addition to the property exemptions set forth in subrules (1), (2), and (3).

(5) In determining need for aid to dependent children income shall be considered to include the income of the following members of the family unit living together

Digitized by Google Original from UNIVERSITY OF MICHIGAN

(a) Children in need who are of eligible age, except no inquiry or consideration will be made of the amount of earnings of a child under age 14.

(b) A parent of an eligible child.

(c) A stepparent if the stepparent is applying for or receiving assistance for himself.

(d) An applicant (or grantee) and spouse, when other than parents, if applying for or receiving assistance for themselves.

(6) A client who assigns or transfers real or personal property for the purpose of qualifying for aid to dependent children, old age assistance, aid to the blind, or aid to the disabled is ineligible for a period of time equal to the time the value of such property would have maintained him according to assistance standards.

(7) A client shall provide to the department of social services information known to the client about his financial condition, including potential resources and sources of income. A client's potential resources and sources of income, including those to which he is entitled by right and those which can be legally developed within the client's means or with the assistance of the department or other community resources, are to be developed to a status of availability. Assistance payments or services shall not be withheld or reduced by the department because of a client's potential resources or sources of income pending their development to a status of availability unless such development requires action by the client which he is not willing to take.

(8) In determining need for aid to the blind, the first $85.00 per month of income earned by the applicant or recipient plus one-half of earned income in excess of $85.00, shall be disregarded. In the case of an applicant or recipient who has a plan for achieving self-support, such additional amounts of income, whether from earnings or from any other source, as may be necessary to the fulfillment of the plan shall be disregarded for a period not to exceed 36 months. Such plan for achieving self-support must be approved by the state department of social welfare.

(9) When federal law or regulation requires that any earnings, training incentive payments, expense allowances, or other income are not to be considered in determining the need of individuals for public assistance, such income shall be disregarded. Types of income shall be defined in accordance with federal regulations.

(10) Only income and resources which are available in fact for current use are to be considered in determining the need of individuals for assistance and the amount of payments to or for them.

History: 1954 ACS 13, p. 78, Eff. Feb. 14, 1958; 1954 ACS 25, p. 37, Eff. Feb. 14, 1961; 1954 ACS 35, p. 50, Eff. Aug. 14, 1963; 1954 ACS 39, p. 12, Eff. Aug. 14, 1964; 1954 ACS 45, p. 31, Eff. (3) All rules and regulations, policies and practices adopted by any county, city or district department of social welfare in relation to family planning shall conform to the program of the state social welfare commission.

History: 1954 ACS 45, p. 32, Eff. Feb. 14, 1966.

STATE-COUNTY PARTICIPATION IN COSTS OF FOSTER CARE

R 400.21 Permissible charges to county child care funds.

Rule 21. (1) For purposes of administration of the child care fund, foster care may include:

(a) Foster care provided by licensed child caring institutions or child placing agencies pursuant to an order of the juvenile division of the probate court or request of the county department of social welfare.

(b) Foster care provided under the direct supervision of the juvenile division of the probate court for children for whom the court has accepted jurisdiction under the juvenile code.

(c) Care under the direct supervision of the juvenile division of the probate court in a detention home conducted as an agency of the court under the statutes authorizing the establishment of such institutions, or in a licensed home or licensed institution designated by the court as a suitable place of detention.

(d) Foster care provided under the direct supervision of the county department of social welfare. Such care must be in accordance with the standards set forth in section 18c of Act No. 280 of the Public Acts of 1939, and the rules thereunder.

(e) Care at boys' vocational school and girls' training school, including boarding care provided by these two institutions, under Act No. 185 of the Public Acts of 1925, as amended, and Act No. 183 of the Public Acts of 1925, as amended.

(f) Care provided by Michigan children's institute under Act No. 220 of the Public Acts of 1935, as amended.

(g) Purchase of adoption services for court wards from licensed voluntary child placement agencies.

(h) Adoption subsidy payments made in accordance with section 13a of chapter 10 of Act No. 288 of the Public Acts of 1939, as amended, being §710.13a of the Michigan Compiled Laws.

(2) Act Nos. 104, 106, 112, 113, and 114 of the Public Acts of 1955 have no retroactive effect except as specifically provided therein.

(3) "Admitted to foster care," as found in Act Nos. 112 and 113 of the Public Acts of 1955, refers to the most recent order of admission, commitment, or placement authorized by the juvenile division of the probate court or by the county department of social welfare.

History: 1954 ACS 5, p. 56, Eff. Feb. 15, 1956; 1954 ACS 13, p. 80, Eff. Feb. 14, 1958; 1954 ACS 74, p. 77, Eff. Jan. 13, 1973.

R 400.22 State reimbursement for foster care expenditures from county child care funds.

Rule 22. (1) The juvenile division of the probate courts and the county departments of social welfare seeking reimbursement for foster care expenditures out of the county's child care fund shall report monthly to the state department of social welfare on the forms provided and according to the definitions established by the state department.

(2) State reimbursement for expenditures from a county child care fund shall be calculated:

(a) Cumulatively on a calendar year basis, including expenditures as reported by the counties each month, January through December.

Digitized by Google Original from UNIVERSITY OF MICHIGAN

Generated for Susan K Kendall (Michigan State University) on 2018-09-05 16:48 GMT / http://hdl.handle.net/2027/mdp.49015002898253

(b) Upon county disbursement currently reported according to account classifications established by the department. Amounts no greater than rates established by the department will be eligible for reimbursement. In a case of demonstrated special need of a child not a court ward, larger amounts may be charged by prior agreement of the director of the state department and a county social services board. In a case of demonstrated special need for a court ward larger amounts may be reimbursed by prior agreement of the director of the state department and a judge of probate of the affected county. This rule shall not be construed to limit the right of a court to authorize payment necessary for the best interest of any child beyond reimbursable amounts.

(3) The rules adopted by the committee of the probate judges association appointed for the purpose of promulgating rules in accordance with section 25 of chapter 12A of Act No. 288 of the Public Acts of 1939, as amended, being §712A.25 of the Michigan Compiled Laws, shall constitute the basis of audit and payment to counties in respect to expenditures authorized by the probate court.

History: 1954 ACS 5, p. 57, Eff. Feb. 15, 1956; 1954 ACS 13, p. 80, Eff. Feb. 14, 1958; 1954 ACS 74, p. 77, Eff. Jan. 13, 1973.

R 400.23 Standards for foster care and service provided by county departments.

Rule 23. (1) "Foster care financed by a county department" means care provided to a child living outside his own home in either:

(a) A licensed foster home.

(b) The home of a guardian or of relatives other than those of parents.

(c) A shelter care institution operated by a county department.

(d) A licensed private child care institution or placement agency.

(e) A boarding school.

(2) A county department may provide foster care to a child under 18 years of age, utilizing the department of social services sub-account of the county child care fund in the following circumstances:

(a) A written application for foster care has been received from a child's parent, legal guardian or other custodian, and financial need is not the sole reason for a request for foster care.

(b) In an emergency situation such as may exist when a child is without an immediate plan for his care, or during pendency of a petition requesting that a probate court assume responsibility for care.

(c) When a child is not eligible for a state-federal program, or when a county director approves such expenditures for a 30-day period during pendency of an application for participation in a state-federal program.

(d) When a probate court having jurisdiction of a child orders placement of a child in foster care, and there are sufficient funds in a county department's child care sub-account to meet the financial obligation of care, and an agreement has been made between the court and a county department.

(3) A county foster care program shall be structured as directed by the state department and shall consist solely of state employees assigned civil service position classifications at the same level as those assigned staff of the state foster care program.

(4) A county foster care program shall be uniform for all children in foster care without regard to the funding source.

(5) A county foster care program shall include a placement plan in the best interests of each child including either of the following:

(a) Care under direct supervision of a county department.

(b) Purchase of family foster care or institutional care from a private agency.

(6) Appropriate medical care shall be provided each child in foster care. If the court order of commitment has not authorized provision of medical care, authorization to provide the care shall be obtained from a parent or legal guardian. Application of appropriate state-federal medical care programs shall be made and state and federal medical care programs shall be first utilized.

(7) For each child in foster care a record containing all legal documents, medical records, application forms, social data and agreements for purchase of care shall be maintained by the placement county, unless a family public assistance case record exists containing these data.

(8) A record shall reflect the following activities:

(a) Continuous effort with a child and his family toward returning the child to his home.

(b) Observations of foster parents reported to the worker.

(9) If a child is not returned to his home at the end of 1 year, the record shall also show that:

(a) Steps are being taken to terminate parental rights to facilitate the child's adoption.

(b) Other permanent living arrangements are being made in the best interests of the child, including:

(i) Return to his own home.

(ii) Independent living for a child 17 years of age.

(iii) A permanent foster care plan. An annual review shall be completed when a permanent living arrangement utilizing continued use of child care funds continues beyond 1 year.

(10) Foster care may be purchased only from private agencies or boarding schools with which the county department has executed a written purchase of service agreement.

(11) When children in foster care are legally adoptable a county department shall establish a service for recruiting adoption homes, including registration in an inter-county adoption exchange (DARE) within 90 days after placement in foster care.

(12) Potential resources legally available to a child shall be pursued, including applying for benefits for which a child may be eligible, and seeking reimbursement in whole or in part for the foster care from relatives legally responsible for support.

(13) When a child is placed for foster care in a county other than that of original financial responsibility the following procedure shall be observed:

(a) A written notice of intended placement shall be given to the county department involved.

(b) Ongoing care planning, review and approval of claims for payment shall become the responsibility of the county department of placement.

(c) Upon review and final approval by the county department of original financial responsibility, payments shall be processed by the county department of responsibility so as to avoid charge-backs between counties.

(d) Reports shall be made to the county department of original financial responsibility by a county of placement at 90 day intervals.

(e) Termination of placement plans shall be by mutual agreement between a county department of original responsibility and a county department of placement.

STATE-VENDOR PARTICIPATION IN MEDICAL COSTS

R 400.24 Time limitation on claims by county social welfare board.

Rule 24. All claims incurred and paid by the county social welfare board involving vendor medical service for which state reimbursement is sought must be submitted to the county bureau of social aid on a monthly basis but not later than the end of the fifth month following the month in which the latest continuous service in the same class is rendered. Provided, that the state department may pay a bill submitted beyond the fifth month if in its judgment there are extenuating circumstances and if federal financial participation can be obtained.

History: 1954 ACS 12, p. 48, Eff. Nov. 21, 1957; 1954 ACS 13, p. 80, Eff. Feb. 14, 1958; 1954 ACS 30, p. 17, Eff. May 15, 1962.

R 400.25 Determination of percentage of state participation.

Rule 25. The commission will redetermine from time to time the percentage of the costs of hospitalization to be paid by the state department under section 66a of the social welfare act, and such determination shall be applicable to invoices approved by the supervisor of the bureau of social aid in the month or months following such determination, regardless of the date the expense for hospitalization was incurred.

History: 1954 ACS 12, p. 48, Eff. Nov. 21, 1957; 1954 ACS 13, p. 80, Eff. Feb. 14, 1958.

R 400.26 Enforcement of patient's right to hospitalization.

Rule 26. (1) "Promptly" as used in section 66b of the social welfare act and this rule shall, in nonemergency cases, be defined as "within 30 calendar days." Failure of a county department to make a decision promptly on an application for hospitalization by a person who is receiving old age assistance, aid to dependent children (except a person so receiving as an eligible child), aid to the blind, or aid to the permanently and totally disabled, as required by section 66b of the social welfare act, shall be considered to be a determination that hospitalization is not necessary, and the supervisor of the bureau of social aid shall then, with the consent of the applicant, petition for a hearing as provided in sections 66d and 9 of the social welfare act.

(2) The county social welfare board shall comply with a decision made by the director of the state department under R 400.7 concerning hospitalization within 5 working days following receipt of the notice of the decision.

(3) If the county social welfare board does not comply with the decision of the director of the state department as required by subrule (2), the bureau of social aid of the county department of social welfare shall arrange for or approve the necessary hospitalization and shall authorize payment by the state department for it.

(4) The county portion of the costs of hospitalization, when incurred under subrules (2) or (3), shall be recovered by the state department by withholding the amount from any funds due the county social welfare board by the state department.

History: 1954 ACS 12, p. 48, Eff. Nov. 21, 1957; 1954 ACS 13, p. 80, Eff. Feb. 14, 1958.

PART 2. INTER-COUNTY DISPUTES

R 400.31 Appeal; petition.

Rule 31. A county desiring to appeal a dispute with another county or counties concerning settlement of a person or family granted or in need of any form of public aid or relief shall file a petition in writing with the state department of

social welfare on such forms and in such manner as prescribed by said state department.

History: 1944 AC, p. 1358; 1954 AC, p. 4307.

R 400.32 Answer.

Rule 32. Upon notice from the state department of social welfare, the defending county or counties shall file an answer to the original petition on such forms and in such manner as prescribed by the state department of social welfare.

History: 1944 AC, p. 1358; 1954 AC, p. 4307.

R 400.33 Statement of findings.

Rule 33. The director of the state department of social welfare shall prepare and submit to each county concerned a statement of findings of the department, and its decision shall be binding unless appealed.

History: 1944 AC, p. 1358; 1954 AC, p. 4307.

R 400.34 Appeal of department decision.

Rule 34. Either party to the dispute shall have the right to appeal the decision of the department and request a hearing before the Michigan social welfare commission.

History: 1944 AC, p. 1358; 1954 AC, p. 4307.

R 400.35 Hearing date; notice.

Rule 35. A date for the hearing shall be set and every party to the dispute shall be given fair notice.

History: 1944 AC, p. 1358; 1954 AC, p. 4307.

R 400.36 Representation; evidence.

Rule 36. Each party to the dispute shall be permitted such representation, counsel, witnesses, and to submit such evidence as it desires as long as it has direct bearing on the case.

History: 1944 AC, p. 1358; 1954 AC, p. 4307.

R 400.37 Findings of fact; decision.

Rule 37. The Michigan social welfare commission shall hear and weigh all evidence, and shall instruct the director of the state department of social welfare to prepare in writing its findings of the facts and its decision, which shall be binding upon the various counties.

History: 1944 AC, p. 1358; 1954 AC, p. 4307.

R 400.38 Hearing; settlement determination.

Rule 38. A client whose settlement is in dispute may ask for a hearing before the director of the state department of social welfare for determination of settlement.

History: 1944 AC, p. 1358; 1954 AC, p. 4307.

PART 3. INSPECTION AND LICENSING

COUNTY INFIRMARIES

R 400.51 Inspection.

Rule 51. The recommendations of local and state departments of health and the fire marshal's division of the Michigan state police must be carried out if the infirmary is to obtain the approval of the Michigan social welfare commission.

History: 1944 AC, p. 1359; 1954 AC, p. 4308.

R 400.52 Housing.

Rule 52. (1) Plans and specifications for new buildings and for additions or major building changes must be approved by the social welfare commission. All building plans must comply with the state housing law (Act No. 167 of the Public Acts of 1917, as amended).

(2) Buildings and equipment shall be maintained in such a condition as to insure proper safety and sanitation.

(3) All sleeping rooms and day rooms shall be outside rooms with sufficient window space to provide ample light and ventilation. All doors and windows shall be screened.

(4) The arrangement of rooms shall be such as to permit segregation according to sex, character, and physical condition. Exception to this may be made in the case of married couples.

(5) One or more rooms shall be available for the isolation of persons with communicable diseases or for critically ill patients who shall be under the direct care of a physician.

(6) A room shall be set aside where residents may listen to radio programs, read newspapers, books and magazines, play card games, etc. Such a room shall be kept pleasant and comfortable.

History: 1944 AC, p. 1359; 1954 AC, p. 4308.

R 400.53 Equipment.

Rule 53. (1) Each resident shall be provided with a clean, comfortable individual bed and with adequate bed linen including sheets large enough to cover the mattress. Rubber sheets shall be provided if needed. Sheets and pillow cases shall be changed at least once a week or more frequently if essential to the maintenance of cleanliness. Each newly admitted resident shall be provided with a complete change of bed linen.

(2) There shall be a minimum of 40 square feet of floor space per bed, heads of beds shall be at least 3 feet apart.

(3) Each resident shall have 1 comfortable chair in addition to cupboard, locker, or drawer space for the storage of clothing and personal effects.

(4) Each infirmary kitchen shall have refrigeration facilities adequate to prevent food spoilage. Sanitary and well arranged space shall be provided for the storage of food supplies.

(5) Dish washing facilities shall be such that dishes are sterilized either by sufficiently hot water or by immersion in an approved antiseptic solution.

(6) The tops of dining tables shall be washable and without cracks or worn places. No cracked dishes or chipped enamelware shall be used.

(7) Adequate and sanitary laundry facilities shall be provided for washing, rinsing, wringing, drying and ironing clothing and linen. Laundry work shall be directly supervised by a staff member.

(8) There shall be heating facilities capable of maintaining a temperature of not less than 72 degrees Fahrenheit in all occupied quarters.

History: 1944 AC, p. 1359; 1954 AC, p. 4308.

R 400.54 Personnel.

Rule 54. (1) The infirmary staff shall be competent and of sufficient number to insure adequate administration.

(2) Staff members shall be of good character and reputation and shall be selected with due regard to a proper attitude toward the aged and an understanding of the problems of the aged.

(3) Staff members will assume the responsibility for the satisfactory performance of all work done by residents. All work done by infirmary residents shall be supervised by a staff member.

(4) A definite allocation of the duties of residents shall be determined by the superintendent and matron in conjunction with the county social welfare board.

History: 1944 AC, p. 1359; 1954 AC, p. 4309.

R 400.55 Medical care.

Rule 55. (1) The responsibility for making physical examinations of each newly admitted resident and of recording the findings of such examinations shall be delegated to a licensed physician. Physical examinations shall include recognized tests for determining the presence of venereal diseases. X-ray examinations, typhoid checks, and any other examination shall be made whenever case history indicates the need for such procedure.

(2) All food handlers shall be given physical examinations. Blanks supplied by the state department of health shall be used for this purpose.

(3) A licensed physician shall be available and responsible for the medical care of residents. Orders for medication shall be written. Standing orders for common ailments may be formulated by the physician for administration by the matron or nurse.

History: 1944 AC, p. 1360; 1954 AC, p. 4309.

R 400.56 Nursing care.

Rule 56. (1) Residents suffering from contagious or infectious diseases shall be isolated under physician's orders.

(2) Decent privacy and 24-hour nursing care shall be provided for the critically ill and the dying.

(3) Infirmaries not equipped to care for cases of acute illness shall transfer such cases to a licensed hospital.

(4) Mental cases shall not be unduly restrained nor solitarily confined unless such action is essential to the welfare of other residents. Whenever such cases are required to be placed in confinement, they shall be under careful supervision and attention in the interests of their well-being. Mental cases shall be undressed, bathed, fed, and, in general, cared for as well as are all other residents.

History: 1944 AC, p. 1360; 1954 AC, p. 4309.

R 400.57 Care of residents.

Rule 57. (1) Residents shall be subjected to only kind, proper, and humane treatment.

(2) Each resident shall have his own clothing, properly marked, which shall be kept clean and well mended.

(3) It shall be the responsibility of the superintendent and matron to see that residents bathe or are bathed at least weekly or more frequently if essential to personal cleanliness. Towels and washcloths shall be provided and a regular place arranged for them to be kept.

(4) A routine procedure shall be established by which incoming cases shall be prevented from bringing in bedbugs and lice. Immediate steps shall be taken to eradicate existing vermin and to keep all quarters free of vermin.

(5) Food shall be wholesome, ample, of sufficient dietary variety, well cooked and served.

(6) In the event of death, or serious illness or accident, immediate notice shall be given to the nearest relative or friend of the resident.

History: 1944 AC, p. 1360; 1954 AC, p. 4309.

R 400.58 Records.

Rule 58. (1) Each county infirmary shall make a monthly report, on a prescribed form, to the county board of social welfare and shall retain a duplicate copy of such reports.

(2) A chronological register of admissions shall be kept. Records of personal data for each resident shall be kept in any reasonable form prescribed by the county director.

(3) Minimum records shall include name, address, birthplace and date, color, sex, legal status, name and address of nearest friend or relative, reasons for admission and for discharge, property owned, provision for burial and a list of personal belongings.

History: 1944 AC, p. 1360; 1954 AC, p. 4310.

JUVENILE DETENTION HOMES

R 400.71 Approval of plans.

Rule 71. It is recommended that plans for all new juvenile detention homes and for major structural changes in existing homes be submitted for approval by the Michigan social welfare commission. All such plans shall have the approval of the:

(a) State fire marshal.

(b) State or full-time county health department.

History: 1954 ACS 10, p. 14, Eff. June 14, 1957.
Editor's note: Former rules numbered R 400.71—R 400.76 appeared in 1954 AC, pp. 4310-4312.

R 400.72 Housing.

Rule 72. (1) The recommendations of the local or state departments of health and of the state fire marshal as they relate to items of health and safety shall be carried out.

(2) Housing space shall be sufficient to accommodate without crowding the number of children likely to require care at any one time.

(3) Floors, walls, furniture, and equipment shall be in good condition and of a character to permit easy cleaning and shall be kept in good condition.

(4) Arrangement of rooms shall be such as to permit segregation according to sex, character, physical and mental condition.

(5) All sleeping rooms shall be outside rooms with sufficient window space to provide adequate light and ventilaton.

(6) Beds shall be at least 3 feet apart except in emergencies.

(7) All beds shall have sheets and pillow cases as well as blankets. These shall be kept in a clean and sanitary condition.

(8) Each child shall be provided with a comfortable, single bed and shall sleep alone.

(9) Each child shall have a place for and shall be provided with his own personal belongings, such as a towel, washcloth, toothbrush, and a comb.

(10) Heating facilities shall be adequate to maintain a temperature of 70 degrees Fahrenheit in winter weather.

History: 1954 ACS 10, p. 14, Eff. June 14, 1957.

R 400.73 Personnel.

Rule 73. (1) There shall be a competent staff of administrative, supervisory, and maintenance personnel sufficient in number to provide for constant supervision of all children under care.

(2) All personnel having direct contact with children are required to have physical examinations when hired and annually thereafter.

(3) Staff personnel who work directly with children shall have training and education suitable for the responsibilities they assume.

(4) A staff member shall be available to children at all times. At night the person responsible for the children shall have sleeping quarters located so that he can easily meet emergencies, such as illness, attempted escape or other problems which might arise. Where adequate supervision requires it, 1 or more staff members shall be dressed and available 24 hours a day.

History: 1954 ACS 10, p. 15, Eff. June 14, 1957.

R 400.74 Care of children.

Rule 74. (1) Provisions shall be made for dental, medical and nursing care suited to the number and type of children in the home.

(2) All children shall be given a physical examination as soon as possible after admission for their own protection as well as that of other children in the home.

(3) Children suffering from illness of any kind shall be isolated and given proper nursing and medical care.

(4) In case of illness or accident immediate notice shall be given to the probate court.

(5) Discipline and control shall be based on a careful study of each individual child.

(6) Meals shall be planned to meet the dietary needs of the children. They shall meet standards of nutrition as set up by the state department of health.

(7) Means shall be provided for the education of those children who remain in the detention home for any length of time, in accordance with the ability and need of the individual child, and in as close an approximation to the normal school system as possible. If it becomes necessary to provide education within the detention home, the teaching facilities and equipment shall have the approval of the state department of public instruction.

(8) There shall be ample opportunity for indoor and outdoor play and games, individually and in groups, as a means of promoting physical and mental health; books, toys and games should be available.

(9) The juvenile home shall maintain permanent records of all children. The minimum amount of information in such records shall include the child's name, age, address, address of parent or guardian; dates of admission and discharge; and the names and official titles of persons responsible for placement or removal from the juvenile detention home.

History: 1954 ACS 10, p. 15, Eff. June 14, 1957.

HOMES FOR THE AGED

R 400.91—R 400.106 Rescinded.

History: 1944 ACS 27, pp. 26-35; 1954 AC, pp. 4312-4320; rescinded 1954 ACS 9, p. 13, Eff. Feb. 14, 1957.

DAY CARE CENTERS AND NURSERY SCHOOLS

R 400.120 Definitions.

Rule 120. (1) A nursery school is a daytime group facility which has as its main objective a developmental program for pre-school children, and whose staff meets the educational qualifications as established by the Michigan department of public instruction.

Digitized by Google

(2) A day care center is a daytime group facility which gives care for pre-school children away from their homes but which need not employ a teacher approved by the department of public instruction. It provides a program which promotes the development of the individual child and is under the direction of a person with experience in child care.

History: 1954 ACS 10, p. 16, Eff. June 14, 1957.

R 400.121 Staff.

Rule 121. (1) There shall be an adequate staff of administrative, supervisory and maintenance personnel.

(a) A minimum of 2 adults is required for any group of children to insure adult supervision at all times. When the group is small enough to be under the guidance of 1 person, the second person shall be available in the center to assist upon call.

(b) When the number of children in the nursery exceeds 10, full-time assistance for the director is to be provided, in the following ratio:

Minimum Ratio:

Age of Children	There shall be
2½ and 3 years	1 adult assistant to each 10 children or fraction thereof, beyond the first 10
4 years	1 adult assistant to 12 children beyond the first 12
5 years	1 adult assistant to 20 children beyond the first 20
2½ through 5 years	(mixed age group) 1 adult assistant to 10 children beyond the first 10

(2) The head teacher or person in charge of programming of the nursery school shall meet the education qualifications as determined by the Michigan department of public instruction for nursery school assignment.

(3) The director or person in charge of a day care center shall have a minimum of 2 years of study at the college level.

History: 1954 ACS 10, p. 16, Eff. June 14, 1957.
Editor's note: Former rules numbered R 400.121—R 400.126 appeared in 1954 AC, pp. 4320-4322.

R 400.122 Program.

Rule 122. Every center shall have a balanced schedule of daily activities based upon developmental needs of children.

History: 1954 ACS 10, p. 16, Eff. June 14, 1957.

R 400.123 Records.

Rule 123. A record shall be kept of each child which shall include:

(a) Child's full name, age, and date of entry and discharge.

(b) Full names of both parents or relatives.

(c) Address and telephone number of parents.

(d) Places and hours of employment of parents or relatives.

(e) Instructions for reaching parents or relatives.

(f) Name, address, and telephone number of another person who might be reached in case of an emergency.

(g) Name, address, and telephone number of family physician.

(h) Accurate record of daily attendance.

History: 1954 ACS 10, p. 16, Eff. June 14, 1957.

R 400.124 Equipment for centers.

Rule 124. (1) The equipment shall be of the size and design that will fit the individual child's developmental needs.

Digitized by Google

(2) There shall be a cot, sheet, and blanket for every child who remains for afternoon rest.

(3) There shall be an adequate and varied supply of suitable play equipment and materials easily accessible to children.

History: 1954 ACS 10, p. 16, Eff. June 14, 1957.

R 400.125 Fire, health, and sanitation.

Rule 125. (1) All housing shall conform with local and state building codes and shall be approved by the state fire marshal or local full-time fire bureau.

(2) Within 30 days of attendance the following documentation shall be obtained by a day care center or nursery school for each child enrolled and shall be maintained in the center or school files:

(a) A signed report on the state of the child's health, based on an evaluation by a qualified physician made within the preceding 12 months. The report shall contain the statement that participation in a day care program will not be detrimental to the child's health. Restrictions on physical activity shall be reported by the physician.

(b) Proof of immunization procedures and boosters completed or in progress against diphtheria, pertussis, tetanus, polio, measles and rubella, or otherwise as required by law.

(c) The requirements of subdivisions (a) and (b) may be waived, if a child's parents or guardian sign a statement agreeing to take part in a health care program which shall include health observations, physical assessments, screening tests and immunization procedures, when such a health program is available and has been approved by the state department of public health.

(d) A child whose parents or guardian object to physical examinations, immunization, or medical treatment on the grounds of religious convictions may be admitted after the following statements are submitted:

(i) Statement by the parents or guardian that the child is and has been in normal and good health.

(ii) Statement by the parents or guardian assuming responsibility for the child's state of health while at a center or nursery school with the understanding that either be notified immediately when anything unforeseen in this regard occurs. This statement shall include a provision that when the center or school is unable or does not have time to locate the persons designated to be notified in case of emergency, the center or nursery school director may take such temporary measures as he deems appropriate.

(3) A full-time or more than half-time employee or volunteer who comes in contact with children shall have an examination by a licensed physician, or his designee, conducted within 12 months before employment and every 2 years thereafter. The person shall also have a test for communicable tuberculosis within 1 year before employment and annually thereafter.

(4) A center or nursery school shall have approval of the state or local full-time health department with respect to this rule.

History: 1954 ACS 10, p. 17, Eff. June 14, 1957; 1954 ACS 76, p. 55, Eff. Aug. 14, 1973.

R 400.126 Transportation.

Rule 126. If transportation is provided by the center, adequate precautions shall be taken for the safety of children. These include:

(a) A seat in the car for each child.

(b) The car in good operating condition with safety locks on the doors which may be opened only from the outside.

(c) An adult in addition to the driver in any bus or automobile transporting children to and from the center.

(d) Transportation on buses conforming to the Michigan school bus requirements.

(e) Validity of driver's license for transportation of children.

(f) Proper insurance coverage.

History: 1954 ACS 10, p. 17, Eff. June 14, 1957.

R 400.127 Teacher qualifications; nursery schools.

Rule 127. (1) Each school shall employ 1 properly qualified head teacher. The number of assistant teachers required will depend upon such factors as number and age of children, length of day, arrangement of rooms, amount of space and facilities, and adequacy of the service staff, provided that there shall be no more than 12 children per teacher. This does not include maintenance staff, only teaching staff.

(2) A teaching certificate issued by the state board of education must be obtained based upon a minimum of 2 years of professional training in early childhood education. Four years of professional education is recommended for a head teacher.

(3) A nursery school teacher shall have a working knowledge of the conditions and experiences under which young children grow and develop physically, socially, emotionally, and intelligently. This will require basic study in early childhood education and include such subjects as child psychology, physical growth, nutrition, mental hygiene, and social development. A background in parent education, family relationships, and utilization of community resources is desirable.

(4) Teachers shall have a basic understanding of the principles and practices of nursery school operation and administration. This will require study of such topics as equipment, program building, record keeping, handling of the sick, and the routines of washing, toileting, sleeping, dressing, and feeding. Teachers shall have a genuine liking for children, be socially well-adjusted, emotionally stable, unhurried in speech and action, and adept at fostering a cheerful, relaxed atmosphere in the school. They shall be skillful in interpreting the aims of the school to parents and securing their cooperation.

History: 1944 ACS 8, p. 23; 1954 AC, p. 4322.

R 400.128 Program.

Rule 128. Every nursery school program shall provide opportunity for the child to develop through language, sensory, motor, social, and creative experiences.

History: 1944 ACS 8, p. 23; 1954 AC, p. 4322.

CHILD CARING INSTITUTIONS AND CHILD PLACEMENT AGENCIES

R 400.141 Definitions.

Rule 141. As used in this subpart:

(a) "Department" means the state department of social services.

(b) "Agency" means either a child caring institution or child placement agency.

(c) A "child placement agency" means an agency organized for the purpose of receiving children for placement in family homes for care or for adoption.

(d) A "child caring institution" or "institution" means a child welfare agency organized for the purpose of receiving children for care, maintenance and

supervision usually on a 24-hour basis in buildings maintained by the institution for that purpose and which operates throughout the year. An educational program may be provided within the institution, but this is not its primary purpose. Maternity homes for unmarried mothers are included in this definition. It does not include a hospital or convalescent home established primarily to provide medical care and treatment.

(e) An "executive officer" of an agency is the person in charge of the administration of the program and staff under his jurisdiction and is ordinarily accountable to the agency board of directors, or director of the county department of social services.

(f) A "casework supervisor" of an agency is the social worker who supervises caseworkers who work directly with children, their families and other relevant individuals.

(g) A "caseworker" of an agency is the social worker who works directly with children, their families and other relevant individuals and who carries primary responsibility for planning for the child.

(h) A "supervisor of child care" of an agency is that person directly responsible for supervising the child care staff within a children's institution.

(i) A "child care worker" of an agency is that person who is directly responsible for the care and supervision of children in a child caring institution.

(j) A "regular volunteer" of an agency is a person who contributes his services on an ongoing basis and who comes into direct contact with children under the care of the agency.

History: 1944 AC, p. 1367; 1944 ACS 32, p. 8; 1954 AC, p. 4323; 1954 ACS 62, p. 26, Eff. May 18, 1970.

R 400.142 Licensing and approval of agencies.

Rule 142. (1) An agency shall not receive any child into care unless currently licensed by the department, except that a county child care institution shall not receive any child into care unless currently approved by the department.

(2) A county child caring institution operated by the county board of supervisors or counties contracting together shall meet the rules in this subpart, except R 400.143(2) and (4) and R 400.161, R 400.162, R 400.163, R 400.171, R 400.172, and R 400.173, which are not statutorily applicable to such facilities.

(3) An agency shall meet a child welfare need in the geographic area it serves or intends to serve. The geographic area shall be designated in the agency's statement of purpose. Proof of such need shall be furnished to the department prior to issuance of the initial license or approval to operate and shall include:

(a) Evidence of a need for the service to be provided to a particular group of children in the geographic area.

(b) Sufficient financial support which will insure meeting at least the minimum requirements for licensing of an agency from inception.

(c) Evidence that the agency will be used by referral sources.

(d) Evidence of compliance with the legal requirements of state, county, or city.

(4) An agency may be both a child caring institution and a child placement agency and licensed to carry on both types of service.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 8; 1954 AC, p. 4323; 1954 ACS 62, p. 26, Eff. May 18, 1970.

R 400.143 Organization and financial operations of agencies.

Rule 143. (1) An agency shall be organized as a legal form of association, or corporation, or a governmental unit recognized by laws of this state. The purposes and the functions of the agency shall be clearly defined and shall include a

Google Digitized by Google UNIVERSITY OF MICHIGAN

description of the geographic area to be served, children to be accepted for care, and services to be provided for these children.

(2) An agency shall have a board of directors responsible for the policy, program, financing and general management of the agency. The board shall meet at least 4 times a year. Official minutes of board and standing committee meetings shall be kept as permanent agency records.

(3) A budgetary estimate showing details of income and expenditures for the coming fiscal year shall be approved by the board before the beginning of each fiscal year.

(4) Financial accounts shall be audited at least once a year by a certified public accountant or a certified public accountant firm not administratively related to the agency. The agency shall submit a copy of such audit to the department.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 8; 1954 AC, p. 4323; 1954 ACS 62, p. 27, Eff. May 18, 1970.

R 400.144 Discrimination; reports; waiver of rules.

Rule 144. (1) The services of an agency shall be accessible to children and their parents regardless of race, color or national origin. A release of a child for adoption shall not be refused by a licensed agency because of the age, race, religion or national origin of the child.

(2) An agency shall make such reports to the department as may be required to insure that licensing rules are being met.

(3) The department may temporarily waive any rule within this subpart to allow for experimentation and demonstration of new and innovative approaches to the delivery of services.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 8; 1954 AC, p. 4323; 1954 ACS 62, p. 27, Eff. May 18, 1970; 1954 ACS 68, p. 53, Eff. Aug. 2, 1971.

R 400.145 Agency personnel.

Rule 145. (1) An agency shall employ or contract for its own social work staff. A sufficient number of qualified, paid staff shall be provided to perform effectively the tasks required in providing a total service for the children and their parents. The number of children assigned to individual staff members shall be limited so that the agency's responsibility to provide effective service for each child and his family can be fulfilled.

(2) An agency shall have a job description for all positions to assist the agency in determining qualifications necessary for personnel to accomplish required duties, and to define education and training necessary for prospective employees.

(3) An agency shall have a written statement of personnel policies which outlines personnel practices as they affect both the agency and employee. The policies shall include hours of work, sick leave and vacations. Each employee shall be informed of agency personnel policies.

(4) An agency shall not dismiss a person employed by it when these rules become effective, solely because of his lack of qualifications as established by these rules.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 8; 1954 AC, p. 4323; 1954 ACS 62, p. 27, Eff. May 18, 1970.

R 400.146 Executive officers.

Rule 146. The executive officer of an agency shall have at the time of his employment as such officer either of the following:

(a) A master's degree in social work, a master's degree in a related field in which the major emphasis has been on behavioral sciences, or a master's degree in public administration. He shall also have 2 years' experience in an agency, or equivalent experience.

(b) A bachelor's degree in social work, or a bachelor's degree in a related field in which the major emphasis has been on behavioral sciences. He shall also have 4 years' experience as a staff member in an agency, or equivalent experience.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 8; 1954 AC, p. 4323; 1954 ACS 62, p. 27, Eff. May 18, 1970.

R 400.147 Supervisors, social workers, and child care staff.

Rule 147. (1) A social work supervisor in an agency shall have a minimum of a master's degree from a graduate school of social work. An executive officer, acting as supervisor, shall meet the requirements of this rule.

(2) A social worker in an agency shall have a minimum of a bachelor's degree from a college or university accredited by a regional accrediting organization.

(3) The supervisor of the child care staff of a child caring institution shall have at least a bachelor's degree and a minimum of 2 years' experience in a child caring institution. A child care supervisor assigned as executive officer or casework supervisor for the child caring institution shall meet the requirements for those positions.

(4) Child care staff of a child caring institution shall have at least an eighth grade education.

(5) Case aides or paraprofessional staff may be employed to assist in the delivery of service. When employed, such staff shall have specific job descriptions and shall participate in a regular staff development program.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 8; 1954 AC, p. 4323; 1954 ACS 62, p. 28, Eff. May 18, 1970.

R 400.148 General qualifications and records of personnel.

Rule 148. (1) An agency employee, or regular volunteer with ongoing duties, shall be a person of good character, good health, emotional stability, and of sufficient ability and education to carry out adequately the duties assigned to him.

(2) A member of the staff or regular volunteer in an agency shall provide and have on record in the agency suitable references attesting to his character, integrity, and ability to perform the tasks required of his position.

(3) An agency shall maintain a confidential personnel record of each full-time or part-time employee or regular volunteer. The records shall contain at least the following information: name, age, education, work history, statement of references, present duties and work schedule, salary, medical report, and at least a written evaluation of the employee or regular volunteer's job performance during the first year of service.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 8; 1954 AC, p. 4323; 1954 ACS 62, p. 28, Eff. May 18, 1970.

R 400.149 Health of personnel in child caring institutions.

Rule 149. (1) An employee shall have a physical examination conducted within 12 months preceding employment within the facility.

(2) An employee, or a regular volunteer with ongoing duties, who comes in contact with children within the course of his work shall have an examination for tuberculosis within the 12 months prior to beginning work and annually thereafter.

(3) A regular volunteer shall complete a history form indicating illnesses treated by a physician in the previous 12 months. A volunteer who has been treated for other than minor illnesses shall submit a statement from his personal physician that he is able to properly carry out his duties.

(4) Records indicating compliance with this rule shall be on file for review by the staff of the department of health and department of social services.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 8; 1954 AC, p. 4323; 1954 ACS 62, p. 28, Eff. May 18, 1970.

R 400.150 Case records.

Rule 150. The agency shall be responsible for keeping case records of all children accepted for care.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 9; 1954 AC, p. 4323.

R 400.151 Agency child health programs.

Rule 151. An agency shall provide a complete health program for the children including:

(a) Physical examination or report of physical examination on admission to care.

(b) Immunization.

(c) Remedial treatment.

(d) Periodic medical examination.

(e) Dental care, as appropriate.

(f) Provision for specialized medical and dental services such as: auditory, ophthalmological, orthopedic and orthodontic when necessary or appropriate.

(g) Hospitalization, when necessary.

(h) Nursing care, when necessary.

(i) Health records.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 9; 1954 AC, p. 4323; 1954 ACS 62, p. 28, Eff. May 18, 1970.

R 400.152 Health at time of admission to child caring institutions.

Rule 152. (1) Except in emergency placements, a child at time of admission to a child caring institution shall have current immunization against diphtheria, whooping cough, tetanus, poliomyelitis, measles and be vaccinated for smallpox or shall have a statement from a physician that inoculation and vaccination are in progress or will immediately begin and be continued until the time the child is currently protected.

(2) When a child is admitted to care in a child caring institution, his parent or guardian shall submit a report of a physical examination performed by a qualified physician including a report of tuberculin test conducted within the preceding 12 months. In case of an emergency acceptance of a child and if such report is not available, a physical examination and tuberculin test shall be completed and immunization procedures, if incomplete, shall be started within 3 days of the time of admission.

(3) An agency shall have a program of screening for communicable diseases at the time of admission and on a continuing basis during the period of care. If a child is suspected of having a communicable disease, he shall be suitably isolated.

(4) Records of compliance with this rule shall be on file for review by the staff of the department of health and department of social services.

(5) At the time of admission to care, an authorization, signed by a parent, legal guardian or court, to provide medical care, surgical care, anesthesia and immunization shall be secured by an agency and maintained in the child's case or medical record.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 9; 1954 AC, p. 4323; 1954 ACS 62, p. 29, Eff. May 18, 1970.

R 400.153 Health during period of care.

Rule 153. (1) An agency shall provide for periodic health examinations. Each child shall have a health examination by a qualified physician at least annually. Medical treatment shall be under the supervision of a physician and consultation on the medical program shall be readily available. An agency shall provide and establish written procedures for emergency medical treatment.

(2) An agency shall provide for adequate dental examination and treatment. A thorough dental examination shall be carried out as soon as practical after admission, but not later than 3 months. Reexamination shall be made at least annually.

(3) In a child caring institution, a written log of minor illnesses and injuries showing symptoms and treatment given shall be maintained by the child care worker directly responsible for the child and shall become a part of the child's health record.

(4) A child caring institution shall maintain an adequate supply of first aid supplies.

(5) A child caring institution shall have a physician on call.

(6) A child caring institution providing care for children under 5 years of age shall have as a full-time staff member a licensed practical nurse or registered nurse.

(7) A child caring institution shall carry out a program of instruction in personal hygiene for all children.

(8) A child caring institution shall provide an adequate diet, varied and palatably prepared and appetizingly served. It shall be served in a manner and atmosphere that will provide enjoyment to the child.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 9; 1954 AC, p. 4324; 1954 ACS 62, p. 29, Eff. May 18, 1970.

R 400.154 Educational programs.

Rule 154. An agency shall provide an educational program for children of school age. If the agency is an institution and the educational program is conducted on campus, the program shall be designed to meet specific needs of the children and competent instruction shall be provided in conformity with requirements of the state department of education.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 9; 1954 AC, p. 4324; 1954 ACS 62, p. 29, Eff. May 18, 1970.

R 400.155 Immunizations.

Rule 155. Each child taken into care shall be immunized against smallpox, diphtheria, and tetanus, and each child under 5 years of age shall be immunized against whooping cough.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 9; 1954 AC, p. 4324.

R 400.156 Preventive medical program.

Rule 156. The agency shall make provisions for periodic health examinations.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 9; 1954 AC, p. 4324.

R 400.157 General services to children and families; scope.

Rule 157. (1) An agency shall complete an intake and case planning study in order to determine that acceptance is necessary and to provide adequate social services to a child and his family. Every effort shall be made to help a family remain together when this is in the best interests of the child and his family.

(2) The intake study and case plan shall be completed, when possible, prior to acceptance of a child and no later than 30 days after acceptance. If the agency provides services for unmarried mothers, such services shall include activities required to meet the unmarried mother's physical, emotional, and material needs and shall not be limited to services pertaining to planning for the child. Contact with the father of the child shall be appropriate to the case plan.

(3) The parent or expectant parent shall be helped to understand the policies of the agency, their responsibility in the placement, and the meaning of separation to

Digitized by UNIVERSITY OF MICHIGAN

the child. The expectant parent shall be asked to sign papers concerning the planning for the child only after the child's birth.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 9; 1954 AC, p. 4323; 1954 ACS 62, p. 29, Eff. May 18, 1970.

R 400.158 General services to children and families; intake studies and case plans.

Rule 158. (1) The intake study and case plan developed for the child, family or the expected parents shall be a part of the agency case record. The intake study and case plan shall include:

(a) Clearance with other relevant agencies in the community when a release of information has been obtained from the parent or guardian.

(b) Information as full as possible on the family situation and the religious, educational, economic and cultural background based on interviews with the child where appropriate, his parents, relatives, and collateral sources.

(c) Information on the child's developmental and health history, physical condition, personality, school placement and adjustment, the child's religious preference, if any, previous placement outside the home, and attitude of the child and his parents toward removal from the home.

(d) Evaluation of the past experiences and problems of the child to determine the placement or service best suited to meet his needs.

(e) Information concerning the specific goals of assisting the child and his family.

(f) Designation of responsibility for work with the child's own parents, foster or adoptive parents where appropriate, and the child, including frequency of contacts with child's own parents, foster or adoptive parents where appropriate, to reach treatment goals.

(g) Plans for periodic evaluation of progress.

(h) Goals in respect to discharge, i.e. expected length of stay, and outcome.

(2) Except when an emergency exists which is detrimental to the health or safety of the child, there shall be planned procedure to prepare the child for a placement, giving him time and opportunity to understand what is happening to him. When the plan for the child is changed, there shall be involvement of the child appropriate for his age.

(3) Unless there has been a termination of parental rights, the agency shall encourage regularly scheduled contacts between the parent and the child except where it has been determined that such visits are clearly detrimental to the child. If it is determined that visits are detrimental, the records shall contain this information.

(4) An agency shall provide the child with the opportunity for religious education and experience. The agency shall have a defined policy regarding its religious practices for the information of those placing a child with it.

(5) A child shall never be exploited for the benefit of an agency. Public appearances of a child shall not be for the purpose of display, nor in connection with fund raising. Identity of a child shall be given only when a positive value accrues to the child. The institution shall encourage visitors to make advance arrangements for visiting the institution. Every consideration of privacy shall be exercised.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 9; 1954 AC, p. 4324; 1954 ACS 62, p. 30, Eff. May 18, 1970.

R 400.159 Case records.

Rule 159. Case records shall be maintained to provide protection against destruction and damage, and assurance of confidentiality. Uniformity shall be

maintained in organization and maintenance of case records. The agency record shall include the following:

(a) Basic identifying information, including, where appropriate, verification of birth record.

(b) Intake study, including evaluation and plan.

(c) Documentation of the agency's legal right to care for the child.

(d) Information relating to ongoing evaluation, care, and planning.

(e) Consent for medical or surgical care.

(f) Admission examination and complete health and dental record.

(g) Record of continuing school progress.

(h) Termination evaluation and plan for a closed case.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 9; 1954 AC, p. 4324; 1954 ACS 62, p. 30, Eff. May 18, 1970.

R 400.160 Health records.

Rule 160. Each agency or institution shall keep adequate health records for each child.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 9; 1954 AC, p. 4324.

R 400.161 Adoption services; general provisions.

Rule 161. (1) An agency which places children for adoption shall comply with the provisions of the adoption law in chapter 10 of the probate code, as amended, being chapter 10 of Act No. 288 of the Public Acts of 1939 and §§710.1 to 710.14 of the Michigan Compiled Laws.

(2) A child placement agency shall be responsible for a continuing, imaginative and aggressive adoptive home recruitment program.

(3) Eligibility requirements shall be flexible in order to afford the child who might otherwise never be placed the opportunities of adoption. Such requirements shall be made available to adoptive parents and to the general public. Available resources including inter-agency, state and national exchanges shall be used to facilitate early placement of children.

(4) First consideration shall be given to placing children from the same family together. If this cannot or should not be done in the best interests of the children involved, the record shall contain such evidence.

(5) A report of information given to adoptive parents concerning the child shall be recorded in the case record.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 9; 1954 AC, p. 4324; 1954 ACS 62, p. 30, Eff. May 18, 1970.

R 400.162 Adoption services; medical examinations and evaluations.

Rule 162. (1) A child shall not be made available for adoption without a physician's consultation within the preceding 30 days. A child shall not be placed for adoption without a physician's consultation within the preceding 90 days. The physician's report shall be a part of the case record.

(2) Information concerning the child's maternal and paternal heritage shall be obtained whenever possible in order to determine significant hereditary factors or pathology that may affect the child's normal development and to help the adoptive parents and eventually the child understand the family situation and the reasons for adoption and for the older child who has lived with his family to decide which characteristics shall be given consideration in selection of a new family.

(3) A developmental history shall be obtained from the parents, relatives and other responsible resources. Where there is a pre-adoptive placement, direct study and observation of the child by the caseworker, foster parents, nurse, pediatrician,

Open Access, Google-digitized / http://www.hathitrust.org/access_use#oa-google

and other professional disciplines shall supplement the developmental history and be included in the child's record.

(4) An agency shall not make a placement for adoption unless an evaluation of the child and prospective adoptive family has been made and recorded. An evaluation shall not be considered approved or denied without agency administrative approval.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 9; 1954 AC, p. 4324; 1954 ACS 62, p. 31, Eff. May 18, 1970.

R 400.163 Adoption services; continuing services.

Rule 163. After an adoption petition has been filed and prior to confirmation of the adoption, and at the discretion of the court, planned assistance may be provided for the family for the purpose of facilitating the child's integration into the family.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 9; 1954 AC, p. 4324; 1954 ACS 62, p. 31, Eff. May 18, 1970.

R 400.164 Physical examinations of staff.

Rule 164. At the time of employment and annually thereafter, the institution shall require physical examination, including chest x-ray, of all staff members coming in contact with children. Any person who is a carrier of typhoid bacilli or virulent diphtheria bacilli, or who is suffering from any chronic communicable disease, shall not be employed in any institution.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 9; 1954 AC, p. 4324.

R 400.165 Health supervision of children.

Rule 165. Daily observations for illness and for cleanliness shall be carried out.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 9; 1954 AC, p. 4324.

R 400.166 Personal hygiene.

Rule 166. The institution shall carry out a program of instruction in personal hygiene for all children.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 10; 1954 AC, p. 4325.

R 400.167 Adequate diet.

Rule 167. The institution shall provide an adequate diet, varied, and palatably prepared and appetizingly served. It shall include sufficient quantities of pasteurized milk, green and fresh leafy vegetables, meat, fish, eggs, cheese, fruits and other protective foods so that the child's total nutritional requirements will be met.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 10; 1954 AC, p. 4325.

R 400.168 Requirements for infant care.

Rule 168. The institution caring for children under 2 years of age shall have:

(a) An attending physician.

(b) A resident nurse approved by the physician.

(c) Feedings prescribed by a physician, and a record of such feeding orders shall be kept.

(d) Records showing the weight, height, diet, and development of the infant and these records shall be periodically reviewed by the attending physician.

(e) Enough attendants adequately to meet the needs of the infants.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 10; 1954 AC, p. 4325.

R 400.169 Provision for nursing care.

Rule 169. The institution shall provide for adequate nursing care of sick children.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 10; 1954 AC, p. 4325.

R 400.170 First aid supplies.

Rule 170. The institution shall have readily available adequate first aid equipment.

History: 1944 AC, p. 1368; 1944 ACS 32, p. 10; 1954 AC, p. 4325.

R 400.171 Foster family care; licensing and supervision of homes.

Rule 171. (1) A foster family shall be licensed by the department upon certification by the agency that the home has been investigated and meets foster home licensing standards.

(2) An agency shall not place a child in a home certified by another agency without specific written approval from the certifying agency.

(3) The agency shall make a thorough complete study of each foster family home. The study shall evaluate the motivation for foster care of children, the compatability of both foster parents and adjustment of their own children, if any, and their ability to become good foster parents. The certifying agency shall have a thorough knowledge of each member of the foster family as individuals. Sufficient factual information shall be available to give assurance that the children will have good care and training. The rules established by the department for licensing foster family homes shall be applied in making foster family home studies.

(4) A foster family home in which a child is placed under a definite arrangement that board and lodging will be provided in return for the child's services, and wage homes in which money is paid to the child for his services in addition to board and lodging, shall be used only on the basis of the casework plan and where it is in the best interests of the child. The plan shall be documented in the case record.

History: 1944 AC, p. 1369; 1944 ACS 32, p. 10; 1954 AC, p. 4325; 1954 ACS 62, p. 31, Eff. May 18, 1970.

R 400.172 Foster family care; agencies' records of homes.

Rule 172. An agency is responsible for keeping foster family home records. The records shall be protected from unauthorized examination. They shall include:

(a) The application.

(b) Foster family home study including health reports and reports of reference.

(c) A written agreement outlining the responsibility of both the agency and foster parents regarding the conditions of placement.

(d) Recommendations as to type of child best served by this home.

(e) Evidence that the home is licensed prior to its use and is continuously licensed for foster family care when children are in the home.

(f) A list of the children placed in the foster home including the names, ages, dates of placements, and dates and reasons for removal.

(g) Periodic reevaluations of the home at least once a year including assessment of the family's ability to meet the needs of the individual child.

History: 1944 AC, p. 1369; 1944 ACS 32, p. 10; 1954 AC, p. 4325; 1954 ACS 62, p. 31, Eff. May 18, 1970.

R 400.173 Foster family care; payment for care.

Rule 173. A child placement agency shall have a clearly established payment schedule for payments to be made to foster families for services provided to children.

History: 1944 AC, p. 1369; 1944 ACS 32, p. 10; 1954 AC, p. 4325; 1954 ACS 62, p. 32, Eff. May 18, 1970.

R 400.174 Plant and equipment.

Rule 174. All buildings shall conform with local or state building codes and shall be approved by the state fire marshal or the local fire department.

History: 1944 AC, p. 1369; 1944 ACS 32, p. 10; 1954 AC, p. 4325.

R 400.175 Adequate rooms.

Rule 175. All rooms shall be designed to suit adequately the purpose for which they are intended, and in the case of sleeping rooms a minimum of 300 cubic feet per child shall be provided.

History: 1944 AC, p. 1369; 1944 ACS 32, p. 10; 1954 AC, p. 4325.

R 400.176 Outdoor play space.

Rule 176. Outdoor play space shall be of sufficient area to allow for children's games.

History: 1944 AC, p. 1369; 1944 ACS 32, p. 10; 1954 AC, p. 4325.

R 400.177 Compliance with sanitary code.

Rule 177. The institution shall comply with requirements and obtain the approval of the state or local department of health. Proper sanitary and safety measures shall be enforced.

History: 1944 AC, p. 1369; 1944 ACS 32, p. 10; 1954 AC, p. 4325.

R 400.178 Right to a hearing.

Rule 178. No original application for a license shall be denied, nor shall any license be granted provisionally, unless the applicant shall have been given notice in writing of the grounds of such proposed denial or for making such provisional requirements. If such proposed denial or proposed issue of a provisional license is protested in the same manner as provided in section 5 in respect to a proposed revocation of license, a hearing shall be granted in the same manner as a hearing on a revocation.

History: 1944 AC, p. 1369; 1944 ACS 32, p. 10; 1954 AC, p. 4326.

R 400.181 Institutional care.

Rule 181. (1) A child or children under 6 years of age shall not remain in a child caring institution for more than 30 days unless it can be demonstrated that such planning is in the best interests of the child or children.

(2) Policies and practices regarding discipline of a child shall be clearly stated and furnished in writing to all employees of the institution. All institutional personnel shall conform to these policies.

(3) The ratio of institutional child care workers directly responsible for a living unit shall be determined by the age and the problems of the children. A minimum of 1 child care worker shall be on duty for each 15 children during the hours when children are present and awake. At least 2 adults shall be readily available at all times to insure adequate coverage in case of an emergency.

History: 1954 ACS 62, p. 32, Eff. May 18, 1970.

R 400.185 Agency plant, grounds, and equipment.

Rule 185. (1) An agency shall be in a location accessible to clients and staff and housed in an attractive and well kept manner. The facility shall include comfortable offices with good lighting and ventilation, as well as interviewing rooms which recognize the confidential nature of the client contact.

(2) Agency buildings shall comply with appropriate local and state building and zoning codes, and shall be approved by the designated fire department.

(3) A child caring institution shall comply with the requirements of the local department of health. Proper sanitary and safety measures shall be enforced.

(4) Plans for new construction or for changes in an institution's physical plant shall be discussed with the department and the agency shall receive written approval from the department prior to implementation.

(5) Each child in an institution shall have a separate comfortable bed equipped with clean appropriate bedding. Children of opposite sex, over 5 years of age, shall not sleep in the same room.

History: 1954 ACS 62, p. 32, Eff. May 18, 1970.

FOSTER HOMES FOR CHILDREN

R 400.191 Inspection and licensing.

Rule 191. (1) No home shall be licensed for more than 4 children, except when it is desirable for brothers and sisters of 1 family to be kept together, or when some other special need exists. Exception to this limitation may be made only by the Michigan social welfare commission.

(2) No home shall be licensed to provide care at any time for more than 2 infants under 1 year of age, including children of the foster parents. Exception to this limitation may be made only by the Michigan social welfare commission.

(3) For special licenses granted under subrules (1) and (2), approval by the welfare commission is contingent upon the written report of the health department.

(4) The license applies only to the residence where the family is living at the time application for a license is made, and a change of residence automatically terminates the license. Prior to a change of residence, the licensee shall notify the supervising agency, and if there is an independently placed child in the home, the person for whom the child is given care must also be notified.

(5) The licensee shall not accept more children than the maximum specified in the license. If additional room is available or other changes warrant an increase in the license, the licensee or the supervising agency shall request the Michigan social welfare department to increase the authorized number of children who may be boarded in the home.

History: 1944 AC, p. 1369; 1944 ACS 8, p. 19; 1954 AC, p. 4326; 1954 ACS 30, p. 17, Eff. May 15, 1962.

R 400.192 Foster home.

Rule 192. (1) The home shall be so constructed, arranged, and maintained as to provide adequately for the health and safety of occupants. Representatives of the health department or fire marshal's office shall be admitted at any time for purpose of inspection.

(2) Heating, ventilation, and light shall be sufficient to provide a comfortable airy atmosphere. Furnishings and housekeeping standards shall be such that the home presents a clean orderly appearance.

(3) Comfortable beds shall be provided for all members of the family and shall be kept in a clean condition at all times; the bedding shall be adequate and suitable to the season. Sleeping rooms must provide adequate opportunities for

rest and privacy. No living room, dining area, or other area of the home which is not ordinarily a sleeping room, may be used for such purpose by any member of the family. No detached building may be used for sleeping purposes.

(4) No room shall be used for living purposes where more than ½ the room height is below grade, except where the ceiling of such portion of a building is located 5 feet or more above grade for more than 25% of the perimeter measurement of the home. All sleeping rooms shall have a window of a type that may be opened readily and is accessible for evacuation.

(5) The amount of space in a sleeping room shall not be less than 40 square feet per child. There must be adequate closet and drawer space to provide for the storage and handling of clothing and personal belongings.

(6) Refrigeration shall be available for the care of perishable foods. All outside doors and windows shall be screened during the summer months. Adequate arrangements must be made for the disposal of garbage and refuse. If garbage is kept in cans, the cans must be covered tightly and the contents disposed of at regular intervals.

(7) Water supply and sewage disposal systems must meet the requirements of the local or state health department. Inspection may be required by the social welfare department.

(8) Milk, cream, and milk products shall come from sources licensed by the Michigan department of agriculture and shall be pasteurized.

(9) Play space, fenced if necessary, shall be available and free from hazards which might be dangerous to the life and health of the child. The play area shall be kept free from litter, rubbish, and inflammable material at all times.

History: 1944 AC, p. 1370; 1944 ACS 8, p. 19; 1954 AC, p. 4326; 1954 ACS 30, p. 18, Eff. May 15, 1962.

R 400.193 Foster family.

Rule 193. (1) All members of the household must be in such physical and mental health as will not affect adversely either the health of the child or the quality and manner of his care.

(2) Members of the foster family shall be of good character, habits, and reputation; relationships within the family shall be such that a wholesome atmosphere for the child will be assured. All members of the foster family shall be willing to accept the foster child into the home as a member of the family group.

(3) The persons in charge of the foster home shall be of suitable temperament to care for children; shall understand the needs of children; shall be capable of handling an emergency situation promptly and intelligently; and shall be willing to cooperate fully with the children's own parents and/or the supervising agency.

(4) The foster family should be composed of a father and mother about the same age as parents bringing up their own children. The applicant shall not be over 65 years of age. Exception may be made at the discretion of the social welfare department.

(5) The number of persons in the home at the time of application shall be taken into consideration and be a basis for fixing the number of children to be maintained in the home. The total number of children under 17 years of age in a home shall not exceed 8 including foster children.

(6) A home accepting adult roomers and boarders shall not be licensed for foster children except in cases in which the roomers or boarders are relatives or friends who have resided with the family over a period of years and are considered members of the family.

(7) The foster mother shall not accept employment outside of the home which would affect adversely the quality of care given a foster child. The foster mother

or another member of the family must be able to demonstrate that they have adequate time for the care of foster children.

(8) Infants and young children shall never be left alone without competent adult supervision.

(9) No boarding, convalescent, or nursing home which provides care for chronic patients or the aged shall be licensed as a foster home for children, except that in unusual circumstances a license may be issued to meet the needs of a specific child.

(10) The financial status of the foster family must be secure; there must be some definite income which is adequate to care for the family needs.

(11) A home shall not be licensed in which any member of the household is mentally ill or on convalescent status from a mental hospital. Exception may be made at the discretion of the social welfare department.

(12) A home shall not be licensed in which any member of the household is an inmate of a penal or correctional institution or on parole or probation, without consultation with the state department of corrections.

History: 1944 AC, p. 1370; 1944 ACS 8, p. 20; 1954 AC, p. 4327; 1954 ACS 30, p. 18, Eff. May 15, 1962.

R 400.194 Foster child.

Rule 194. (1) The daily routine shall be such as to promote good health, rest, and play habits.

(2) The responsibility for the child's health care shall rest with the foster parents, who shall cooperate with the parents or the child placing agency, public or private, and the physician and health authorities in the community. Any child showing symptoms of illness as manifested by running nose, watery eyes, flushed cheeks, rash, cough, apparent rise in temperature, and vomiting shall be isolated promptly from other children in the home.

(3) In case of sickness or accident to a child, immediate notice shall be given to the person or agency who placed the child; adequate medical care shall be given meanwhile.

(4) Each child shall sleep alone or with only 1 other child of the same sex. Children of opposite sexes, if both are over the age of 5, shall not sleep in the same room. Children over 1 year of age may not sleep in the parental bedroom.

(5) The daily diet shall be varied, adequate, and wholesome. It shall include sufficient quantities of milk, eggs, meats, fruits, vegetables, whole grain cereals, and bread. Food for infants shall be subject to the direction of a competent physician, clinic or health department.

(6) The foster parents shall be responsible for providing opportunity for the religious education and attendance at religious services of the children in accordance with the religious affiliation or expressed wishes of their parents or agency responsible for their care.

(7) Problems of child training shall be handled with sympathy and understanding. Severe corporal punishment shall be a basis for revocation of license.

History: 1944 AC, p. 1370; 1944 ACS 8, p. 21; 1954 AC, p. 4328; 1954 ACS 30, p. 19, Eff. May 15, 1962.

R 400.195 Records required.

Rule 195. (1) Each person in charge of a foster home shall keep a record of the child's name and age, and the date of his entry and discharge.

(2) If the child is placed directly by parents or relatives, and is not under the supervision of a public or private child-placing agency, the following information shall also be recorded:

(a) Names of parents or relatives.

Digitized by Google Original from UNIVERSITY OF MICHIGAN

(b) Address and telephone number of the parents or relatives.
(c) Places and hours of employment of parents or relatives.
(d) Instructions for reaching the parents or relatives.
(e) Name, address, and telephone number of another person who might be reached in case of emergency.
(f) Name, address, and telephone number of the family physician.
(g) The boarding agreement with the parents or relatives, including the rate of pay for care.

History: 1944 AC, p. 1371; 1944 ACS 8, p. 21; 1954 AC, p. 4328; 1954 ACS 30, p. 19, Eff. May 15, 1962.

BOARDING SCHOOLS FOR CHILDREN

R 400.211 Inspection and licensing.

Rule 211. (1) The acceptance for board, care, and instruction of 5 or more children under 16 years of age constitutes a boarding school.
(2) Wilful and substantial failure to comply with any of the provisions of Act No. 47 of the Public Acts of the First Extra Session of 1944, or with these rules, or with the sanitation standards of the state department of health shall constitute sufficient cause for revocation of or denial of a license.
(3) The license issued under this act shall be posted in a conspicuous place. It shall be the property of the Michigan social welfare commission and subject to revocation and return for due cause.
(4) The license shall be renewed annually, if approved after inspection, upon the receipt of the renewal application, properly filled out.
(5) Inspection and approval by a duly authorized representative of the Michigan social welfare commission are necessary prior to the issuance of renewal of license.
(6) If additional facilities, which would allow for an increase in capacity, are contemplated, the state department of social welfare must be notified and approval of the changes secured.
(7) Teaching facilities and equipment, the course of study, and the qualifications of the teachers, shall meet the standards as provided in the general school law and be under the supervision of the superintendent of public instruction.
(8) The approval of the local fire department or state fire marshal must be secured and its recommendations carried out prior to the acceptance of pupils.
(9) The local department of health must approve sanitation.
(10) Hearing, before the Michigan social welfare commission, will be held upon request of a licensee whose license is revoked or renewal denied.

History: 1944 AC, p. 1371; 1954 AC, p. 4329.

R 400.212 Building and equipment.

Rule 212. (1) The building or buildings to be used as a boarding school shall be in good repair and suitably located. There must be no fire hazard.
(2) All rooms shall be outside rooms and the window space shall be ample for light and ventilation. Doors and windows shall be adequately screened.
(3) Safe, clean roomy space for outdoor and indoor play shall be available.
(4) Furniture and equipment must be adequate, in good condition, of a character to permit easy cleaning and neatly kept.
(5) There shall be heating facilities capable of maintaining a comfortable temperature—70 degrees Fahrenheit in severe weather.
(6) An adequate number of toilets, lavatories, showers, and tubs shall be provided to meet the requirements of the school.

(7) Drinking fountains or individual cups must be provided.

(8) Distance between beds shall be not less than 2 feet, and, if they are this close, heads should be alternated.

(9) Each child shall have cupboard or drawer space for storage of personal belongings and convenient space for hanging clothing and outdoor wraps.

(10) Provision must be made so that each individual child keeps his towel, washcloth, toothbrush, and comb for his own use.

History: 1944 AC, p. 1371; 1954 AC, p. 4329.

R 400.213 Personnel.

Rule 213. (1) There shall be an adequate and competent staff of administrative, teaching, supervisory, and maintenance personnel.

(2) Persons responsible for the care of children shall be of good character and reputation, and shall understand children's problems.

(3) Persons responsible for the teaching and supervision of nursery school pupils, children of retarded mentality, suffering from epilepsy or any other specific condition, shall have had special training and experience for the work which meets with the approval of the superintendent of public instruction.

(4) Persons caring for children after school hours and on weekends must be qualified for such duty.

(5) Persons coming in contact with children, including food handlers, shall be in good health. Food handlers shall comply with local ordinances. Kahn, x-ray, smear, or typhoid check may be required if history indicates the need.

History: 1944 AC, p. 1372; 1954 AC, p. 4329.

R 400.214 Medical and nursing care.

Rule 214. (1) Provision must be made for medical and nursing care suited to the number and type of children in the school.

(2) In order to protect the child, other children, and the school management, it is necessary that a physical examination be made by the family physician or school physician or both, just prior to admission, to insure that no conditions exist which should limit the child's activities and that there is no apparent contagious disease or history of recent exposure.

(3) Facilities shall be available for the isolation of any child with infection, temperature, or any other condition inimical to the safety and welfare of others.

(4) In case of serious sickness or accident to a child, immediate notice shall be given to the person or agency who placed the child in the school, adequate medical care being given meanwhile. It is recommended that permission for emergency operations be obtained from the parents.

(5) Contagion or suspected contagion must be promptly reported to the local department of health.

History: 1944 AC, p. 1372; 1954 AC, p. 4330.

R 400.215 Care of children.

Rule 215. (1) Children shall be subjected to only kind and proper treatment and moral surroundings. Reasonable methods of discipline shall be employed.

(2) Planned recreation and a schedule of activity and study conducive to the improvement of health and increase of knowledge and growth of character are required. Careful and constant supervision and reasonable segregation according to age and sex shall be carried out.

(3) Satisfactory arrangements must be made for the serving of well cooked, well planned, and adequate meals.

(4) Arrangements should be made for religious instruction or church attendance in accord with the wishes of the child's parents.

(5) Children shall be provided with a comfortable bed, and shall sleep alone.

(6) There must be a sufficient supply of suitable bedding, bed linen, towels, and table linen, which is kept in a clean and sanitary condition.

(7) Arrangements shall be made for the laundering, mending, and general care of clothing and linen.

(8) Any change which might in any way affect the best interests of the children shall be reported immediately to the state department of social welfare and to the agency or person from whom the children are received.

History: 1944 AC, p. 1372; 1954 AC, p. 4330.

R 400.216 Records.

Rule 216. Records of personal data for each child shall be kept in any reasonable form the school director may choose. Minimum records shall include the child's name, age, and address, the name, address, and telephone number of parents or guardian, and the dates of admission and discharge. It is desirable also to have a record of the child's physical condition, immunizations, previous contagious diseases, school grade, religion, and any social or physical condition that requires special consideration. A running record of the child's school life covering activities, behavior, accidents, illnesses, etc., should be kept and a report sent to parents at the end of the school year.

History: 1944 AC, p. 1372; 1954 AC, p. 4330.

SUMMER CAMPS FOR CHILDREN

R 400.231—R 400.238 Rescinded.

History: 1954 ACS 24, pp. 27-29, Eff. Nov. 12, 1960; 1954 ACS 43, p. 16, Eff. Aug. 14, 1965; 1954 ACS 48, p. 27, Eff. Nov. 14, 1966; 1954 ACS 56, p. 22, Eff. Nov. 14, 1968; 1954 ACS 68, p. 34, Eff. June 28, 1971; rescinded 1954 ACS 77, p. 124, Eff. Sept. 26, 1973.

Editor's note: Former R 400.231 to R 400.235, pertaining to summer camps for children, were rescinded by 1954 ACS 24, p. 17. For history of the rescinded rules, see 1977 AACS, p. 243.

SOLICITING AGENCIES

R 400.241 Sound financial accounting; use of funds.

Rule 241. The charitable organization must show sound financial accounting, and show that all moneys expended have been applied to the carrying out of the announced purpose for which the agency is organized, or for which the solicitation was held. Where the amount received from solicitations during the fiscal year of the charitable organization is less than $15,000.00, the report of audit submitted in connection with an application for the annual license may be a detailed statement sworn to by 2 or more officers of the organization. In all other cases, an audit of the complete operation of the charitable organization by a certified public accountant and certified, as to correctness, by him is required. The organization must adopt controls of income to make it possible for the certified public accountant to attest to the correctness of the amount shown as received, or including all receipts.

History: 1944 AC, p. 1374; 1954 AC, p. 4332; 1954 ACS 28, p. 13, Eff. Nov. 14, 1961.

R 400.242 Purpose of agency.

Rule 242. All soliciting materials and appeals used shall clearly indicate the full purpose of the charitable organization and the purpose of the solicitation.

History: 1944 AC, p. 1374; 1954 AC, p. 4332; 1954 ACS 28, p. 13, Eff. Nov. 14, 1961.

R 400.243 Michigan certificate of authority for foreign corporations.

Rule 243. No license will be granted to a charitable organization, institution, or association incorporated under the laws of another state to make public solicitations in Michigan unless it has obtained a certificate of authority to do business in Michigan issued by the Michigan corporation and securities commission.

History: 1954 ACS 22, p. 79, Eff. May 13, 1960.

R 400.244 "Formed for a charitable purpose"; restrictions as to membership of controlling board.

Rule 244. No organization, institution, association, or corporation, regardless of its statement of purpose, shall be considered as formed for a charitable purpose where more than ⅓ of the members of the board of directors or trustees consists of persons who either are receiving remuneration from the organization, institution, association, or corporation or have spouses, parents, or children so receiving.

History: 1954 ACS 24, p. 29, Eff. Nov. 12, 1960.

R 400.245 Same; restrictions as to dividends; dissolution.

Rule 245. No organization, institution, association, or corporation, regardless of its statement of purpose, shall be considered as formed for a charitable purpose if dividends are distributed to members or stockholders or if, upon dissolution, the net assets are to be so distributed in whole or in part.

History: 1954 ACS 24, p. 29, Eff. Nov. 12, 1960.

R 400.245a Definitions.

Rule 245a. (1) The meaning of the word "charitable" in the phrase "charitable purpose" shall include "philanthropic," "social service," "benevolent," and "patriotic."

(2) A church is an ecclesiastical corporation, or an association organized primarily for public worship and protected in its organization by a specific Michigan statute.

(3) A charitable organization is church-sponsored where a single church has legal control of the organization or contractual control of the solicitation.

History: 1954 ACS 28, p. 13, Eff. Nov. 14, 1961.

MATERNITY HOMES FOR UNMARRIED MOTHERS

R 400.246—R 400.250 Rescinded.

History: 1954 ACS 4, pp. 10, 11, Eff. Dec. 23, 1955; rescinded 1954 ACS 62, p. 26, Eff. May 18, 1970.

PART 4. DIVISION OF SERVICES FOR THE BLIND VOCATIONAL REHABILITATION

R 400.251 Application.

Rule 251. An application shall be considered a right of any individual who considers himself eligible for vocational rehabilitation through the division of services for the blind.

History: 1944 ACS 1, p. 32; 1954 AC, p. 4332; 1954 ACS 78, p. 28, Eff. Feb. 22, 1974.

R 400.252 Special eligibility requirements.

Rule 252. (1) Any individual in Michigan shall be considered eligible for vocational rehabilitation through the division of services for the blind if he is otherwise eligible.

(2) Any individual who is otherwise eligible and is found through an examination by an ophthalmologist or a physician approved by the state supervising ophthalmologist to have a visual acuity of 20/200 or less in the better eye with proper corrections or a limitation of the visual field of vision such that the widest diameter of the visual field subtends an angle distance no greater than 20 degrees, shall be considered eligible for service on the basis of lack or defectiveness of vision.

(3) Vocational rehabilitation services shall be available only to those individuals whose vocational capacity may be increased through such services and when a study of the age, physical and mental capacity, aptitudes, and employment history indicate the probability that a placement may be made after such services have been given; provided, however, that the division of services for the blind may extend rehabilitation services to blind persons whenever it appears feasible without regard to employability.

(4) No person shall be denied rehabilitation or other services on the basis of race, creed, or color. The same facilities will be available to any eligible person.

(5) Vocational rehabilitation services other than maintenance shall be available to any civil employee of the United States disabled while in the performance of his duties and to any war disabled civilian as defined in U.S. Public Law 113-78th Congress (first session) who may be certified to the division of services for the blind by the administrator of the federal security agency without regard to economic circumstances of the individual. Maintenance may be paid only after a study of the economic circumstances of the individual indicates that he is unable to pay for this service.

History: 1944 ACS 1, p. 32; 1954 AC, p. 4332; 1954 ACS 78, p. 29, Eff. Feb. 22, 1974.

R 400.253 Need and amount of services.

Rule 253. (1) Rehabilitation services for the blind shall be available to an individual otherwise eligible who is financially unable to pay for the services. Cost of services other than diagnostic evaluations, counseling, training, training materials, reader service, interpretive service for the deaf, placement, and follow-up shall be available on the basis of a study of the economic circumstances of the individual and may be made available in whole or in part when the study indicates that an individual is unable to pay for such services.

(2) Cost of diagnostic evaluations, counseling, training, training materials, reader service, interpretive service for the deaf, placement, and follow-up shall be considered allowable and may be given without regard to economic circumstances.

History: 1944 ACS 1, p. 32; 1954 AC, p. 4333; 1954 ACS 78, p. 29, Eff. Feb. 22, 1974.

OPERATION OF VENDING STAND PROGRAM

R 400.261 Legal authority and scope of regulations.

Rule 261. The state department of social services, division of services for the blind, hereinafter called the licensing agency, administers a vending stand program for the blind, hereinafter called the program, on federal and other property in accordance with subsection (e) of section 14 of Act No. 280 of the Public Acts of 1939, as amended, and Act No. 14 of the Public Acts of 1939, as amended, being §§400.14 and 393.271 to 393.276 of the Michigan Compiled Laws.

History: 1954 ACS 5, p. 57, Eff. Feb. 15, 1956; 1954 ACS 78, p. 29, Eff. Feb. 22, 1974.

Editor's note: Former R 400.261—R 400.272, deriving from 1954 AC, pp. 4333-4336, were rescinded by 1954 ACS 5, p. 57, Eff. Feb. 15, 1956. For history of the rescinded rules, see 1955 AACS, p. 114.

R 400.262 Licenses; issuance and conditions.

Rule 262. Licenses will be issued to persons in need of employment who have resided in Michigan for at least 1 year immediately preceding the date of license. Licenses will be issued only to persons who have been determined by the state agency to be:

(a) Blind as certified by a duly licensed ophthalmologist according to the following definitions: central visual acuity of 20/200 or less in the better eye after correction, or a limitation in the field of vision such that the widest diameter of visual field subtends an angle distance not greater than 20 degrees.

(b) Citizens of the United States.

(c) At least 21 years of age.

(d) Certified by the licensing agency as qualified to operate a vending stand.

History: 1954 ACS 5, p. 57, Eff. Feb. 15, 1956.

R 400.263 Licenses; duration.

Rule 263. Licenses will be issued for an indefinite period but subject to termination if, after affording the operator an opportunity for a fair hearing, the licensing agency finds that the vending stand is not being operated in accordance with its rules and regulations, the terms and conditions of the permit, or the agreement with the operator.

History: 1954 ACS 5, p. 58, Eff. Feb. 15, 1956.

R 400.264 Income from vending machines.

Rule 264. Income from vending machines within reasonable proximity to and in direct competition with the vending stand will be assigned to the operator when within the power of the agency to secure such assignment.

History: 1954 ACS 5, p. 58, Eff. Feb. 15, 1956.

R 400.265 Termination of licenses.

Rule 265. A license to a blind person for the operation of a vending stand on federal or other property may be terminated when the licensing agency finds that the vending stand is not being operated in accordance with its rules and regulations, the terms and conditions governing the permit, or the agreement with the operator.

History: 1954 ACS 5, p. 58, Eff. Feb. 15, 1956.

R 400.266 Rescinded.

History: 1954 ACS 5, p. 58, Eff. Feb. 15, 1956; rescinded 1954 ACS 61, p. 50, Eff. Feb. 16, 1970.

R 400.267 Furnishing equipment and initial stocks.

Rule 267. The licensing agency is responsible for:

(a) Furnishing each vending stand with adequate, suitable equipment and for the maintenance and repair of such equipment.

(b) Furnishing each vending stand with adequate initial stocks of merchandise.

History: 1954 ACS 5, p. 58, Eff. Feb. 15, 1956.

R 400.268 Right, title to, and interest in vending stand equipment.

Rule 268. Right, title to, and interest in the equipment in each vending stand used in the program, in accordance with the laws of this state, is vested in the state department of social services.

History: 1954 ACS 5, p. 58, Eff. Feb. 15, 1956; 1954 ACS 78, p. 29, Eff. Feb. 22, 1974.

R 400.269 Setting aside of funds.

Rule 269. (1) A uniform fee based upon the gross monthly sales shall be paid by each stand operator. The fee shall be fixed by director of the social services and embodied in a written agreement with the operator. The fee shall be credited to the blind stand revolving fund and used only for:

(a) Maintenance and replacement of equipment.

(b) Purchase of new equipment.

(c) Merchandise loss due to theft or equipment failure.

(d) Management services, including the cost of in-service training programs. The amounts to be set aside shall not exceed a reasonable amount as determined by the director of the office of vocational rehabilitation.

(2) Not more than 10% of the vending stand revolving fund shall be used for maintenance and repair of equipment during any fiscal year. Not more than 90% of the vending stand revolving fund shall be used for the purchase of new equipment during any fiscal year. These charges are based on records of expenditures made for each of these purposes over a reasonable period of time and allow for reasonable charges for improving services, fluctuations in costs and program expansion. The charges shall be reevaluated periodically and necessary adjustments made. Adequate records shall be maintained to support the reasonableness of the charge for each of the purposes listed.

History: 1954 ACS 5, p. 59, Eff. Feb. 15, 1956; 1954 ACS 78, p. 29, Eff. Feb. 22, 1974.

R 400.270 Proceeds of operation of stand.

Rule 270. The proceeds of the operation of each stand shall accrue to the operator, after paying operating costs and reasonable charges for maintenance and replacement of equipment, and the purchase of new equipment.

History: 1954 ACS 5, p. 59, Eff. Feb. 15, 1956.

R 400.271 Agreement with operator.

Rule 271. Each operator must agree to:

(a) Perform faithfully and to the best of his ability the necessary duties in connection with the vending stand in accordance with the licensing agency's rules and standards issued pursuant thereto, the terms of the permit and the agreement with the operator.

(b) Take no action in derogation of or inconsistent with the paramount right, title and interest of the licensing agency to the vending stand equipment.

(c) Admit duly authorized representatives of the licensing agency to the stand and to cooperate with them in connection with their official duties and responsibilities.

(d) Operate the stand in accordance with all applicable health laws and rules.

(e) Furnish such reports as the licensing agency may require from time to time.

(f) Sell only those types of merchandise itemized on the agreement signed by the operator and the licensing agency unless written permission to sell additional types of merchandise is obtained from the licensing agency.

(g) Pay cash for all merchandise purchased.

(h) Obtain prior approval of the licensing agency, except in emergencies, before employing assistants.

(i) Conform to the hours of operation of the stand as fixed by the licensing agency.

(j) Participate in the in-service training programs provided.

(k) Make payment of the service fee by the due date.

(l) Make payment of the operator's share of retirement by the due date.

History: 1954 ACS 5, p. 59, Eff. Feb. 15, 1956; 1954 ACS 78, p. 29, Eff. Feb. 22, 1974.

R 400.272 Operator's in-service training in accounting, merchandising, and maintenance.

Rule 272. In order that each operator shall be assured the maximum financial return and so that employment opportunities for the use of successive blind persons may be preserved, each blind operator shall receive systematic assistance and in-service training in keeping accounts, selection and purchase of suitable merchandise, the maintenance of a clean and attractive location, and the utilization of sound business practices and methods.

History: 1954 ACS 5, p. 59, Eff. Feb. 15, 1956.

R 400.273 Promotion.

Rule 273. An operator shall be promoted to a better paying stand if such a stand is available and the operator is qualified and willing to accept a transfer.

History: 1954 ACS 5, p. 59, Eff. Feb. 15, 1956; 1954 ACS 78, p. 30, Eff. Feb. 22, 1974.

R 400.274 Demotion.

Rule 274. An operator may be demoted to a poorer paying stand if such a stand is available when an operator has demonstrated his inability to operate his present vending stand successfully and efficiently.

History: 1954 ACS 5, p. 59, Eff. Feb. 15, 1956; 1954 ACS 78, p. 30, Eff. Feb. 22, 1974.

R 400.275 Explanation of rights and responsibilities.

Rule 275. These rules, the applicable regulations of the federal agency having charge of the property on which the vending stand is located, and the regulations of the United States department of health, education and welfare governing the vending stand program will be read and explained to each operator, and copies thereof will be furnished to him. When such regulations have been read, explained, and furnished to the operator, he shall attest to this fact in writing.

History: 1954 ACS 5, p. 60, Eff. Feb. 15, 1956.

R 400.276 Copy of rules and description of arrangements.

Rule 276. The licensing agency will furnish each operator with a copy of its rules and regulations and a description of the arrangements for providing services to the operator. The licensing agency will also take adequate steps to assure that each operator understands the provisions of such documents and the provisions of the permit and any agreement under which he operates, as evidenced by his signed statement.

SALE AND MANUFACTURE OF BLIND-MADE MERCHANDISE

R 400.301—R 400.306 Rescinded.

History: 1944 ACS 5, pp. 34, 35; 1944 ACS 37, pp. 26, 27; 1954 AC, pp. 4336, 4337; rescinded 1954 ACS 16, p. 10, Eff. Nov. 14, 1958.

PART 5. STATE JUVENILE WARDS

BOYS' TRAINING SCHOOL

R 400.321 Departures from school.

Rule 321. (1) "Temporary leave of absence for vacation" shall be defined as permission to leave the school for a specific and very temporary purpose, to return to school when purpose of absence has been accomplished.

(2) Conditional release, formerly known as "release and parole," shall be defined as supervised placement of a child by an employee of the department

UNIVERSITY OF MICHIGAN

upon conditions set by the department when the child's progress requires care outside of the school prior to official discharge. Conditions of release may be placement in the parental home, relative's home, in a foster family home, or group facility.

(3) Cost of care for a child on conditional release in any of the suitable facilities mentioned in subrule (2) above may be assumed by the department not to exceed the established rate for board and care; provided that, when a child on conditional release is placed in the parental home, total cost of care shall be assumed by the parents unless the family is found to be in need on assistance standards.

(4) "Discharge" and "graduation" shall both be defined as an order of the superintendent ending all responsibility or control of school and all supervision.

(5) Boys shall be discharged upon attainment of nineteenth birthday.

(6) The superintendent shall have discretion to discharge:

(a) When court or other supervising agency recommends such action on the basis of successful completion of period of release or parole.

(b) In order to enable boy, with court approval, to enlist for military service.

(c) When a boy 17 years of age or older is believed to have gained maximum advantage from school program or has demonstrated that he does not respond to it.

(d) Upon arrest for a new offense and waiver of jurisdiction from juvenile court to criminal court.

History: 1944 ACS 32, p. 7; 1954 AC, p. 4337; 1954 ACS 43, p. 16, Eff. Aug. 14, 1965.

USE OF FACILITIES OF DEPARTMENT OF CORRECTIONS FOR BOYS COMMITTED TO DEPARTMENT OF SOCIAL SERVICES

R 400.331 Procedures prior to use of facilities of corrections department.

Rule 331. (1) The director shall consider the use of the facilities of the corrections department only upon written request of the superintendent of boys' vocational school.

(2) In order to assist him in making a decision, information submitted to the director by the school shall include the following:

(a) A description of the boy's behavior at the boys' vocational school and his inability to adjust. This should include a detailed outline of all procedures which have already been tried in assisting the boy to a better adjustment.

(b) Specific evidence that the boy has been found to be so aggressively out of control as to be a menace to himself or others in boys' vocational school. The following are possible evidences of such behavior, although they do not automatically make a boy eligible, nor does this list exclude other types of behavior:

(i) Assault with intent to do serious bodily injury.

(ii) Repeated acts of physical aggression; history indicates a pattern of extreme aggressiveness.

(iii) Demonstrated inability to participate in the boys' vocational school program, coupled with repeated truancies accompanied by other delinquent acts.

(iv) Forcing another boy, through threat of physical aggression, to be the passive partner in a sexual act more than once.

(v) Habitual use of narcotics.

(c) Reasons why the boy cannot profit from the boys' vocational school program.

(d) Reasons why the boy would profit from care in the Michigan reformatory at Ionia.

(e) Additional information in the form of such records as are available regarding his family history and school and community reports.

(f) Written reports of physical and psychiatric examinations made specifically because of the request, or within 3 months prior to the request. There must be a positive determination that the boy is not suffering from a mental illness which is possibly sufficient to permit commitment to a state hospital.

(3) Following a review of the information submitted, the director of the department of social welfare shall hold a personal interview with the boy. Keeping in mind the information submitted to him, during the interview the director will attempt particularly to learn:

(a) The boy's attitude toward the program and personnel of boys' vocational school.

(b) The boy's difficulties, with what he sees as reasons for them.

(c) The boy's attitude toward the possibility of placement in the Michigan reformatory at Ionia.

(4) The committing judge will be informed that this interview is to be held.

(5) Following the interview the director shall make a decision regarding the action to be taken, and if the boy is to be placed in the reformatory the department of corrections shall be notified.

(6) Copies of the information submitted to the director shall be forwarded to the department of corrections.

History: 1944 ACS 37, p. 27; 1954 AC, p. 4338.

R 400.332 Procedures while under care in Michigan reformatory at Ionia.

Rule 332. (1) The boy shall be required to abide by those rules of the department of corrections, which apply to the inmates of the Michigan reformatory at Ionia, and to take part in its regular program, unless excused therefrom by the warden of the Michigan reformatory at Ionia.

(2) Qualified members of the boys' vocational school staff shall be permitted and required to make frequent regular visits to such boys. During such visits the staff members shall attempt to determine the readiness for release or return to the boys' vocational school. The staff members shall contact officials of the Michigan reformatory at Ionia in order to gain supplemental information regarding adjustment of these boys.

(3) The length of the period of stay in the Michigan reformatory at Ionia should be flexible and governed by the varying needs of the boys in placement there. It should thus be governed by the length of time spent in the program that will most benefit the particular boy under consideration.

(4) A boy may be returned at any time and for any reason whatsoever to the boys' vocational school by the director, and when such return is for reasons other than final discharge or reinstatement as a member of the boys' vocational school, he will be returned to the Michigan reformatory at Ionia by the director when the purpose for which he has been returned has been accomplished. This will provide for temporary leaves of absence, necessitated by illness or death in the boy's family, for medical or surgical attention to the boy, and for other personal or family reasons.

Michigan Compiled Laws. The rate established shall be determined on the basis of expenditures and days care provided during the immediately preceding state fiscal year for each type of care provided such children. The rate shall apply in determining required reimbursement to the state for care provided during the calendar year immediately following. A separate rate is to be established for each of the following: boarding care, care in girls' training school, care in boys' training school including forestry camps, and care in other group care facilities which the department is authorized to operate for care of such department wards. Each rate shall cover the entire cost of care; except that reimbursement of the state from funds received from the United States veterans' administration for children at Michigan children's institute will be limited to only those expenditures identified as paid in respect to the individual child.

History: 1954 ACS 5, p. 60, Eff. Feb. 15, 1956; 1954 ACS 39, p. 12, Eff. Aug. 14, 1964.

Editor's note: Former R 400.341—R 400.348, pertaining to payments to the state for the care of children, were rescinded by 1954 ACS 5, p. 60. For history of rescinded rules, see 1955 AACS, p. 117.

R 400.342 Rescinded.

History: 1954 ACS 5, p. 60, Eff. Feb. 15, 1956; rescinded 1954 ACS 39, p. 13, Eff. Aug. 14, 1964.

R 400.343 Costs of care; days' care basis for per diem rates.

Rule 343. The per diem rate shall be determined by dividing the net expenditures by the sum of days care received during the fiscal year by all children receiving each type of care. In case of truancy and temporary leaves of absence, separation shall not be considered to have occurred until after 5 days of absence.

History: 1954 ACS 5, p. 61, Eff. Feb. 15, 1956; 1954 ACS 39, p. 13, Eff. Aug. 14, 1964.

R 400.344 Notice to auditor general, department of revenue, and probate courts.

Rule 344. The department of social services will give official notice of annual determination of the rates established under R 400.341 to the auditor general, the department of revenue, and each probate court.

History: 1954 ACS 5, p. 61, Eff. Feb. 15, 1956.

R 400.345 Charges; computation.

Rule 345. Charges will be made on a monthly basis according to the per diem rate for each type of care and the number of days care provided each child during the month.

History: 1954 ACS 5, p. 61, Eff. Feb. 15, 1956; 1954 ACS 39, p. 13, Eff. Aug. 14, 1964.

R 400.346 Definition of special guardian.

Rule 346. The phrase "special guardian" as used in part (e) of section 18 of chapter XIIA of Act No. 288 of the Public Acts of 1939, as amended by Act No. 139 of the Public Acts of 1953, shall not be construed to mean a special guardian appointed pursuant to section 11 of chapter 3 of Act No. 288 of the Public Acts of 1939. Since the state, by the statutes governing boys' vocational school, girls' training school, and Michigan children's institute, has assumed state guardianship of the person of the boys and girls committed to such schools and institute, and the respective superintendents represent the state in such guardianship, the phrase permits them to act also as custodian of funds available from the federal government for the care of children.

History: 1954 ACS 5, p. 61, Eff. Feb. 15, 1956.

R 400.347 United States veterans administration payments.

Rule 347. Whenever funds for the care of a boy or girl who has been committed to boys' vocational school, girls' training school, or Michigan children's institute may be available from the veterans' administration of the federal government, the superintendent of the institution to which the boy or girl is committed shall request that he be recognized as custodian of the boy or girl and designated as payee for such funds under the regulations of the veterans' administration. When so designated by the veterans' administration, he may pay from such funds to the institution of which he is superintendent the cost of the current care of the boy or girl as determined in R 400.341 and R 400.345 to the extent possible under federal regulations, provided that payments made from such federal funds shall not be in lieu of any reimbursement or reimbursements a parent is ordered to make by the court committing the boy or girl to the institution.

History: 1954 ACS 5, p. 61, Eff. Feb. 15, 1956.

R 400.348 Survivors benefits.

Rule 348. Whenever the superintendent is payee for benefits under the old age and survivors insurance law of the federal government belonging to any boy or girl for whom he represents the state as guardian, he may pay from such funds to the institution of which he is superintendent the cost of the current care of the boy or girl as determined in R 400.341 and R 400.345 to the extent possible under federal regulations, provided that payments made from such federal funds shall not be in lieu of any reimbursement or reimbursements which a parent is ordered to make by order of the court committing the boy or girl to the institution.

History: 1954 ACS 5, p. 61, Eff. Feb. 15, 1956.

R 400.349 Federal payments deemed gifts.

Rule 349. Since the naming of the superintendent by the federal government as payee for funds available under the old age and survivors insurance law or through the veterans' administration for any boy or girl is based on the relationship in fact of the superintendent to the boy or girl and not in consideration of any requirement of state law that the federal government so name and pay, payments received by the institutions from their superintendents under R 400.347 and R 400.348 shall be considered gifts of money to the social welfare commission under section 15 of Act No. 280 of the Public Acts of 1939, being §400.15 of the Michigan Compiled Laws, and, after notification of the auditor general, shall be deposited with the state treasurer as a voluntary payment for the care of the boy or girl for whom intended.

History: 1954 ACS 5, p. 61, Eff. Feb. 15, 1956.

EXCLUSIONS

R 400.361 Procedures prior to order of exclusion.

Rule 361. When the superintendent of boys' vocational school desires to recommend to the social welfare commission the exclusion of a boy who, because of mental or physical defect, would be unable to profit from training in the school, he shall present to the commission the signed statements of the medical doctor, psychiatrist, and clinical psychologist upon which his request is based, together with statements as to whether the nature of the defect would endanger other boys at the school. Copies of the statements and recommendations shall also be sent to the committing judge at least 5 days prior to the meeting of the social welfare

commission at which the recommendation will be acted on. The judge will also be informed of the date, time, and place of the meeting.

History: 1944 ACS 38, p. 36; 1954 AC, p. 4341.

R 400.362 Charge against counties for excludable boys.

Rule 362. Charge against the county for the care of a boy whom the court wishes to remain in boys' vocational school, and the commission has authorized to remain, shall begin for the day following the day of the commission action.

History: 1944 ACS 38, p. 36; 1954 AC, p. 4341.

GIRLS' TRAINING SCHOOL

R 400.371 Departures from school.

Rule 371. (1) "Leave of absence" shall be defined as permission for a girl to leave the school temporarily for a specific purpose, to return to the school when the purpose of the absence has been accomplished. The girl remains under the control of the school. Such a leave will be granted:

(a) In case of emergency in the girl's immediate family, when verified by the probate court.

(b) To girls for whom a brief home visit might serve a useful purpose.

(c) In case of need for temporary medical care at a place such as the university hospital.

(2) Conditional release, formerly known as "release and parole," shall be defined as supervised placement of a child by an employee of the department upon conditions set by the department when the child's progress requires care outside of the school prior to official discharge. Conditions of release may be placement in the parental home, relative's home, in a foster family home, or group facility.

(3) Cost of care for a child on conditional release in any of the suitable facilities mentioned in subrule (2) above may be assumed by the department not to exceed the established rate for board and care, provided that when a child on conditional release is placed in the parental home, total cost of care shall be assumed by the parents unless the family is found to be in need on assistance standards.

(4) "Absence without leave" shall be defined as the leaving of the school campus by any girl without official permission.

(5) "Discharge" shall be defined as an order of the superintendent ending all responsibility, control, and supervision by the school.

(a) Girls shall be discharged upon attainment of nineteenth birthday.

(b) The superintendent shall have discretion to discharge a girl upon:

(i) Marriage of the girl with permission of the superintendent.

(ii) Demonstration of her successful social adjustment or self-support over a substantial period of time.

(iii) Demonstration that the girl has received maximum advantage from the school program or that she does not respond to it.

(iv) Return to the county as ineligible for care at the school under the statutory admission restrictions.

(v) Return to the county as incorrigible if the girl is 17 years of age or older.

(vi) Transfer to other state institutions as provided by law, except Michigan children's institute.

(6) Upon agreement with the superintendent of Michigan children's institute, the superintendent may transfer a girl to Michigan children's institute for paid care and supervision. Such transfer shall be used for:

(a) Girls previously transferred from Michigan children's institute to girls' training school and expected to return to the care of the institute after a period of care at the training school.

(b) Pregnant girls during the period of maternity care.

(c) Girls in need of placement and supervision when such transfer will materially benefit them mentally or physically.

History: 1944 ACS 39, p. 29; 1954 AC, p. 4342; 1954 ACS 43, p. 16, Eff. Aug. 14, 1965.

PART 6. HEARING PROCEDURES

R 400.381—R 400.383 Rescinded.

History: 1944 ACS 38, pp. 36, 37; 1954 AC, p. 4342; 1954 ACS 13, p. 79, Eff. Feb. 14, 1958; rescinded 1954 ACS 61, p. 50, Eff. Feb. 16, 1970.

PART 7. PROTECTION OF CHILDREN

INTERSTATE PLACEMENTS

R 400.400 Definition.

Rule 400. For the purpose of administering subdivision (d) of section 14 of the social welfare act, when the placement in Michigan is made by an individual, a child shall be defined as a person under 17 years of age; when the placement is made by a court or an agency in another state a child shall be defined as a person under 21 years of age who is a juvenile as defined in the juvenile court laws of the other state.

History: 1954 ACS 13, p. 81, Eff. Feb. 14, 1958.

INTERCOUNTRY PLACEMENTS

R 400.410 Definition.

Rule 410. For the purpose of administering subdivision (d) of section 14 of the social welfare act, when child is to be placed in Michigan from another country, child shall be defined as a person under 17 years of age.

History: 1954 ACS 13, p. 81, Eff. Feb. 14, 1958.

R 400.411 Conditions for approval of placements.

Rule 411. (1) In all cases the state department of social welfare will exercise its judgment on whether or not to approve the placement only when it has:

(a) Information about the immigration status of the child; namely, whether he is to be admitted to the United States on a permanent visa or some type of temporary permit. When the placement is for the purpose of permanent residence and adoption, assurance that the immigration status is such that if the adoption is completed he will be allowed to remain in this country and can eventually become a citizen.

(b) Information about the legal status of the child; namely, who has legal guardianship or custody and who will be responsible for him if the placement does not work out satisfactorily.

(c) Social histories of the child and of the foster home, giving reasonable assurance that the home is a suitable one for the particular child.

(d) When the placement is for the purpose of adoption, a court order or assurance from the court for the county where the adopting parents live that the information about the child and the adoptive home and the legal documents have been reviewed and the court sees no obstacle to completion of the adoption.

(2) With respect to children coming into Michigan for the purpose of adoption from a country which has an immigration quota, whether the child is coming

Generated for Susan K Kendall (Michigan State University) on 2018-09-05 16:48 GMT / http://hdl.handle.net/2027/mdp.49015002898253

Digitized by Google Original from UNIVERSITY OF MICHIGAN

under the quota or on a nonquota visa, the state department of social welfare will exercise its judgment on whether or not to approve the placement only when a child placing agency licensed in Michigan has accepted responsibility for sponsoring the child, provided that if the prospective adoptive family is related to the child or in other special circumstances, the department may exercise the option of waiving the requirement of a sponsor. Sponsorship, as used in this rule, means making a study of the adoptive home, helping the family with the selection of the child and with arrangements for his admission to this country, supervising during the placement period if so directed by the court, and making other plans for the child if the placement fails before the adoption is completed.

(3) When a child is coming into Michigan for the purpose of adoption from Canada (or from any other nonquota country, with slight modifications to meet the requirements of the specific country or the American consulate in such country), the department will exercise its judgment on whether or not to approve the placement when:

(a) The provincial welfare department has secured the social history of the child, determined its legal status and who has authority to consent to the adoption, and the circumstances surrounding the proposed placement and, after reviewing this information, considers that the adoption placement is in the best interest of the child.

(b) For a child in the custody of an agency, the department is satisfied that the foreign agency is authorized to place children and that it has the legal right to place the child in question; and the agency has submitted to the department an agreement to accept the return of the child should the placement be deemed to be unsuccessful before the adoption is completed.

History: 1954 ACS 13, p. 81, Eff. Feb. 14, 1958.

PART 8. MEDICAL ASSISTANCE FOR THE AGED

R 400.501 Living with the spouse.

Rule 501. As found in Act No. 2 of the Public Acts of 1960, First Extra Session, hereinafter referred to in these rules for medical assistance for the aged as "the act," the phrase "living with the spouse" applies to all married clients, except in case of legal separation, estranged separation, or deportation.

History: 1954 ACS 25, p. 37, Eff. Feb. 14, 1961.

R 400.502 Rescinded.

History: 1954 ACS 25, p. 37, Eff. Feb. 14, 1961; rescinded 1954 ACS 48, p. 27, Eff. Nov. 14, 1966.

R 400.503 Disclosure of information.

Rule 503. Records of recipients and former recipients are confidential and no information concerning them or their existence may be given out, except when necessary for purposes related to the administration of public assistance, including recovery of assistance granted. When necessary to give information, R 400.6(2), (3), and (4) of part 1 of the rules of the commission will be followed.

History: 1954 ACS 25, p. 37, Eff. Feb. 14, 1961.

R 400.504 Enforcement of patient's rights to services under this act.

Rule 504. If the state department finds that the county social welfare board has refused to provide the services for which a patient has been certified as eligible by the county bureau of social aid, the state department will provide the services and deduct the cost thereof, including reasonable costs of administration, from moneys owing or to be owing the county by the state department.

History: 1954 ACS 25, p. 37, Eff. Feb. 14, 1961.

R 400.505 Reduction of services.

Rule 505. When, for financial reasons, the commission must reduce services, it may (a) discontinue some or all services for a month or months as determined by the commission after 30 days' notice has been given to the county social welfare board or (b) it may establish a time limitation on some or all services available to new or reinstated clients.

History: 1954 ACS 25, p. 37, Eff. Feb. 14, 1961.

R 400.506 Hearings.

Rule 506. The patient shall be informed in writing of his right to appeal any decision made concerning his application or his medical assistance and of his right to a hearing. Hearings will follow the procedures prescribed by the rules for public assistance hearings, R 400.7 of part 1 of the rules of the commission.

History: 1954 ACS 25, p. 38, Eff. Feb. 14, 1961.

R 400.507 Rescinded.

History: 1954 ACS 25, p. 38, Eff. Feb. 14, 1961; rescinded 1954 ACS 30, p. 20, Eff. May 15, 1962.

R 400.508 Intercounty disputes.

Rule 508. Disputes between 2 or more counties relating to interpretations of the act and claims thereunder may be settled by the social welfare commission in the same manner as prescribed in part 2 of the rules of the commission for appeals of settlement disputes.

History: 1954 ACS 25, p. 38, Eff. Feb. 14, 1961.

R 400.509 Coverage in respect to services.

Rule 509. The state department shall, in consultation with the state commissioner of insurance, determine what hospital and physicians' services are "furnished" under the 2 contracts in the act and in effect on September 1, 1960, and on file with the insurance commissioner. Such determination shall be implemented in written instructions to the county social welfare departments and bureaus of social aid as shall be deemed necessary from time to time.

History: 1954 ACS 25, p. 38, Eff. Feb. 14, 1961.

R 400.510 Rescinded.

History: 1954 ACS 25, p. 38, Eff. Feb. 14, 1961; rescinded 1954 ACS 37, p. 45, Eff. Feb. 14, 1964.

R 400.511 Reconsideration of eligibility for assistance.

Rule 511. Eligibility for assistance granted under this act shall be reconsidered from time to time as circumstances may require, and such reinvestigation, including redetermination of medical need, shall be made at least once in each 12 months.

History: 1954 ACS 25, p. 38, Eff. Feb. 14, 1961.

R 400.512 Definition of acute illness.

Rule 512. "Hospitalization for an acute illness" is defined as in-patient care in an approved hospital for: (a) an illness, injury, or defect which has arisen within 60 days immediately prior to date of entry into the hospital, or (b) admission to the hospital for an exacerbation of an illness, injury, or defect which has existed more than 60 days prior to admission, or (c) surgery.

History: 1954 ACS 25, p. 38, Eff. Nov. 14, 1961.

R 400.513 Nursing care; 90-day limit.

Rule 513. To qualify for nursing care in a licensed nursing home a person must have received hospitalization for an acute illness and enter the nursing home for care required for the illness for which the person was hospitalized within 30 calendar days following discharge from the hospital, provided that not more than 90 days of nursing care may be approved for any MAA recipient in a 12-month period, beginning with the first day of admission to the nursing home.

History: 1954 ACS 28, p. 13, Eff. Nov. 14, 1961; 1954 ACS 37, p. 45, Eff. Feb. 14, 1964.

R 400.514 Death of patient after application.

Rule 514. In the case of a patient who dies after application, services may be provided under medical assistance for the aged if eligibility can be determined and certification issued within 30 calendar days following death.

History: 1954 ACS 37, p. 46, Eff. Feb. 14, 1964.

R 400.515 Assistance to Michigan residents.

Rule 515. The state department may pay up to 100% of the cost of medical assistance for the aged services provided to: (a) Patients who have Michigan residence but are without domicile in any Michigan county; (b) Patients who are Michigan residents but are temporarily absent from the state.

History: 1954 ACS 37, p. 46, Eff. Feb. 14, 1964.

PART 9. HEARINGS AND APPEALS

R 400.901 Notice of right to hearing.

Rule 901. An applicant, recipient, or licensee shall be informed in writing at the time of application and at the time of any action affecting his claim:

(a) Of his right to a hearing, as provided in R 400.903.

(b) Of the method by which he may obtain a hearing, as provided in R 400.903.

(c) That he may be represented by an authorized representative, such as legal counsel, relative, friend, or other spokesman or he may represent himself.

History: 1954 ACS 61, p. 51, Eff. Feb. 16, 1970; 1954 ACS 84, p. 47, Eff. Sept. 10, 1975.

R 400.902 Notice of negative action.

Rule 902. (1) In cases of proposed action to discontinue, terminate, suspend, or reduce public assistance or services, the department shall mail a timely notice before a proposed change would be effective. Timely means that the notice is mailed at least 10 days before the action would become effective. A notice shall include the following:

(a) A statement of what action the department intends to take.

(b) The reasons for the intended action.

(c) The specific regulations supporting the action.

(d) An explanation of the individual's right to request a hearing.

(e) The circumstances under which assistance or service is continued if a hearing is requested.

(2) An agency may dispense with timely notice as provided in subrule (1), but shall send adequate notice as detailed in subrule (1) not later than the date upon which the action would become effective, when:

(a) An agency has factual information confirming the death of a recipient or of the aid to dependent children payee when there is no relative available to serve as new payee.

(b) An agency receives a clear written statement signed by a recipient that he no longer wishes assistance, or that gives information which requires termination or reduction of assistance, and the recipient has indicated, in writing, that he understands that this shall be the consequence of supplying such information.

(c) A recipient has been admitted or committed to an institution, and further payments to that individual do not qualify for federal financial participation under the state plan.

(d) A recipient has been placed in skilled nursing care, intermediate care, or long-term hospitalization.

(e) A recipient's whereabouts are unknown and agency mail directed to him has been returned by the post office, indicating no known forwarding address. A recipient's check shall be made available to him if his whereabouts become known during the payment period covered by a returned check.

(f) A recipient has been accepted for assistance in a new jurisdiction and that fact has been established by the state department.

(g) An aid to dependent children child is removed from the home as a result of a judicial determination.

(h) A change in level of medical care under the medical assistance program is prescribed by the recipient patient's physician.

(i) A special allowance granted for a specific period is terminated and the recipient has been informed in writing at the time of initiation that the allowance automatically terminates at the end of the specified period.

(3) When the changes in either state or federal law require automatic grant adjustments for classes of recipients, timely notice of the grant adjustments shall be given which is adequate if it includes a statement of the intended action, the reasons for the intended action, a statement of the specific change in law requiring the action, and a statement of the circumstances under which a hearing may be obtained and assistance continued.

History: 1954 ACS 61, p. 51, Eff. Feb. 16, 1970; 1954 ACS 68, p. 34, Eff. June 28, 1971; 1954 ACS 84, p. 47, Eff. Sept. 10, 1975.

R 400.903 Right to hearing.

Rule 903. (1) An opportunity for a hearing shall be granted to an applicant who requests a hearing because his claim for assistance is denied or is not acted upon with reasonable promptness, and to any recipient who is aggrieved by an agency action resulting in suspension, reduction, discontinuance, or termination of assistance.

(2) An opportunity for a hearing shall be granted to an applicant who requests a hearing because of a denial, suspension, or exclusion from a service program or failure to take into account a recipient's choice of service.

(3) A hearing shall not be granted when either state or federal law requires automatic grant adjustments for classes of recipients, unless the reason for an individual appeal is incorrect grant computation.

(4) An applicant for, or holder of, a license issued by the department is entitled to a hearing based upon the denial, limitation, refusal to renew, or revocation of a license.

(5) A complaint as to alleged misconduct or mistreatment by a state employee shall not be considered through the administrative hearing process, but shall be referred to the department personnel director.

History: 1954 ACS 61, p. 51, Eff. Feb. 16, 1970; 1954 ACS 68, p. 34, Eff. June 28, 1971; 1954 ACS 84, p. 48, Eff. Sept. 10, 1975.

R 400.904 Request for hearing; timeliness.

Rule 904. (1) A request for a hearing shall be in writing and signed by the claimant, petitioner, or on his behalf by his authorized representative.

Digitized by Google
Original from UNIVERSITY OF MICHIGAN

(2) The request may be filed with the state department office in Lansing or a local county office. When filed with the local county department office, it shall be forwarded immediately to the state department office.

(3) Freedom to make a request for a hearing shall not be limited or interfered with in any way. The agency shall assist a claimant to submit and process his request.

(4) A claimant shall be provided 90 days from the mailing of the notice in R 400.902 to request a hearing.

(5) When a claimant requests a hearing within the timely notice period, assistance shall not be suspended, reduced, discontinued, or terminated until a decision is rendered after a hearing, unless:

(a) A determination is made at the hearing by the administrative law judge that the sole issue is one of state or federal law or policy. The administrative law judge shall inform a claimant promptly in writing that assistance is to be discontinued pending the final decision if the sole issue is one of state or federal law or policy, subject to this issue being reconsidered in the final decision.

(b) A subsequent change affecting a recipient's grant occurs while the hearing decision is pending and a recipient fails to request a hearing after notice of the subsequent change.

(6) When an appeal is filed from a written notice of revocation, denial, or refusal to renew a license within 30 days of receipt of the written notice, the denial, revocation, or refusal to review shall be held in abeyance pending the final decision.

History: 1954 ACS 61, p. 52, Eff. Feb. 16, 1970; 1954 ACS 84, p. 48, Eff. Sept. 10, 1975.

R 400.905 Group hearings.

Rule 905. The department may respond to a series of individual requests for a hearing by conducting a single group hearing where the sole issue is one of state or federal law or policy or change in federal or state law. An individual claimant shall be permitted to present his own case or be represented by his authorized representative.

History: 1954 ACS 61, p. 52, Eff. Feb. 16, 1970; 1954 ACS 84, p. 49, Eff. Sept. 10, 1975.

R 400.906 Denial or dismissal of request for hearing.

Rule 906. (1) The department shall deny or dismiss the request for a hearing if:

(a) A request is withdrawn by a claimant, counsel, or petitioner in writing prior to the signing of the final decision and order.

(b) The issue is one of state or federal law, requiring automatic grant adjustments for classes of recipients.

(c) A claimant abandons the hearing.

(d) The department has no jurisdiction over the matter.

(e) An issue is not appealable as authorized by R 400.903.

(2) Abandonment occurs if a claimant, without good cause therefor, fails to appear by himself or by his authorized representative at the scheduled hearing.

History: 1954 ACS 61, p. 52, Eff. Feb. 16, 1970; 1954 ACS 84, p. 49, Eff. Sept. 10, 1975.

R 400.907 Place of hearing.

Rule 907. A hearing shall be conducted at a reasonable time, date, and place which normally shall be in the county where a claimant resides. Licensing cases may be heard in Lansing or in a county where the petitioner maintains a place of business.

History: 1954 ACS 61, p. 52, Eff. Feb. 16, 1970; 1954 ACS 84, p. 49, Eff. Sept. 10, 1975.

R 400.908 Notice of hearing.

Rule 908. (1) Notice of the time, date, and place of hearing shall be mailed to the claimant, his representative of record, and the county department or state bureau involved at least 10 days before the date of hearing, except when otherwise required by law.

(2) A notice shall contain the section of the law and rule involved.

History: 1954 ACS 84, p. 49, Eff. Sept. 10, 1975.

R 400.909 Administrative law judges.

Rule 909. A hearing shall be conducted by an impartial administrative law judge. An administrative law judge assigned to preside shall not have been involved in the initial determination of the action in question.

History: 1954 ACS 84, p. 49, Eff. Sept. 10, 1975.

R 400.910 Powers of administrative judges.

Rule 910. (1) A presiding administrative law judge may:

(a) Administer oaths or affirmations.

(b) Sign and issue subpoenas in the name of the agency, requiring attendance and giving of testimony by witnesses and the production of books, papers, and other documentary evidence to the extent permitted by law.

(c) Provide for the taking of testimony by depositions.

(d) Regulate the course of a hearing, set the time and place for continued hearings, and fix the time for filing of briefs and other documents.

(2) When a hearing involves medical issues such as those concerning a diagnosis, an examining physician's report, or a medical review team's decision, a medical assessment other than that of the person or persons involved in making the original decision shall be obtained at department expense and made part of the record, if considered necessary by an administrative law judge.

History: 1954 ACS 84, p. 49, Eff. Sept. 10, 1975.

R 400.911 Considerations.

Rule 911. A hearing shall include consideration of:

(a) An agency action, or failure to act with reasonable promptness, on a claim for financial or medical assistance, which includes undue delay in reaching a decision on eligibility or in making a payment, refusal to consider a request for or undue delay in making an adjustment in payment, or discontinuance, termination, or reduction of such assistance.

(b) An agency decision regarding:

(i) Eligibility for financial or medical assistance in both initial and subsequent determinations.

(ii) Amount of financial or medical assistance or change in payments.

(iii) The manner or form of payment.

(iv) The denial, limitation or revocation of a license.

History: 1954 ACS 84, p. 50, Eff. Sept. 10, 1975.

R 400.912 Rights of parties.

Rule 912. A party or his representative shall have opportunity:

(a) To examine the contents of his case file and all documents and records to be used by the agency at the hearing at a reasonable time before the date of the hearing as well as during the hearing.

(b) To present a case himself or with the aid of an authorized representative. A county department or a state department division involved in a hearing has the right to be represented by legal counsel and other representatives, including the county director or division head, and staff or former staff members directly involved in the issue presented. The regional office staff shall be available to assist.

(c) To bring witnesses.

(d) To establish all pertinent facts and circumstances.

(e) To advance any relevant arguments without undue interference.

(f) To question or refute any testimony or evidence, including opportunity to confront and cross-examine adverse witnesses.

History: 1954 ACS 84, p. 50, Eff. Sept. 10, 1975.

R 400.913 Evidence; oath.

Rule 913. (1) A witness or party testifying shall be put under oath or affirmation.

(2) Insofar as is practical, an administrative law judge shall follow the rules of evidence as applied in a nonjury civil case in circuit court. If necessary, evidence not admissible thereunder may be admitted, unless precluded by statute, if it is the type commonly relied upon by reasonable prudent persons in the conduct of their affairs. Effect shall be given to the rules of privilege recognized by law. Incompetent, irrelevant, immaterial, or unduly repetitious evidence may be excluded. Objections to offers of evidence may be made and shall be noted in the record.

History: 1954 ACS 84, p. 50, Eff. Sept. 10, 1975.

R 400.914 Subpoena.

Rule 914. (1) A department subpoena authorized by law shall be issued to a party upon request and a showing of need, general relevance to the issue involved, and the reasonable scope of the evidence sought requiring the attendance of witnesses and the production of identifiable records not exempt from disclosure by law.

(2) If a department subpoena is not obeyed, appearance of the subpoenaed individual or production of the subpoenaed records, documents, or books may be enforced as provided by law.

History: 1954 ACS 84, p. 50, Eff. Sept. 10, 1975.

R 400.915 Adjournments; continuances.

Rule 915. An adjournment or continuance may be granted by an administrative law judge for good cause. Good cause includes the absence of material witnesses or relevant and necessary evidence.

History: 1954 ACS 84, p. 50, Eff. Sept. 10, 1975.

R 400.916 Administrative law judge opinion.

Rule 916. An administrative law judge's opinion shall be prepared subsequent to the hearing and contain his findings of fact, conclusions of law, and a recommendation as to the proper decision, based exclusively on the evidence and other materials introduced at the hearing.

History: 1954 ACS 84, p. 50, Eff. Sept. 10, 1975.

R 400.917 Decisions.

Rule 917. (1) A decision shall be based exclusively on the administrative law judge's opinion, evidence, and other material introduced at the hearing.

(2) The record shall consist of the transcript or recording of testimony and exhibits, or an official report containing the substance of what transpired at the hearing, together with all exhibits and requests filed in the proceeding, and the recommendation of the administrative law judge. The record shall be available to the claimant at a place accessible to him or his representative.

(3) Prompt, definitive, and final administrative action shall be taken within 90 days of the request for a hearing, unless otherwise provided by governing state or federal law and rules.

(4) All parties and their representatives shall be notified promptly by mail of the decision in writing, which shall include the director's decision and order and the administrative law judge's opinion.

History: 1954 ACS 84, p. 51, Eff. Sept. 10, 1975.

R 400.918 Retroactivity.

Rule 918. When a hearing decision is favorable to the claimant, or when the department decides in favor of the claimant prior to a hearing, the department shall make corrective retroactive payments promptly in accord with federal regulations.

History: 1954 ACS 84, p. 51, Eff. Sept. 10, 1975.

R 400.919 Rehearing following decision.

Rule 919. A hearing decision adverse to the petitioner is not subject to rehearing upon the same issue unless newly discovered, relevant evidence is to be presented.

History: 1954 ACS 84, p. 51, Eff. Sept. 10, 1975.

R 400.920 Public access.

Rule 920. Copies of all decisions of the director shall be accessible to the public at the state office of the department in a form which shall not reveal the identity of any of the parties or witnesses.

History: 1954 ACS 84, p. 51, Eff. Sept. 10, 1975.

R 400.921 Judicial review.

Rule 921. Decisions are appealable to the circuit court in the following manner:

(a) Public assistance decisions are appealable within 30 days of receipt of the decision as to matters of law.

(b) Other decisions are appealable as provided by applicable governing statute.

History: 1954 ACS 84, p. 51, Eff. Sept. 10, 1975.

R 400.922 Child care and transportation.

Rule 922. Reasonable and necessary child care costs, not to exceed the rates established under the child care program, and transportation for the petitioner to and from the hearing at the standard travel rates shall be reimbursed wherever the total combined cost exceeds $3.00. The presiding administrative law judge shall certify the need for the costs.

History: 1954 ACS 84, p. 51, Eff. Sept. 10, 1975.

PART 10. CHILDREN'S CAMPS

GENERAL PROVISIONS

R 400.1001 Definitions; A to C.

Rule 1001. (1) "Adult" means a mature person aged 18 years or older.

Digitized by Google
UNIVERSITY OF MICHIGAN
Generated for Susan K Kendall (Michigan State University) on 2018-09-05 16:48 GMT / http://hdl.handle.net/2027/mdp.49015002898253

(2) "Aquatics guard" means a person aged 17 years or older on duty at a waterfront for guarding and rescue purposes.

(3) "Aquatics supervisor" means an adult in charge at a waterfront supervising swimming and watercraft activities.

(4) "Buddy system" means a pairing of campers to facilitate accounting of all children.

(5) "Campsite" means land including natural features where the main camp facilities are located.

(6) "Children's camp" or "camp" means a residential, day, troop, or travel camp conducted in a natural environment for 5 or more school age children apart from their parents, relatives or legal guardians for 5 or more days in a 14-day period. A camp provides care and supervision for groups of children for usually no more than 12 weeks. Special kinds of camps are:

(a) "Resident camp" which means a camp which provides a minimum of 24 hours a day care for children at 1 campsite.

(b) "Day camp" which means a camp providing care for children during all or part of the day but less than 24 hours a day.

(c) "Travel camp" which means a camp which is mobile and provides not less than 24 hours a day care for children at various campsites.

(d) "Troop camp" which means a camp which provides not less than 24 hours a day care for organized groups of children within a parent council of the boy scouts, girl scouts or camp fire girls.

History: 1954 ACS 77, p. 125, Eff. Sept. 26, 1973.

R 400.1002 Definitions; D to V.

Rule 1002. (1) "Department" means the state department of social services.

(2) "Facility" means a structure including furnishings and installations on a campsite for living and program purposes.

(3) "School age" means children aged 6 years on or before December 1 of the camp year and under age 17 years.

(4) "Vehicle" means a carrier used in transporting children on public highways to and from camp or other places incidental to the camp program.

History: 1954 ACS 77, p. 125, Eff. Sept. 26, 1973.

R 400.1004 Licensing and evaluation.

Rule 1004. (1) A person, firm, corporation, association, or organization shall not establish a camp unless licensed by the department.

(2) Application for a camp license shall be made on forms provided by the department.

(3) A license shall be in force for the period indicated on the license which shall be not more than 1 year.

(4) Willful and substantial failure to comply with any provision of Act No. 47 of the Public Acts of the First Extra Session of 1944, as amended, being §§722.101 to 722.108 of the Michigan Compiled Laws, or with these rules, constitutes sufficient cause for denial or revocation of a license.

(5) The department at any time may evaluate the conditions of a camp.

(6) An individual or organization shall satisfy the department that there is sufficient financial support to operate and maintain a camp in accordance with these rules and the camp goals and objectives. Financial records shall be made available to the department upon request.

(7) A person, on the grounds of race, color, religion, or national origin, shall not be denied the benefit of, or be subjected to discrimination in a camp. A camp operated by a recognized church may give priority to its own constituency.

History: 1954 ACS 77, p. 125, Eff. Sept. 26, 1973.

R 400.1005 Site, plans, facilities, and equipment.

Rule 1005. (1) The location of a camp shall not present a fire, health, safety, or social hazard. The main camp facilities in a new camp shall not be divided by a major public highway or railroad.

(2) Camp structures and facilities shall comply with state and local building and zoning codes. Before construction, plans for a proposed children's camp, or major changes in an existing camp building, shall be submitted for review to the department, the fire marshal division of the department of state police and the county health department. Approval of a license will be based on the recommendations of these agencies.

(3) In new construction, a structure containing sleeping quarters in a resident camp shall be separated from all other structures by a distance of not less than 25 feet.

(4) In a resident camp each child shall be provided with not less than 35 square feet of floor space in sleeping quarters and a comfortable separate bed. If tents are used as permanent sleeping quarters not less than 30 square feet of floor space shall be provided for each camper. There shall be not less than 2 feet of space between the sides of each bed. A camper shall not sleep in a triple bunk nor sleep in the same room with children of the opposite sex. Facilities shall be provided in sleeping quarters for each camper to store clothing.

(5) A room, tent, or building to serve as a health center shall be maintained on the campsite for the temporary isolation and treatment of sick and injured members of the camp community. This facility shall be protected from flies and insects, be located to insure privacy and quiet and not located in or directly off the kitchen. It shall include first aid equipment and medical supplies deemed necessary by the directing physician for the health and welfare of the camp.

(6) Equipment used in the camp program shall be of good quality and not present undue risk to children. Power equipment, especially that used for maintenance of the camp, shall not be stored, operated or left unattended without proper safeguards in camper areas.

History: 1954 ACS 77, p. 125, Eff. Sept. 26, 1973.

R 400.1007 Staff.

Rule 1007. (1) A camp shall have a written statement of personnel policies and practices as they affect both the camp and staff. Staff members shall be informed of these policies and practices.

(2) A camp shall have a written job description of each staff classification.

(3) The camp management shall ascertain and have on record information attesting to the character, integrity, and ability of each staff member to perform the tasks required of his position.

(4) A camp director shall be not less than 21 years old and have 2 years of experience working with children. The director shall be knowledgeable in camp administrative practices and have not less than 1 season of leadership experience in an organized children's camp or related activity.

(5) Hazardous camp activities such as aquatics, archery, horseback riding, and riflery shall be conducted by a qualified adult activity specialist capable of

implementing safety standards established by the department. He shall also have training or experience in conducting the activity.

(6) An adult leader shall be responsible for the care and supervision of every 10 children in the camp. The camp director shall not be included in this ratio in camps servicing over 50 children.

History: 1954 ACS 77, p. 126, Eff. Sept. 26, 1973.

R 400.1008 General care of children.

Rule 1008. (1) Policies and practices for discipline of a child shall be clearly stated and furnished in writing to all employees of the camp. A child shall not be deprived of food, isolated, or subjected to corporal punishment or abusive physical exercise as a means of punishment, either by staff or by another camper.

(2) The camp shall offer opportunities for children to develop an appreciation and understanding of their natural environment. Activities shall be provided which are conducive to the learning of skills, increase of knowledge, improvement of health, and development of character.

(3) Reasonable grouping according to age and the capabilities of each child shall be observed in all activities including contact sports.

History: 1954 ACS 77, p. 126, Eff. Sept. 26, 1973.

R 400.1010 Health.

Rule 1010. (1) A camp medical program shall be under the direction of a physician and consultation for medical treatment shall be readily available. A written arrangement for emergency medical treatment shall be made with a hospital, clinic, or doctor's office as close as possible to the camp where children can be taken in case of serious injury or illness.

(2) The health staff of a resident camp shall have on duty in residence a licensed physician, a registered nurse or licensed practical nurse complying with the rules of the state board of nursing, or a camp health director certified by the American camping association.

(3) The health staff of a day, troop, or travel camp shall have on duty a licensed physician, a registered nurse or a licensed practical nurse complying with the rules of the state board of nursing, a camp health director currently certified by the American camping association, or a first aider currently certified by the American red cross.

(4) A bound medical log listing date, name of patient, ailment, and treatment prescribed shall be maintained at the health center. If an injury or illness is judged to be serious, the camp physician shall be consulted immediately, and the parents or guardians when the patient is a child notified as soon as possible.

(5) A camp shall have a written outline of daily procedures for health surveillance. If a child or staff member is suspected of having a communicable disease, he shall be suitably isolated.

History: 1954 ACS 77, p. 126, Eff. Sept. 26, 1973.

R 400.1011 Physical examinations.

Rule 1011. (1) A child, at the time of admission to a resident or travel camp, shall submit a written report of a physical examination performed by a qualified physician within the preceding 12 months. He shall also have current protection against diphtheria, tetanus, poliomyelitis, measles, and rubella, or a statement from a physician that immunization is in progress. If there is religious objection to physical examination or immunization, a child shall submit a written statement signed by the parents or legal guardians to the effect the child is in good health

and they assume the health responsibility for the child while in camp with the understanding they will be notified immediately if anything unforeseen occurs. This statement shall also include a provision that if the camp is unable or does not have the time to locate the persons designated to be notified in case of emergency, camp authorities may take such temporary measures as they deem appropriate.

(2) A paid employee of a camp who comes in contact with children in the course of his work shall submit a report of a physical examination performed by a qualified physician and a report of the results of a tuberculin test, both conducted within 12 months before employment in the camp.

(3) A regular volunteer who comes in contact with children in the course of his work shall submit a report of the results of a tuberculin test conducted within 12 months before employment in the camp.

(4) Required physical examination records shall be on file in the camp for review by the staff of the department of public health and the department.

History: 1954 ACS 77, p. 127, Eff. Sept. 26, 1973.

R 400.1013 Nutrition and food service.

Rule 1013. (1) A camp shall establish written policies for its nutrition and food service program. These policies shall include meal patterns, meal hours, type of food service, staff responsibilities during the time food is served, special diets, and administration of the food service program.

(2) Food provided by the camp shall be of sufficient quantity and nutritional quality to provide for the dietary needs of each child.

(3) Menus shall be planned at least a week in advance and shall be dated as to the week of use. The current week's menu shall be posted in the food preparation area. Food substitutes shall be noted on the menus in writing. After use, the menus shall be kept on file for the period of the camping season.

(4) A file of recipes, appropriate for the size of the camp and the age of the children, shall be maintained and used by personnel for the preparation of foods listed on the menus.

(5) Mealtimes shall be scheduled to meet the children's needs and spaced so there are no excessively long periods without food. At least 3 meals shall be served each day in a resident, troop or travel camp.

(6) Meals shall be prepared to preserve nutritive value, flavor, and appearance and shall be served in an appetizing and sanitary manner. Meals shall be prepared as close to serving time as possible and in forms that are appropriate to the developmental level of the children.

History: 1954 ACS 77, p. 127, Eff. Sept. 26, 1973.

R 400.1016 Waterfront staff.

Rule 1016. (1) An aquatics supervisor in a resident camp or day camp for swimming programs shall be currently certified as an American red cross water safety instructor, a YMCA aquatics instructor or a boy scouts of America national aquatics instructor.

(2) The aquatics supervisor in a troop or a travel camp who supervises swimming programs shall be currently certified as an American red cross senior lifesaver, a YMCA senior lifesaver, or a boy scouts of America lifeguard.

(3) The aquatics supervisor in any camp who supervises wading or watercraft programs shall be currently certified as an American red cross senior lifesaver, a YMCA senior lifesaver, or a boy scouts of America lifeguard.

(4) When swimming or watercraft activities are in progress, the aquatics supervisor shall be in attendance supervising the program.

Open Access, Google-digitized / http://www.hathitrust.org/access_use#oa-google

(5) The aquatics supervisor is responsible for the procedures of waterfront supervision and they shall be strictly enforced. The aquatics staff shall not engage in recreational swimming or boating while on waterfront duty.

(6) The aquatics supervisor and 1 aquatics guard shall be on duty for 20 or less children in the water. One additional aquatics guard shall be on duty for every additional 20 children or fraction thereof.

History: 1954 ACS 77, p. 128, Eff. Sept. 26, 1973.

R 400.1017 Swimming areas.

Rule 1017. (1) A swimming area shall be maintained in a clean and safe condition, free from rocks, holes, and hidden dangers. Any known hazard in the vicinity shall be properly safeguarded and posted.

(2) The permanent swimming area of a resident camp or a day camp shall have a delineation of areas for nonswimmers, intermediates, and swimmers in accordance with the standards of the American red cross, YMCA or boy scouts of America.

(3) Lifesaving equipment shall be provided at a swimming area and placed so it is immediately available in case of an emergency. The equipment shall be kept in good working order and include a bell or whistle, 2 assist poles, and a ring buoy.

History: 1954 ACS 77, p. 128, Eff. Sept. 26, 1973.

R 400.1018 Swimming procedures.

Rule 1018. (1) American red cross, YMCA, or boy scouts of America tests shall be used to determine each child's swimming ability. Children shall be confined to an area equal to the limits of their swimming skills or an area requiring lesser skills for which they have been classified.

(2) A method of supervising and checking bathers shall be established and enforced. Recommended methods are the check or buddy board, the buddy system, the colored cap system, or any combination of these. The system used shall be supervised during swimming periods by a member of the aquatics staff and checks shall be conducted not less than every 10 minutes. A written "lost swimmer" plan shall be established, and all staff shall know exactly what their duties are in case of an emergency at the waterfront.

(3) Swimming is prohibited at sites other than the permanent camp waterfront without prior approval of the camp management. The activity shall be supervised by the aquatics supervisor assisted by 1 aquatics guard for every 10 children or fraction thereof in the water. The buddy system shall be used and buddy checks shall be conducted not less than every 5 minutes.

(4) Swimming is prohibited during the hours of darkness in lakes, rivers, or pools without prior approval by the department.

History: 1954 ACS 77, p. 128, Eff. Sept. 26, 1973.

R 400.1019 Watercraft and waterskiing.

Rule 1019. (1) Watercraft activities shall be conducted during daylight hours and supervised by the aquatics supervisor. A coastguard-approved life preserver shall be provided for each occupant of a watercraft. A nonswimmer shall wear a vest type coastguard-approved life preserver and not be permitted in a sailboat unless accompanied by a counselor. A camper shall wear a vest type, coastguard-approved life preserver before entering and while in white water or on a lake when the water is rough or while waterskiing.

(2) During a watercraft activity period, a lifeguard shall patrol the watercraft area in a lifeboat. A watercraft docking area shall not be in the swimming area.

(3) The swimming area shall not be used for the launching or stopping of waterskiers.

History: 1954 ACS 77, p. 128, Eff. Sept. 26, 1973.

R 400.1023 Vehicles and drivers.

Rule 1023. (1) A vehicle in good running condition shall be available at all times for use in emergency situations.

(2) A vehicle used for transporting children shall be capable of passing the department of state police vehicle inspection.

(3) A truck shall not be used as a means of transporting children from their homes to camp and vice versa except in the cab.

(4) At least 1 adult in addition to the driver shall ride with the children being transported in a truck or bus on a public highway.

(5) Children shall not be transported on a public highway in:

(a) A trailer.

(b) A vehicle when an object or person obscures the driver's view ahead, to the sides and rear, or interferes with his free and easy movement to accessories required for emergencies.

(c) A truck unless sitting on the floor or on seats or benches securely fastened to the truck floor.

(d) A truck with sides or tailgate lower than 36 inches.

(6) The driver of a camp vehicle carrying children shall be an adult.

(7) A person hired specifically to drive a vehicle to transport children, or if operating a vehicle carrying more than 12 children, shall possess a valid chauffeur's license.

History: 1954 ACS 77, p. 129, Eff. Sept. 26, 1973.

R 400.1028 Records and reports.

Rule 1028. (1) Records of personal data for each child shall be kept at camp when in session and shall include as a minimum: the child's name, age and address; the parent's or guardian's name, address, telephone number, and where they or their designees may be reached in case of emergency; and the dates of admission and release.

(2) Written emergency procedures shall be provided at a camp for fire, tornado, serious accident, illness, or injury, and a lost camper. Each member of the camp staff shall be informed of his duties in case of an emergency.

(3) The camp management shall make reports to the department as may be required to insure that licensing rules are being met.

(4) A written report on forms furnished by the department shall be submitted within 48 hours to the department by the camp management regarding a death of a child or staff member and a serious camper accident or illness which requires hospitalization or being sent home.

(5) A change in the camp location, dates of operation, or cancellation shall be reported to the department before the change.

History: 1954 ACS 77, p. 129, Eff. Sept. 26, 1973.

R 400.1029 Sanitation and fire hazards.

Rule 1029. The department may require a camp to correct or eliminate any specific condition not described in these rules but which it deems necessary for proper sanitation or fire protection at the camp.

History: 1954 ACS 77, p. 129, Eff. Sept. 26, 1973.

R 400.1030 Modification and waiver of rule.

Rule 1030. (1) Any person or his authorized agent, confronted with practical difficulties in carrying out the strict letter of any rule, may apply to the department in writing for a modification thereof, and when such modification involves R 400.1051 to R 400.1068, the local health department having jurisdiction shall be furnished with a copy. Only a modification that will not constitute a definite hazard to life or property will be considered. The decision of the department, including the particulars of the application, shall be entered upon the records of the department and a copy thereof sent to the applicant.

(2) The department may waive temporarily any rule to allow for experimentation and demonstration of new and innovative approaches to a camp program.

History: 1954 ACS 77, p. 129, Eff. Sept. 26, 1973.

FIRE SAFETY PROVISIONS

R 400.1031 Construction.

Rule 1031. (1) A new building and a conversion of an existing building, if multistory, shall be of minimum 1 hour fire resistant construction, unless the construction is of solid or laminated wood timbers not less than 3 inches in thickness. If 1 story, construction may be less than fire resistant if it complies with other provisions of this subpart.

(2) An existing licensed camp may be certified for continued use, if it complies with other provisions of this subpart for existing facilities.

History: 1954 ACS 77, p. 130, Eff. Sept. 26, 1973.

R 400.1033 Interior finishes.

Rule 1033. (1) The alphabetical classification of finish materials is for flame spread, fuel contribution and smoke development as determined by the tunnel test in accordance with NFPA 255-1972, ASTM-E-84-1968, or UL-723-1973 and grouped as follows:

Class	Flame Spread	Fuel Contributed	Smoke Developed
A	0-25	0-35	0-50
B	26-75	36-75	51-125
C	76-200	76-200	126-200

(2) The same alphabetical classification is used for combustibility of prefabricated acoustical tile units only, under federal specifications SS-A-118B-1958.

(3) The documents referred to in subrules (1) and (2) may be purchased from the Department of Social Services, 300 S. Capitol Avenue, Lansing, Michigan 48926, or NFPA 255-1972 from The National Fire Protection Association, 60 Batterymarch Street, Boston, Massachusetts 02110, at the cost of $1.00, ASTM-E-84-1968, from the American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pennsylvania 19103, at the cost of $1.50, UL-723-1973 from Underwriters' Laboratories Incorporated, 207 East Ohio Street, Chicago, Illinois 60611, at a cost of $1.00 and SS-S-118A-1972 which may be purchased from Specifications Sales (3FRSBS) Building, 197 Washington Navy Yard, General Services Administration, Washington, D.C. 20407, at a cost of 10 cents.

(4) In new construction, additions, and conversions, interior finish classification shall be that of the basic material used without regard to subsequently applied paint or other covering in an attempt to meet the classification. Such basic

material shall be minimum class "B" in means of egress and minimum class "C" in other areas.

(5) Paper, cardboard, asphalt paper, or other highly flammable material shall not be used for the interior finish of a building.

(6) Where a sleeping occupancy is maintained on a second floor or over a basement area, the ceiling of the first floor or basement shall be protected with ⅝ inch underwriters' laboratories listed gypsum wall board or any other proved assembly of materials that will provide a minimum 1-hour's resistance to fire, unless such construction is of solid or laminated wood timbers not less than 3 inches in thickness and installed so as to be smoke tight. A loft above ground level not furnished with escape access directly to the ground shall not be used to house campers.

History: 1954 ACS 77, p. 130, Eff. Sept. 26, 1973.

R 400.1035 Means of egress.

Rule 1035. (1) "Means of egress" means the entire way and method of passage to free and safe ground remote from a building. A means of egress shall be maintained in unobstructed, easily traveled condition at all times. Exposure to inherent hazards of the building, such as heating plant, kitchen, flammable storage, or other similar conditions is not permitted. Furniture, equipment, and utility materials shall not be stored or maintained in a location or position which they are likely to fall into, be pushed into, or be obstructive in any way to means of egress.

(2) A building with an occupancy of more than 12 persons including staff shall be provided with at least 2 separate and independent means of egress located as far apart as practical and in no case less than 50% of the longest dimension of the building. Each door shall be hung to swing in the direction of egress.

(3) An occupancy above the first floor shall be provided with 2 separate and independent means of egress, so located that all persons are located between approved exit facilities. An exitway shall lead to an approved outside fire escape or to an interior stairway enclosed with an assembly of materials affording substantial protection from fire and leading directly to the outdoors at grade.

(4) A required exit from a facility for an occupancy of more than 25 persons, or where the exit is not readily visible to the occupants, shall be designated by an illuminated exit sign. Directional exit signs shall be installed where needed.

(5) Lighting shall be provided for a stairway, corridor, and fire escape that constitutes a required means of egress. In new construction or remodeling, the lighting required by this rule shall be installed on separate circuits in nonflexible metallic conduit and fused ahead of the main switch or disconnect.

(6) An assemblage area, such as a recreation room, dining hall, or chapel shall be maintained and arranged in accordance with the regulations governing places of public assemblage promulgated pursuant to Act No. 207 of the Public Acts of 1941, which may be obtained from the fire marshal division of the department of state police. Each door from a room occupied by campers shall enter a corridor between exits, or there shall be direct egress to the outside from each room.

History: 1954 ACS 77, p. 130, Eff. Sept. 26, 1973.

R 400.1037 Exit doors and stairways.

Rule 1037. (1) A required exit door shall be a side hinged, swing door only. In new construction an exit door shall be not less than 36 inches wide. A door, forming part of a means of egress where door hardware is used, shall be of a type that is nonlocking against egress and operable with a single motion. The use of

hooks and eyes, bolts, bars, and similar devices is prohibited on a door provided for exit purposes or designated as an exit.

(2) An outside stairway when used as part of a means of egress shall be protected by closed walls directly under the stairway and for a distance of 6 feet in all other directions. Windows may be allowed within this area if they are stationary, and are of steel sash and glazed with wired glass of at least ¼ inch thickness.

History: 1954 ACS 77, p. 131, Eff. Sept. 26, 1973.

R 400.1041 Fire warning and extinguishing equipment.

Rule 1041. (1) In an existing building housing more than 25 persons, an electrical or manual fire alarm system shall be established and maintained. In new construction an approved closed circuit, self-supervised, fire alarm system shall be installed.

(2) A building used for sleeping more than 12 persons shall be protected throughout with an approved automatic fire detection system, or a staff member on night watch awake and dressed shall be provided to make rounds of all floors of all buildings at frequent intervals between the hours of 10 p.m. and 7 a.m. or other additional times when occupants are sleeping.

(3) Fire extinguishers of class and size and at locations determined by the fire inspector shall be installed throughout the camp.

History: 1954 ACS 77, p. 131, Eff. Sept. 26, 1973.

R 400.1043 Heating.

Rule 1043. (1) Heating shall be by 1 or more approved sealed combustion heaters drawing combustion air directly from the outdoors and installed in accordance with the manufacturer's specifications, or by a central heating plant installed in an enclosure providing a minimum 1 hour's resistance to fire, including "B" labeled fire door and frame assemblies in any interior door opening to this enclosure and an approved fire damper in any duct piercing this enclosure located where the enclosure is pierced. Air for proper combustion shall be provided directly from the outdoors through a permanently open louver.

(2) A combustion type water heater shall be installed in the same enclosure or in a similar enclosure of the same construction.

(3) Underwriters' laboratories approved, permanent, fixed type electrical heating, such as panel or baseboard type, may be approved in any location.

(4) A portable auxiliary heating unit shall not be used in a camper occupied building.

(5) A boiler, if used, shall be inspected and a certificate provided as required by the boiler division, state department of labor.

(6) A fireplace opening shall have an approved screen or glass device to prevent the spread of fire. In new fireplace construction, a minimum masonry facing around the fireplace opening of 8 inches to the sides, 12 inches above and 16 inches at the floor, shall be provided, and the chimney shall have an approved flue lining.

History: 1954 ACS 77, p. 131, Eff. Sept. 26, 1973.

R 400.1045 Electrical service and flammables.

Rule 1045. (1) The electrical service shall be maintained in a safe condition. Where conditions indicate a need for inspection, and on a new or remodeling project, the electrical service shall be inspected by a qualified electrical inspector, and a copy of the certificate of approval shall be submitted to the fire inspector.

(2) Liquid flammables, propane fuel tanks, gasoline powered equipment, or other highly flammable materials shall not be stored in a building occupied by campers. Storage of flammable liquids shall comply with the flammable liquids regulation promulgated pursuant to Act No. 207 of the Public Acts of 1941 which may be obtained from the fire marshal division of the department of state police.

History: 1954 ACS 77, p. 132, Eff. Sept. 26, 1973.

SANITATION PROVISIONS

R 400.1051 Location and housing.

Rule 1051. (1) A campsite shall be located on land that provides good natural drainage or be properly drained. Children shall be protected from hazardous areas such as traffic, cliffs, sinkholes, pits, and abandoned excavations. These areas shall be guarded or posted to reduce the possibility of accidents.

(2) A camp building shall comply with applicable building, plumbing, electrical, and similar codes. A building shall remain dry. Walls, ceilings, and floors shall be of such construction, type, and finish as to be kept clean easily. A stairway shall be equipped with structurally safe handrails.

(3) A tent used for sleeping and living purposes, which remains in 1 location for more than 2 weeks, shall be provided with a floor which is smooth, easily cleaned, and in good repair.

(4) Sleeping quarters shall be convenient to toilet facilities. A basement where a sleeping room is located shall be at least 50% above grade. A room arrangement shall not be such that access to a sleeping room is only by going through another sleeping room, bathroom, or water closet compartment. When required by the health inspector, mattresses shall be covered with waterproof washable material.

History: 1954 ACS 77, p. 132, Eff. Sept. 26, 1973.

R 400.1053 Food.

Rule 1053. (1) Food shall be obtained from an approved source. Milk and milk products shall be used only when pasteurized. Canned goods shall be used only when commercially packed.

(2) A permanent food preparation area, whether on or off the campsite, shall comply with the applicable provisions of Act No. 269 of the Public Acts of 1968, being §§325.801 to 325.813 of the Michigan Compiled Laws. Equipment used to transport food and dishes shall meet sanitation standards for insuring safe food.

History: 1954 ACS 77, p. 132, Eff. Sept. 26, 1973.

R 400.1055 Heating.

Rule 1055. (1) Heating equipment shall be capable of maintaining a temperature of at least 70 degrees Fahrenheit at a point 2 feet above the floor. An accurate thermometer shall be provided. A portable heating device or space heater shall not be used.

(2) A fireplace shall be protected by a screen or glass device to prevent burns. A hot water and steam radiator and pipe shall be shielded to prevent burns.

History: 1954 ACS 77, p. 132, Eff. Sept. 26, 1973.

R 400.1057 Light, ventilation, and screening.

Rule 1057. (1) The total window, screened area, and glazing in door measured between steps for a room occupied by children shall be not less than 10% of the floor area and the total openable window area shall be not less than 2½% of the

floor area, unless central air conditioning is provided. A skylight, louver, transom, glass block panel, and similar light transmitting device shall not be counted for more than 50% of the required area in lieu of conventional windows, screened areas, and glazed doors.

(2) During fly season each door, window, and other opening to the outside used for ventilation purposes of a building occupied by campers shall be supplied with a screen of not less than 16 mesh. Each screen door shall swing outward and have a self-closing device in working condition.

History: 1954 ACS 77, p. 132, Eff. Sept. 26, 1973.

R 400.1059 Swimming beaches and pools.

Rule 1059. (1) The water of a natural swimming beach shall be free from contamination by garbage, refuse, sewage pollution, or foreign or floating material. The water shall be of such clarity that a 12-inch white square with 6-inch black center can be seen in 5 feet of water when the beach is in use. A sanitary survey or evaluation of the quality of the water at a swimming area shall be made in accordance with R 325.2101 to R 325.2103 of the Michigan Administrative Code.

(2) An artificial swimming pool shall be constructed and maintained in accordance with Act No. 230 of the Public Acts of 1966, being §§325.601 to 325.620 of the Michigan Compiled Laws and the rules adopted thereunder.

History: 1954 ACS 77, p. 133, Eff. Sept. 26, 1973.

R 400.1061 Toilet fixtures.

Rule 1061. (1) The following table shall be used to determine the number of toilet fixtures needed with showers being optional. This rule may be waived by the local health department for a day, troop, or travel camp that meets at a state or metropolitan county park. Flush urinals may be substituted for not more than ½ of the required number of toilets for girls.

Persons of Each Sex to be Served	Boys		Girls	Boys or Girls	
	Toilets	Urinals	Toilets	Lavatories	Showers*
1-18	1	1	2	1	1
19-33	2	1	2	2	2
34-48	2	2	3	2	3
49-63	3	2	4	3	4
64-79	3	3	5	3	5
80-95	4	3	6	4	6

*When showers are provided as bath facilities, hot water shall be available.

History: 1954 ACS 77, p. 133, Eff. Sept. 26, 1973.

R 400.1062 Water.

Rule 1062. (1) Each sink, lavatory, and shower shall be supplied with safe and potable water, sufficient in quantity and pressure to meet conditions of peak demand.

(2) Water shall be supplied from a public water system, if available; otherwise from an approved private source. Water for dwellings shall be kept free from connections to an unsafe water supply and from cross connections to a drainage or secondary water system.

(3) A groundwater supply system shall comply with Act No. 294 of the Public Acts of 1965, being §§325.221 to 325.240 of the Michigan Compiled Laws, as to

registration of the well driller and pump setter. The location, construction, and maintenance of the system shall comply with R 325.1451 to R 325.1461 of the Michigan Administrative Code.

History: 1954 ACS 77, p. 133, Eff. Sept. 26, 1973.

R 400.1065 Sewage, garbage and other solid waste.

Rule 1065. (1) Sewage and other water-carried wastes shall be disposed of through a municipal sewer system when such a system is available. Where municipal sewer connections are not available, liquid wastes shall be discharged into an approved private system. The private system shall not create a nuisance or pollute a stream, lake, or other body of water, or contaminate a water supply or bathing place, and shall comply with applicable local health department requirements.

(2) Garbage produced in the kitchen area shall be removed and stored in flyproof and watertight containers with tight fitting covers which are emptied not less than twice a week. They shall not be filled to overflowing or allowed to become foul smelling or breeding place for flies. A garbage can shall be provided with a waterproof liner or thoroughly cleaned after each emptying.

(3) Other solid waste shall be handled and removed at intervals so as not to create a nuisance or a menace to health.

History: 1954 ACS 77, p. 133, Eff. Sept. 26, 1973.

R 400.1066 Farm and domestic animals.

Rule 1066. (1) A horse or other farm animal shall not be permanently quartered within 500 feet of living quarters, kitchen, or mess hall.

(2) A temporary shelter, corral, tie-rail or hitching post shall not be located within 200 feet of dining hall, kitchen or other place where food is prepared, cooked or served. Manure shall not be allowed to remain for more than 12 hours at such a location. Fly repellants and other precautions shall be used to prevent such a location from becoming an attraction for or breeding place for flies.

(3) Manure from permanent and shelter quarters used for horses shall be removed from the premises not less than weekly. Storage between removals shall be in flytight enclosures or in piles isolated from the area of camp activity.

(4) Drainage from stables and temporary quarters for horses shall not be permitted to flow into a spring, stream, or lake in such a manner as to create dangerous pollution.

(5) A horse, dog, or other domestic animal or pet shall not be permitted on a bathing beach or in the water in the area used for waterfront activities.

History: 1954 ACS 77, p. 133, Eff. Sept. 26, 1973.

R 400.1068 Maintenance.

Rule 1068. (1) A campsite shall be maintained in a clean, sanitary, and safe condition, free from standing water.

(2) The campsite, including main and accessory structures, shall be maintained so as to prevent and eliminate rodent and insect harborage.

(3) A roof, exterior wall, door, skylight, and window shall be weathertight and watertight, and shall be kept in sound condition and good repair.

(4) Floors, interior walls, and ceilings shall be sound and in good repair and maintained in a clean and sanitary condition.

(5) A plumbing fixture and water and waste pipe shall be properly installed and maintained in good sanitary working condition.

(6) A water closet compartment, bathroom and kitchen floor surface shall be constructed and maintained so as to be reasonably impervious to water and to permit the floor to be easily kept in a clean and sanitary condition. Floor finishes should be of nonslip material. A floor shall be cleaned not less than once a day and kept in good repair.

(7) Equipment, including playground devices, shall be inspected periodically for defects. Proper maintenance shall be carried out to keep it in a safe operating condition.

History: 1954 ACS 77, p. 134, Eff. Sept. 26, 1973.

YOUTH PAROLE AND REVIEW BOARD

(By authority conferred on the department of social services by sections 6, 14, 115, and 121 of Act No. 280 of the Public Acts of 1939, as amended, and section 553 of Act No. 380 of the Public Acts of 1965, being §§400.6, 400.14, 400.115, 400.121, and 16.553 of the Michigan Compiled Laws)

PART 1. GENERAL

R 400.1201 Definitions.

Rule 1201. (1) "Board" means the youth parole and review board.

(2) "Department" means the state department of social services.

(3) "Director" means the director of the department.

(4) "Discharge" means termination of a ward's commitment to the department of social services.

(5) "Institution" means the training schools or their successor institutions by whatever name.

(6) "Interim placement" means the temporary care of a ward who requires custody for his own or the community's protection pending disposition by the board or execution of a placement order of the board.

(7) "Juvenile code" means chapter XIIA of Act No. 288 of the Public Acts of 1939, as amended, being §§712A.1 to 712A.28 of the Michigan Compiled Laws.

(8) "Petition" means a written request for board action.

(9) "Presiding officer" means a board member or a person designated by the board to conduct a proceeding.

(10) "Proceeding" means a hearing, investigation or review conducted by the board or its assigned representative.

(11) "Release" means a board approved change of placement from an institution to any other placement.

(12) "Revocation" means a board decision to terminate release status and return a ward to an institution.

(13) "Ward" means a person coming under the jurisdiction of the probate court under sections 2a or 2d of the juvenile code who is thereafter committed to the department.

History: 1954 ACS 83, p. 35, Eff. Mar. 19, 1975.

R 400.1205 Scope of rules; application of law.

Rule 1205. (1) All proceedings shall be conducted pursuant to the administrative procedures act, being Act No. 306 of the Public Acts of 1969, as amended, being §§24.201 to 24.315 of the Michigan Compiled Laws, and in accordance with these rules. Any reference in these rules to the administrative procedures act relates to the law cited above.

(2) Nothing contained in these rules prohibits or requires any person to be represented by an attorney at law in any proceeding before the board.

History: 1954 ACS 83, p. 35, Eff. Mar. 19, 1975.

R 400.1211 Board; principal office.

Rule 1211. (1) The youth parole and review board is created within the department by statute and consists of 3 members appointed by the director within the classified civil service. The board has such duties and responsibilities as are imposed by statute and such additional duties as are authorized by law or the director.

(2) The principal office of the board, to which all communications to the board should be addressed, is 300 South Capitol Avenue, Lansing, Michigan 48926. After a case has been assigned to a presiding officer, communications may be filed directly with him, until the case is returned to the board for final action.

History: 1954 ACS 83, p. 35, Eff. Mar. 19, 1975.

PART 2. GENERAL RULES OF PROCEDURE

R 400.1221 Petitions; preliminary inquiry.

Rule 1221. (1) A petition regarding a matter within the board's jurisdiction may be filed by any of the following: a ward, department personnel, prosecuting attorney or state attorney general, juvenile court staff, law enforcement authority, parent or guardian, interested members of the community, the board by its own motion, a presiding officer or other person deemed appropriate by the board. Petitions may be on forms provided by the board or by a written statement setting forth facts upon which relief may be granted. Once filed, a petition shall not be withdrawn without board approval.

(2) When a person informs the board that a ward is within the jurisdiction of the board, the board may make a preliminary inquiry to determine whether the interests of the public or of the ward require that further action be taken. The presiding officer may direct the parties or their representatives to appear. If it appears that formal jurisdiction should be exercised the board shall authorize a hearing request to be filed. If the best interests of the ward or the public will be served by not having a hearing, the board shall not authorize the filing of a hearing request, but shall inform the petitioner in writing of the reasons for denial.

(3) If, as the result of a preliminary inquiry, parties agree upon any fact involved in the controversy, their stipulation may be made a part of the record, and the presiding officer may enter a binding order for use of the stipulation as evidence at a later hearing.

History: 1954 ACS 83, p. 36, Eff. Mar. 19, 1975.

R 400.1222 Documents; identifying information.

Rule 1222. Except as otherwise specifically provided, this rule applies to all documents filed with the board. Each document filed shall state clearly the name, address and interest of the person by whom it is filed and the name of the ward in connection with whose case it is submitted. A petition shall be signed by the person filing it, or by his attorney or representative.

History: 1954 ACS 83, p. 36, Eff. Mar. 19, 1975.

R 400.1223 Manner of service; proof of service.

Rule 1223. (1) Where these rules require that a copy of a notice or other document be served personally upon a person, service may be made anywhere in

Digitized by Google Original from UNIVERSITY OF MICHIGAN

Generated for Susan K Kendall (Michigan State University) on 2018-09-05 16:48 GMT / http://hdl.handle.net/2027/mdp.49015002898253

the state by delivering a copy to him personally or by mailing the document to his last known address and to the business address of his attorney or other representative. All notices of hearing mailed to a ward, and to his parents or guardian, shall be sent by registered or certified mail. All other mailings may be by ordinary mail, with postage prepaid.

(2) Proof that service of a document was made shall be filed with the board. Service may be proved in any case by an acknowledgment of service signed by the person to be served. Personal service may be proved by a written, notarized statement of the person who made service on a form provided by the board. Service by registered or certified mail may be proved by an appropriate receipt. Unless disputed, a written notarized statement by the person filing the document stating that he has served it, and the manner of service, is sufficient as proof of service.

History: 1954 ACS 83, p. 36, Eff. Mar. 19, 1975.

R 400.1224 Notice and place of hearings.

Rule 1224. (1) Notice of hearing shall contain the date, hour, place and nature of the hearing, a statement of the jurisdiction under which the hearing is held, a short, plain statement of the matters asserted, information on the ward's rights, and, where appropriate, reference to the particular sections of the statutes and rules involved.

(2) Subject to the rules on release violation hearings, hearings may be held at any suitable place the board or its presiding officer may designate. At least 24 hours' notice is required for release violation hearings. Notice of other hearings is sufficient if personal service is made at least 72 hours before the date of the hearing or mailing is made at least 5 days before the date of hearing.

(3) Notice of all hearings shall be given to the ward, parents or guardian of the ward, and their representatives of record, and to the department personnel assigned to the matter. In the case of a hearing on a request for discharge, release or release violation, notice shall also be given to the probate court and prosecuting attorney in the county from which the ward was committed. Notice of all release violation hearings shall also be given to the attorney general and the probate court in the county where the violation allegedly occurred. Notice of hearing may be given to other persons at the board's discretion.

(4) Notice of proceedings other than hearing may be informal and may be given in such manner and to such persons as the board or presiding officer may direct in each case.

(5) Notice under these rules may be waived in writing.

History: 1954 ACS 83, p. 36, Eff. Mar. 19, 1975.

R 400.1225 Powers and duties of presiding officer.

Rule 1225. (1) In connection with any case assigned to him, the presiding officer may exercise those powers granted by section 80 of the administrative procedures act. Subject to the authority of the board, he may exercise all powers reasonably necessary to carry out those functions given to the board by section 121 of Act No. 280 of the Public Acts of 1939, as amended, being §400.121 of the Michigan Compiled Laws, and required by judicial interpretation or decision. He may make rulings on any matters that would expedite the proceedings in accordance with the requirements of law, including the acceptance of admissions, pleas or waivers on the record, and matters of discovery and additional process.

(2) A presiding officer may refer or recommend the ward to any appropriate individual or facility for examination, including medical and other examinations

relevant to the development of a recommendation or report pertaining to the matter before the board.

(3) A presiding officer may exclude members of the general public from a hearing and, to protect confidentiality and the record, may clear the hearing room of all persons not having a direct interest in the case.

(4) The board shall permit the ward or the ward's representative to inspect the written reports and documents offered in evidence at a hearing. The ward shall be given an opportunity at the hearing to respond to the report and to explain or controvert any factual representations disclosed. The presiding officer may except from disclosure parts of the report or whole documents which are not relevant to a proper disposition, diagnostic opinion which might seriously disrupt a program of rehabilitation, or sources of information which have been obtained on a promise of confidentiality. In all cases where parts of a report or whole documents are not disclosed under such authority, the presiding officer shall state for the record the reasons for his action and inform the ward and his representative that information has not been disclosed. The action of the presiding officer in excepting information from disclosure shall be subject to board approval on the record of the hearing, and the board action is subject to appellate review.

History: 1954 ACS 83, p. 37, Eff. Mar. 19, 1975.

R 400.1226 Parties, representation, intervention, and appearance.

Rule 1226. (1) The ward is a necessary party at board hearings. A hearing under these rules shall not be conducted in the ward's absence except that, upon request, the presiding officer may excuse but may not restrict the ward for the taking of evidence on sensitive material which could be harmful to the ward if discussed in his presence.

(2) If the ward has a representative who withdraws or fails to appear, a hearing leading to a final determination of the case shall not be conducted without giving the ward a reasonable opportunity to secure other representation. The presiding officer shall determine what constitutes reasonable opportunity in each case.

(3) Any other person who seeks directly to affect the result of a proceeding, upon his request, or at the direction of the board or presiding officer, may be named as a party to the case by statement on the record.

(4) A ward may be represented at board proceedings by legal counsel, a relative, a friend or other spokesman, or he may represent himself. A ward's representative shall enter his appearance on the record.

History: 1954 ACS 83, p. 37, Eff. Mar. 19, 1975.

R 400.1227 Consolidation.

Rule 1227. The board or its presiding officer may order any matters before it consolidated where appropriate.

History: 1954 ACS 83, p. 38, Eff. Mar. 19, 1975.

R 400.1228 Settlements and waiver; approval.

Rule 1228. All proposed settlements of cases or waivers of rights are subject to the approval of the presiding officer. A settlement, compromise or waiver becomes final upon board approval and order.

History: 1954 ACS 83, p. 38, Eff. Mar. 19, 1975.

R 400.1229 Submission of record; time for decision.

Rule 1229. Case records, together with the written summary and recommendation of the presiding officer, shall be furnished to each member of the board

within 10 days after the conclusion of the hearing, unless a different time limit is specified by these rules or board order. The board shall review the record and issue its decision or recommendation by a majority vote within 10 days after receipt and completion of the record.

History: 1954 ACS 83, p. 38, Eff. Mar. 19, 1975.

PART 3. RELEASES

R 400.1231 Approval of releases; criteria.

Rule 1231. (1) Every ward assigned to institutional placement shall be brought before the board prior to release. A release plan may be presented to the board by any directly interested person with a recommendation for release and for the conditions in each case. The board shall determine whether or not release shall be granted and the conditions to be imposed. A ward may be considered for release at any time.

(2) Appropriate criteria for determining release readiness include, but are not limited to, the following:

(a) Testimony of witnesses and excerpts from the official record, in the discretion of the presiding officer.

(b) Whether the ward has made satisfactory adjustment and is likely to avoid further violation of the law.

(c) The ward's record of delinquency and nature of the criminal offenses committed.

(d) The ward's attitude toward his offense, himself and others.

(e) Professional evaluations relative to the ward's behavior.

(f) Progress of the ward toward achievement of appropriate goals set for him during institutional residence.

(3) The board shall determine whether the community treatment plan is acceptable as submitted. By agreement, modifications can be made in the plan to facilitate an immediate release. The board may approve a release for a ward even though a fully developed community treatment plan is not available, if it appears that continued institutionalization is counterproductive.

History: 1954 ACS 83, p. 38, Eff. Mar. 19, 1975.

R 400.1232 Decision on release.

Rule 1232. The board shall render a decision on release in any of the following ways:

(a) Approve an immediate release to be effected within 2 weeks after the final decision of the board.

(b) Approve release subject to fulfillment of specific relevant conditions. The board or its representative may hold a conference at any time with the ward, his parents or representative, department staff, or other interested persons to review and assess whether the conditions have been met, and, if so, grant release without further hearing.

(c) Deny release. Where release is denied, the board shall set another hearing at any time not more than 90 days after the decision. A decision to deny release shall include a clear statement of the reasons for denial and the goals or objectives suggested for the ward which will receive consideration at the next hearing.

History: 1954 ACS 83, p. 38, Eff. Mar. 19, 1975,

R 400.1233 Conditions of release.

Rule 1233. (1) The following conditions shall attach to all releases:

(a) A ward shall report regularly to personnel having responsibility for supervision. Supervision shall be reasonably available and accessible to the ward.

(b) A ward shall live in a place of residence which is approved by the department.

(c) A ward shall not violate the juvenile code nor any statute or local ordinance governing criminal offenses.

(2) A ward shall abide by all special conditions of his release. Special conditions shall relate to clearly identifiable and documented needs of a ward and may be established by the board, parents, or community services worker with board approval.

History: 1954 ACS 83, p. 38, Eff. Mar. 19, 1975.

PART 4. VIOLATION OF CONDITIONS, RETURN FROM RELEASE

R 400.1241 Mandatory reporting.

Rule 1241. If a juvenile court petition is not filed, violations shall be reported to the board by the department for all allegations of behavior that would be a felony if committed by an adult, and for all criminal convictions.

History: 1954 ACS 83, p. 39, Eff. Mar. 19, 1975.

R 400.1242 Hearing request; contents.

Rule 1242. If authorized pursuant to subrule (2) of R 400.1221, requests for release violation hearing shall contain:

(a) A statement indicating that the youth is a ward of the state who comes within board jurisdiction.

(b) A statement describing the alleged violation, including specific citation of the law, rule or policy allegedly violated.

(c) The names and addresses of relevant persons, such as witnesses, and their connection with the case.

(d) Such other information as is required by the board.

History: 1954 ACS 83, p. 39, Eff. Mar. 19, 1975.

R 400.1243 Location of hearings (venue); return to institution.

Rule 1243. If practicable, all release violation hearings shall be held in the county where the ward is found. However, location may be changed to any other county for convenience of the parties and witnesses. A ward shall not be returned to the institution for any violation without at least a finding of probable cause.

History: 1954 ACS 83, p. 39, Eff. Mar. 19, 1975.

R 400.1244 Admission of release violation.

Rule 1244. (1) With the consent of the presiding officer, a ward may admit a violation of release if a record is made that:

(a) It is clear that the ward was fully advised of his rights and he reasonably appears to understand and comprehend the nature of the proceedings.

(b) The admission appears to be made voluntarily without coercion, fear, promise of reward or any other unlawful interference or persuasion.

(c) The ward appears to understand the possible resulting consequences, for example, return to the institution.

(d) The ward briefly describes sufficient facts regarding the charged conduct to reasonably believe that he committed the act.

(2) If accepted, the admission makes a full formal hearing unnecessary, but in all cases an informal hearing shall be afforded.

Generated for Susan K Kendall (Michigan State University) on 2018-09-05 16:48 GMT / http://hdl.handle.net/2027/mdp.49015002898253

(3) A ward may withdraw his admission at any stage prior to the conclusion of testimony and final argument.

History: 1954 ACS 83, p. 39, Eff. Mar. 19, 1975.

R 400.1245 Release violation hearing.

Rule 1245. (1) There shall be a hearing afforded to the ward in each case where violation hearing request is authorized.

(2) Hearings on violations consist of 2 phases, adjudicative and dispositional. The presiding officer shall determine the interval of time between the 2 phases of the hearing. The adjudicative phase determines whether the ward has violated his conditions of release as alleged. The dispositional phase determines measures to be taken with respect to the ward.

(3) In the absence of a valid admission, only competent, relevant and material evidence is admissible at the adjudicative phase, subject to the general rules of evidence in civil, nonjury proceedings as found in §600.2101 et seq. of the Michigan Compiled Laws. If a criminal conviction forms the basis for an alleged violation, the facts of the conviction may not be reargued. In the dispositional phase, only such matters as are relevant and material may be considered.

(4) The ward or his representative may present arguments on issues of law and policy and evidence and argument on issues of fact. He may confront and question witnesses against him and have subpoenas issued to obtain witnesses in his favor. The ward may remain silent or testify if he chooses. An inference adverse to the ward may not properly be drawn if he elects not to testify.

History: 1954 ACS 83, p. 39, Eff. Mar. 19, 1975.

R 400.1246 Disposition after finding or admission of violation.

Rule 1246. (1) At the conclusion of the proceeding, the presiding officer shall determine whether or not there is cause to believe that the ward committed the act alleged, and whether or not the act was a violation of release conditions, and he shall make a disposition, subject to board decision.

(2) The presiding officer has authority to determine interim placement of the ward pending final board decision, taking into consideration prior record, character, physical and mental maturity, pattern of living, seriousness of the instant offense, relative availability of suitable programs and facilities and the best interests of the public and the ward.

(3) Upon admission or finding of violation of conditions of release, the board may change the conditions by addition, deletion or modification, may take no action or may revoke release taking into consideration the department's recommendation. If release is revoked, the ward shall be returned to the institution from which released unless the department selects another institutional program.

History: 1954 ACS 83, p. 40, Eff. Mar. 19, 1975.

PART 5. DISCHARGE

R 400.1251 Procedure for discharge.

Rule 1251. (1) Where discharge is effected by operation of law, that is, by the attainment of legal discharge age, death of the ward, or by judicial determination, the department shall notify the board.

(2) Requests for discharge of a ward not discharged by operation of law may be made to the board at any time. A discharge from wardship may be granted upon:

(a) Satisfactory community adjustment and a showing that the ward no longer needs care and treatment related to state wardship status.

(b) Enlistment in national or military service, or a showing that the ward is clearly eligible and has applied for enlistment.

(c) Criminal court conviction and a showing that the ward is not likely to benefit from continued state wardship.

(d) A showing that the ward has not responded to services offered and would gain no benefit from continued wardship, and his discharge will not cause a substantial risk of serious harm to the community, or to the ward.

(e) Other reasons which in the judgment of the board should terminate wardship; for example, marriage, continuous absence, or removal to another state.

(3) The board may grant discharge on the record submitted or may require a hearing.

History: 1954 ACS 83, p. 40, Eff. Mar. 19, 1975.

PART 6. REVIEW

R 400.1261 Informal reviews.

Rule 1261. Upon request, or at its own discretion, the board may review the department records of a ward at any time. Record review may be supplemented by an interview with department personnel familiar with the case, to the end that the board may be aware of the long range plans for the ward, his current status and his progress toward achieving the long range plan. A board member or examiner conducting the review may secure further information or reports from department staff. The results of an informal review may be reported to the director with board recommendation.

History: 1954 ACS 83, p. 40, Eff. Mar. 19, 1975.

R 400.1262 Annual reviews.

Rule 1262. (1) When a ward is assigned to an institutional placement for 1 year or more, a hearing shall be conducted to consider the ward's progress toward release. A request for hearing is not required. The results of an annual hearing shall be reported to the director with board recommendation.

(2) When there is no objection at the conclusion of an annual review hearing, the presiding officer may recommend release to the board for decision.

History: 1954 ACS 83, p. 40, Eff. Mar. 19, 1975.

R 400.1263 Special review.

Rule 1263. Requests for special review may be filed at any time if it appears that the ward is subject to conditions of treatment, care, or custody which are likely to cause injury to the ward if continued, either through lack of treatment or imposition of unreasonable or inappropriate treatment. The results of a special review shall be reported to the director with board recommendation.

History: 1954 ACS 83, p. 40, Eff. Mar. 19, 1975.

R 400.1264 Rehearings.

Rule 1264. (1) The board may review any decision at any time on its own motion if new and important circumstances have arisen which, in the opinion of the board, would justify another hearing, review or decision.

(2) Rehearings may be held as provided in section 87 of the administrative procedures act.

History: 1954 ACS 83, p. 40, Eff. Mar. 19, 1975.

R 400.1265 Appeals.

Rule 1265. Requests for rehearing before the board may be filed before application for judicial review of a board order or decision. If the request for rehearing is denied, or if the interested person is still aggrieved following a rehearing, he may seek judicial review as provided in sections 101 to 106 of the administrative procedures act.

History: 1954 ACS 83, p. 41, Eff. Mar. 19, 1975.

FAMILY DAY CARE HOMES

(By authority conferred on the department of social services by section 2 of Act No. 116 of the Public Acts of 1973, being §722.112 of the Michigan Compiled Laws)

R 400.1301 Definitions.

Rule 1301. (1) The terms defined in Act No. 116 of the Public Acts of 1973, being §§722.111 to 722.128 of the Michigan Compiled Laws, have the same meanings when used in these rules.

(2) "Licensee" means the individual who is licensed or registered under Act No. 116 of the Public Acts of 1973 to operate a family day care home.

(3) "Caregiver" means the family day care home licensee and any other individual whose duties include direct care, supervision, and guidance of children in a family day care home.

(4) "Parent" means the child's natural parent, guardian, or other legally responsible person.

History: 1954 ACS 83, p. 41, Eff. Apr. 2, 1975.

R 400.1302 Caregiver and day care home family.

Rule 1302. (1) A caregiver shall:

(a) Be at least 18 years of age.

(b) Be of responsible character to provide for the care and welfare of children.

(c) Be suitable to meet the physical, emotional, social and intellectual needs of each child.

(d) Be capable of appropriately handling emergency situations.

(e) Be responsible for supervision at all times.

(2) All persons living in the home shall be of responsible character to assure the welfare of children.

(3) A licensee shall have an arrangement with a person at least 18 years of age who is available to assist in an emergency situation.

(4) A licensee shall provide the department with the name of any person living in the home or caring for children who has been convicted of a crime involving intentional bodily harm or a sexual offense.

(5) A licensee shall provide the department with a written statement verifying a person's personal fitness to care for or to be associated with children for any person living in a home or caring for children who has been on release status from a mental hospital or a mental institution for less than 1 year. A statement shall be obtained from the medical or administrative director of the mental hospital or mental institution.

History: 1954 ACS 83, p. 41, Eff. Apr. 2, 1975.

R 400.1303 Ratio of caregivers to children.

Rule 1303. The ratio of caregivers to children, present in the home at any one time, shall be not less than 1 caregiver to 6 children, including children under the

age of 7 years who are related to an adult member of the family by blood, marriage or adoption. No more than 2 of such children in the care of a caregiver shall be under the age of 12 months.

History: 1954 ACS 83, p. 41, Eff. Apr. 2, 1975.

R 400.1304 Program.

Rule 1304. (1) A licensee shall talk with a parent about the child's daily activities to insure that a child's daily routine in the family day care home and his own home fit together in a balanced way.

(2) The daily routine planned by the licensee shall be in accord with the age and needs of the individual child and shall include:

(a) Active and quiet play.

(b) Indoor and outdoor play as weather permits.

(c) Rest or sleep or both.

(d) Meals and snacks.

(3) Toilet training shall be planned cooperatively between the licensee and a parent so that the toilet routine established is consistent between the family day care home and the child's own home.

History: 1954 ACS 83, p. 42, Eff. Apr. 2, 1975.

R 400.1305 Discipline.

Rule 1305. (1) A licensee shall talk with a parent about the methods of child handling and discipline to insure that the methods used encourage cooperation, self-direction and independence.

(2) A caregiver shall not use the following methods of handling children:

(a) Any form of corporal punishment or physical force. Nonsevere discipline or restraint which is reasonably necessary, based on a child's development, to prevent a child from harming himself or other persons or property may be used only when a licensee has obtained prior written consent from a parent.

(b) Restricting a child's movement by binding or tying him.

(c) Confining a child in an area such as a closet, locked room, box or similar cubicle.

(d) Withholding necessary food, rest or toilet use.

(e) Mental or emotional cruelty such as humiliating, shaming or frightening a child.

History: 1954 ACS 83, p. 42, Eff. Apr. 2, 1975.

R 400.1306 Equipment.

Rule 1306. (1) A variety and number of toys, games and other play equipment shall be available to the child and shall be appropriate and of interest to a child at his stage of development.

(2) The equipment shall be sturdy, safe and clean.

(3) Each child shall have a comfortable and clean place to sleep or rest. The floor shall be used only when padded, warm and free from drafts. A child who is in care between the hours of 8 p.m. and 6 a.m. shall have an individual sleeping place. Children under 12 months of age and any child unable to walk unassisted shall sleep in a crib or bed with side rails and a firm mattress.

(4) A telephone shall be accessible on the premises or within close walking distance. When a telephone is not accessible, a vehicle shall be available for use in emergency situations.

History: 1954 ACS 83, p. 42, Eff. Apr. 2, 1975.

R 400.1307 Food and nutrition.

Rule 1307. (1) A licensee shall work out a written statement for the provision of food with a parent at the time of initial attendance. The statement shall include who provides the food, the amounts of food to be served and the approximate times the child is to be fed. There shall be enough of the proper kinds of foods to enable the child to meet his nutritional needs for growth and development.

(2) Food shall be provided so that there are no excessively long periods between meals and snacks.

History: 1954 ACS 83, p. 42, Eff. Apr. 2, 1975.

R 400.1308 Health supervision.

Rule 1308. (1) A caregiver shall report promptly to a parent any accidents, suspected illness or other changes observed in the health of a child.

(2) When a communicable disease occurs, a licensee shall notify a parent of an exposed child immediately so that the child may be observed for symptoms of disease.

(3) Bedding used by an ill child shall be laundered and toys, utensils, toilet and lavatory used by an ill child shall be cleaned and sanitized before being used by another child.

History: 1954 ACS 83, p. 42, Eff. Apr. 2, 1975.

R 400.1309 Health supervision of the caregiver and day care home family.

Rule 1309. A person living in the home or caring for children who has a suspected or confirmed case of communicable disease shall be excluded from contact with children.

History: 1954 ACS 83, p. 43, Eff. Apr. 2, 1975.

R 400.1310 Medication.

Rule 1310. If medication is to be administered by a caregiver, the following procedures shall be followed:

(a) Medication shall be given or applied only with prior written permission from a parent. Medication shall be in the original container, stored according to instructions and clearly labeled for a named child. A caregiver shall keep the medication out of reach of children and shall return the medication to a parent or destroy it when no longer needed.

(b) A caregiver shall give or apply the medication according to the instructions provided. A caregiver shall maintain a record as to the time and amount of medication given or applied.

(c) Prescription medication shall have the pharmacy label indicating physician's name, child's name, instructions and name and strength of the medication.

History: 1954 ACS 83, p. 43, Eff. Apr. 2, 1975.

R 400.1311 General environment.

Rule 1311. (1) A family day care home and its furnishings shall be maintained in a clean and safe condition so as to provide a healthful environment for the general welfare of children.

(2) A home and premises shall be kept free from standing water.

(3) A home shall be maintained so as to prevent and eliminate rodent and insect infestation.

(4) Plumbing fixtures and water and waste pipes shall be properly installed and maintained in good sanitary working condition.

(5) During fly season, any door, window and other opening to the outside used for ventilation shall be supplied with screening of not less than 16 mesh which shall be kept in good repair.

(6) A facility shall be kept heated to at least 68 degrees Fahrenheit at a point 2 feet above the floor. Hot water pipes, steam radiators, and permanently installed space heaters shall be shielded to protect against burns. Portable heating devices shall not be used.

(7) A furnace, water heater, heating appliances, pipes, and other similar devices shall be maintained in a safe condition and shall be made inaccessible to children.

History: 1954 ACS 83, p. 43, Eff. Apr. 2, 1975.

R 400.1312 Space.

Rule 1312. (1) A family day care home shall provide per child present in the home at least 35 square feet of indoor floor space used by and accessible to the child, exclusive of bathrooms and storage areas.

(2) An outdoor play area of not less than 400 square feet, protected from hazards, shall be available on the premises or within walking distance of the home.

History: 1954 ACS 83, p. 43, Eff. Apr. 2, 1975.

R 400.1313 Food and food handling.

Rule 1313. (1) All milk and milk products used shall be pasteurized.

(2) Refrigeration equipment shall be used for the storage of perishable foods and shall be capable of maintaining temperatures of 45 degrees Fahrenheit or below.

History: 1954 ACS 83, p. 43, Eff. Apr. 2, 1975.

R 400.1314 Sanitation.

Rule 1314. (1) Each sink and lavatory used by children shall be supplied with safe water. Water shall be supplied from a public water system, if available, otherwise from a private source which shall meet the requirements of the department of public health.

(2) Sewage and other water-carried wastes shall be disposed of through a municipal sewer system, if available, otherwise into a private system which shall meet the requirements of the department of public health.

(3) Garbage and trash shall be handled and removed at intervals so as not to create a nuisance or a menace to health. Garbage shall be stored in flyproof and watertight containers with tight fitting covers.

History: 1954 ACS 83, p. 43, Eff. Apr. 2, 1975.

R 400.1315 Exits.

Rule 1315. (1) A family day care home shall have at least 2 exits, 1 of which may be a window, from each floor level used by children. At least 1 exit from each floor level shall provide a direct means of unobstructed travel to the outside at street or ground level.

(2) A window provided as a second exit shall be of a type which may be readily opened and of proper size and design to allow for evacuation.

(3) A room or space including attics which is accessible only by a ladder, folding stairway or through a trap door shall not be used by children.

History: 1954 ACS 83, p. 43, Eff. Apr. 2, 1975.

R 400.1316 Fireplaces.

Rule 1316. A fireplace which is used while children are in care shall be separated from the area by a protective device.

History: 1954 ACS 83, p. 44, Eff. Apr. 2, 1975.

R 400.1317 Hazardous materials.

Rule 1317. A caregiver shall store all flammable materials, medical supplies, bleaches, detergents, insecticides, plastic bags, firearms, and other similar hazardous materials securely and out of the reach of children.

History: 1954 ACS 83, p. 44, Eff. Apr. 2, 1975.

R 400.1318 Health record of child.

Rule 1318. (1) At the time of initial attendance, a licensee shall obtain from the parent the following:

(a) A written permission to seek emergency medical care signed by a parent and notarized.

(b) A statement signed by a parent that the child is, and has been, in normal and good health.

(c) Information as to immunizations and boosters, if any, completed or in progress against diphtheria, pertussis, tetanus, polio, measles, rubella, and others as recommended by the department of public health. Immunization records shall be updated annually.

(2) Within 30 days of initial attendance for any child with a handicap or health problem, a licensee shall obtain from the parent a statement signed by a licensed physician indicating the limits of participation in the daily activities that would be a risk to the child's health and any special needs or treatment.

History: 1954 ACS 83, p. 44, Eff. Apr. 2, 1975.

R 400.1319 Health record of caregiver and day care home family.

Rule 1319. (1) A licensee shall give the department the following information:

(a) For a caregiver, a statement signed by a licensed physician within 12 months prior to caregiving and every 2 years thereafter, indicating that to the best of his knowledge, the caregiver is mentally and physically capable of handling the additional responsibility of child care. For a caregiver over the age of 65 years, the statement shall be obtained annually.

(b) For a caregiver and all other persons 14 years of age or older living in the home, written evidence of freedom from communicable tuberculosis verified within 1 year prior to caregiving and annually thereafter.

(2) A licensee shall maintain current information as to immunizations and boosters completed or in progress against diphtheria, pertussis, tetanus, polio, measles, rubella, and others as recommended by the department of public health for all minor children living in the home. If immunizations have not been given or completed, a licensee shall so inform the parent of any child in care.

History: 1954 ACS 83, p. 44, Eff. Apr. 2, 1975.

R 400.1320 General records.

Rule 1320. (1) A licensee shall give each parent placing a child in a family day care home a copy of the family day care home rules as furnished in booklet form by the department. A licensee shall have verification that each parent has received a copy of the rules.

(2) A licensee shall maintain the following information for each child received for care:

(a) Child's full name, birthdate, date of admission and discharge.

(b) Name of parent.

(c) Home address and telephone number of parent.

(d) Parent's business telephone number.

(e) Name, address and telephone number of family physician and hospital desired in an emergency.

(f) Written authorization for emergency medical treatment for the child.

(g) Health insurance identification information.

(h) Name, address and telephone number of another person to be notified in case of emergency.

(i) Names of persons other than parent to whom a child may be released.

(j) Health record.

(k) Written permission by a parent for administering medication.

(l) Statement for provision of food.

History: 1954 ACS 83, p. 44, Eff. Apr. 2, 1975.

R 400.1321 Reports.

Rule 1321. A licensee shall report any accident or illness occurring while a child is in care which results in hospitalization or in death to the department within 5 days on a form provided by the department.

ADULT FOSTER CARE FACILITIES

(By authority conferred on the director of social services by section 3 of Act No. 287 of the Public Acts of 1972, being §331.683 of the Michigan Compiled Laws)

PART 1. GENERAL PROVISIONS

R 400.2101 Scope.

Rule 101. This part applies to all adult foster care facilities.

History: 1954 ACS 82, p. 29, Eff. Feb. 1, 1975.

R 400.2102 Definitions; A to D.

Rule 102. (1) "Act" means Act No. 287 of the Public Acts of 1972, being §§331.681 to 331.694 of the Michigan Compiled Laws.

(2) "Adult" means a person 18 years of age or older.

(3) "Assessment plan" means a written statement prepared in cooperation with a responsible agency and which identifies the specific care and maintenance, services and resident activities appropriate for each individual resident's physical and behavioral needs and well-being and the methods of providing such care and service taking into account the preferences and competency of the individual.

(4) "Care and maintenance" means personal care or supervision of activities provided by a facility which are essential to the resident's daily functioning.

(5) "Congregate facility" means a facility which provides adult foster care for more than 20 adults of which not more than 6 can be of age 65 or older with the condition that each living unit does not exceed 20 individuals and requires functional grouping of residents.

(6) "Council" means the adult foster care facility advisory council.

(7) "Department" means the state department of social services.

(8) "Director" means the director of the department.

History: 1954 ACS 82, p. 29, Eff. Feb. 1, 1975.

R 400.2103 Definitions; F, G.

Rule 103. (1) "Facility" means an adult foster care facility classified either as a family home, a group home or a congregate facility, or a distinct part of an establishment which provides supervision, assistance, protection or personal care, in addition to room and board, to an adult. An adult foster care facility does not include a licensed home for the aged, a licensed nursing home or a licensed mental hospital.

(2) "Facility census" means the count of residents living in a facility exclusive of foster family or staff. Persons related to the facility licensee or to the licensee's spouse within the second degree are excluded from the census count.

(3) "Family home" means a facility which provides adult foster care to not more than 6 adults.

(4) "Foster care agreement" means a written document executed by a facility and a responsible agency or person which spells out the basic responsibility of each party. Where the agreement is not with the department, a copy shall be filed with the department for its review and approval.

(5) "Group home" means a facility which provides adult foster care for more than 6 but not more than 20 adults of which not more than 6 can be of age 65 or older.

(6) "Foster family" means all individuals who live as a household. For the purpose of this definition recipients of foster care are exempted.

History: 1954 ACS 82, p. 29, Eff. Feb. 1, 1975.

R 400.2104 Definitions; H, I.

Rule 104. (1) "Habilitative and activities programs" means that group of alternate care services beyond care and maintenance which a facility designates and provides directly or through contract to preserve or improve a client's physical and intellectual functioning and independence. These include:

(a) "General program" means a program administered by staff without special prerequisite requirements or skills which provides health, educational, vocational or other services needed by a resident.

(b) "Developmentally disabled program" means a program which is primarily designed for the mentally handicapped with activities aimed at maintaining or improving levels of functioning for a resident with mental handicaps to achieve maximum independence and accepted participation in community life.

(c) "Social-emotional program" means a program which is primarily designed for a individual with diagnosed problems in social or emotional functioning and the activities shall aim at maintaining or improving levels of functioning for a resident to achieve maximum independence and accepted participation in community life.

(d) "Alcohol program" means a program which is primarily designed for the alcoholic dependent and whose activities aim to decrease alcoholism and other related self-destructive behavior and to return a resident to the community as a self-supporting adult.

(e) "Drug abuse program" means a program which is primarily designed for an individual experiencing problems with nonalcoholic drugs and whose activities aim to decrease drug taking and related self-destructive behavior of an individual and to return a resident to the community as a self-supporting adult.

(2) "Health appraisal" means an evaluation conducted as necessary by physicians, dentists or nurses or other health professionals where appropriate having as its objective optimal individual health.

(3) "Isolation" means the complete and unattended separation of a resident from staff and other residents for purposes of discipline or training.

History: 1954 ACS 82, p. 29, Eff. Feb. 1, 1975.

R 400.2105 Definitions; L to P.

Rule 105. (1) "License" means a certificate issued by the department authorizing a facility to operate. A license may be temporary, regular, or provisional.

(2) "Living unit" means a section or distinct part of a facility which incorporates the arrangement of a family home and which at least contains a living room, bedrooms, and bathrooms for a group of residents. Central activity, food service, and dining areas are permitted.

(3) "On notice" means a licensee operating after having been served with a notice of intent to revoke, suspend or refuse to renew a license pursuant to these rules.

(4) "Program elements" means those goal-directed service components which may be found in each program.

(5) "Provisional license" means a certificate issued by the department giving the facility authority to operate, although the applicant is temporarily unable to conform to all of the rules of the director on condition that the items of nonconformance do not constitute an immediate threat to the health, safety, or well-being of the residents. The maximum period a facility may operate under a provisional license for any item of noncompliance is 2 years.

History: 1954 ACS 82, p. 30, Eff. Feb. 1, 1975.

R 400.2106 Definitions; R to W.

Rule 106. (1) "Regular license" means a full authority to operate in accordance with the provisions of the act and these rules.

(2) "Responsible agency" means a public or private organization which arranges for care of a resident in a facility, primarily through purchase of services and maintains ongoing responsibility to the resident in the facility.

(3) "Responsible person" means the licensee or administrator or an individual designated by the licensee or administrator to carry out on-site duties and responsibilities of the licensee or administrator in his absence who is at least 18 years of age, is of good moral character and is physically and emotionally capable of meeting the needs of residents during the period he is in charge. A responsible person shall be other than a resident.

(4) "Restraint" means paraphernalia, contraptions, material, or equipment for the purpose of immobilizing residents, or the use of such items.

(5) "Temporary license" means authority to operate a facility which is issued for a limited period of time not to exceed 90 days to a new applicant to permit completion of investigation of his application for a license.

(6) "Written admission policy" means a facility's public statement of objectives, eligibility and application requirements for admission; items included in its rate; other items and services available at designated extra charge, services available; its resident fund and visitation and grievance policies and procedures.

History: 1954 ACS 82, p. 30, Eff. Feb. 1, 1975.

R 400.2111 Licensing applications and renewals.

Rule 111. (1) An individual who is at least 18 years old, an organization, corporation or a foreign corporation authorized to do business in Michigan may apply for a license to provide adult foster care pursuant to these rules on fully completed forms authorized and prescribed by the department. The licensee shall

Original from UNIVERSITY OF MICHIGAN

be legally served if service is made on a responsible person or administrator at the address shown on the application.

(2) An application for a license shall be made and signed by the authorized representative of an individual, partnership, corporation or association including a receiver, trustee, assignee or legal representative desiring to establish, conduct or maintain an adult foster care facility. A 10% or more interest by any person, firm, corporation, association or organization in a facility shall be disclosed on the application or at such time following the application or reapplication that such interest is acquired. In the case of a married couple and the spouse is living in the facility, a statement of concurrence shall accompany the application for the purpose of determining that a wholesome atmosphere for a resident will be assured.

(3) An applicant shall furnish the department with programs, site and financial statement which shall include the following:

(a) Statement of facility purposes, objectives, and goals.

(b) Program designation and description of services to be provided with such endorsements or certifications as are required by the department to assure the performance of programs.

(c) Description of staff or contract means by which care and services will be accomplished.

(d) Floor plan showing the interior layout of foster care areas and room descriptions including use, number of beds, and dimensions for floor space.

(e) Financial statement and annual budget (group and congregate only).

(f) An addendum composed of any existing foster care agreement between the facility and a responsible agency.

(4) A $10.00 license fee shall accompany a license application and renewal. This fee is nonrefundable.

History: 1954 ACS 82, p. 31, Eff. Feb. 1, 1975.

R 400.2112 Inspections and investigations.

Rule 112. (1) Before issuing a license, the department shall conduct an investigation of the facility and attempt to determine if the applicant, or owners, partners or directors of the applicant, if other than an individual, is of good moral character, and is physically and emotionally capable of constructively assisting with programs for residents. The department shall also attempt to determine the applicant's financial and administrative capability to operate a facility providing the level of care and program stipulated in the application.

(2) A medical examination may be required at any time to establish physical or mental health of persons involved in providing residential care and services.

(3) Existing community resources, area housing patterns, and concentration of facilities shall be items of consideration for license issuance.

(4) Investigations and inspections shall be made at least annually and as further necessary to assure compliance with the act and the rules. Inspections of provisional licensees shall be made at least every 6 months to review progress on compliance issues.

(5) The department shall determine whether or not a facility complies with these rules and applicable laws.

(6) Inspections or investigations shall be conducted in accordance with the act and rules and shall include unannounced on-site visits, consideration of any facts, conditions or circumstances relevant to the operation of a facility, including reference and other information about the character and quality of facility staff members and reports of other agencies and community groups.

(7) Failure of an applicant or licensee to cooperate with the department in connection with an inspection or investigation shall be considered grounds for denial, suspension, revocation, or refusal to renew a license.

(8) Inspections and investigations shall be recorded by the department and the results, including any deficiencies, shall be mailed to the applicant or licensee. A licensee shall be given a reasonable period of time to correct noted deficiencies. The time period shall be specified in writing.

(9) The status of licensing, including notice of intent, shall be of public record.

History: 1954 ACS 82, p. 31, Eff. Feb. 1, 1975.

R 400.2113 License issuance.

Rule 113. (1) When the result of an investigation satisfies the department that a facility complies with the requirements of the act and these rules, by not being in substantial violation, the director may issue a regular license. He may issue a temporary license to a new applicant when a preliminary investigation satisfies him that an applicant appears to have the capacity to meet licensing requirements. He may issue a provisional license when an applicant or licensee is temporarily unable to comply with all the rules. Items of noncompliance shall not constitute an immediate clear and present threat to the health, safety or well-being of any resident.

(2) A license shall state the name and address of the licensee, the type of facility, the facility address and the maximum number of adults to receive care.

(3) The number of residents cared for in a facility and the number of resident beds shall not exceed the capacity authorized by the license.

(4) The total number of persons residing in a family home and the arrangement of the home at the time of application, renewal, reopening or approval of a change of license status shall be taken into consideration and be a basis for determining the number of residents to be authorized by the license for that family home.

(5) The current license, whether regular, provisional or temporary, shall be posted in a conspicuous public area of a group or congregate facility and shall be available for public inspection in a family home.

(6) An applicant or an authorized representative shall give written notice to the department of any changes in information previously submitted in an application for license within 5 business days after the change occurs.

History: 1954 ACS 82, p. 32, Eff. Feb. 1, 1975.

R 400.2114 Congregate homes.

Rule 114. Commencing with the promulgation of these rules, congregate facilities shall not be licensed except as drug and alcohol therapeutic communities. Congregate facilities already existing or demonstrated to be in an active planning stage may be licensed.

History: 1954 ACS 82, p. 32, Eff. Feb. 1, 1975.

R 400.2115 Waiver of licensing rules.

Rule 115. (1) The director may waive any rule for a stated period of time to permit experimentation and demonstration of new and innovative approaches to the delivery of services on condition that an evaluation is planned. Results shall be submitted to the department as prescribed by the waiver.

(2) A facility established before the effective date of the act which the director deems essential in providing care to 1 or more adults and whose continued operation is not deemed contrary to the health, safety and well-being of residents

is entitled to a waiver of any rule for a period not to exceed 2 years from date of initial evaluation. During this period a provisional license may be issued.

(3) In the interest of efficient administration of the act, after notification to the council and after consideration of the council's advice, the director may waive any rule.

History: 1954 ACS 82, p. 32, Eff. Feb. 1, 1975.

R 400.2116 Reports.

Rule 116. (1) A licensee shall report all new admissions and discharges in the facility to the department at a time, in such manner and on such forms as prescribed by the department.

(2) Within 10 days of receipt, a licensee shall report to the department all receipts of property or interests in property by transfers from a resident or an applicant for admission conveyed to the licensee or others associated with the facility. A licensee shall make such other reports to the department as the department may require.

History: 1954 ACS 82, p. 32, Eff. Feb. 1, 1975.

R 400.2117 Confidentiality.

Rule 117. Any portion of books, records, and information pertaining to any resident and required to be kept according to these rules shall be held confidential by the department and licensee and properly safeguarded, but they may be used by the department and licensee as necessary in the administration of the act.

History: 1954 ACS 82, p. 32, Eff. Feb. 1, 1975.

R 400.2118 Licenses; denials; suspension; revocations.

Rule 118. (1) The director may revoke, deny or suspend a license if the licensee or applicant is found to be in substantial violation of the act or these rules.

(2) Substantial violation means an infraction of a rule or of a provision of the act which is damaging to the intent of the rule or provision of the act and may be evidenced by any 1 of the following:

(a) The violation is continuing, repetitive, intentional or has proved damaging to specific residents.

(b) The violation is likely to result in damage to residents.

(c) The violation is likely to retard or prevent progress in resident habilitation.

(d) The violation does not closely conform to essential components of the rule.

(3) When the director proposes to revoke, deny, suspend or refuse to renew a license, he shall give an applicant or licensee written notice of the grounds for the proposed action after notice is given to the council. The notice shall be by certified or registered mail to the address shown in the application. The notice shall contain a statement of the reasons including the section of the act or rules upon which the denial, revocation, suspension, renewal or refusal is based and shall inform the applicant that there is a right to protest the decision to the director or his representative within 30 days of receipt of notice. Each council member shall be notified by regular mail.

(4) If the proposed action is protested by an applicant or licensee by written objections filed with the director within 30 days after receipt of notice, the director or his representative shall conduct a hearing at which an applicant or licensee may present testimony and confront witnesses. An applicant shall be afforded a prompt hearing and shall be notified by certified or registered mail of the hearing date at least 2 weeks prior to the date thereof. The hearing shall be held at the offices of the department at Lansing, Michigan, or such other place as

the director may designate. A notice of the hearing shall state the date, time, place and citation of the act or rule infraction relied upon.

(5) On the basis of the evidence presented at the hearing, the director shall make a final decision and shall forward his decision by certified or registered mail to all parties to the protest and hearing.

(6) If a proposed action is not protested within 30 days of receipt of notice of the proposed action as provided in the act, the license may thereupon be revoked, suspended, or renewal or application denied in accordance with the notice given.

History: 1954 ACS 82, p. 33, Eff. Feb. 1, 1975.

R 400.2119 Grievance procedures.

Rule 119. (1) A resident or licensee shall have access to the department hearing process for complaints regarding department administrative actions based upon these rules.

(2) A licensee shall require that grievance procedures for a licensee or a resident be included in any foster care agreement entered into with a responsible agency. Dispositions under such procedure shall be available to the department for inspection purposes.

History: 1954 ACS 82, p. 33, Eff. Feb. 1, 1975.

R 400.2120 Adult foster care facility advisory council.

Rule 120. (1) An advisory council to advise the director on the promulgation of all rules and amendments thereto and their enforcement shall be maintained in the department.

(2) The council shall advise the director on matters related to an adult foster care facility licensing program which he places before it for consideration. The director in his determination may take into consideration any recommendations of the advisory council.

History: 1954 ACS 82, p. 33, Eff. Feb. 1, 1975.

R 400.2121 Concurrent licensing.

Rule 121. A facility may be licensed concurrently under the act and Act No. 47 of the Public Acts of the First Extra Session of 1944, as amended, being §§722.101 to 722.108 of the Michigan Compiled Laws, only as a result of a special study by the department and a finding that such accommodation is in the best interest of the residents.

History: 1954 ACS 82, p. 33, Eff. Feb. 1, 1975.

R 400.2122 Staff training programs.

Rule 122. A licensee shall have its staff participate in training programs which are available and designated by the department. The training sessions shall be provided on a basis which will allow licensees and administrators to maintain adequate facility staffing.

History: 1954 ACS 82, p. 33, Eff. Feb. 1, 1975.

PART 2. FAMILY HOMES

R 400.2201 Scope.

Rule 201. This part applies only to family homes.

History: 1954 ACS 82, p. 34, Eff. Feb. 1, 1975.

R 400.2202 Family home licensees.

Rule 202. (1) Care provided by a family home shall be based on a foster care agreement between the family home and the responsible agency or person requesting care. The agreement shall specify the responsibility of the agency or person requesting care to provide all necessary intake procedures; secure information; initial, ongoing and discharge assessment planning; preparation for discharge; ongoing social services and assistance in obtaining all necessary care which may be needed by the resident. A copy of the agreement shall be maintained in the home. Where the agreement is not with the department, a copy shall be filed with the department for its review and approval.

(2) A foster family shall include at least 1 individual who lives in on a nontransient basis and meets the definition of a responsible person.

(3) Members of the foster family and those regularly assisting them shall be free of reportable communicable diseases required to be reported by the laws of this state or by the rules promulgated under such laws, and in such physical and mental health as will promote the health of the resident, his habilitation and his general well-being.

(4) Members of the foster family shall be of good moral character and be emotionally capable of fostering relationships within the foster family to assure a wholesome atmosphere for the resident. Activities and practices of the family home such as dining, bathing and dressing shall emphasize the benefits of family living in assisting, protecting, supervising and caring for residents.

(5) Members of a foster family participating in resident care and others who are designated as responsible persons or acting in such capacity shall be of suitable temperament to care for residents, shall understand the needs of residents, shall be capable of handling an emergency situation promptly and intelligently and shall be willing to cooperate fully with the resident, his own family and responsible relatives and the supervising agency.

(6) Members of a foster family participating in resident care and those who are designated as responsible persons or acting in such capacity shall have sufficient time available to devote to the supervision and care of residents to assure that the health, safety and well-being of residents is provided for.

History: 1954 ACS 82, p. 34, Eff. Feb. 1, 1975.

R 400.2203 Admission and discharge.

Rule 203. (1) A family home licensee shall have a written admission policy which shall be kept on the premises and be immediately available upon request. The department's assistance in establishing the policy is available upon request of a licensee.

(2) A prospective resident or his guardian, if the prospective resident is legally incompetent, shall exercise free choice in the selection of a family home. The department shall determine if the family home is capable of meeting an individual's needs.

(3) A family home shall not accept or keep a person whose behavior requires isolation or restraint nor admit a person whose present care requirements and program needs are incompatible with those of other residents in the family home.

(4) An admission prerequisite for persons transferring from another residential setting, nursing home or medical institution is a current written assessment plan outlining the specific service appropriate to the resident's needs and the method of providing the service. With a resident's consent, an individual not having a responsible agency shall have an assessment plan completed by department

workers and filed in the resident's record at the family home within 30 days after admission to the family home.

(5) Upon admission a resident's record shall contain information obtained from the resident, his next of kin or legal guardian, indicating persons to be notified in an emergency and the preferred physician or hospital and instructions for emergency care.

(6) An individual admitted shall have had a health appraisal completed within the previous 90 days, or in emergency admissions shall obtain the appraisal within 30 days of admission.

(7) A resident shall not be discharged from a family home without adequate preparation, including a determination that the move is in the resident's best interest. At the time of discharge, the responsible agency or the department shall update the assessment plan to provide for continuity in achieving objectives. A family home shall record date of discharge, the reason for discharge, the disposition of money and valuables held for safekeeping and a forwarding address of the resident or a relative, guardian or other adult. The foregoing does not restrict the resident's ability to make his own living arrangement.

(8) The express wishes of the resident shall be considered in all movements to and from a family home.

(9) A bedfast person or one requiring continuous and constant professional nursing care shall not be accommodated in a family home. This does not preclude the accommodation of a resident who is temporarily ill and bedfast but who does not require professional nursing.

History: 1954 ACS 82, p. 34, Eff. Feb. 1, 1975.

R 400.2204 Illnesses and accidents.

Rule 204. (1) In case of an accident or sudden adverse change in a resident's physical condition or adjustment, a family home shall obtain needed care immediately and notify the responsible relative and the person or agency responsible for placing and maintaining the resident in the family home.

(2) An occurrence of a reportable communicable disease as defined by the laws of this state or the rules implementing such laws shall be reported immediately to the local health department and the department.

(3) Immediate investigation of the cause of an accident or incident involving a resident, employee or visitor shall be initiated by a family home licensee and an appropriate accident record or incident report completed and maintained. Within 72 hours, serious accidents requiring medical attention shall be reported to the department for remedial review.

History: 1954 ACS 82, p. 35, Eff. Feb. 1, 1975.

R 400.2205 Deaths of residents.

Rule 205. When a resident dies, a family home licensee shall notify the resident's physician, the next of kin or legal guardian and the person or agency responsible for placing and maintaining the resident in the family home immediately. Statutes applicable to the reporting of sudden or unexpected death shall be observed. The death shall be reported to the department within 72 hours.

History: 1954 ACS 82, p. 35, Eff. Feb. 1, 1975.

R 400.2211 Programs for residents.

Rule 211. A family home shall provide programs for the habilitation of their residents. At minimum, this includes basic self-care and habilitation training for a resident, if required, plus providing or assuring transportation necessary to carry

out an assessment plan for all residents. In addition, the family home may elect to provide 1 or more of the following program elements. Department approval is contingent upon the resident's requirements and the family home's ability to provide those program elements:

(a) Basic self-care and habilitation training is a service to teach and reinforce skills in dressing, grooming, eating, bathing, toileting, and following of simple directions.

(b) Social education training is a service which covers areas of training inclusive of recreational participation such as group programs, community entertainment and recreational facilities utilization. Social graces and acceptable public behavior are covered in this area as are leisure time use and skills.

(c) Tutorial and special skills training is a service typically providing 1 to 1 training in an area. Services include basic self-care training, mobility training, or advanced skills. The service provider may be at a fixed location or may come to the family home to provide the service.

(d) Adult activity, day care, or day training is an activity and training service, including basic self-care skills, activities of daily living, utilization of community resources, hazard training, individual and group programs of therapy and education, recreational programs, field trips, skills maintenance, and special training. Objectives range from the maintenance of a participant in the community to the development of pre-vocational skills to permit placement in a sheltered workshop setting.

(e) Work activity is a work activity service provided in a protective setting in a day program to serve a retarded or mentally ill adult. Activities are divided between development of pre-vocational skills by producing a product in a structured work setting and providing basic social activities of daily living training. The major focus shall be on work skills for which reimbursement from products sold or from contracts may be provided.

(f) Sheltered workshop is a service in a certified protective workshop setting which includes special vocational training, job evaluation and rehabilitation planning with a definite objective of placement in gainful employment, either sheltered or independent. Certification includes proper wage deviation permits from the department of labor and approvals as appropriate from the division of vocational rehabilitation.

(g) Personal adjustment is a service for a person with psychiatric, emotional, behavioral or developmental problems and includes counseling and individual or group therapy as well as diagnostic evaluation. Utilization of appropriate batteries of psychological testing material and related counseling to assist in classification and determination of readiness for movement or maintenance in the community.

(h) Transportation means vehicle travel by public or private carrier and related cost to and from program resources in the community including consultation, medical and other services. This includes escort between screening and entry programs.

(i) Health services include pharmaceutical, medical, or dental services provided directly or through contractual agreement.

History: 1954 ACS 82, p. 35, Eff. Feb. 1, 1975.

R 400.2212 Care of residents.

Rule 212. (1) A responsible person shall always be present when a resident is in the home except as may be provided in an individual assessment plan. A resident shall not be left after nightfall or over night without a responsible person in attendance.

Digitized by Google

(2) Residents shall be assured privacy and protection from moral, social, and financial exploitation.

(3) All work performed by a resident shall be in accordance with the assessment plan.

(4) A resident shall be treated with dignity, and his personal needs, including protection and safety, shall be attended to at all times.

History: 1954 ACS 82, p. 36, Eff. Feb. 1, 1975.

R 400.2213 Residents; personal care.

Rule 213. (1) A family home shall provide care and maintenance to its residents including either or both personal care and supervision as appropriate. Supervision means guidance of an individual as he carries out activities of daily living, including reminding a resident to maintain his medication schedule as directed by his physician, reminding him of important activities to be carried out, assisting him in keeping appointments and being aware of his general whereabouts even though he may travel independently about the community. Personal care means continuous attendance by a responsible person to render personal assistance with dressing, personal hygiene, grooming and maintenance of medication schedule as directed and supervised by the individual's physician and being aware of the individual's specific whereabouts at all times, including his presence in outside activities. Specifically, personal care shall include, as required, care of the skin, mouth, teeth, hands, feet, eyes, and hair.

(2) A resident shall receive a bath or shower weekly and be afforded the opportunity for daily bathing.

(3) A resident shall be offered facilities for shaving daily.

(4) A resident shall be afforded opportunities to obtain haircuts, hairsets, or other hair grooming processes.

(5) A resident shall be afforded the opportunity, encouraged, and instructed to dress as fashion, cleanliness, and the season warrants.

(6) A resident shall be given assistance or trained in the use of prosthesis, as appropriate.

(7) A resident's dignity and privacy shall be respected in all areas. Female residents requiring assistance in activities such as dressing, bathing, and personal hygiene shall be assisted by or in the presence of another female.

History: 1954 ACS 82, p. 36, Eff. Feb. 1, 1975.

R 400.2214 Complaints.

Rule 214. A resident shall be afforded a means of presenting grievances to the foster family. If the area of concern is with the responsible agency, refer to R 400.2119.

History: 1954 ACS 82, p. 36, Eff. Feb. 1, 1975.

R 400.2215 Health care of residents.

Rule 215. (1) A resident shall have a health appraisal at least annually which contains specific recommendations for care, maintenance, treatment or special programs and shall reflect the resident's progress in meeting scheduled objectives.

(2) A resident who in the recent past has been a patient in an institution shall have on file in his individual record a statement of his medical and health history and his medical and health needs.

(3) The weight of each resident shall be recorded upon admission and a monthly record of the weight of each resident maintained.

(4) All prescription medication shall be prescribed by a licensed physician. Medication shall be administered and safeguarded in accordance with the instructions of an individual's physician.

History: 1954 ACS 82, p. 37, Eff. Feb. 1, 1975.

R 400.2216 Prohibited practices.

Rule 216. A family home licensee shall not establish or practice policies of physical restraint, isolation, corporal punishment, personal humiliation or the withholding of food, water or clothing.

History: 1954 ACS 82, p. 37, Eff. Feb. 1, 1975.

R 400.2217 Assessment plan.

Rule 217. Care, maintenance and services shall be provided according to an assessment plan. Components of a plan shall include at least:

(a) Specific objectives of maximum self-care and independence appropriate for each resident.

(b) Health appraisal, including medical, dental, and, where appropriate, other evaluations by health professionals and prescribed treatment.

(c) Care and maintenance requirements.

(d) Specific services and planning needed to obtain objectives.

(e) Work activities.

(f) Religious activities.

(g) Restrictions or exceptions to the requirements of resident care which are individually set and allowable under licensing rule.

(h) Payment planning related to the care and services to be obtained by the resident.

History: 1954 ACS 82, p. 37, Eff. Feb. 1, 1975.

R 400.2218 Resident activities.

Rule 218. (1) A resident shall have access to the use of the United States mails; he may write and send mail at his own expense without censorship and receive mail addressed to him unopened.

(2) A resident shall have daily, private access and use of a telephone for local calls. Similar access is to be granted for long distance calls which are made collect or for which charges are otherwise met by the resident.

(3) A resident shall have immediate access to and use of his personal clothing and personal belongings which he usually or habitually carries on his person or uses as a matter of identification, grooming, toilet, prosthesis, hygiene, communication, religious observance, personal adornment, personal entertainment, study or personal enhancement.

(4) A resident shall be provided with storage space for his immediate and private use.

(5) A family home shall facilitate family relationships and personal friendships by its routine and personnel attitude. Restrictive visiting hours shall not be maintained and residents shall be allowed to receive reasonable numbers of visitors at any reasonable time. Exceptions shall be covered in the assessment plan. Special consideration shall be given to visitors coming from out-of-town or whose hours of employment warrant deviation from usual visiting hours.

(6) A resident who is capable shall have the opportunity of doing his own shopping for his personal needs in the nearest community.

(7) Residents shall be afforded appropriate recreational experiences and opportunities within and outside the family home.

(8) A resident shall be permitted to practice the religious belief of his choice free of any coercion, and be allowed religious ministration at reasonable hours. Religious practice shall not be required of any resident.

(9) An adult shall not be denied admission to, or be discharged from, a family home because of race, religion, color, or national origin. The individual, or in the case of the legally incompetent his guardian, shall exercise free choice in the selection of a family home if it is capable of meeting the individual's needs.

(10) Any exception to resident activities shall be noted in the assessment plan.

History: 1954 ACS 82, p. 37, Eff. Feb. 1, 1975.

R 400.2221 Residents' funds; access; safekeeping.

Rule 221. (1) A resident shall have access to and use of personal funds belonging to him in reasonable amounts, including immediate access to at least $5.00 of his personal funds. Exceptions shall be subject to provisions of the assessment plan.

(2) The maximum value of money and valuables a family home shall accept for safekeeping shall not exceed $400.00 per resident.

(3) Residents' funds shall be kept separate and apart from all funds and monies of the licensee and treated as a trust obligation of the licensee.

History: 1954 ACS 82, p. 38, Eff. Feb. 1, 1975.

R 400.2222 Accounting of residents' funds.

Rule 222. (1) A resident's funds are subject at all times to a full and prompt accounting to the resident. Funds shall be considered promptly accounted for when the following conditions have been observed:

(a) A resident receives on request an itemized monthly statement of all charges against funds held in trust which shall be in such form as reasonably to inform the resident of the nature of the charge for goods or services and the amount thereof. A copy of the itemized statement shall be filed in the resident's record.

(b) A resident receives up to his full amount of personal funds at a time designated by the resident but no later than 5 days following the request subject to limitations in the resident's assessment plan.

(c) The charges against the resident's fund account bear a reasonable relationship to value or agreed price for the services rendered and goods furnished or made available to the resident.

(2) A resident who is discharged from a facility shall receive an itemized statement of his personal funds and prompt and reasonable payment of funds remaining in his account at the time of discharge, but no later than 5 banking days after discharge.

History: 1954 ACS 82, p. 38, Eff. Feb. 1, 1975.

R 400.2223 Charges against residents' funds.

Rule 223. A resident, or in the case of a mentally handicapped resident, the responsible agency, legal guardian, person or relative responsible for maintaining him, shall be given prior written notice and approval obtained before charges are made against his account. A copy of the authorization shall be maintained in the resident's record.

History: 1954 ACS 82, p. 38, Eff. Feb. 1, 1975.

R 400.2224 Transactions prohibited; review.

Rule 224. (1) A member of a foster family or personnel of a family home shall *not borrow* money or valuables from a resident with or without the consent of the *resident.*

(2) Transactions between a resident and a family home are subject to review by the department where it is alleged by a resident or his representative that the family home did not comply with any rule pertaining to trust funds. Department review does not preclude any other legal remedy a resident or his representative may have.

History: 1954 ACS 82, p. 38, Eff. Feb. 1, 1975.

R 400.2231 Home environment.

Rule 231. (1) The family home shall be so constructed, arranged and maintained as to provide adequately for the health and safety and well-being of all occupants.

(2) Furnishings and housekeeping standards shall be such that a family home presents a comfortable, clean and orderly appearance.

(3) All occupied rooms shall be of standard lath and plaster construction or equivalent.

(4) The atmosphere and routine of a family home shall be such that a resident may spend the majority of his nonsleeping hours outside of his bedroom.

(5) Dining, bath, sitting, living and recreation rooms shall be maintained by an adequate central heating system or its equivalent at a temperature range of 68-72 degrees Fahrenheit during nonsleeping hours.

(6) A family home shall make adequate provision for laundering of personal laundry.

(7) A family home shall be equipped to provide an adequate amount of hot water for a resident's use between the temperature range of 110-120 degrees Fahrenheit at the fixture.

(8) A toilet, lavatory and bathing or showering facility shall be provided for each 8 adults in a family home, including foster family and residents. At least 1 toilet and lavatory shall be provided on each floor having resident's bedrooms.

(9) Floors, walls, and ceilings shall be finished so as to be easily cleanable, and shall be kept clean and in good repair.

History: 1954 ACS 82, p. 38, Eff. Feb. 1, 1975.

R 400.2232 Living areas.

Rule 232. (1) A family home shall provide distinct living and sleeping areas. All areas shall be well lighted, heated, and ventilated.

(2) A family home shall provide a living or day room area for use by a resident and his visitors which affords privacy.

(3) The living and sleeping areas for a given resident shall not be in noncontiguous wings, units or buildings.

(4) A living room, dining room, or other room not ordinarily used for sleeping shall not be used for sleeping by residents or foster family members.

(5) Traffic to and from any room shall not be through a resident's bedroom.

History: 1954 ACS 82, p. 39, Eff. Feb. 1, 1975.

R 400.2233 Bedrooms.

Rule 233. (1) A room shall not be used as a bedroom where more than ½ the room height is below grade except where the ceiling of such portion of a building is located 5 feet or more above grade for more than 25% of the perimeter measurement of the building. Such acceptable bedrooms shall be provided 2 acceptable means of egress.

(2) Bedrooms for residents shall be separated from halls, corridors and other rooms by floor to ceiling walls containing no openings except doorways. Interior

doorways of bedrooms occupied by residents shall be equipped with a side-hinged permanently mounted door equipped with positive latching hardware which will insure opening of the door by a single motion, such as turning a knob or by pressing with normal strength on a latch.

(3) Residents of opposite sex shall not occupy the same bedroom unless they are husband and wife.

(4) Bedrooms shall have at least 1 window. Bedrooms shall be well ventilated and maintained at a comfortable temperature.

(5) A single occupancy bedroom shall have at least 80 square feet of usable floor space (70 square feet for existing facilities). Usable floor space is defined as that floor space under a ceiling at least 6 feet 6 inches in height.

(6) A multi-occupancy bedroom shall have at least 70 square feet of usable floor space per bed (65 square feet for existing facilities) with a maximum of 4 beds per bedroom. Usable floor space is defined as that floor space under a ceiling at least 6 feet 6 inches in height.

(7) There shall be at least a 3-foot clearance between beds in a multi-occupancy bedroom.

(8) Roll-a-ways, cots, double deck, stacked bunks, hide-a-beds, day beds and studio couches are prohibited.

(9) Provision shall be made for a resident to mount or hang pictures on bedroom walls.

(10) A resident bedroom shall be equipped with a mirror appropriate for grooming.

(11) Bedroom furnishing shall include an adequate closet or wardrobe, lighting sufficient for reading and other resident activities, bureau or dresser or equivalent and at least 1 chair with arms in each bedroom for every 2 residents.

History: 1954 ACS 82, p. 39, Eff. Feb. 1, 1975.

R 400.2234 Bedding and linen.

Rule 234. (1) A family home shall provide an individual bed at least 36 inches wide and 72 inches long with comfortable springs in good condition, a clean protected mattress not less than 5 inches thick or 4 inches if of a synthetic construction and a pillow.

(2) A family home shall provide bedding which includes 2 sheets, a pillow case, a minimum of 1 blanket and a bedspread. A family home shall maintain a linen supply for twice the number of beds in it. A family home shall provide towels and wash cloths which shall be changed at least twice weekly and more often if soiled. Bed linen shall be changed at least weekly or more often if soiled.

History: 1954 ACS 82, p. 39, Eff. Feb. 1, 1975.

R 400.2241 Fire safety.

Rule 241. (1) A family home shall be inspected and approved for fire safety prior to the accommodation of residents and at least annually except that existing family homes shall not be required to remove residents for the purpose of the initial fire inspection.

(2) A family home shall be at least of ordinary construction, light platform frame. It shall have "C" interior finish or better.

(3) A complete set of plans and specifications for any modification or addition to a family home shall be submitted to the department of social services, adult foster care facilities licensing division, for review and consultation. Approval for *any modifications* shall be contingent upon conformity to these rules.

History: *1954 ACS 82, p. 40, Eff. Feb. 1, 1975.*

R 400.2242 Interior finishes and materials.

Rule 242. (1) The alphabetical classification of finish materials is for flame spread, fuel contribution and smoke development as determined by the tunnel test in accordance with NFPA 255-1972, ASTM-E-84-1968, or UL-723-1971 and grouped as follows:

Class	Flame Spread	Fuel Contributed	Smoke Developed
A	0- 25	0- 35	0- 50
B	26- 75	36- 75	51-125
C	76-200	76-200	126-200

(2) The same alphabetical classification is used for combustibility of prefabricated acoustical tile units only, under federal specifications SS-A-118B-1958.

(3) The documents referred to in the previous subrules may be purchased from NFPA 255-1972, The National Fire Protection Association, 60 Batterymarch Street, Boston, Massachusetts 02110 at the cost of $1.00, ASTM-E-84-1968, from the American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pennsylvania 19103 at the cost of $1.50, UL-723-1960 from Underwriters' Laboratories Incorporated, 207 East Ohio Street, Chicago, Illinois 60611 at a cost of $1.00 and SS-1-118B-1958 which may be purchased from Specifications Sales (3FRSBS) Building, 197 Washington Navy Yard, General Services Administration, Washington, D.C. 20407, at a cost of 10 cents.

(4) In new construction, additions and conversions, interior finish classification shall be that of the basic material used without regard to subsequently applied paint or other covering in an attempt to meet the classification. The basic material shall be minimum class B in means of egress and minimum class C in other areas.

(5) Paper, cardboard, asphalt paper, or other highly flammable material shall not be used for the interior finish of a building.

History: 1954 ACS 82, p. 40, Eff. Feb. 1, 1975.

R 400.2243 Exits.

Rule 243. (1) A means of egress shall be considered the entire way and method of passage to free and safe ground outside a building. Means of egress shall be maintained in unobstructed, easily traveled condition at all times. Where basements are regularly utilized for resident activities, there shall be 2 acceptable means of egress. Doors which form a part of a required means of egress shall be equipped with positive latching, nonlocking against egress and shall be at least 36 inches in width in new construction, and at least 30 inches in width in existing facilities, and insure adequate egress for residents requiring wheelchairs, including ramps where necessary.

(2) The first floor of a family home shall have at least 2 separate and independent means of egress leading to the outside.

(3) In family homes, stairway and other vertical openings shall be enclosed with partitions and doors equal in fire resistance to the standard partition construction of the building. Such stairway doors shall be equipped with closing devices and latching, nonlocking hardware. Enclosures shall be so constructed and arranged that effective fire and smoke separations between floors will be provided or each resident bedroom on the second floor or above shall be equipped with a minimum 1¾-inch solid core wood door.

(4) In new or remodeled family homes, corridors shall lead directly to the outside or to required stairways having egress directly outside at grade level.

(5) Occupied room and exterior door hardware shall be positive latching, nonlocking against egress.

(6) New and existing family homes accommodating residents who regularly require wheelchairs shall be equipped with ramps located at primary and secondary means of egress. A ramp shall not exceed 1 foot of rise in 12 feet of run.

History: 1954 ACS 82, p. 40, Eff. Feb. 1, 1975.

R 400.2244 Heating.

Rule 244. (1) Except as provided herein, a family home shall be heated by an approved heating plant. If the heating plant is located in the basement of a family home, standard building material is sufficient for the floor separation which shall include at least 1¾-inch solid wood core door or equivalent to create a floor separation between the basement and the first floor. If the heating plant is on the same level with the residents, the furnace room shall be separated from the remainder of the building with materials that will afford a minimum 1 hour protected enclosure. A permanent outside vent which cannot be closed shall be incorporated in the design of heating plant rooms so that adequate air for proper combustion is assured. Space heaters are prohibited.

(2) Factory mutual and underwriters' laboratories approved permanent, fixed-type electrical heating, such as recognized panel or baseboard fixed-type may be utilized in any location. In existing homes where an American gas association approved sealed combustion wall heater has been installed in accordance with both the AGA and the manufacturer's recommendations, approval will be given if the unit is located on an outside wall, obtains combustion air directly from the outside and vents products of combustion directly to the outside.

(3) Flame-producing water heaters or incinerators shall be installed with the same protection as a heating plant.

(4) Storage of combustible materials is prohibited in rooms containing the heating plant, water heater, or incinerator.

History: 1954 ACS 82, p. 41, Eff. Feb. 1, 1975.

R 400.2245 Fire extinguishers.

Rule 245. A minimum of one 5-pound multi-purpose fire extinguisher or equivalent shall be provided for use in a family home on each occupied floor and in the basement.

History: 1954 ACS 82, p. 41, Eff. Feb. 1, 1975.

R 400.2246 Electrical service.

Rule 246. Electrical service shall be maintained in a safe condition. Where conditions indicate a need for inspection, and on all new or remodeled projects, the electrical service shall be inspected by a qualified electrical inspection service and a copy of the inspection report shall be submitted to the department.

History: 1954 ACS 82, p. 41, Eff. Feb. 1, 1975.

R 400.2247 Safety generally.

Rule 247. (1) Stairways shall have sturdy and securely fastened handrails, not less than 30 inches nor more than 34 inches above the upper surface of the tread. Exterior stairways and porches shall have handrails on the open sides.

(2) Scatter or throw rugs on hard finished floors shall have a nonskid backing.

(3) Handrails and nonskid surfacing or strips shall be installed in showers and bath areas.

(4) Sidewalks, fire escape routes, and entrances shall be kept free of any hazards such as ice, snow and debris.

(5) A yard area shall be kept free from all hazards, nuisances, refuse, and litter.

History: 1954 ACS 82, p. 41, Eff. Feb. 1, 1975.

R 400.2248 Water and sanitation.

Rule 248. (1) Private water systems shall meet the department of public health rules, "Regulations for Certain Water Supplies in Michigan" available from the Department of Public Health, 3500 North Logan, Lansing 48915. A bacteriological report confirming water quality shall be required during initial inspection and every 2 years thereafter. Family homes using a community approved water system need not comply with this requirement.

(2) Sewage disposal systems shall meet the requirements of the state department of public health.

(3) Kitchen and bathroom areas shall be maintained to insure cleanliness and sanitation so as to protect health.

(4) Waste which is not disposed of by mechanical means shall be kept in leakproof, nonabsorbent containers with close-fitting covers for garbage, refuse and other solid waste. Waste shall be removed from the kitchen daily and from the premises at least weekly.

(5) Hand washing facilities provided in both kitchen and bathroom areas shall include hot and cold water, soap, and individual towels, preferably of paper.

(6) An insect, rodent, or pest-control program shall be maintained as necessary, and carried out in a manner which continually protects the health of residents. Poisons, caustics and other dangerous materials shall be stored and safeguarded in nonresident areas and in nonfood preparation and storage areas.

(7) Open windows shall be screened May through October.

(8) When a resident is discharged, his room and its contents shall be thoroughly cleaned. Blankets and spreads shall be sanitized.

History: 1954 ACS 82, p. 41, Eff. Feb. 1, 1975.

R 400.2251 Records generally.

Rule 251. Resident records, a resident register, accident records and incident reports, employee records, resident's grievances and complaints and record of resident funds and valuables shall be kept in the family home and shall be available to the director or his authorized representative.

History: 1954 ACS 82, p. 42, Eff. Feb. 1, 1975.

R 400.2252 Resident records.

Rule 252. (1) An individual resident record shall be provided for each resident in the family home.

(2) It is the shared responsibility of the family home licensee and the responsible agency to assure that a current resident record is maintained and that all entries are dated and signed.

(3) A resident record shall include at least the following information:

(a) Identifying information including name, social security number, agency case number, veteran status and number, marital status, age, sex, and home address. Also, religious preference, insurance information, and burial provisions.

(b) Assessment plan.

(c) Name, address, and telephone number of next of kin or legal guardian.

(d) Name, address, and telephone number of person or placing agency responsible for a resident's maintenance and care in the home.

(e) Date of admission.

(f) Date of discharge and place to which resident was discharged.

(g) Health information, including all health appraisals and statements and instructions for administering prescribed medication.

(h) The name and address of the preferred physician and hospital and instructions for emergency care.

(i) Information available from the resident about insurance policies and prearranged funeral arrangements.

History: 1954 ACS 82, p. 42, Eff. Feb. 1, 1975.

R 400.2253 Resident register.

Rule 253. A chronological register of residents shall be maintained and include the following information for each resident: Date of admission, date of discharge and place to which a resident was discharged, including date and location for temporary absences.

History: 1954 ACS 82, p. 42, Eff. Feb. 1, 1975.

R 400.2254 Accident records and incident reports.

Rule 254. An accident record or incident report shall be prepared for each accident to a resident, family, staff member or visitor. Incident means seizures or highly unusual behavior episodes including extended periods of absence without prior notice. An accident record or incident report shall include the following information:

(a) Name of person involved in accident or incident.

(b) Date, hour, place, and cause of accident or incident.

(c) Effect of accident or incident on person involved and care given.

(d) Name of physician notified and time of notification.

(e) Physician's statement regarding extent of injuries, treatment ordered, and disposition of person involved.

(f) Corrective measures taken to avoid repetition of accident or incident.

History: 1954 ACS 82, p. 42, Eff. Feb. 1, 1975.

R 400.2255 Employee records.

Rule 255. Employee records are required for permanent full-time and permanent part-time employees only. The records shall include evidence of employee's health and qualifications for work assigned or performed which directly relate to resident care.

History: 1954 ACS 82, p. 42, Eff. Feb. 1, 1975.

R 400.2256 Residents' grievances and complaint record.

Rule 256. A resident's grievances and complaint record shall be maintained which shall include copies of all residents' grievances or complaints filed in chronological order. The report shall include the nature of the complaint, the date of the complaint and a statement indicating how the issue was resolved.

History: 1954 ACS 82, p. 43, Eff. Feb. 1, 1975.

R 400.2257 Resident funds and valuables.

Rule 257. The residents' funds and valuables record shall indicate the date and *receipt number* of all deposits and dispersals, and the amount and description of *monies*, valuables, or both, given for safekeeping for each resident. It shall also

include any written authorization by the resident for charges made by the family home to the fund.

History: 1954 ACS 82, p. 43, Eff. Feb. 1, 1975.

R 400.2261 Emergency preparedness.

Rule 261. (1) A family home shall have a telephone. A family home shall have a written procedure to be followed in the case of fire or medical emergency. Responsible foster family members or employees shall be familiar with emergency planning and their responsibilities. Responsible persons shall be capable of using the telephone to summon appropriate assistance and carry out an evacuation plan.

(2) An emergency plan shall specify persons to be notified, locations of alarm signals and fire extinguishers, evacuation routes, procedures for evacuating residents of limited mobility and visitors, and provide for at least 4 fire drills per year. Emergency telephone numbers shall be immediately available.

(3) Residents, insofar as possible, adult members of the foster family and responsible persons shall be familiar with emergency procedures.

History: 1954 ACS 82, p. 43, Eff. Feb. 1, 1975.

R 400.2271 Quality of meals.

Rule 271. (1) A minimum of 3 regular, nutritious, attractively prepared meals shall be provided daily. Not more than 15 hours shall elapse between the evening and morning meal. Meals shall be of proper form, consistency and temperature. Meals shall meet the general requirements for nutrition published by the department or currently found in the recommended daily dietary allowances, food and nutrition board, national academy of science.

(2) Special diets shall be prescribed only by a physician.

History: 1954 ACS 82, p. 43, Eff. Feb. 1, 1975.

R 400.2272 Food service.

Rule 272. (1) All perishable foods shall be stored at such temperatures as will protect against spoilage.

(2) All foods while being stored, prepared, or served shall be protected against contamination and be safe for human consumption.

History: 1954 ACS 82, p. 43, Eff. Feb. 1, 1975.

R 400.2273 Equipment.

Rule 273. A family home shall be equipped properly to prepare and serve adequate meals.

PART 3. GROUP HOMES

R 400.2301 Scope.

Rule 301. This part applies only to group homes.

History: 1954 ACS 82, p. 44, Eff. Feb. 1, 1975.

R 400.2302 Licensees and administrators.

Rule 302. (1) Care provided by a group home shall be based on a foster care agreement between the group home and the responsible agency or person requesting care. The agreement shall specify that it is the responsibility of the agency or person requesting care to provide all necessary intake information; to provide other required information; to provide initial, ongoing and discharge assessment planning; preparation for discharge; social services and assistance in obtaining all necessary care which may be needed by the resident. A copy of the agreement shall be maintained in the home. Where the agreement is not with the department, a copy shall be filed with the department for its review and approval.

(2) A licensee or a governing body may appoint an administrator to operate a group home.

(3) An administrator, all staff participating in resident care and staff who are designated as responsible persons or acting in such capacity shall be at least 18 years of age, be of good moral character, in good health and by training and experience be capable of meeting the demands of the position.

(4) A licensee or an administrator shall designate in writing a responsible person to carry out his responsibilities and duties in his absence.

(5) A licensee or an administrator shall be willing to cooperate fully with the resident, his own family and responsible relatives and the supervising agency.

History: 1954 ACS 82, p. 44, Eff. Feb. 1, 1975.

R 400.2303 Admission and discharge.

Rule 303. (1) A group home shall have a written admission policy which shall be posted in a conspicuous public area of the group home. The department's assistance in establishing the policy is available upon request of a licensee.

(2) A prospective resident or his guardian, if the prospective resident is legally incompetent, shall exercise free choice in the selection of a group home. The department shall determine if the group home is capable of meeting an individual's needs.

(3) A person shall not be denied admission or discharged from a group home because of race, religion, color or national origin.

(4) A group home shall not accept or keep a person whose behavior requires isolation or restraint nor admit a person whose present care requirements and service needs are incompatible with those of other residents in the group home. This subrule shall not be used to circumvent subrule (3).

(5) An admission prerequisite for persons transferring from another residential setting, nursing home or medical institution is a current written assessment plan outlining the specific service appropriate to the resident's needs and the method of providing the service. With a resident's consent an individual not having a responsible agency shall have an assessment plan completed by department workers and filed in the resident's record at the group home within 30 days after admission to the group home.

(6) Upon admission a resident's record shall contain information obtained from a resident, his next of kin or legal guardian, or responsible agency indicating persons to be notified of an emergency, and the preferred physician or hospital and instructions for emergency care.

(7) An individual admitted shall have had a health appraisal completed within the previous 90 days or in emergency admissions shall obtain the appraisal within 30 days of admission.

(8) A group home shall report all new admissions and discharges to the department in a manner prescribed by the department.

(9) A resident shall not be discharged from a group home without adequate preparation, including a determination that a move is in the resident's best interest. At the time of discharge the responsible agency or the department shall update the assessment plan to provide for continuity in achieving objectives. A group home shall record the date of discharge, the reason for discharge, the disposition of money and valuables held for safekeeping and a forwarding address of the resident or a relative, guardian or other adult. The foregoing does not restrict the resident's ability to make his own living arrangement.

(10) The express wishes of the resident shall be considered in all movements to and from a group home.

(11) A bedfast person or one requiring continuous and constant professional nursing care shall not be accommodated in a group home. This does not preclude the accommodation of a resident who is temporarily ill and bedfast but does not require professional nursing.

History: 1954 ACS 82, p. 44, Eff. Feb. 1, 1975.

R 400.2304 Illnesses and accidents.

Rule 304. (1) In case of an accident or sudden adverse change in a resident's physical condition or adjustment, a group home shall obtain needed care immediately and notify the responsible relative and the person or agency responsible for placing and maintaining the resident in the group home.

(2) An occurrence of a reportable communicable disease as defined by the laws of this state or the rules implementing such laws shall be reported immediately to the local health department and the department.

(3) Immediate investigation of the cause of an accident or incident involving a resident, employee or visitor shall be initiated by a group home licensee or

administrator and an appropriate accident record or incident report completed and maintained. Within 72 hours, serious accidents requiring medical attention shall be reported to the department for remedial review.

History: 1954 ACS 82, p. 45, Eff. Feb. 1, 1975.

R 400.2305 Deaths of residents.

Rule 305. When a resident dies, a group home licensee or administrator shall notify immediately the resident's physician, the next of kin or legal guardian and the person or agency responsible for placing and maintaining the resident in the group home. Statutes applicable to the reporting of sudden or unexpected death shall be observed. The death shall be reported to the department within 72 hours.

History: 1954 ACS 82, p. 45, Eff. Feb. 1, 1975.

R 400.2306 Personnel policies and health supervision.

Rule 306. (1) Written personnel policies, practices, job descriptions, and procedures shall be made available to all employees and volunteers. Work assignments shall be consistent with job descriptions and the level of training and experience of the employee or volunteers.

(2) An employee involved in food preparation or kitchen cleanup activities or who comes in contact with residents, as a preemployment requirement, shall be certified by a physician to be free from communicable diseases required to be reported by the laws of this state or by the rules promulgated under such laws. Periodically the licensee or administrator shall review with an employee his present state of health.

History: 1954 ACS 82, p. 45, Eff. Feb. 1, 1975.

R 400.2307 Staffing.

Rule 307. (1) The ratio of staff to residents shall be adequate to carry out responsibilities defined in the act and in these rules and staff ratios shall conform with requirements set by the department following study by the department and advice from the council.

(2) Group homes operating other than a general habilitative and activities program shall employ personnel with special and appropriate skills or have formal agreements with other agencies or persons whereby services are made available to the group home according to resident need.

(3) A staff or a responsible person shall be on the premises during sleeping hours although the person need not be awake and dressed.

(4) Personnel shall wear clean garments, maintain a high degree of personal cleanliness, and conform to acceptable hygienic practices while on duty.

History: 1954 ACS 82, p. 45, Eff. Feb. 1, 1975.

R 400.2311 Services for residents.

Rule 311. A group home shall provide services for the habilitation of its residents. In addition to transportation and basic self-care and habilitation training, group homes shall provide or cause to be provided all of the following program elements which are essential for the habilitation of their residents. A program element other than basic self-care and habilitation training shall not be provided on the premises without department approval when it is available in the community:

(a) Basic self-care and habilitation training is a service to teach and reinforce *skills in dressing*, grooming, eating, bathing, toileting, and following of simple *directions*

(b) Social education training is a service which covers areas of training inclusive of recreational participation such as group programs, community entertainment and recreational facilities utilization. Social graces and acceptable public behavior are covered in this area as are leisure time use and skills.

(c) Tutorial and special skills training is a service typically providing 1 to 1 training in an area. Services include basic self-care training, mobility training or advanced skills. The service provider may be at a fixed location or may come to the home to provide the service.

(d) Adult activity day care or day training is an activity and training service including basic self-care skills, activities of daily living, utilization of community resources, hazard training, individual and group programs of therapy and education, recreational programs, field trips, skills maintenance and special training. Objectives range from the maintenance of a participant in the community to the development of pre-vocational skills to permit placement in a sheltered workshop setting.

(e) Work activity is a work activity service provided in a protective setting in a day program to serve a retarded or mentally ill adult. Activities are divided between development of pre-vocational skills by producing a product in a structured work setting and providing basic social activities of daily living training. The major focus shall be on work skills for which reimbursement from products sold or from contracts may be provided.

(f) Sheltered workshop is a service in a certified protective workshop setting which includes special vocational training, job evaluation and rehabilitation planning with a definite objective of placement in gainful employment, sheltered or independent. Certification includes proper wage deviation permits from the department of labor and approvals as appropriate from the division of vocational rehabilitation.

(g) Personal adjustment is a service for a person with psychiatric, emotional, behavioral or developmental problems and includes counseling and individual or group therapy as well as diagnostic evaluation. It also includes utilization of appropriate batteries of psychological testing material and related counseling to assist in classification and determination of readiness for movement or maintenance in the community.

(h) Transportation means vehicle travel by public and private carrier and related cost to and from program resources in the community including consultation, medical and other services. This includes escort between screening and entry programs.

(i) Health services include pharmaceutical, medical, or dental services provided directly or through contractual agreement.

History: 1954 ACS 82, p. 46, Eff. Feb. 1, 1975.

R 400.2312 Care of residents.

Rule 312. (1) A staff member or a responsible person shall always be present when a resident is in the group home.

(2) Residents shall be assured privacy and protection from moral, social, and financial exploitation.

(3) All work performed by a resident shall be in accordance with the assessment plan.

(4) A resident shall be treated with dignity, and his personal needs, including protection and safety, shall be attended to at all times.

History: 1954 ACS 82, p. 46, Eff. Feb. 1, 1975.

R 400.2313 Residents; personal care.

Rule 313. (1) A group home shall provide care and maintenance to its residents including either or both personal care and supervision as appropriate. Supervision means guidance of an individual as he carries out activities of daily living, including reminding a resident to maintain his medication schedule as directed by his physician, reminding him of important activities to be carried out, assisting him in keeping appointments and being aware of his general whereabouts even though he may travel independently about the community. Personal care means continuous attendance by a responsible person to render personal assistance with dressing, personal hygiene, grooming and maintenance of medication schedule as directed and supervised by the individual's physician and being aware of the individual's specific whereabouts at all times, including his presence in outside activities. Specifically, personal care shall include, as required, care of the skin, mouth, teeth, hands, feet, eyes and hair.

(2) A resident shall receive a bath or shower weekly and be afforded the opportunity for daily bathing.

(3) A resident shall be offered facilities for shaving daily.

(4) A resident shall be afforded opportunities to obtain haircuts, hairsets, or other hair grooming processes.

(5) A resident shall be afforded the opportunity, encouraged and instructed to dress as fashion, cleanliness, and the season warrants.

(6) A resident shall be given assistance or trained in the use of prosthesis as appropriate.

(7) A resident's dignity and privacy shall be respected in all areas. Female residents requiring assistance in activities such as dressing, bathing, and personal hygiene shall be assisted by or in the presence of another female.

History: 1954 ACS 82, p. 47, Eff. Feb. 1, 1975.

R 400.2314 Complaints.

Rule 314. A resident shall be afforded a means of presenting grievances to the group home licensee or administrator. If the area of concern is with the responsible agency, refer to R 400.2119.

History: 1954 ACS 82, p. 47, Eff. Feb. 1, 1975.

R 400.2315 Health care of residents.

Rule 315. (1) A resident shall have a health appraisal at least annually which contains specific recommendations for care, maintenance, treatment or special programs and shall reflect the resident's progress in meeting scheduled objectives.

(2) A resident who in the recent past has been a patient in an institution shall have on file in his individual record a statement of his medical and health history and his medical and health needs.

(3) The weight of each resident shall be recorded upon admission and a monthly record of the weight of each resident shall be maintained.

(4) All prescription medication shall be prescribed by a licensed physician. Medication shall be administered and safeguarded in accordance with the instructions of a resident's physician.

History: 1954 ACS 82, p. 47, Eff. Feb. 1, 1975.

R 400.2316 Prohibited practices.

Rule 316. A group home licensee or administrator shall not establish or practice policies of physical restraint, isolation, corporal punishment, personal humiliation, *or withholding* of food, water, or clothing.

History: 1954 ACS 82, p. 47, Eff. Feb. 1, 1975.

R 400.2317 Assessment plan.

Rule 317. Care, maintenance, and services shall be provided according to an assessment plan. Components of a plan shall include at least:

(a) Specific objectives of maximum self-care and independence appropriate for each resident.

(b) Health appraisal, including medical-dental and, where appropriate, other evaluations by health professionals and prescribed treatment.

(c) Care and maintenance requirement.

(d) Specific services and planning needed to obtain objectives.

(e) Work activities.

(f) Religious activities.

(g) Restrictions or exceptions to the requirements of resident care which are individually set and allowable under licensing rule.

(h) Payment planning related to the care and services to be obtained by the resident.

History: 1954 ACS 82, p. 47, Eff. Feb. 1, 1975.

R 400.2318 Resident activities.

Rule 318. (1) A resident shall have access to the use of the United States mails; he may write and send mail at his own expense without censorship and receive mail addressed to him unopened.

(2) A resident shall have daily, private access and use of a telephone for local calls. Similar access is to be granted for long distance calls which are made collect or for which charges are otherwise met by the resident. When pay telephones are provided in group homes, a reasonable amount of change shall be available in the group home to enable residents to make change for telephoning purposes.

(3) A resident shall have immediate access to and use of his personal clothing and personal belongings which he usually or habitually carries on his person or uses as a matter of identification, grooming, toilet, prosthesis, hygiene, communication, religious observance, personal adornment, personal entertainment, study or personal enhancement.

(4) A resident shall be provided with storage space for his immediate and private use.

(5) A group home shall facilitate family relationships by its routine and personnel attitude. Restrictive visiting hours shall not be maintained and residents shall be allowed to receive reasonable numbers of visitors at any reasonable time. Exceptions shall be covered in the assessment plan. Special consideration shall be given to visitors coming from out of town or whose hours of employment warrant deviation from usual visiting hours.

(6) A resident who is capable shall have the opportunity of doing his own shopping for his personal needs in the nearest community.

(7) A resident shall be afforded appropriate recreational experiences and opportunities within and outside the group home.

(8) A resident shall be permitted to practice the religious belief of his choice free of any coercion, and be allowed religious ministration at reasonable hours. Religious practice shall not be required of any resident.

(9) An adult shall not be denied admission to, or be discharged from, a group home because of race, religion, color, or national origin. The individual, or in the case of the legally incompetent his guardian, shall exercise free choice in the selection of a group home if it is capable of meeting the individual's needs.

(10) Any exception to resident activities shall be noted in the assessment plan.

History: 1954 ACS 82, p. 48, Eff. Feb. 1, 1975.

R 400.2321 Residents' funds; access; safekeeping.

Rule 321. (1) A resident shall have access to and use of personal funds belonging to him in reasonable amounts, including immediate access to at least $5.00 of his personal funds. Exceptions shall be subject to provisions of the assessment plan.

(2) The maximum value of money and valuables a group home shall accept for safekeeping shall not exceed the amount of $400.00 per resident.

(3) Residents' funds shall be kept separate and apart from all funds and monies of the licensee and treated as a trust obligation of the licensee.

History: 1954 ACS 82, p. 48, Eff. Feb. 1, 1975.

R 400.2322 Accounting of residents' funds.

Rule 322. (1) A resident's funds are subject at all times to a full and prompt accounting to the resident. Funds shall be considered promptly accounted for when the following conditions have been observed:

(a) A resident receives on request an itemized monthly statement of all charges against funds held in trust which shall be in such form as reasonably to inform the resident of the nature of the charge for goods or services and the amount thereof. A copy of the itemized statement shall be filed in the resident's record.

(b) A resident receives up to his full amount of personal funds at a time designated by the resident but no later than 5 days following the request subject to limitations in the resident's assessment plan.

(c) The charges against the resident's fund account bear a reasonable relationship to value or agreed price for the services rendered and goods furnished or made available to the resident.

(2) A resident who is discharged from a group home shall receive an itemized statement of his personal funds and prompt and reasonable payment of funds remaining in his account at the time of discharge but no later than 5 banking days after discharge.

History: 1954 ACS 82, p. 48, Eff. Feb. 1, 1975.

R 400.2323 Charges against residents' funds.

Rule 323. A resident, or in the case of a mentally handicapped resident, the responsible agency, legal guardian, person or relative responsible for maintaining him, shall be given prior written notice and approval obtained before charges are made against his account. A copy of the authorization shall be maintained in the resident's record.

History: 1954 ACS 82, p. 49, Eff. Feb. 1, 1975.

R 400.2324 Transactions prohibited; review.

Rule 324. (1) A group home licensee or a member of his family, or group home staff, shall not borrow money or valuables from a resident with or without his consent.

(2) Transactions between a resident and a group home shall be subject to review by the department where it is alleged by a resident or his representative that the group home did not comply with any rule pertaining to trust funds. Department review does not preclude any other legal remedy a resident or his representative may have.

History: 1954 ACS 82, p. 49, Eff. Feb. 1, 1975.

R 400.2331 Home environment.

Rule 331. (1) A group home shall be so constructed, arranged and maintained as to provide adequately for the health, safety and well-being of occupants.

Digitized by Google Original from UNIVERSITY OF MICHIGAN

Generated for Susan K Kendall (Michigan State University) on 2018-09-05 16:48 GMT / http://hdl.handle.net/2027/mdp.49015002898253

(2) Furnishings and housekeeping standards shall be such that a group home presents a comfortable, clean and orderly appearance.

(3) All occupied rooms shall be of standard lath and plaster construction or equivalent.

(4) The atmosphere and routine of the group home shall be such that a resident may spend the majority of his nonsleeping hours out of his bedroom.

(5) Dining, bath, sitting, living and recreation rooms shall be maintained by an adequate central heating system or its equivalent at a temperature range of 68-72 degrees Fahrenheit during nonsleeping hours.

(6) A group home shall make adequate provision for laundering personal laundry.

(7) A group home shall be equipped to provide an adequate amount of hot water for a resident's use between the temperature range of 110-120 degrees Fahrenheit at the fixture.

(8) A toilet, lavatory and bathing or showering facility shall be provided for each 8 adults in a group home including live-in staff and residents. At least 1 toilet and lavatory shall be provided on each floor having residents' bedrooms.

(9) Bathrooms and toilet facilities without windows shall have forced ventilation to the outside. Bathroom windows used for ventilation shall open easily.

(10) Toilets, bathtubs, and showers shall provide for individual privacy.

(11) Floors, walls, and ceilings shall be finished so as to be easily cleanable, and shall be kept clean and in good repair.

History: 1954 ACS 82, p. 49, Eff. Feb. 1, 1975.

R 400.2332 Living areas.

Rule 332. (1) A group home shall provide distinct living and sleeping areas. All areas shall be well lighted, heated, and ventilated.

(2) A group home shall provide 1 or more attractively furnished multi-purpose areas of adequate size for training, recreational, family style dining and other diversional and social activities.

(3) The living and sleeping areas for a given resident shall not be in non-contiguous wings, units, or buildings.

(4) A living room, dining room or other room not ordinarily used for sleeping shall not be used for sleeping by residents or family or staff members.

(5) Traffic to and from any room shall not be through a resident's bedroom.

History: 1954 ACS 82, p. 49, Eff. Feb. 1, 1975.

R 400.2333 Bedrooms.

Rule 333. (1) A room shall not be used as a bedroom where more than ½ the room height is below grade except where the ceiling of such portion of a building is located 5 feet or more above grade for more than 25% of the perimeter measurement of the building. Such acceptable bedrooms shall be provided 2 acceptable means of egress.

(2) Bedrooms for residents shall be separated from halls, corridors and other rooms by floor to ceiling walls containing no openings except doorways.

(3) Interior doorways of bedrooms occupied by residents shall be equipped with a side-hinged permanently mounted door equipped with positively latching hardware which will insure opening of the door by a single motion, such as turning a knob or by pressing with normal strength on a latch.

(4) Residents of opposite sex shall not occupy the same bedroom unless they are husband and wife.

(5) Residents having impaired mobility shall not sleep in or be assigned bedrooms located above the first or main floor.

(6) Bedrooms shall have at least 1 window. Bedrooms shall be well ventilated and maintained at a comfortable temperature.

(7) A single occupancy bedroom shall have at least 80 square feet of usable floor space (70 square feet for existing facilities). Usable floor space is defined as that floor space under a ceiling at least 6 feet 6 inches in height.

(8) A multi-occupancy bedroom shall have at least 70 square feet of usable floor space per bed (65 square feet for existing facilities) with a maximum of 4 beds per bedroom. Usable floor space is defined as that floor space under a ceiling at least 6 feet 6 inches in height.

(9) There shall be at least a 3-foot clearance between beds in a multi-occupancy bedroom.

(10) Roll-a-ways, cots, double deck, stacked bunks, hide-a-beds, day beds and studio couches are prohibited.

(11) Provision shall be made for a resident to mount or hang pictures on bedroom walls.

(12) A resident bedroom shall be equipped with a mirror appropriate for grooming.

(13) Bedroom furnishings shall include an adequate closet or wardrobe, lighting sufficient for reading and other resident activities, bureau or dresser or equivalent and at least 1 chair with arms in each bedroom for every 2 residents.

History: 1954 ACS 82, p. 49, Eff. Feb. 1, 1975.

R 400.2334 Bedding and linen.

Rule 334. (1) A group home shall provide an individual bed at least 36 inches wide and 72 inches long with comfortable springs in good condition, a clean protected mattress not less than 5 inches thick or 4 inches if of a synthetic construction and a pillow.

(2) A group home shall provide bedding which includes 2 sheets, a pillow case, a minimum of 1 blanket and a bedspread. A group home shall maintain a linen supply for twice the number of beds in it. A group home shall provide towels and washcloths which shall be changed at least twice weekly and more often if soiled. Bed linen shall be changed at least weekly and more often if soiled.

History: 1954 ACS 82, p. 50, Eff. Feb. 1, 1975.

R 400.2341 Fire safety.

Rule 341. (1) A group home shall be inspected and approved for fire safety prior to the accommodation of residents and at least annually, except that existing group homes shall not be required to remove residents for the purpose of the initial fire inspection. To meet these requirements, carpeting shall have been tested under criteria outlined in NFPA 255, ASTM E-84 or UL-723 and have a flame spread of no more than 75 and smoke development of no more than 200.

(2) A group home shall be at least of ordinary construction, light platform frame. It shall have "C" interior finish or better.

(3) A complete set of plans and specifications for any modification or addition to a group home shall be submitted to the department of social services, adult foster care facilities licensing division, for review and consultation. Approval for *any modifications* shall be contingent upon conformity to these rules.

R 400.2342 Interior finishes and materials.

Rule 342. (1) The alphabetical classification of finish materials is for flame spread, fuel contribution and smoke development as determined by the tunnel test in accordance with NFPA 255-1972, ASTM-E-84-1968, or UL-723-1971 and grouped as follows:

Class	Flame Spread	Fuel Contributed	Smoke Developed
A	0- 25	0- 35	0- 50
B	26- 75	36- 75	51-125
C	76-200	76-200	126-200

(2) The same alphabetical classification is used for combustibility of prefabricated acoustical tile units only, under federal specifications SS-A-118B-1958.

(3) The documents referred to in the previous subrules may be purchased from NFPA 255-1972, the National Fire Protection Association, 60 Batterymarch Street, Boston, Massachusetts 02110, at the cost of $1.00, UL-723-1960 from Underwriters' Laboratories Incorporated, 207 East Ohio Street, Chicago, Illinois 60611, at a cost of $1.00 and SS-A-118B-1958 which may be purchased from Specifications Sales (3FRSBS) Building, 197 Washington Navy Yard, General Services Administration, Washington, D.C. 20407, at a cost of 10 cents.

(4) In new construction, additions, and conversions, interior finish classification shall be that of the basic material used without regard to subsequently applied paint or other covering in an attempt to meet the classification. Such basic material shall be minimum class B in means of egress and minimum class C in other areas.

(5) Paper, cardboard, asphalt paper, or other highly flammable material shall not be used for the interior finish of a group home.

(6) Group homes accommodating thirteen or more residents shall have a complete, 100% coverage, underwriters' laboratories approved automatic fire detection system, including at least one manual pull station per floor level and basement, except in group homes protected completely with an approved automatic sprinkler system. A fire alarm detection system shall be a closed circuit, self-supervised, continuous ringing system.

History: 1954 ACS 82, p. 50, Eff. Feb. 1, 1975.

R 400.2343 Exits.

Rule 343. (1) A means of egress shall be considered the entire way and method of passage to free and safe ground outside a group home. Means of egress shall be maintained in unobstructed, easily traveled condition at all times. Where basements are regularly utilized for resident activities, there shall be 2 acceptable means of egress. Doors which form a part of a required means of egress shall be equipped with positive latching, nonlocking against egress type hardware and shall be at least 36 inches in width in new construction, and at least 30 inches in width in existing facilities, and insure adequate egress for residents requiring wheelchairs, including ramps where necessary.

(2) The first floor of a group home shall have at least 2 separate and independent means of egress leading to the outside. Where basements are regularly utilized for resident activities, there shall be 2 acceptable means of egress.

(3) In new group homes, rooms which are used by residents for any purpose and located above the first or main floor shall have access to 2 independent stairs,

Open Access, Google-digitized / http://www.hathitrust.org/access_use#oa-google

which are separated by a distance of at least 50% of the largest dimension of the floor, and shall be through stairs enclosed with 1-hour fire resistant material which exit directly to the outside at grade level.

In existing group homes housing fewer than 13 residents, the second stairway is not required; however, the primary stair shall be enclosed with partitions and doors equal in fire resistance to the standard partition construction of the building. Such stairway doors shall be equipped with closing devices and latching nonlocking hardware. The enclosures shall be so constructed and arranged that effective fire and smoke separations between floors is provided or each resident bedroom on the second floor or above shall be equipped with a minimum 1¾-inch solid core wood door.

In existing group homes housing 13 through 20 residents, at least 1 means of egress from each floor shall be directly to the outside or shall be through an enclosed stairway properly separated from exposure from floor below and which exits directly to the outside at grade level.

The required second means of egress shall be enclosed with partitions and doors equal in fire resistance to the standard partition construction of the building. The enclosures shall be so constructed and arranged that effective fire and smoke separations between floors is provided.

(4) New and existing group homes accommodating residents who regularly require wheelchairs shall be equipped with ramps located at primary and secondary means of egress. A ramp shall not exceed 1 foot of rise in 12 feet of run.

(5) In existing group homes, stairway and other vertical openings shall be enclosed with partitions and doors equal in fire resistance to the standard partition construction of the building, if the partition construction is of standard lath and plaster type or equivalent as a minimum. Enclosures shall be so constructed and arranged that effective fire and smoke separations between floors will be effected or each resident bedroom on the second floor or above shall be equipped with a minimum 1¾-inch solid core wood door.

(6) In all new or remodeled group homes, corridors shall lead directly to the outside or to required stairways having egress directly outside at grade level.

(7) Occupied room hardware shall be positive latching, nonlocking against egress in both new and existing facilities. In all facilities housing more than 6 residents, exterior doors shall swing in the direction of egress and be equipped with nonlatching against egress type hardware.

History: 1954 ACS 82, p. 51, Eff. Feb. 1, 1975.

R 400.2344 Heating.

Rule 344. (1) Except as provided herein, occupancies shall be heated by an approved heating plant. If the heating plant is located in the basement of a group home, standard building material shall suffice for the separation which shall include at least 1¾-inch solid wood core door or equivalent to create a floor separation between the basement and the first floor. If the heating plant is on the same level with the residents, the furnace room shall be separated from the remainder of building with materials that will afford a minimum 1-hour protection enclosure. A permanent outside vent which cannot be closed shall be incorporated in the design of heating plant rooms so that adequate air for proper combustion is assured. Space heaters are prohibited.

(2) Factory mutual and underwriters' laboratories approved permanent, fixed-type electrical heating such as recognized panel or baseboard fixed-type may be utilized in any location. In existing homes where an American gas association approved sealed combustion wall heater has been installed in accordance with

both the AGA and the manufacturer's recommendations, approval will be given if the unit is located on an outside wall, obtains combustion air directly from the outside and vents products of combustion directly to the outside.

(3) Flame-producing water heaters or incinerators shall be installed with the same protection as a heating plant.

(4) Storage of combustible materials is prohibited in rooms containing the heating plant, water heater or incinerator.

History: 1954 ACS 82, p. 52, Eff. Feb. 1, 1975.

R 400.2345 Fire extinguishers.

Rule 345. A minimum of one 5-pound multi-purpose fire extinguisher, or equivalent, shall be provided for use in a group home, on each occupied floor and in the basement.

History: 1954 ACS 82, p. 52, Eff. Feb. 1, 1975.

R 400.2346 Electrical service.

Rule 346. Electrical service shall be maintained in a safe condition. Where conditions indicate a need for inspection, and on all new or remodeled projects, the electrical service shall be inspected by a qualified electrical inspection service and a copy of the inspection report shall be submitted to the department or its agents.

History: 1954 ACS 82, p. 52, Eff. Feb. 1, 1975.

R 400.2347 Safety generally.

Rule 347. (1) Stairways shall have sturdy and securely fastened handrails not less than 30 inches nor more than 34 inches above the upper surface of the tread. Exterior stairways and porches shall have handrails on the open sides.

(2) Scatter or throw rugs on hard finished floors shall have a nonskid backing.

(3) Handrails and nonskid surfacing or strips shall be installed in showers and bath areas.

(4) Sidewalks, fire escape routes and entrances shall be kept free of any hazards such as ice, snow and debris.

(5) Cooking appliances shall be suitably installed in accordance with approved safety practices. Where metal hoods or canopies are provided, they shall be equipped with filters which shall be maintained in an efficient condition and kept clean at all times.

(6) A yard area shall be kept free from all hazards, nuisances, refuse and litter.

History: 1954 ACS 82, p. 52, Eff. Feb. 1, 1975.

R 400.2348 Water and sanitation.

Rule 348. (1) Private water systems shall meet the department of public health rules, "Regulations for Certain Water Supplies in Michigan" available from the Department of Public Health, 3500 North Logan, Lansing, 48915. A bacteriological report confirming water quality shall be required during initial inspection and every 2 years thereafter. Group homes using a community approved water system need not comply with this requirement.

(2) Sewage disposal systems shall meet the requirements of the state department of public health.

(3) Kitchen and bathroom areas shall be maintained to insure cleanliness and sanitation so as to protect health.

(4) Waste which is not disposed of by mechanical means shall be kept in leakproof, nonabsorbent containers with close-fitting covers for garbage, refuse

and other solid waste. Waste shall be removed from the kitchen daily and from the premises at least weekly.

(5) Hand washing facilities provided in both kitchen and bathroom areas shall include hot and cold water, soap and individual towels, preferably of paper.

(6) An insect, rodent or pest-control program shall be maintained as necessary, and carried out in a manner which continually protects the health of residents. Poisons, caustics and other dangerous materials shall be stored and safeguarded in nonresident areas and in nonfood preparation storage areas.

(7) Open windows shall be screened May through October.

(8) When a resident is discharged, his room and its contents shall be thoroughly cleaned. Blankets and spreads shall be sanitized.

History: 1954 ACS 82, p. 52, Eff. Feb. 1, 1975.

R 400.2351 Records generally.

Rule 351. Resident records, a resident register, accident records and incident reports, residents' grievances and complaints, employee records, employee work schedules and record of resident funds and valuables shall be kept in the group home and shall be available to the director or his authorized representative.

History: 1954 ACS 82, p. 53, Eff. Feb. 1, 1975.

R 400.2352 Resident records.

Rule 352. (1) An individual resident record shall be provided for each resident in the group home.

(2) It shall be the shared responsibility of the group home licensee and the responsible agency to assure that a current resident record is maintained and that all entries are dated and signed.

(3) A resident record shall include the following information:

(a) Identifying information including name, social security number, agency case number, veteran status and number, marital status, age, sex, and home address. Also, religious preference, insurance information, and burial provisions.

(b) Assessment plan.

(c) Name, address, and telephone number of next of kin or legal guardian.

(d) Name, address, and telephone number of person or placing agency responsible for resident's maintenance and care in the group home.

(e) Date of admission.

(f) Date of discharge and place to which resident was discharged.

(g) Health information including all health appraisals and statements and instructions for administering prescribed medication.

(h) The name and address of the preferred physician and hospital and instructions for emergency care.

(i) Information available from the resident about insurance policies and prearranged funeral arrangements.

History: 1954 ACS 82, p. 53, Eff. Feb. 1, 1975.

R 400.2353 Resident register.

Rule 353. A chronological register of residents shall be maintained and include the following information for each resident: Date of admission, date of discharge, and place to which resident was discharged, including date and location for temporary absences.

History: 1954 ACS 82, p. 53, Eff. Feb. 1, 1975.

R 400.2354 Accident records and incident reports.

Rule 354. An accident record or incident report shall be prepared for each accident or incident involving a resident, staff member or visitor. Incident means seizures or highly unusual behavior episodes including periods of absence without prior notice. An accident record or incident report shall include the following information:

(a) Name of person involved in accident or incident.
(b) Date, hour, place, and cause of accident or incident.
(c) Effect of accident or incident on person involved and care given.
(d) Name of physician notified and time of notification.
(e) Physician's statement regarding extent of injuries, treatment ordered, and disposition of person involved.
(f) Corrective measures taken to avoid repetition of accident or incident.

History: 1954 ACS 82, p. 53, Eff. Feb. 1, 1975.

R 400.2355 Employee records and schedules.

Rule 355. (1) A record shall be maintained for permanent full-time and permanent part-time employees only and shall include the following:

(a) Name, address, telephone number, and social security number.
(b) License or registration number, if applicable.
(c) Date of birth.
(d) Summary of experience and education (resume).
(e) References.
(f) Beginning date of employment and position for which employed.
(g) Performance evaluation.
(h) Results of annual health certifications.
(i) Periodic health review information.
(j) Date employment ceased and reasons therefor.

(2) A daily work schedule shall be maintained to include the number and type of personnel on duty in the group home. Work schedules shall be kept for 90 days.

History: 1954 ACS 82, p. 54, Eff. Feb. 1, 1975.

R 400.2356 Resident's grievance and complaint record.

Rule 356. A resident grievance and complaint record shall be maintained which shall include copies of all resident grievances or complaints filed in chronological order. The report shall include the nature of the complaint, the date of the complaint, and a statement indicating how the issue was resolved.

History: 1954 ACS 82, p. 54, Eff. Feb. 1, 1975.

R 400.2357 Resident funds and valuables.

Rule 357. The resident funds and valuables record shall indicate the date and receipt number of all deposits and dispersals, and the amount and description of monies or valuables or both given for safekeeping for each resident. It shall also include any written authorization by the resident for charges made by the group home to the fund.

History: 1954 ACS 82, p. 54, Eff. Feb. 1, 1975.

R 400.2361 Emergency preparedness.

Rule 361. (1) A group home shall have a telephone. A group home shall have a written procedure to be followed in the case of fire or medical emergency. Responsible employees and residents, to the best of their ability, shall be familiar with emergency planning and their responsibilities.

(2) An emergency plan shall specify persons to be notified, locations of alarm signals and fire extinguishers, evacuation routes, procedures for evacuating residents of limited mobility and visitors, and provide for at least 4 fire drills per year.

(3) The emergency plan, including appropriate telephone numbers, shall be prominently posted and made fully known to all residents and responsible persons and be reviewed annually.

(4) Staff shall be trained to perform assigned tasks and be familiar with all fire fighting equipment.

(5) Fire drills shall be conducted quarterly and a record of their performance shall be maintained. Evacuation planning shall include the possibility of night-time movements of patients.

History: 1954 ACS 82, p. 54, Eff. Feb. 1, 1975.

R 400.2371 Quality of meals.

Rule 371. (1) A minimum of 3 regular, nutritious, attractively prepared meals shall be provided daily. Not more than 15 hours shall elapse between the evening and morning meal. Meals shall be of proper form, consistency and temperature. Meals shall meet the general requirements for nutrition published by the department or currently found in the recommended daily dietary allowances, food and nutrition board, national academy of science.

(2) Special diets shall be prescribed only by a physician.

History: 1954 ACS 82, p. 54, Eff. Feb. 1, 1975.

R 400.2372 Food service.

Rule 372. (1) All perishable foods shall be stored at such temperatures as will protect against spoilage.

(2) All foods while being stored, prepared or served shall be protected against contamination and be safe for human consumption.

History: 1954 ACS 82, p. 54, Eff. Feb. 1, 1975.

R 400.2373 Equipment.

Rule 373. A group home shall be equipped properly to prepare and serve adequate meals.

History: 1954 ACS 82, p. 55, Eff. Feb. 1, 1975.

R 400.2374 Meal planning.

Rule 374. (1) Menus shall be written prior to the serving of the meal. Any change or substitution shall be noted and considered as a part of the original menu.

(2) Records of menus as served shall be provided upon request by the department.

History: 1954 ACS 82, p. 55, Eff. Feb. 1, 1975.

R 400.2375 Staff.

Rule 375. A minimum of 1 individual qualified by training, experience, and performance shall be responsible for food preparation. Such additional food service assistance, including relief persons, as necessary for regular and timely meals, shall be employed.

PART 4. CONGREGATE FACILITIES

R 400.2401 Scope.

Rule 401. This part applies only to congregate facilities.

History: 1954 ACS 82, p. 55, Eff. Feb. 1, 1975.

R 400.2402 Licensees and administrators.

Rule 402. (1) Care provided by a congregate facility shall be based on a foster care agreement between the congregate facility and the responsible agency or person requesting care. The agreement shall specify that it is the responsibility of the agency or person requesting care to provide all necessary intake information; to provide other required information; to provide initial and ongoing and discharge assessment planning; preparation for discharge; social services assistance in obtaining all necessary care which may be needed by the resident. A copy of the agreement shall be maintained in the congregate facility. Where the agreement is not with the department, a copy shall be filed with the department for its review and approval.

(2) A licensee or a governing body may appoint an administrator to operate a congregate facility.

(3) An administrator, all staff participating in resident care and staff who are designated as responsible persons or acting in such capacity shall be at least 18 years of age, be of good moral character and reputation, be in good health and by training and experience be capable of meeting the demands of the position.

(4) A licensee or an administrator shall designate in writing a responsible person to carry out his responsibilities and duties in his absence.

(5) A licensee or an administrator shall be willing to cooperate fully with the resident, his own family and responsible relatives and the supervising agency.

History: 1954 ACS 82, p. 55, Eff. Feb. 1, 1975.

R 400.2403 Admission and discharge.

Rule 403. (1) A congregate facility shall have a written admission policy which shall be posted in a conspicuous public area of the facility. The department's assistance in establishing the policy is available upon request of a licensee.

(2) A prospective resident or his guardian, if the prospective resident is legally incompetent, shall exercise free choice in the selection of a foster care congregate facility. The department shall determine if the congregate facility is capable of meeting an individual's needs.

(3) A person shall not be denied admission to or discharged from a congregate facility because of race, religion, color, or national origin.

(4) In administering or managing a congregate facility, a licensee or an administrator shall not accept or keep a person whose behavior requires isolation or restraint. A person shall not be admitted to a congregate facility whose present care requirements and service needs are incompatible with those of other residents in the facility. This subrule shall not be used to circumvent subrule (3).

(5) An admission prerequisite for persons transferring from another residential setting, nursing home, or medical institution is a current written assessment plan outlining the specific service appropriate to the resident's needs and the method of providing the service. With a resident's consent, an individual not having a responsible agency shall have an assessment plan completed by department workers and filed in the resident's record at the congregate facility within 30 days after admission to the congregate facility.

(6) Upon admission a resident's record shall contain information obtained from the resident, his next of kin or legal guardian, or responsible agency indicating persons to be notified of an emergency, including the preferred physician or hospital and instructions for emergency care.

(7) An individual admitted shall have had a health appraisal completed within the previous 90 days or in emergency admissions shall obtain the appraisal within 30 days of admission.

(8) A congregate facility licensee shall report all new admissions and discharges to the department in a manner prescribed by the department.

(9) A resident shall not be discharged from a congregate facility without adequate preparation, including a determination that a move is in a resident's best interest. At the time of discharge the responsible agency or the department of social services shall update the assessment plan to provide for continuity in achieving objectives. A congregate facility shall record the date of discharge, the reason for discharge, the disposition of money and valuables held for safekeeping and a forwarding address of the resident or a relative, guardian or other adult. The foregoing does not restrict the resident's ability to make his own living arrangements.

(10) The express wishes of the resident shall be considered in all movements to and from a congregate facility.

(11) A bedfast person or one requiring continuous and constant professional nursing care shall not be accommodated in a congregate facility. This does not preclude the accommodation of a resident who is temporarily ill and bedfast but who does not require professional nursing.

History: 1954 ACS 82, p. 56, Eff. Feb. 1, 1975.

R 400.2404 Illnesses and accidents.

Rule 404. (1) In case of an accident or sudden adverse change in a resident's physical condition or adjustment, a congregate facility shall obtain needed care

immediately and notify the responsible relative and the person or agency responsible for placing and maintaining the resident in the congregate facility.

(2) An occurrence of a reportable communicable disease as defined by the laws of this state or the rules implementing such laws shall be reported immediately to the local health department and the department.

(3) Immediate investigation of the cause of an accident or incident involving a resident, employee or visitor shall be initiated by a congregate facility licensee or administrator and an appropriate accident record or incident report completed and maintained. Within 72 hours, serious accidents requiring medical attention shall be reported to the department for remedial review.

History: 1954 ACS 82, p. 56, Eff. Feb. 1, 1975.

R 400.2405 Deaths of residents.

Rule 405. When a resident dies, a congregate facility licensee or administrator shall notify immediately the resident's physician, the next of kin or legal guardian and the person or agency responsible for placing and maintaining the resident in the congregate facility. Statutes applicable to the reporting of sudden or unexpected death shall be observed. The death shall be reported to the department within 72 hours.

History: 1954 ACS 82, p. 57, Eff. Feb. 1, 1975.

R 400.2406 Personnel policies and health supervision.

Rule 406. (1) Written personnel policies, practices, job descriptions, and procedures shall be made available to all employees and volunteers. Work assignments shall be consistent with job descriptions and the level of training and experience of the employee or volunteers.

(2) An employee involved in food preparation or kitchen cleanup activities or who comes in contact with residents, as a preemployment requirement, shall be certified by a physician to be free from communicable diseases required to be reported by the laws of this state or by the rules promulgated under such laws. Periodically, the licensee or administrator shall review with each employee his present state of health.

History: 1954 ACS 82, p. 57, Eff. Feb. 1, 1975.

R 400.2407 Staffing.

Rule 407. (1) The ratio of staff to residents shall be adequate to carry out responsibilities defined in the act and in these rules and staff ratios shall conform with requirements set by the department following study by the department and advice from the council.

(2) Congregate facilities operating other than a general habilitative and activities program shall employ a program director and other personnel, as necessary, with special and appropriate skills; or have formal agreements with other agencies or persons whereby services are made available to the congregate facility according to resident need.

(3) A responsible person, capable of immediately responding to emergencies, shall be on the premises of each living unit of a congregate facility during sleeping hours although the person need not be awake and dressed.

(4) Personnel shall wear clean garments, maintain a high degree of personal cleanliness, and conform to acceptable hygienic practices while on duty.

History: 1954 ACS 82, p. 57, Eff. Feb. 1, 1975.

R 400.2411 Services for residents.

Rule 411. A congregate facility shall provide services for the habilitation of its residents. In addition to transportation and basic self-care and habilitation training, congregate facilities shall provide or cause to be provided all of the following program elements which are essential for the habilitation of their residents. Without department approval a program element other than basic self-care and habilitation training shall not be provided on the premises when it is available in the community:

(a) Basic self-care and habilitation training means a service to teach and reinforce skills in dressing, grooming, eating, bathing, toileting, and following of simple directions.

(b) Social education training means a service which covers areas of training inclusive of recreational participation such as group programs, community entertainment and recreational facilities utilization. Social graces and acceptable public behavior are covered in this area as are leisure time use and skills.

(c) Tutorial and special skills training is a service typically providing 1 to 1 training in an area. Services include basic self-care training, mobility training, or advanced skills.

(d) Adult activity, day care or day training, is an activity and training service including basic self-care skills, activities of daily living, utilization of community resources, hazard training, individual and group programs of therapy and education, recreational programs, field trips, skills maintenance, and special training. Objectives range from the maintenance of a participant in the community to the development of prevocational skills to permit placement in a sheltered workshop setting.

(e) Work activity is a work activity service provided in a protective setting in a day program to serve a retarded or mentally ill adult. Activities are divided between development of prevocational skills by producing a product in a structured work setting and providing basic social activities of daily living training. The major focus shall be on work skills for which reimbursement from products sold or from contracts may be provided.

(f) Sheltered workshop is a service in a certified protective workshop setting which includes special vocational training, job evaluation and rehabilitation planning with a definite objective of placement in gainful employment, sheltered or independent. Certification includes proper wage deviation permits from the department of labor and approvals as appropriate from the division of vocational rehabilitation.

(g) Personal adjustment is a service for a person with psychiatric, emotional, behavioral, or developmental problems and includes counseling and individual or group therapy as well as diagnostic evaluation. It also includes utilization of appropriate batteries of psychological testing material and related counseling to assist in classification and determination of readiness for movement or maintenance in the community.

(h) Transportation means vehicle travel by public or private carrier and related cost to and from program resources in the community including consultation, medical and other services. This includes escort between screening and entry programs.

(i) Health services include pharmaceutical, medical, or dental services provided directly or through contractual agreement.

R 400.2412 Care of residents.

Rule 412. (1) A staff member or a responsible person shall always be present when a resident is in the congregate facility or a living unit.

(2) Residents shall be assured privacy and protection from moral, social, and financial exploitation.

(3) All work performed by a resident shall be in accordance with the assessment plan.

(4) A resident shall be treated with dignity, and his personal needs, including protection and safety, shall be attended to at all times.

History: 1954 ACS 82, p. 58, Eff. Feb. 1, 1975.

R 400.2413 Residents; personal care.

Rule 413. (1) A congregate facility shall provide care and maintenance to its residents including either or both personal care and supervision as appropriate. Supervision means guidance of an individual as he carries out activities of daily living, including reminding a resident to maintain his medication schedule as directed by his physician, reminding him of important activities to be carried out, assisting him in keeping appointments and being aware of his general whereabouts even though he may travel independently about the community. Personal care means continuous attendance by a responsible person to render personal assistance with dressing, personal hygiene, grooming and maintenance of medication schedule as directed and supervised by the individual's physician and being aware of the individual's specific whereabouts at all times, including his presence in outside activities. Specifically, personal care shall include, as required, care of the skin, mouth, teeth, hands, feet, eyes, and hair.

(2) A resident shall receive a bath or shower weekly and be afforded the opportunity for daily bathing.

(3) A resident shall be offered facilities for shaving daily.

(4) A resident shall be afforded opportunities to obtain haircuts, hairsets, or other hair grooming processes.

(5) A resident shall be afforded the opportunity, encouraged, and instructed to dress as fashion, cleanliness, and the season warrants.

(6) A resident shall be given assistance or trained in the use of prosthesis as appropriate.

(7) A resident's dignity and privacy shall be respected in all areas. Female residents requiring assistance in activities such as dressing, bathing, and personal hygiene shall be assisted by or in the presence of another female.

History: 1954 ACS 82, p. 58, Eff. Feb. 1, 1975.

R 400.2414 Complaints.

Rule 414. A resident shall be afforded a means of presenting grievances to the congregate facility licensee or administrator. If the area of concern is with the responsible agency, refer to R 400.2119.

History: 1954 ACS 82, p. 58, Eff. Feb. 1, 1975.

R 400.2415 Health care of residents.

Rule 415. (1) A resident shall have a health appraisal at least annually which contains specific recommendations for care, maintenance, treatment, or special programs and shall reflect the resident's progress in meeting scheduled objectives.

(2) A resident who in the recent past has been a patient in an institution shall have on file in his individual record a statement of his medical history and his medical and health needs.

(3) The weight of each resident shall be recorded upon admission and a monthly record of the weight of each resident shall be maintained.

(4) All prescription medication shall be prescribed by a licensed physician. Medication shall be administered and safeguarded in accordance with the instructions of a resident's physician.

History: 1954 ACS 82, p. 59, Eff. Feb. 1, 1975.

R 400.2416 Prohibited practices.

Rule 416. Licensees or administrators shall not establish or practice policies of physical restraint, isolation, corporal punishment, personal humiliation, or withholding of food, water, or clothing.

History: 1954 ACS 82, p. 59, Eff. Feb. 1, 1975.

R 400.2417 Assessment plan.

Rule 417. Care, maintenance, and services shall be provided according to an assessment plan. Components of a plan shall include at least:

(a) Specific objectives of maximum self-care and independence appropriate for each resident.

(b) Health appraisal, including medical-dental and, where appropriate, other evaluations by health professionals and prescribed treatment.

(c) Care and maintenance requirements.

(d) Specific services and planning needed to obtain objectives.

(e) Work activities.

(f) Religious activities.

(g) Restrictions or exceptions to the requirements of resident care which are individually set and allowable under licensing rule.

(h) Payment planning related to the care and services to be obtained by the resident.

History: 1954 ACS 82, p. 59, Eff. Feb. 1, 1975.

R 400.2418 Resident activities.

Rule 418. (1) A resident shall have access to the use of the United States mails; he may write and send mail at his own expense without censorship and receive mail addressed to him unopened.

(2) A resident shall have daily, private access to and use of a telephone for local calls. Similar access is to be granted for long distance calls which are made collect or for which charges are otherwise met by the resident. When pay telephones are provided in congregate facilities, a reasonable amount of change shall be available in the congregate facility to enable residents to make change for telephoning purposes.

(3) A resident shall have immediate access to and use of his personal clothing and personal belongings which he usually or habitually carries on his person or uses as a matter of identification, grooming, toilet, prosthesis, hygiene, communication, religious observance, personal adornment, personal entertainment, study or personal enhancement.

(4) A resident shall be provided with storage space for his immediate and private use.

(5) A congregate facility shall facilitate family relationships by its routine and personnel attitude. Restrictive visiting hours shall not be maintained and residents shall be allowed to receive reasonable numbers of visitors at any reasonable time. *Exceptions* shall be covered in the assessment plan. Special consideration shall be

given to visitors coming from out of town or whose hours of employment warrant deviation from usual visiting hours.

(6) A resident who is capable shall have the opportunity of doing his own shopping for his personal needs in the nearest community.

(7) A resident shall be afforded appropriate recreational experiences and opportunities within and outside the congregate facility.

(8) A resident shall be permitted to practice the religious belief of his choice free of any coercion, and be allowed religious ministration at reasonable hours. Religious practice shall not be required of any resident.

(9) An adult shall not be denied admission to, or be discharged from, a congregate facility because of race, religion, color, or national origin. The individual, or in the case of the legally incompetent his guardian, shall exercise free choice in the selection of a congregate facility if it is capable of meeting the individual's needs.

(10) Any exception to resident activities shall be noted in the assessment plan.

History: 1954 ACS 82, p. 59, Eff. Feb. 1, 1975.

R 400.2421 Residents' funds; access; safekeeping.

Rule 421. (1) A resident shall have access to and use of personal funds belonging to him in reasonable amounts, including immediate access to at least $5.00 of his personal funds. Exceptions shall be subject to provisions of the assessment plan.

(2) The maximum value of money and valuables a congregate facility shall accept for safekeeping shall not exceed the amount of $400.00 per resident.

(3) Resident's funds shall be kept separate and apart from all funds and monies of the licensee and treated as a trust obligation of the licensee.

History: 1954 ACS 82, p. 60, Eff. Feb. 1, 1975.

R 400.2422 Accounting of residents' funds.

Rule 422. (1) A resident's funds are subject at all times to a full and prompt accounting to the resident. Funds shall be considered promptly accounted for when the following conditions have been observed:

(a) A resident receives on request an itemized monthly statement of all charges against funds held in trust which shall be in such form as reasonably to inform the resident of the nature of the charge for goods or services and the amount thereof. A copy of the itemized statement shall be filed in the resident's record.

(b) A resident receives up to his full amount of personal funds at a time designated by the resident but in no event later than 5 days following the request subject to limitations in the resident's assessment plan.

(c) The charges against the resident's fund account bear a reasonable relationship to value or agreed price for the services rendered and goods furnished or made available to the resident.

(2) A resident who is discharged from a congregate facility shall receive an itemized statement of his personal funds and prompt and reasonable payment of funds remaining in his account at the time of discharge, but no later than 5 banking days after discharge.

History: 1954 ACS 82, p. 60, Eff. Feb. 1, 1975.

R 400.2423 Charges against residents' funds.

Rule 423. A resident, or in the case of a mentally handicapped resident, the responsible agency, legal guardian, person, or relative responsible for maintaining him, shall be given prior written notice and approval obtained before charges are

made against his account. A copy of the authorization shall be maintained in the resident's record.

History: 1954 ACS 82, p. 60, Eff. Feb. 1, 1975.

R 400.2424 Transactions prohibited; review.

Rule 424. (1) A congregate facility licensee or a member of his family, or congregate facility staff shall not borrow money or valuables from a resident with or without his consent.

(2) Transactions between a resident and a congregate facility shall be subject to review by the department where it is alleged by a resident or his representative that the congregate facility did not comply with any rule pertaining to trust funds. Department review does not preclude any other legal remedy a resident or his representative may have.

History: 1954 ACS 82, p. 60, Eff. Feb. 1, 1975.

R 400.2431 Home environment.

Rule 431. (1) A congregate facility shall be so constructed, arranged and maintained as to provide adequately for the health, safety, and well-being of occupants.

(2) Furnishings and housekeeping standards shall be such that a congregate facility presents a comfortable, clean, and orderly appearance.

(3) All occupied rooms shall be of standard lath and plaster construction or equivalent.

(4) The atmosphere and routine of the congregate facility shall be such that a resident may spend the majority of his nonsleeping hours out of the bedroom.

(5) Dining, bath, sitting, living and recreation rooms shall be maintained by an adequate central heating system or its equivalent at a temperature range of 68-72 degrees Fahrenheit during nonsleeping hours.

(6) A congregate facility shall make adequate provision for laundering personal laundry.

(7) A congregate facility shall be equipped to provide an adequate amount of hot water for a resident's use between the temperature range of 110-120 degrees Fahrenheit at the fixture.

(8) A toilet, lavatory and bathing or showering facility shall be provided for each 8 adults in a congregate facility including live-in staff and residents. At least 1 toilet and lavatory shall be provided on each floor having resident bedrooms.

(9) Bathrooms and toilet facilities without windows shall have forced ventilation to the outside. Bathroom windows used for ventilation shall open easily.

(10) Toilets, bathtubs, and showers shall provide for individual privacy.

(11) Floors, walls, and ceilings shall be finished so as to be easily cleanable, and shall be kept clean and in good repair.

History: 1954 ACS 82, p. 60, Eff. Feb. 1, 1975.

R 400.2432 Living and sleeping areas.

Rule 432. (1) A congregate facility shall provide distinct living and sleeping areas. All areas shall be well lighted, heated, and ventilated.

(2) A congregate facility shall provide 1 or more attractively furnished multipurpose areas of adequate size for training, recreational, family style dining and other diversional and social activities.

(3) The living and sleeping areas for a given resident shall not be in noncontiguous wings, units or buildings.

(4) A living room, dining room or other room not ordinarily used for sleeping shall not be used for sleeping by residents or family or staff members.

(5) Traffic to and from any room shall not be through a resident's bedroom.

History: 1954 ACS 82, p. 61, Eff. Feb. 1, 1975.

R 400.2433 Bedrooms.

Rule 433. (1) A room shall not be used as a bedroom where more than ½ the room height is below grade, except where the ceiling of such portion of a building is located 5 feet or more above grade for more than 25% of the perimeter measurement of the building.

(2) Bedrooms for residents shall be separated from halls, corridors, and other rooms by floor to ceiling walls containing no openings except doorways.

(3) Interior doorways of bedrooms occupied by residents shall be equipped with a sidehinged permanently mounted door equipped with positively latching hardware which will insure opening of the door by a single motion, such as turning a knob or by pressing with normal strength on a latch.

(4) Residents of opposite sex shall not occupy the same bedroom unless they are husband and wife.

(5) Residents having impaired mobility shall not sleep in or be assigned bedrooms located above the first or main floor.

(6) Bedrooms shall have at least 1 window. Bedrooms shall be well ventilated and maintained at a comfortable temperature.

(7) A single occupancy bedroom shall have at least 80 square feet of usable floor space (70 square feet for existing facilities). Usable floor space is defined as that floor space under a ceiling at least 6 feet 6 inches in height.

(8) A multi-occupancy bedroom shall have at least 70 square feet of usable floor space per bed (65 square feet for existing facilities) with a maximum of 4 beds per bedroom. Usable floor space is defined as that floor space under a ceiling at least 6 feet 6 inches in height.

(9) There shall be at least a 3-foot clearance between beds in a multi-resident bedroom.

(10) Roll-a-ways, cots, double deck, stacked bunks, hide-a-beds, day beds, and studio couches are prohibited.

(11) Provision shall be made for a resident to mount or hang pictures on bedroom walls.

(12) A resident bedroom shall be equipped with a mirror appropriate for grooming.

(13) Bedroom furnishings shall include an adequate closet or wardrobe, lighting sufficient for reading and other resident activities, bureau or dresser or equivalent and at least 1 chair with arms in each bedroom for every 2 residents.

History: 1954 ACS 82, p. 61, Eff. Feb. 1, 1975.

R 400.2434 Bedding and linen.

Rule 434. (1) A congregate facility shall provide an individual bed at least 36 inches wide and 72 inches long with comfortable springs in good condition, a clean protected mattress not less than 5 inches thick or 4 inches if of a synthetic construction, and a pillow.

(2) A congregate facility shall provide bedding which includes 2 sheets, a pillow case, a minimum of 1 blanket, and a bedspread. A congregate facility shall maintain a linen supply for twice the number of beds in it. A congregate facility shall provide towels and wash cloths which shall be changed at least twice weekly

and more often if soiled. Bed linen shall be changed at least weekly and more often if soiled.

History: 1954 ACS 82, p. 61, Eff. Feb. 1, 1975.

R 400.2447 Safety generally.

Rule 447. (1) Scatter or throw rugs on hard finished floors shall have a nonskid backing.

(2) Handrails and nonskid surfacing or strips shall be installed in showers and bath areas.

(3) Sidewalks, fire escape routes and entrances shall be kept free of any hazards such as ice, snow and debris.

(4) A yard area shall be kept free from all hazards, nuisances, refuse and litter.

History: 1954 ACS 82, p. 62, Eff. Feb. 1, 1975.

R 400.2448 Water and sanitation.

Rule 448. (1) Private water systems shall meet the department of public health rules, "Regulations for Certain Water Supplies in Michigan" available from the Department of Public Health, 3500 North Logan, Lansing 48915. A bacteriological report confirming water quality shall be required during initial inspection and every 2 years thereafter. Congregate facilities using a community approved water system need not comply with this requirement.

(2) Sewage disposal systems shall meet the requirements of the state department of public health.

(3) Kitchen and bathroom areas shall be maintained to insure cleanliness and sanitation so as to protect health.

(4) Waste which is not disposed of by mechanical means shall be kept in a leakproof, nonabsorbent container with close-fitting covers for garbage, refuse, and other solid waste. Waste shall be removed from the kitchen daily and from the premises at least weekly.

(5) Hand washing facilities provided in both kitchen and bathroom areas shall include hot and cold water, soap and individual towels, preferably of paper.

(6) An insect, rodent or pest-control progam shall be maintained as necessary, and carried out in a manner which continually protects the health of residents. Poisons, caustics and other dangerous materials shall be stored and safeguarded in nonresident areas and in nonfood preparation and storage areas.

(7) Open windows shall be screened May through October.

(8) When a resident is discharged, his room and its contents shall be thoroughly cleaned. Blankets and spreads shall be sanitized.

History: 1954 ACS 82, p. 62, Eff. Feb. 1, 1975.

R 400.2451 Records generally.

Rule 451. Resident records, a resident register, accident records and incident reports, residents' grievances and complaints, employee records, employee work schedules and record of resident funds and valuables shall be kept in the congregate facility and shall be available to the director or his authorized representative.

History: 1954 ACS 82, p. 62, Eff. Feb. 1, 1975.

R 400.2452 Resident records.

Rule 452. (1) An individual resident record shall be provided for each resident in the congregate facility.

(2) It shall be the shared responsibility of the congregate facility licensee and the responsible agency to assure that a current resident record is maintained and that all entries are dated and signed.

(3) The resident record shall include the following information:

(a) Identifying information including name, social security number, agency case number, veteran status and number, marital status, age, sex, and home address. Also, religious preference, insurance information, and burial provisions.

(b) Assessment plan.

(c) Name, address, and telephone number of next of kin or legal guardian.

(d) Name, address, and telephone number of person or placing agency responsible for resident's maintenance and care in the congregate facility.

(e) Date of admission.

(f) Date of discharge and place to which resident was discharged.

(g) Health information including all health appraisals and statements and instructions for administering prescribed medication.

(h) The name and address of the preferred physician and hospital and instructions for emergency care.

(i) Information available from the resident about insurance policies and prearranged funeral arrangements.

History: 1954 ACS 82, p. 62, Eff. Feb. 1, 1975.

R 400.2453 Resident register.

Rule 453. A chronological register of residents shall be maintained and include the following information for each resident: date of admission, date of discharge, and place to which resident was discharged, including date and location for temporary absences.

History: 1954 ACS 82, p. 63, Eff. Feb. 1, 1975.

R 400.2454 Accident records and incident reports.

Rule 454. An accident record or incident report shall be prepared for each accident or incident involving a resident, staff member or visitor. Incident means seizures or highly unusual behavior episodes including periods of absence without prior notice. An accident record or incident report shall include the following information:

(a) Name of person involved in accident or incident.

(b) Date, hour, place, and cause of accident or incident.

(c) Effect of accident or incident on person involved and care given.

(d) Name of physician notified and time of notification.

(e) Physician's statement regarding extent of injuries, treatment ordered, and disposition of person involved.

(f) Corrective measures taken to avoid repetition of accident or incident.

History: 1954 ACS 82, p. 63, Eff. Feb. 1, 1975.

R 400.2455 Employee records and schedules.

Rule 455. (1) A record shall be maintained for permanent full-time and permanent part-time employees only and shall include the following:

(a) Name, address, telephone number, and social security number.

(b) License or registration number, if applicable.

(c) Date of birth.

(d) Summary of experience and education (resume).

(e) References.

(f) Beginning date of employment and position for which employed.

(g) Performance evaluation.
(h) Results of annual health certifications.
(i) Periodic health review information.
(j) Date employment ceased and reasons therefor.

(2) A daily work schedule shall be maintained to include the number and type of personnel on duty in the congregate facility. Work schedules shall be kept for 90 days.

History: 1954 ACS 82, p. 63, Eff. Feb. 1, 1975.

R 400.2456 Resident's grievances and complaints record.

Rule 456. A resident grievances and complaint record shall be maintained which shall include copies of all resident grievances or complaints filed in chronological order. The report shall include the nature of the complaint, the date of the complaint and a statement indicating how the issue was resolved.

History: 1954 ACS 82, p. 63, Eff. Feb. 1, 1975.

R 400.2457 Resident funds and valuables.

Rule 457. The resident funds and valuables record shall indicate the date and receipt number of all deposits and dispersals, and the amount and description of monies or valuables or both given for safekeeping for each resident. It shall also include any written authorization by the resident for charges made by the congregate facility to the fund.

History: 1954 ACS 82, p. 63, Eff. Feb. 1, 1975.

R 400.2461 Emergency preparedness.

Rule 461. (1) A congregate facility shall have a telephone. A congregate facility shall have a written procedure to be followed in the case of fire, or medical emergency. Responsible employees and residents, to the best of their ability, shall be familiar with emergency planning and his or her responsibilities.

(2) An emergency plan shall specify persons to be notified, locations of alarm signals and fire extinguishers, evacuation routes, procedures for evacuating residents of limited mobility and visitors, and provide for at least 4 fire drills per year.

(3) The emergency plan, including appropriate telephone numbers, shall be prominently posted and made fully known to all residents, staff and responsible persons and be reviewed annually.

(4) Staff shall be trained to perform assigned tasks and be familiar with all fire fighting equipment.

(5) Fire drills shall be conducted quarterly and a record of their performance shall be maintained. Evacuation planning shall include the possibility of nighttime movements of residents.

History: 1954 ACS 82, p. 63, Eff. Feb. 1, 1975.

R 400.2471 Quality of meals.

Rule 471. (1) A minimum of 3 regular, nutritious, attractively prepared meals shall be provided daily. No more than 15 hours shall elapse between the evening and morning meal. Meals shall be of proper form, consistency and temperature. Meals shall meet the general requirements for nutrition published by the department or currently found in the recommended daily dietary allowances, food and nutrition board, national academy of science.

(2) Special diets shall be prescribed only by a physician.

History: 1954 ACS 82, p. 63, Eff. Feb. 1, 1975.

R 400.2472 Food service.

Rule 472. (1) All perishable foods shall be stored at such temperatures as will protect against spoilage.

(2) All foods while being stored, prepared, or served shall be protected against contamination and be safe for human consumption.

History: 1954 ACS 82, p. 64, Eff. Feb. 1, 1975.

R 400.2473 Equipment.

Rule 473. A congregate facility shall be equipped properly to prepare and serve adequate meals.

History: 1954 ACS 82, p. 64, Eff. Feb. 1, 1975.

R 400.2474 Meal planning.

Rule 474. (1) Menus shall be written 3 days prior to the serving of the meal. Any change or substitution shall be noted and considered as a part of the original menu.

(2) Records of menus as served shall be provided upon request by the department.

History: 1954 ACS 82, p. 64, Eff. Feb. 1, 1975.

R 400.2475 Staff.

Rule 475. A minimum of 1 individual qualified by training, experience, and performance shall be responsible for food preparation. Such additional food service assistance, including relief persons, as necessary for regular and timely meals, shall be employed.

History: 1954 ACS 82, p. 64, Eff. Feb. 1, 1975.

PART 5. FIRE SAFETY; CONGREGATE FACILITIES

R 400.2501 Scope.

Rule 501. This part applies only to congregate facilities.

History: 1954 ACS 82, p. 64, Eff. Feb. 1, 1975.

R 400.2502 Definitions.

Rule 502. (1) "Approved" means acceptable to the director.

(2) "Automatic fire detection system" means at least a local system incorporating labeled underwriters' laboratories, inc., control units, with audible signal devices, thermostats and associated instruments and devices listed by underwriters' laboratories, inc., in fire protection equipment list, and installed in accordance with the 1972 edition of the national fire protection association pamphlet nos. 72A, 72B, and 72D, proprietary, auxiliary and local protective signaling systems.

(3) "Automatic sprinkler system" means sprinkler system installed in accordance with the current edition of the national board of fire underwriters' pamphlet no. 13, sprinkler systems.

(4) "Basement" means that portion of a building below grade but so located that the vertical distance from the grade to the floor is not greater than the vertical distance from the grade to the ceiling; except that where the ceiling of such portion of a building is located 5 feet or more above grade for more than 25% of the perimeter measurement of the building or part of the building affected, it shall be classed as a first story.

(5) "Building" means a congregate facility occupied by residents.

(6) "Cellar" means that portion of a building partly below grade, but so located that the vertical distance from the grade to the floor is greater than the vertical distance from the grade to the ceiling.

(7) "Combustible" means the opposite of noncombustible.

(8) "Exit" means a way of departure from the interior of a building or structure to a street or to an open space which provides safe access to a street. It may comprise vertical and horizontal means of travel such as doorways, stairways, ramps, corridors, passageways, and fire escapes, including all elements necessary for the purpose of emergency escape from the building or structure. An exit begins at a doorway or other point of access to an exit from which occupants may proceed to the exterior of the building or structure with reasonable safety.

(9) "Fire alarm system" means at least a local system incorporating control units, audible signal devices, thermostats and associated instruments and devices listed by underwriters' laboratories, inc., in fire protection equipment list, and installed in accordance with the 1972 edition of the national fire protection association pamphlet nos. 72A, 72B, and 72D, proprietary, auxiliary, and local protective signaling systems.

(10) "Fire doors" means doors constructed in accordance with the 1970 edition of the national fire protection association pamphlet no. 80, standard for the installation of fire doors and windows, and labeled in accordance with the listing of underwriters' laboratories, inc.

(11) "Fire-resistant construction" means a building having all walls, ceilings, floors, partitions and roof of noncombustible materials such as stone, brick, tile, concrete, gypsum, steel, or similar noncombustible materials. Structural members shall be of such assembly or be protected by material that will afford a fire-resistant rating of 1 hour or more.

(12) "Fire-resistance rating" means materials or assembly of materials that shall afford a rating as prescribed in the 1964 edition as amended of the fire-resistance rating pamphlet published by the national board of fire underwriters, or listings of underwriters' laboratories, inc., building materials list.

(13) "Flameproof" or "flameproofing" means materials which do not readily ignite or propagate flame under test conditions. Flameproofed materials usually are combustible materials with the addition of some treatment or coating to modify their burning properties.

(14) "Noncombustible" means:

(a) A material no part of which will ignite and burn when subjected to fire. A material which liberates flammable gas when heated to a temperature of 1,380 degrees Fahrenheit for 5 minutes is not considered noncombustible.

(b) A material having a structural base of noncombustible material as defined in subdivision (a), with a surfacing not over ⅛-inch thick which has a flame spread rating not higher than 50 in compliance with R 400.2543.

(c) A material, other than as described in subdivisions (a) or (b), having a surface flame spread rating not higher than 25 in compliance with R 400.2543, without evidence of continued progressive combustion and of such composition that surfaces that would be exposed by cutting through the material in any way would not have a flame spread rating higher than 25 without evidence of continued progressive combustion.

(15) "Panic hardware" means hardware listed as panic hardware in the accident, automotive and burglary protection equipment lists of underwriters' laboratories.

(16) "Plenum" means an air compartment or chamber to which 1 or more ducts are connected and which form part of an air distribution system.

(17) "Protected ordinary construction" means a type of construction in which exterior bearing walls are of masonry; roofs and interior framing are of wood or other combustible material protected so as to afford at least a 1 hour fire-resistance rating; and the ceilings are attached unfurred and directly to the underside of the roof joists without attic or open space above ceiling joists.

(18) "Story" means that part of a building comprised between a floor and the floor or roof next above. The first story shall be the lowest story of a building, the ceiling of which is located 5 feet or more above grade for more than 25% of the perimeter measurement of that story. Other stories shall be referred to by numerical designations in their order above the first story.

(19) "Wired glass" means glass not less than ¼-inch thick reinforced with wire mesh, no. 24 gauge or heavier, with openings not larger than 1 inch square.

History: 1954 ACS 82, p. 64, Eff. Feb. 1, 1975.

R 400.2503 General provisions.

Rule 503. (1) Any person or his authorized agent, confronted with practical difficulties in carrying out the strictest letter of these rules, may apply to the director in writing for modification thereof. Only such modification as shall not constitute a definite hazard to life or property shall be considered. The decision of the director, including the particulars of any such application, shall be entered upon the records of the department and a signed copy thereof sent to the applicant.

(2) A congregate facility shall be inspected and approved for fire safety prior to the accommodation of residents and at least annually except that existing congregate facilities shall not be required to remove residents for the purpose of the initial fire inspection.

(3) A complete set of plans and specifications prepared by a registered architect or engineer, for any proposed congregate facility building, addition, remodeling or alteration to an existing congregate facility shall be submitted to the appropriate inspecting authority. If the plans and specifications conform with these rules and permission has been completed and before occupancy, the owner shall notify the appropriate inspecting authority and an inspection shall be made to determine if these rules have received compliance. If the construction has been found to be in compliance with the rules, approval for the use and occupancy of the building or addition shall be given.

(4) Plans for additions to existing buildings shall include portions of the building being added to, showing existing exits, existing type of construction, and room occupancies which may be affected by such addition.

(5) On completion of any construction, addition or conversion of a congregate facility, the first inspection shall be made by an appropriate inspecting authority.

(6) Electrical plans and specifications shall be approved by the local electrical inspection authority where available or by the inspection services of the state electrical administrative board, and complete inspection service with final certificate of compliance covering the electrical installation shall be made by the same agency.

History: 1954 ACS 82, p. 66, Eff. Feb. 1, 1975.

R 400.2504 Other occupancy.

Rule 504. A motor vehicle, gasoline-powered equipment, or other devices which may cause or communicate fire, not necessary for treatment or care of residents, shall not be stored within a congregate facility building. Such devices

and materials necessary for use within the building shall be used with reasonable care for safety from fire.

History: 1954 ACS 82, p. 66, Eff. Feb. 1, 1975.

R 400.2505 Roofing.

Rule 505. Roofs shall be covered with roofing of spark-resistant material.

History: 1954 ACS 82, p. 66, Eff. Feb. 1, 1975.

R 400.2506 Egress facilities.

Rule 506. (1) Each floor or story of every building shall have at least 2 separate and independent means of egress leading to the outside.

(2) Means of egress in addition to the minimum of 2 required from each story shall be required when the maximum possible occupancy exceeds 100 residents per story. There shall be at least 1 additional means of egress for each 100 additional residents per story. Exits shall be of such number and so arranged that it will not be necessary to travel more than 100 feet from the door of a resident occupied room to reach the nearest approved means of egress from that story.

(3) Architectural treatment, mirrors, false windows, doors, or other decorations shall not be used as to give the appearance of doors or exits where no door or exit exists, or so placed as to decrease the width or impair the use of the exit. Nothing shall be placed or hung in front of exit signs which shall obstruct or prevent a clear view of the exit signs.

(4) Corridors shall lead directly to the outside or to a required stairway having direct egress to the outside through approved exit doors at grade which shall give access to a public street. Only 1 required stairway may terminate in and have egress directly across a main floor entrance lobby, which has ample approved means of egress to the outside.

(5) Elevators shall not be approved as required means of egress.

(6) Corridors, stairways, and passageways to means of egress shall not be used for the housing of residents or for storage of any kind and shall not be obstructed or hidden from view by ornamentation, curtains or other appurtenances.

(7) Corridor barrier doors, other than approved smoke barrier doors, shall be double action doors only and shall not be secured by any device other than by a type that will permit opening the door in the direction of travel from either side with normal push or pressure.

(8) New and existing congregate facilities accommodating residents who regularly require wheelchairs shall be equipped with ramps located at primary and secondary means of egress. A ramp shall not exceed 1 foot rise in 12 feet of run.

History: 1954 ACS 82, p. 66, Eff. Feb. 1, 1975.

R 400.2507 Doors and doorways.

Rule 507. (1) Doorways which are a part of a means of egress shall be at floor level.

(2) Doors, including screen and storm doors, forming a part of an approved means of egress shall open in the direction of egress travel. This rule does not require doors from resident occupied rooms to open into corridors, except that such a door shall not be hung so as to obstruct egress passage. There shall be no obstruction at any time to the opening and closing of egress doors or doors from a resident occupied room into corridors.

(3) In a building having no more than 2 levels, where both levels exit at grade, and where elevations between levels do not exceed 4 feet, the building will be considered as 1 story and enclosures shall not be required between levels.

(4) Revolving doors shall not be approved as part of a means of egress. Where revolving doors are installed, side hinged doors, complying with other sections of this rule shall be installed within 15 feet of each revolving door.

(5) Doors entering stair shafts or other vertical openings shall not be held in an open position at any time by an under door wedge or door holding device.

(6) Transoms and other similar openings between rooms and corridors or passages are not permitted.

History: 1954 ACS 82, p. 67, Eff. Feb. 1, 1975.

R 400.2508 Rubbish handling and incinerators.

Rule 508. (1) Rubbish handling and incinerators shall be in accordance with the 1972 edition of the national fire protection association pamphlet no. 82, incinerators, rubbish handling. Rubbish chutes, refuse bins or rooms shall comply with the provisions of this pamphlet for industrial type incinerators. Approved 2 bushel or less gas incinerators may be placed in an approved furnace room and shall be equipped with approved automatic 100% shut-off controls, including a safety pilot. No feed doors for incinerator or rubbish chutes shall be permitted to be installed in any corridor or hallway that is used as a passageway to a means of egress. All such doors shall be located in an enclosed sprinklered room or compartment separated from other parts of the building by walls, floor and ceiling having a fire-resistant rating of not less than 1 hour with openings to such rooms or compartment protected B-labeled fire doors and labeled fire door frames.

(2) Rubbish chutes shall extend at least 4 feet above the roof and be covered by a metal skylight glazed with thin plain glass. A sprinkler head shall be installed at the top of rubbish chutes and within the chutes at alternate floor levels in buildings over 2 stories in height. A rubbish chute shall empty into a separate room, closet or bin constructed of materials having at least 1 hour's resistance to fire and protected with automatic sprinklers.

(3) In new construction incinerator rooms shall have at least 1 wall an outside wall not exposing a closed court.

(4) Wastebaskets or receptacles shall be constructed with noncombustible material, and when they exceed a capacity of 2 cubic feet or 15 gallons shall be equipped with a noncombustible cover.

History: 1954 ACS 82, p. 67, Eff. Feb. 1, 1975.

R 400.2509 Laundry.

Rule 509. (1) In new construction a laundry shall be located in a room constructed of materials, including doors and frames, that have a 1 hour fire-resistant rating and shall be protected with an approved automatic sprinkler system. In existing facilities a laundry shall be located in a substantial enclosure, including doors and frames and may be of less than 1 hour fire-resistant rating if acceptable to the inspecting authority.

(2) Steam lines shall be insulated with a noncombustible material and shall have a 1-inch clearance from combustibles.

(3) Dryers shall be constructed of metal. Lint traps shall be cleaned frequently.

(4) The use of any flammable liquids for cleaning, brushing, scouring or scrubbing is prohibited.

(5) Gas appliances shall have 100% safety shut-off controls.

(6) Adequate air for combustion shall be provided in the laundry room.

History: 1954 ACS 82, p. 67, Eff. Feb. 1, 1975.

R 400.2510 Exit signs and illumination.

Rule 510. (1) Each exit shall be marked by means of an electrically lighted exit sign having letters at least 3¾ inches in height on a background of contrasting color with strokes not less than ¾ inch in width and shall be so installed as to be legible from the direction of travel thereto. Where such doorways and signs are not readily discernible from a resident's room doorway, an adequate number of additional electrically lighted directional signs shall be provided, with an arrow pointing in the direction of such exits.

(2) Adequate equipment shall be provided in all facilities for the lighting of corridors, stairways, outside fire escapes and egress passages at all times.

(3) In new construction the lighting required by this rule shall be installed on separate circuits in nonflexible metallic conduit, fused ahead of the main entrance switch and cut-out.

(4) In new construction no other wiring shall be in the same raceway or conduit which serves the exit lights and emergency lighting.

History: 1954 ACS 82, p. 68, Eff. Feb. 1, 1975.

R 400.2511 Fire extinguishing equipment.

Rule 511. (1) Fire extinguishers shall be of a type listed by underwriters' laboratories, inc.

(2) Fire extinguishers shall be housed in a special cabinet or wall rack readily accessible at all times, so located that the top of the extinguisher is not over 5 feet above the floor. The cabinet or the wall in the area of the wall rack shall be painted a distinguishing color.

(3) Extinguishers shall be sized and located as prescribed in the 1972 edition of national fire protection association pamphlet no. 10.

(4) Fire extinguishers of class A or ABC type shall be located in corridors, storage areas of combustible materials, shops and laundries.

(5) Fire extinguishers of B or ABC type shall be located in heating plant rooms, shops, laboratories and kitchens.

(6) A standpipe system shall be installed in a building over 2 stories in height above the highest grade and more than 10,000 square feet in area in accordance with the current edition of national fire protection association pamphlet no. 14, standpipe and hose systems.

History: 1954 ACS 82, p. 68, Eff. Feb. 1, 1975.

R 400.2512 Fire alarms.

Rule 512. (1) New and existing congregate facilities shall be equipped with an approved electrically operated, closed circuit, self-supervised, local fire alarm system with suitable signaling devices of such character and so located as to communicate the alarm of fire to the personnel on each floor of the building. A system shall also have approved actuating stations suitably located on each floor and basement so that it will not be necessary to travel more than 100 feet from any room to reach a station on the same floor.

(2) A telephone or other suitable means of communicating an alarm of fire to the fire department shall be provided. Pay stations are not an approved means of sending an alarm.

(3) Alarms shall be tested every 6 months and a record maintained of the test.

(4) The electrical circuit serving fire alarm devices shall be installed on a separate circuit, and in new construction shall be installed in nonflexible metallic conduit, fused ahead of the main entrance switch.

History: 1954 ACS 82, p. 68, Eff. Feb. 1, 1975.

R 400.2513 Evacuation plan.

Rule 513. An approved plan for the protection of residents in the event of fire and their evacuation from the building when necessary shall be formulated by the management. This plan shall be reduced to writing and posted in places conspicuous to personnel and staff who shall be instructed and kept informed regarding their duties under the evacuation plan.

History: 1954 ACS 82, p. 69, Eff. Feb. 1, 1975.

R 400.2514 Smoking.

Rule 514. Smoking may be permitted where ashtrays of noncombustible material are provided. Ashtrays shall not be emptied in an open wastepaper container. Metal containers with self-closing cover devices shall be provided for the disposal of the contents of the ashtrays.

History: 1954 ACS 82, p. 69, Eff. Feb. 1, 1975.

R 400.2515 Electrical.

Rule 515. (1) Electrical wiring and equipment shall be installed in accordance with the provisions of the state electrical law and rules and the 1971 edition of the national electrical code.

(2) Only such oil and gas burners as are approved by underwriters' laboratories, inc., gas and oil equipment list, or the American gas association shall be approved for use in facilities.

History: 1954 ACS 82, p. 69, Eff. Feb. 1, 1975.

R 400.2516 Chimneys and flues.

Rule 516. (1) Furnaces and other fired units shall be vented by smoke pipes to a chimney constructed of brick, solid block masonry, or reinforced concrete, with approved flue lining, properly erected and maintained in safe condition. A bracket chimney is not permitted.

(2) Subrule (1) does not prohibit the installation and use of any prefabricated chimney bearing the label of approval of underwriters' laboratories, inc., if it is installed and used in accordance with their specifications.

History: 1954 ACS 82, p. 69, Eff. Feb. 1, 1975.

R 400.2517 Hot water.

Rule 517. (1) Hot water heaters, other than those electrically heated, or any booster heaters for dishwashers or laundry purposes, shall be installed in the heating plant or in an enclosure of like fire-resistant construction and not used for storage of any combustible material.

(2) Hot water storage tanks shall be equipped with safety devices which shall prevent temperatures in excess of 210 degrees Fahrenheit, and pressures in excess of the maximum working pressure for which the tank is designed, as follows:

(a) An acceptable pressure relief valve, combined with an energy cutoff approved by underwriters' laboratories or the American gas association.

(b) By an acceptable pressure relief valve and an acceptable temperature relief valve of the spillage type.

(c) By an acceptable combined temperature-pressure relief valve of the spillage type.

History: 1954 ACS 82, p. 69, Eff. Feb. 1, 1975.

R 400.2518 Gas.

Rule 518. (1) The installation, use and maintenance of gas appliances and gas piping shall be in accordance with the 1969 editions of pamphlet no. 54, installation of gas appliance and gas piping, and pamphlet no. 54A, standards for the installation, maintenance and use of piping, appliances, and fittings for city gas, of the national fire protection association.

(2) All liquefied petroleum gas installations shall be in accordance with the state regulations for such use. When such gas supply lines are placed in tunnels, they shall be without joints and the tunnels shall have forced ventilation.

History: 1954 ACS 82, p. 69, Eff. Feb. 1, 1975.

R 400.2519 Cooking appliances.

Rule 519. (1) Cooking appliances shall be suitably installed in accordance with approved safety practices.

(2) Where metal hoods or canopies are provided over main kitchen cooking appliances, they shall be equipped and designed in compliance with the current edition of the national fire protection association pamphlet no. 96, ventilation of restaurant cooking equipment.

(3) Filters shall be maintained in an efficient condition and kept clean at all times.

(4) Only vapor proof type electrical wiring and equipment shall be permitted in hoods or canopies.

(5) Exhaust ducts from hoods shall be run to the outside by the shortest possible route, and when run through open spaces between a ceiling and a floor or roof, or through any floors above, shall be enclosed in horizontal or vertical shafts protected from the remainder of the building by construction which will afford a 2-hour fire-resistance rating.

History: 1954 ACS 82, p. 69, Eff. Feb. 1, 1975.

R 400.2520 Aids for fire department service.

Rule 520. (1) Proper driveways to main building for fire department apparatus use shall be maintained free from all obstructions.

(2) A copy of the plans of the building shall be submitted to the local fire department officials to enable them to become familiar with the floor plan of the building.

History: 1954 ACS 82, p. 70, Eff. Feb. 1, 1975.

R 400.2521 Abatement of fire hazard.

Rule 521. Nothing in these rules prevents the abatement of fire hazards not specifically mentioned.

History: 1954 ACS 82, p. 70, Eff. Feb. 1, 1975.

R 400.2531 New construction.

Rule 531. New construction, additions, remodeling, and buildings converted for the purpose of a congregate facility shall comply with all of the requirements of R 400.2501 to R 400.2521 and the requirements of R 400.2531 to R 400.2545.

History: 1954 ACS 82, p. 70, Eff. Feb. 1, 1975.

R 400.2532 Construction.

Rule 532. A congregate facility hereafter constructed, an addition hereafter made to a congregate facility, and a building hereafter converted for use as a congregate facility shall be of fire-resistant construction, except that:

Digitized by Google Original from UNIVERSITY OF MICHIGAN

(a) Such construction, addition or conversion may be of 1-hour protected ordinary construction, solid masonry exterior walls, wood joist and studding, if it is not over 1 story in height without basement or attic and is protected throughout with an approved automatic sprinkler system.

(b) Forming materials which are left in place as a part of the permanent structure shall be noncombustible. Such material shall not be more hazardous than class A as defined in R 400.2543(3).

(c) In a building where a fire-resistive ceiling constitutes an essential part of a floor or roof assembly to meet the required fire-resistance rating, it shall be installed as tested and may have openings to accommodate noncombustible piping, ducts or electrical outlets. The aggregate area of such openings in the ceiling shall not exceed 16 square inches for each 90 square feet of ceiling area, unless the equipment was a part of the test assembly. All ceiling duct openings shall be protected with fire dampers as tested in the assembly.

(d) All alterations shall comply with these rules.

(e) This rule shall not necessarily apply to a building attached to a congregate facility which is not used in any part for facility purposes if it is separated from congregate facility building by an unpierced fire wall having at least a 4-hour fire-resistant rating. This rule shall not apply to buildings which are not used in any part for facility purposes when so located as to provide a horizontal outside separation by distance from such building in accordance with recognized standards.

(f) Additions to existing sprinklered buildings shall be separated therefrom by fire walls and B labeled fire doors unless the addition is sprinklered.

(g) An unsprinklered addition to an existing unsprinklered building of combustible construction shall be separated therefrom by at least a 15-foot breezeway having a 1 hour fire separation at either end of the breezeway.

(h) During remodeling, alterations or construction of additions, building openings exposed to construction operations shall be protected by noncombustible material. Remodeling, construction, or alterations shall not obstruct or render unusable any required means of egress. Where any required means of egress is obstructed or rendered unusable due to any remodeling, construction, or alteration, a temporary means of egress shall be provided so as to assure the safety of occupants or the area affected shall be vacated during such work.

History: 1954 ACS 82, p. 70, Eff. Feb. 1, 1975.

R 400.2533 Restricted location.

Rule 533. A congregate facility building shall not be located within 300 feet of above ground storage tanks containing flammable liquids used in connection with a bulk plant, marine terminal, aircraft refueling, or the bottling plant of a liquefied petroleum gas installation.

History: 1954 ACS 82, p. 71, Eff. Feb. 1, 1975.

R 400.2534 Egress facilities required.

Rule 534. (1) Corridors or passageways from resident bedrooms or wards leading to egress stairways and thence to the outside, or to the outside from the first story, shall be not less than 5 feet in width.

(2) Corridors and passageways considered as approved means of egress shall be at least 90 inches in height.

(3) Resident occupied rooms shall be located between approved means of egress, except 1 room on each side of each end of a corridor that may have not more than 2 residents in each room, or 1 room at the end of any corridor that may

have not more than 4 residents. Doors from such rooms shall be not more remote than 15 feet from an approved exit, stairway or egress directly to the outside at grade.

(4) Resident bedrooms located in areas between exits shall be of such dimensions that no part of the room is in excess of 30 feet to the room exit door unless an approved secondary means of egress is provided. There shall be a minimum clear space of 3 feet in width from 1 side of each bed adjacent to an aisle of at least 5 feet in width leading to the room exit or exits and maintained free from any obstruction.

(5) Rooms shall be separated from corridors with partition construction extending to the floor or deck above, or to a ceiling which is a part of at least a 1 hour rated assembly which will afford at least a ¾-hour fire-resistant rating. Any glass in such partitions, including doors, shall be ¼-inch wired glass in steel framing, not exceeding 1,296 square inches per opening, with no dimension exceeding 54 inches.

(6) Approved means of egress from above the first floor shall be through approved enclosed stairways only.

(7) A resident occupied room shall have at least 1 doorway opening directly to the outside, or to a corridor which has 2 separate and independent means of egress leading to the outside without going through any other occupied room or space except an approved lobby.

History: 1954 ACS 82, p. 71, Eff. Feb. 1, 1975.

R 400.2535 Inside stairways.

Rule 535. (1) Inside stairways forming an approved means of egress shall have suitable handrails on each side.

(2) Inside stairways forming an approved means of egress shall be at least 44 inches wide in the clear. Handrails attached to walls may project into the required width of a stairway not more than 3½ inches at each side.

(3) Stairways forming an approved means of egress shall have treads not less than 9½ inches wide, exclusive of the nosing, and the risers shall not exceed 7¾ inches in height. Treads and risers shall be of uniform width and height in each individual stairway.

(4) An inside stairway forming a means of egress consisting of 2 or more steps which in changing direction does so by benefit of the variance in the width along each tread, shall not be approved. This subrule does not prohibit a stairway with treads of uniform width throughout which changes direction by benefit of intermediate landings or platforms.

(5) The maximum vertical distance between platforms or landings in any flight of stairs shall not exceed 9 feet.

History: 1954 ACS 82, p. 71, Eff. Feb. 1, 1975.

R 400.2536 Outside stairways.

Rule 536. Outside stairways on new construction and on conversions as part of an approved means of egress are prohibited.

History: 1954 ACS 82, p. 71, Eff. Feb. 1, 1975.

R 400.2537 Doors and doorways.

Rule 537. (1) Doors from resident bedrooms and doors forming a part of an approved means of egress for residents shall be not less than 36 inches.

(2) Doors into stairway enclosures and doors serving other vertical openings shall be B labeled fire doors in fire door frames, equipped with approved self-closing devices; designed, installed and maintained to close the doors automatically. The doors shall be hung so as to allow for convenient manual opening and closing at all times. These doors shall be maintained in a closed position and shall have a prominent sign on each side with the following: "Keep Door Closed for Fire Safety."

(3) Egress doors from resident occupied rooms shall be equipped with positive latching hardware which will insure opening of the doors by a single motion, such as turning a knob or by pressure of a latch with normal strength. All doors provided or designated as exits shall have anti-panic hardware listed in the accident, automotive and burglary protection equipment lists of underwriters' laboratories. The use of hooks and eyes, bolts, bars, and similar devices is expressly prohibited on doors provided for exit purposes or designated as exits.

(4) Doorways entering upon common use corridors or egress passageways shall be protected by at least a 1¾-inch solid wood core or approved hollow metal, side-hinged, swing-type door, so constructed as to provide a reasonably smoke tight enclosure.

(5) Doorways from resident bedrooms and doors forming a part of an approved means of egress shall be at least 78 inches in height.

History: 1954 ACS 82, p. 71, Eff. Feb. 1, 1975.

R 400.2538 Stairways and other vertical openings.

Rule 538. (1) Interior stairways shall be enclosed with material having a fire-resistant rating of not less than 1 hour. Other vertical openings through floors and ceilings, such as spaces around pipes, conduits, and ducts, shall be firestopped with noncombustible material.

(2) Elevator and dumbwaiter shafts shall be completely enclosed by noncombustible materials with a fire-resistant rating of not less than 1 hour. Openings shall not be permitted through the sidewall enclosures for ventilation or any other purpose. Doors and frames servicing elevators and dumbwaiters shall be approved fire door construction and shall be hung so as to be reasonably smoke-tight when the doors are closed. Lintels and panels above the doors shall be constructed to resist fire for 1 hour. Where necessary, the doors shall have wired glass ¼ inch thick and the glass shall not exceed 100 square inches.

(3) There shall be no room doors or openings into stairways other than corridor access doors except where a floor consists of 1 open area such as a large open ward floor.

History: 1954 ACS 82, p. 72, Eff. Feb. 1, 1975.

R 400.2539 Fire doors.

Rule 539. (1) Fire doors shall bear the underwriters' laboratories or factory mutual label, be installed in labeled fire door frames and be equipped with self-closers and latching devices.

(2) Fire doors shall not be equipped with any hold open devices. B labeled fire doors shall be provided as follows:

(a) In openings into vertical shafts, such as stairwells, rubbish, and incinerator shafts, laundry chutes, dumbwaiter shafts, service shafts other than ventilation duct openings.

(b) In openings into storage rooms for ordinary combustible materials, janitor rooms and closets, linen rooms both dirty and clean, laundry rooms, heating plant rooms, machine and fan rooms, flammable liquid storage rooms, receiving rooms,

laundry and rubbish bin rooms, laundry and rubbish chute feed rooms, maintenance shops, kitchen storage rooms, electrical service rooms and gas meter rooms.

(c) Openings from kitchens to required exit corridors in new construction.

(3) Fire doors used in pairs without mullions shall be equipped with astragals and synchronizing closing devices. Astragals shall be of at least 10 gauge steel, securely attached in place so as to project ¾ inch.

History: 1954 ACS 82, p. 72, Eff. Feb. 1, 1975.

R 400.2540 Laundry chutes.

Rule 540. (1) Laundry chutes shall be enclosed in shafts constructed of an assemblage of noncombustible materials having at least 1 hour's resistance to fire. If the shaft terminates within the building, the top shall be covered with noncombustible material affording at least 1 hour's resistance to fire. There shall be no openings into the shaft other than those necessary to the intended use of the laundry chute. Openings directly into the shaft shall be protected by chute doors normally utilized by the industry. The spaces between the chute and the shaft shall be filled in at each floor level with noncombustible material. Feed doors for laundry chutes shall not be installed in any corridor or hallway used as a passageway to a means of egress. Feed doors shall be located in an enclosed sprinklered room or compartment separated from other parts of the building by walls, floor and ceiling having a fire-resistant rating of not less than 1 hour with openings to such room or compartment protected by B labeled fire doors in labeled fire door frames.

(2) A sprinkler head shall be installed at the top of the chutes and within the laundry chutes at alternate floor levels in buildings over 2 stories in height. The laundry chutes shall empty into a separate room, closet or bin constructed of materials having at least 1 hour's resistance to fire and protected with automatic sprinklers.

(3) If the shaft terminates through the roof of the building, the top may have an open vent. If not equipped with an open vent, the top shall have a skylight glazed with ordinary glass of 10% of the shaft area, except that the skylight may be eliminated and a window of equivalent construction and size set into the side of the shaft with the sill of the window at least 2 feet above the roof level and 10 feet from any property line or other exposure on which it faces.

History: 1954 ACS 82, p. 72, Eff. Feb. 1, 1975.

R 400.2541 Heating plants.

Rule 541. (1) Heating shall be only from an approved central heating plant or an approved permanently installed electrical heating system.

(2) Heating plants shall be enclosed by walls, floor, and ceiling having at least 1 hour's resistance to fire with at least 1 wall being an outside wall not exposing a closed court. Doorways and other openings through required heating plant enclosures shall be protected by B labeled fire doors in labeled fire door frames, installed so as to be reasonably smoke tight and be equipped with self-closing devices.

(3) Heating plant rooms shall not be located beneath any portion of a building. This rule does not require the removal of an existing heating plant from beneath an existing congregate facility unless it shall be so required in the interest of public safety. If it becomes necessary to expand the capacity of a heating plant to heat a congregate facility, the expansion shall not be permitted under any portion of the existing building.

Open Access, Google-digitized / http://www.hathitrust.org/access_use#oa-google

(4) Furnace rooms or heating plant enclosures shall be provided with approved air vents connected directly to the outside, sufficient in size to supply the required volume of air to support proper combustion. Adequate ventilation shall be provided directly to the outside from the ceiling of the heating plant enclosure to eliminate excessive temperature at all times.

(5) Portable heating units are not permitted.

(6) Gas meters shall be located outside or in a room separated from other occupancies and exposures by at least a 1-hour rated enclosure which is vented to the outside. Gas meters may be in the heating plant room if located 5 or more feet from the heating units.

(7) A heating plant room shall not be utilized for storage of combustible or for a maintenance shop unless the room is protected with automatic sprinklers.

History: 1954 ACS 82, p. 73, Eff. Feb. 1, 1975.

R 400.2542 Air conditioning and air handling systems.

Rule 542. (1) Air conditioning, warm air heating, air cooling and ventilating systems shall comply with the current edition of the national fire protection association's pamphlet no. 90-A, air conditioning and ventilating systems.

(2) Where power exhaust ventilation is to be used, there shall be an air supply equal to the amount exhausted, especially in areas housing combustion equipment, lest negative pressures be developed, resulting in reversal of drafts in chimney flues.

(3) Fans and air handling equipment used for recirculating air in more than 1 room or a single area shall be located in a room cut off from other portions of the building by construction having a fire-resistant rating of not less than 1 hour including fire dampers for duct openings, and a thermostatic device with a setting not in excess of 125 degrees Fahrenheit, or an approved automatic smoke detector shall be located in the system at a suitable point in the return air duct ahead of the fresh air intake, the actuating of which shall open the electrical circuit supplying the fan motor. Fan rooms shall not be designed or used for any other use except for housing other mechanical equipment.

(4) Where duct systems serve 2 or more floors, approved fire dampers shall be installed either at each direct outlet or inlet and in each branch duct at its junction with the main vertical duct, or at each point where a floor is pierced.

(5) Where ducts pierce a smoke barrier or a wall or enclosure required to have a 1-hour fire-resistance rating, heat actuated fire dampers shall be installed. Where ducts pierce a wall required to have a 2-hour or more fire-resistance rating, heat actuated fire dampers shall be installed on both sides of the wall opening through which they pass.

(6) Required exit corridors shall not be used either as exhaust plenums or as return plenum chambers in heating and ventilating systems, and openings shall not be provided in separation walls or doors between rooms and corridors.

(7) Ducts and plenum spaces whether for supply, return or exhaust shall be constructed of noncombustible materials. Space between a drop ceiling and floor above, where the drop ceiling is protection to exposed steel, shall not be used as a plenum.

(8) Heat actuated fire dampers shall be underwriters' laboratories, inc., labeled or in accordance with the Michigan fire damper clarification publication.

History: 1954 ACS 82, p. 73, Eff. Feb. 1, 1975.

R 400.2543 Interior finish and materials.

Rule 543. (1) Wall and ceiling finish materials throughout resident facilities shall be no more hazardous than class A, except for necessary wood doors and wood trim.

Digitized by Google
Original from UNIVERSITY OF MICHIGAN
Generated for Susan K Kendall (Michigan State University) on 2018-09-05 16:48 GMT / http://hdl.handle.net/2027/mdp.49015002898253

(2) Folding type partitions when desired as separations in rooms or between rooms shall be of noncombustible material except that impregnated wood or other material which conforms to class B is acceptable.

(3) The alphabetical classification of finish materials is for flame spread, fuel contribution and smoke development as determined by the tunnel test in accordance with NFPA 255-1972, ASTM-E-84-1968 or UL-723-1973 and grouped as follows:

Class	Flame Spread	Fuel Contributed	Smoke Developed
A	0- 25	0- 35	0- 50
B	26- 75	36- 75	51-125
C	76-200	76-200	126-200

(4) The same alphabetical classification is used for combustibility of prefabricated acoustical tile units only, under federal specifications SS-A-118B-1958.

(5) The documents referred to in subrules (3) and (4) may be purchased from NFPA 255-1972, the National Fire Protection Association, 60 Batterymarch Street, Boston, Massachusetts 02110, at the cost of $1.00, ASTM-E-84-1968, from the American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pennsylvania 19103, at the cost of $1.50, UL-723-1973 from Underwriters' Laboratories Inc., 207 East Ohio Street, Chicago, Illinois 60611, at a cost of $1.00, and SS-S-118A-1972 which may be purchased from Specification Sales (3FRSBS) Building, 197 Washington Navy Yard, General Services Administration, Washington, D.C. 20407, at a cost of 10 cents.

(6) Interior finish shall include the material of walls, partitions of fixed removable type, ceilings and other exposed interior surfaces of buildings, comprising both the plaster, wood or other interior finish material.

(7) The classification of interior finish materials as to their flame spread and smoke development shall be that of the basic material used without regard to subsequently applied paint or other covering, except where such paint or other covering is of such character or thickness or so applied as to affect materially the flame spread and smoke characteristics. Highly combustible material application such as lacquer or proxylin base materials or unapproved wall coverings shall not be used.

(8) Paints or coatings containing plastics, polyesters or epoxies may be used on noncombustible surfaces without proof of classification if not applied in excess of 8 mils total thickness.

(9) Any new floor covering assembly shall be a minimum class B.

History: 1954 ACS 82, p. 74, Eff. Feb. 1, 1975.

R 400.2544 Storerooms and closets.

Rule 544. Rooms for storage of combustible materials, including all janitor rooms and closets, dirty and clean linen rooms, receiving rooms, kitchen storage rooms and maintenance shops, shall be separated from the remainder of the building by construction having at least a 1-hour fire-resistance rating and be protected by automatic sprinklers.

History: 1954 ACS 82, p. 74, Eff. Feb. 1, 1975.

R 400.2545 Sprinkler protection.

Rule 545. (1) For construction defined as "protected ordinary construction," the entire new construction involved shall be protected throughout by an approved automatic sprinkler system.

Generated for Susan K Kendall (Michigan State University) on 2018-09-05 16:48 GMT / http://hdl.handle.net/2027/mdp.49015002898253

(2) Where there is no adequate water from a community water system to supply a sprinkler system where area to be protected does not exceed 20,000 square feet, special pressure tank supply for sprinklers as specified in the 1971 edition of national fire protection association pamphlet no. 22, standard for water tanks for private fire protection, shall be provided. The special pressure tanks shall contain 2,000 gallons of water in a 3,000-gallon tank for partial systems and for complete building systems shall have 3,000 gallons of water in a 4,500-gallon tank.

(3) Where there is no adequate water supply from a community system to supply a sprinkler system, and where the total gross area to be protected exceeds 20,000 square feet, the water supply shall be furnished by a gravity tank of not less than 30,000 gallons capacity, constructed as specified in the 1971 edition of national fire protection association pamphlet no. 22, standard for water tanks for private fire protection.

(4) Complete shop drawings shall be submitted to the appropriate inspecting authority for approval before installation of sprinklers.

(5) Sprinkler systems shall be equipped with a flow alarm electrically relayed to the fire alarm system of the building except for sprinklers installed in accordance with subrule (6).

(6) The sprinkler piping for any isolated hazardous area which can be adequately protected by not more than 2 sprinklers may be connected directly to the domestic water system at a point where a minimum 1-inch supply is available. An approved OS and Y valve and check valve shall be installed between the sprinklers and the connection to the domestic water supply. This method of sprinklering shall be used very conservatively.

(7) Partial sprinkler systems in new construction shall be designed to protect the following areas: heating plant rooms housing incinerators of more than 2-bushel capacity, incinerator rooms, laundry rooms, storage rooms for combustible material including janitor rooms and closets, clean and dirty linen rooms, receiving bins, laundry and rubbish chute feed rooms, the tops and various levels where required of laundry and rubbish chutes and the kitchen storage rooms.

History: 1954 ACS 82, p. 75, Eff. Feb. 1, 1975.

R 400.2551 Existing facilities.

Rule 551. Existing licensed facilities shall comply with the requirements of R 400.2501 to R 400.2521 and with the requirements of R 400.2551 to R 400.2567.

History: 1954 ACS 82, p. 75, Eff. Feb. 1, 1975.

R 400.2552 Sprinkler system required; exception.

Rule 552. Upon written notice all existing congregate facilities, or portions thereof not of fire-resistant construction, shall be protected by an approved automatic sprinkler system, except as follows:

(a) Existing congregate facilities of 1 story with concrete floor and no basement which upon review may be classified by authorized inspection authority as protected ordinary construction, having competent partitions and doors separating rooms from exit corridors, storage rooms segregated and protected, where there is compliance with other applicable features provided for in these rules and the entire building is protected by an approved automatic fire detection system.

(b) Existing congregate facilities where residents occupy the first floor only, if other applicable features of these rules are complied with and the entire building is protected by an approved automatic fire detection system.

(c) This rule shall not necessarily apply to a building attached to a congregate facility building which is not used in any part for facility purposes if it is separated from the facility building by an unpierced firewall having at least a 4-hour fire-resistant rating. Nor shall it necessarily apply to buildings which are not used in any part for home purposes when so located as to provide a horizontal outside separation by distance from such building in accordance with recognized standards.

History: 1954 ACS 82, p. 75, Eff. Feb. 1, 1975.

R 400.2553 Egress facilities required.

Rule 553. (1) In existing congregate facility buildings, not over 2 stories in height, required additional means of egress from the second floor may be provided with approved outside stairways.

(2) Existing congregate facility buildings which are provided with outside stairways as required means of egress on the effective date of these rules shall not be required to replace the outside stairways if they comply with the requirements for existing fire escapes contained herein.

(3) Corridors or passageways from resident bedrooms or wards leading to egress stairways and thence to the outside, or to the outside from the first story, shall be not less than 3 feet in width.

(4) Corridors and passageways considered as approved means of egress shall be at least 78 inches in height.

(5) In existing congregate facilities which are of fire resistant construction or which are protected by an approved sprinkler system where present exits are separated by at least 50% of the longest dimension of the building, the housing of not more than 10 residents beyond a means of egress will be approved if there is no storage room, pharmacy or other hazardous occupancy between the resident rooms and the means of egress and if the most remote resident room door is not more than 50 feet from the means of egress.

(6) Resident bedrooms located in areas between exits shall be of such dimensions that no part of the room is more than 30 feet from the room exit door unless an approved secondary means of egress is provided for the room.

(7) Room to corridor partitions shall be of substantial standard construction and be reasonably smoke tight.

(8) Each story of every building used as a congregate facility shall have at least 2 means of egress to the outside. Each resident-occupied room shall have at least 1 doorway opening directly to the outside or to a corridor leading directly or by stairway to the outside, or an opening without a door into 1 adjacent room with a means of egress direct to the outside.

History: 1954 ACS 82, p. 75, Eff. Feb. 1, 1975.

R 400.2554 Inside stairways.

Rule 554. (1) All inside stairways forming an approved means of egress shall have suitable handrails on each side.

(2) All inside stairways forming an approved means of egress shall be at least 36 inches wide in the clear. Handrails attached to walls may project into the required width of a stairway not more than 3½ inches at each side.

(3) All stairways forming an approved means of egress shall have treads not less than 8 inches wide, exclusive of the nosing, and the risers shall not exceed 8½ inches in height. Treads and risers shall be of uniform width and height in each individual stairway.

Generated for Susan K Kendall (Michigan State University) on 2018-09-05 16:48 GMT / http://hdl.handle.net/2027/mdp.49015002898253

(4) An inside stairway forming a means of egress consisting of 2 or more steps which in changing direction does so by benefit of the variance in the width along each tread, shall not be approved. This section does not prohibit a stairway with treads of uniform width throughout which changes directions by benefit of intermediate landings or platforms.

History: 1954 ACS 82, p. 76, Eff. Feb. 1, 1975.

R 400.2555 Existing fire escapes.

Rule 555. Existing fire escapes shall comply with specifications for new fire escapes except as follows:

(a) That they be certified in affidavit form from an architect or structural engineer attesting to their structural stability if so required by the appropriate inspecting authority.

(b) Handrails shall be no lower than 27 inches above the forward edge of the tread.

(c) Treads are not less than 8 inches exclusive of nosing.

(d) Risers are not more than 8½ inches.

(e) Vertical distance between platforms or landings in any flight of stairs does not exceed 15 feet.

(f) The width of stairs is not less than 36 inches.

History: 1954 ACS 82, p. 76, Eff. Feb. 1, 1975.

R 400.2556 New fire escapes.

Rule 556. New fire escapes shall be constructed in accordance with the following:

(a) Material may be of steel or nominal 2-inch lumber.

(b) Tubular and spiral slide type escapes are not permitted.

(c) An outside stairway constituting an approved means of egress shall be designed, constructed and maintained to support a live load of 100 pounds per square foot on platform and landings and a concentrated load of 400 pounds on stair treads.

(d) Supporting members of platforms, landings and stairs, which are in tension and are fastened directly to the building, shall pass through the wall and be fastened securely to the framework of the building. Whenever practicable, all outside stairways shall be self-supporting. Counterbalanced stairways are not permitted.

(e) On outside stairways, each landing or platform adjacent to an exit doorway of the building shall be not less than 3 inches or more than 8 inches below the sill level of the doorway. Each landing or platform shall be at least the full width of the doorway it serves and its depth shall be not less than the width of the widest outside stairway which leads directly to or from it. The landings or platforms shall be so designed and so constructed that exit doors, when open, will not decrease the required unobstructed width of the platform or stairs.

(f) Outside stairways considered as approved means of egress shall lead to ground level and the last step in descent to the ground shall not exceed the height of the riser immediately above.

(g) A ladder shall not be used as any portion of an approved means of egress.

(h) All outside stairs shall be provided with handrails on both sides 36 inches above the forward edge of the tread. At least 2 rails shall be provided equidistant between the handrail and the forward edge of the tread.

(i) Treads shall be not less than 9½ inches wide exclusive of nosing.

Digitized by Google

(j) Where the tread or platform surface is such as to involve danger of slipping, suitable non-slip surface shall be provided.

(k) Treads shall include an additional width of 1 inch as nosing when stairs are constructed with risers.

(l) The riser of stairs shall be not more than 7¾ inches.

(m) The maximum vertical distance between platforms or landings in any flight of stairs shall not exceed 12 feet.

(n) The required width of new outside stairways shall be not less than 44 inches.

(o) Outside stairways as part of approved means of egress shall be protected against fire in the building by blank or closed walls directly under such stairways and for a distance of 6 feet in all other directions. Windows may be allowed within this area if they are stationary, of steel sash and glazed with wired glass of at least ¼ inch in thickness.

(p) Outside stairways considered as approved egress passages and access therefrom to a public street or alley shall be maintained in safe condition for their intended use at all times. Stairways forming a part of an approved means of egress shall be maintained free from ice and snow at all times. There shall be no obstruction placed upon or within stairways or entrances thereto or any other waste material under or adjacent to such stairways.

(q) When deemed necessary by the inspection authorities stairways shall be provided with an approved shelter against ice and snow.

(r) When iron and steel fire escapes are constructed as part of an approved means of egress from a congregate facility, the balconies and stair treads shall comply with this rule and shall be made up of ⅜ inch by 1 inch straight bar set on edge spaced 1 inch apart from center to center.

History: 1954 ACS 82, p. 76, Eff. Feb. 1, 1975.

R 400.2557 Doors and doorways.

Rule 557. (1) All doorways leading to fire escapes shall be at floor level except where a proper approved ramp is provided. A ramp shall not exceed 1 foot of rise in 12 feet of run.

(2) Doors from resident bedrooms and doors forming a part of an approved means of egress shall be not less than 30 inches in width.

(3) Doors into stairway enclosures and doors serving other vertical openings shall be of equal fire resistant rating as the partition in which they are installed and be equipped with approved self-closing devices designed, installed and maintained to close the doors automatically. The doors shall be hung so as to allow for convenient manual opening and closing at all times. The doors shall be maintained in a closed position and shall have a prominent sign on each side with the following: "Keep Door Closed for Fire Safety." Any glass in the doors shall be ¼ inch wired glass not exceeding 6 square feet in area.

(4) All egress doors from resident occupied rooms shall be equipped with hardware which will ensure opening by a single motion, such as turning a knob or by pressure of a latch with normal strength. All doors provided or designated as exits, giving egress directly to the outside shall be equipped with approved anti-panic hardware or a knob type which is nonlocking against egress. The use of hooks and eyes, bolts, bars and similar devices, is expressly prohibited on doors provided for exit purposes or designated as exits.

(5) All doorways entering upon common use corridors or egress passages shall be protected by substantially constructed side-hinged, swing-type doors, so constructed as to provide a reasonably smoke tight enclosure.

(6) Existing transoms and like openings in corridors and passageways shall be permanently sealed and made fire resistant equal to the related partition construction.

History: 1954 ACS 82, p. 77, Eff. Feb. 1, 1975.

R 400.2558 Stairways and other vertical openings.

Rule 558. (1) Interior stairways shall be enclosed with material having a fire-resistant rating of not less than 1 hour in buildings of fire-resistant construction and of material having ½-hour fire-resistant rating in buildings of wood joist construction. One quarter inch wired glass in steel frame meets the ½-hour requirement.

(2) Elevator and dumbwaiter shafts shall be completely enclosed by noncombustible materials with a fire-resistant rating of not less than 1 hour. An opening shall not be allowed through the side wall enclosures for ventilating or other purposes. All doors servicing elevators and dumbwaiters shall be of solid construction, reasonably smoke tight when closed. Doors, lintels and panels above shall be constructed to resist fire for 1 hour, but where necessary such doors in elevators may have wired glass not to exceed 6 square feet.

History: 1954 ACS 82, p. 78, Eff. Feb. 1, 1975.

R 400.2559 Closets and store rooms.

Rule 559. Closets and store rooms for storage of ordinary combustibles shall comply with congregate facility requirements except such rooms shall be separated from the remainder of the building by construction having not less than ½-hour fire-resistant rating.

History: 1954 ACS 82, p. 78, Eff. Feb. 1, 1975.

R 400.2560 Rubbish handling and incinerators.

Rule 560. Incinerators and rubbish handling shall comply with the general provisions or their use shall be discontinued and all chute openings permanently sealed.

History: 1954 ACS 82, p. 78, Eff. Feb. 1, 1975.

R 400.2561 Laundry chutes.

Rule 561. Laundry chutes shall comply with the general provisions except that where existing laundry chute drop openings are properly protected with qualified laundry chute doors and are fed from corridors or other rooms, they shall not be required to be placed in specially designed rooms or compartments.

History: 1954 ACS 82, p. 78, Eff. Feb. 1, 1975.

R 400.2562 Interior finish.

Rule 562. (1) All interior finish shall be class A or B except that interior finish in individual rooms may be class C for walls only.

(2) All combustible finish material shall be applied to, or be furred out not more than 1 inch from a noncombustible surface with the space behind fire-stopped into areas extending not more than 8 feet in any direction.

(3) Where combustible interior finishes comprise more than 10% of the aggregate wall and ceiling surface of any room or space, and where such material is more hazardous than permitted in subrule (1) such combustible interior finish may be treated so as to comply with subrule (1) if the material is secured to walls or ceilings as specified in subrule (2).

(4) Where interior finish is more hazardous than class A, and where it is furred more than 1 inch from noncombustible wall or ceiling surfaces, it shall be replaced with noncombustible material or reinstalled to comply with the above requirements.

(5) Existing wood paneling or combustible acoustical interior finish in lobbies, waiting rooms and office areas in existing buildings, may be permitted to remain if the rooms or areas are separated from the rest of the building by proper walls and fire doors.

(6) In completely sprinklered buildings where the basic material is class C and is installed as specified above, no further treatment will be necessary. However, where the basic material is more hazardous than class C and is installed as specified above, it shall be surface treated on its exposed side whether or not the building is sprinklered.

(7) Class C interior finish in the form of wainscoting extending not over 5 feet above the floor and installed as previously specified, shall not be required to be surface treated in any event.

(8) Interior finish shall include the material of walls, partitions of fixed or movable type, ceilings and other exposed interior surfaces of buildings, comprising both the plaster, wood or other interior finish material. Doors, trim, backing of shelving, cabinets and wardrobes shall be included in the 10% permissible class C finish.

(9) The classification of interior finish materials as to their flame spread and smoke development shall be that of the basic material used without regard to subsequently applied paint or other covering, except where such paint or other covering is of such character or thickness or so applied as to affect materially the flame spread and smoke characteristics. Highly combustible material application such as lacquer or proxylin base materials or unapproved wall coverings shall not be used.

(10) Paints or coatings containing plastics, polyesters or epoxies may be used on noncombustible surfaces without proof of classification if not applied in excess of 8 mils total thickness.

History: 1954 ACS 82, p. 78, Eff. Feb. 1, 1975.

R 400.2563 Cooking appliances.

Rule 563. (1) Cooking appliances shall be suitably installed in accordance with approved safety practices.

(2) Where metal hoods or canopies are provided over main kitchen cooking appliances, they shall be equipped and designed in compliance with the current edition of the national fire protection association's pamphlet no. 96, removal of smoke and grease-laden vapors from commercial cooking equipment.

(3) Filters shall be maintained in an efficient condition and kept clean at all times.

(4) Only vapor-proof type electrical wiring and equipment shall be permitted in hoods or canopies.

(5) Exhaust ducts from hoods shall be run to the outside by the shortest possible route, and when run through open spaces between a ceiling and a floor or roof, or through any floors above, shall be enclosed in horizontal or vertical shafts protected from the remainder of the building by construction which will afford a 2-hour fire-resistant rating.

History: 1954 ACS 82, p. 79, Eff. Feb. 1, 1975.

R 400.2564 Heating plants.

Rule 564. (1) In existing facilities the central heating plant shall be segregated in a room having walls, ceiling and floor constructed of materials having at least 1-hour fire-resistant rating.

(2) Doorways and other openings through required enclosures for heating plants shall be by doors and frames of the same fire-resistant quality as is required of the enclosure, hung so as to be reasonably smoke tight and equipped with adequate self-closing devices.

(3) Furnace rooms or enclosures shall be provided with an air vent directly to the outside, sufficient to admit the required volume of air to support proper combustion. The air vents shall be open at all times. Vents may be protected by louvers or other approved devices.

(4) Gas or electric meters shall not be permitted within 5 feet of the heating plant.

(5) Space heaters are not permitted in any congregate facility.

History: 1954 ACS 82, p. 79, Eff. Feb. 1, 1975.

R 400.2565 Air conditioning and air handling systems.

Rule 565. (1) Where power exhaust ventilation is to be used, there shall be an air supply equal to the amount exhausted, especially in areas housing combustion equipment, lest negative pressures be developed, resulting in reversal of drafts in chimney flues.

(2) Fan and air handling equipment used for recirculating air in more than 1 room or single area, shall be located in a room cut off from other portions of the building by construction having at least 1-hour fire-resistance rating. Rooms housing fans and air handling equipment shall not be used for any combustible storage.

(3) All ducts and plenums employing mechanical means for the movement of air and used for heating and ventilation, including warm air heating systems, plain ventilating systems, air conditioning systems or exhaust systems, shall be constructed entirely of noncombustible material. Where ducts and plenums of existing systems are constructed, wholly or in part, of combustible materials, they shall be reconstructed entirely of noncombustible materials if possible. Where revamping or reconstruction is impractical due to design or construction, the inspecting authority may accept the existing installation if heat-actuated fire dampers are installed in each return air duct opening from every room or space.

(4) Heat-actuated fire dampers shall be installed on the discharge side of each recirculating fan unit serving more than 1 room or single area; and where practicable and feasible, there shall be an approved thermostatic device with a setting not in excess of 125 degrees Fahrenheit located in the system at a suitable point in the return air duct ahead of the fresh air intake, actuation of which shall open the electrical circuit supplying the fan motor. Where it is impracticable to locate a thermostatic device ahead of the fresh air intake, an approved heat or smoke actuated device, actuation of which will open the electrical circuit supplying the fan motor, shall be located at a suitable point in the air duct on the discharge side of the fan.

(5) Where existing systems utilize corridors or exitways as return air plenums, the system shall be revamped to eliminate this condition. When revamping is impractical due to design or construction, the inspecting authority may accept the existing system if an approved smoke detector is installed in each separated area of the corridors or exitways to automatically open the electrical circuit supplying the fan motor. Smoke detectors shall incorporate visual or audible signals to

indicate any trouble which would interfere with proper operation of the devices. Stairways shall not be used as return plenums.

History: 1954 ACS 82, p. 79, Eff. Feb. 1, 1975.

R 400.2566 Sprinkler protection.

Rule 566. (1) An automatic sprinkler system shall be installed in all congregate facilities as herein required.

(2) Where an adequate supply of water is available, sprinkler systems shall be installed to protect the following areas: heating plant rooms housing incinerators of more than 2 bushel capacity, incinerator rooms, laundry rooms, storage rooms for combustible material including janitor rooms and closets, clean and dirty linen rooms, receiving rooms, maintenance shops, laundry and rubbish receiving rooms or bins, laundry and rubbish chute feed rooms, the tops and various levels where required of laundry and rubbish chutes and kitchen storage rooms. Where an adequate supply of water is not available, these areas shall be protected with an approved automatic fire detection system.

(3) Water supplies and flow alarms shall be in accordance with new construction requirements.

(4) Complete shop drawings shall be submitted to the appropriate inspecting authority for approval before any sprinkler installation is made.

History: 1954 ACS 82, p. 80, Eff. Feb. 1, 1975.

R 400.2567 Automatic fire detection system.

Rule 567. (1) An automatic fire detection system as defined shall be installed in all facilities as required by these rules.

(2) Electrical supply for a system shall be installed on a separate circuit in metallic conduit, fused ahead of the main entrance switch.

BUREAU OF MEDICAL ASSISTANCE

MEDICAL ASSISTANCE PROGRAM

(By authority conferred on the director of the department of social services by sections 6 and 9 of Act No. 280 of the Public Acts of 1939, as amended, being §§400.6 and 400.9 of the Michigan Compiled Laws)

R 400.3351 Invoices or claim adjustments; identification of physician, dentist, or other practitioner.

Rule 1. The department may, in the interest of utilization review and control, require identification of the attending, referring, or prescribing physician, dentist, or other practitioner on all invoices or claim adjustments submitted by medical or clinical laboratories, pharmacies, and hospitals enrolled in the medical assistance program. The attending, referring, or prescribing physician's, dentist's, or other practitioner's medical assistance program identification number or an alternative appropriate number which has been approved by the bureau of medical assistance shall be used to identify the attending, referring, or prescribing physician, dentist, or other practitioner.

History: 1954 ACS 96, p. 92, Eff. Aug. 8, 1978.

BUREAU OF ADMINISTRATIVE HEARINGS

MEDICAID PROVIDER REVIEWS AND HEARINGS

(By authority conferred on the director of the department of social services by sections 6 and 9 of Act No. 280 of the Public Acts of 1939, as amended, being §§400.6 and 400.9 of the Michigan Compiled Laws)

R 400.3401 Definitions.

Rule 1. As used in these rules:

(a) "Adverse action" includes, but is not limited to:

(i) A suspension or termination of provider participation in the medical assistance program.

(ii) A denial of an applicant's request for participation in the medical assistance program.

(iii) A denial, revocation, or suspension of a license or certification issued by the department to allow a facility to operate.

(iv) The reduction, suspension, or adjustment of provider payments.

(v) Retroactive adjustments following the audit or review and determination of the daily reimbursement rates for institutional providers.

(b) "Applicant" means an individual, firm, corporation, association, agency, institution, or other legal entity that has made formal application to participate in the medical assistance program as a provider.

(c) "Bureau" means the bureau of medical assistance of the Michigan department of social services.

(d) "Bureau director" means the director of the bureau of medical assistance, Michigan department of social services.

Digitized by Google
Original from UNIVERSITY OF MICHIGAN

(e) "Bureau representative" means a person, agency, or entity which is authorized to review the patient care rendered by a provider or applicant or which is authorized to make audits and reviews of the records, procedures, reports, accounting methods, and billing practices of the provider or applicant, as well as the propriety of same.

(f) "Delegate" means a person who is authorized to act on behalf of the bureau director.

(g) "Department" means the Michigan department of social services, its officials, or agents.

(h) "Director" means the director of the Michigan department of social services.

(i) "Final determination notice" means a notice of an adverse action which includes the action to be taken; the date of the proposed action; the reason for the action; the statute, rule, or guideline under which the action is taken; and the right to a hearing.

(j) "Hearing authority" means the person appointed by the director to decide appeals from decisions of an administrative law judge.

(k) "Medical assistance program" means the department's program to provide for medical assistance established by section 105 of Act No. 280 of the Public Acts of 1939, as amended, being §400.105 of the Michigan Compiled Laws, and title XIX of the federal social security act, 42 U.S.C. §1396 et seq.

(l) "Notice," when notification by the department is indicated or required, means notice which meets the requirement of section 71(2) of Act No. 306 of the Public Acts of 1969, being §24.271(2) of the Michigan Compiled Laws. Notification shall be by certified or registered mail, with return receipt requested, to the last address of the provider or other party on file with the department.

(m) "Provider" means an individual, firm, corporation, association, agency, institution, or other legal entity which is providing, or has been approved to provide, medical assistance to a recipient pursuant to the medical assistance program.

(n) "Recipient" means an individual receiving medical assistance through the department.

History: 1954 ACS 95, p. 62, Eff. Mar. 23, 1978.

R 400.3402 Preliminary conference; initial findings; request for bureau conference; final determination letter.

Rule 2. (1) The bureau shall, prior to the taking of an adverse action, hold a preliminary conference with the provider or applicant, or with the representative thereof, to discuss the results of the investigation. The provider or applicant shall be advised of the preliminary conference in writing. The provider or applicant may submit any additional information which the provider or applicant wishes to be considered prior to the closing of the investigation.

(2) Within 10 calendar days of the completion of the preliminary conference, the bureau representative shall inform the provider or applicant, in written form, of his initial findings including copies of all written reports which influenced the findings. At the same time, the bureau representative shall inform the provider or applicant of the right to a conference with the bureau director or his delegate.

(3) Within 20 calendar days of receipt of the initial findings by the provider or applicant, the provider or applicant may request, in writing, a bureau conference. If the provider or applicant makes a timely request for a bureau conference, the provider or applicant shall, at the same time, submit a written response to the initial findings.

(4) If no timely request for a bureau conference is made by a provider or applicant, a final determination letter shall be mailed pursuant to R 400.3405.

History: 1954 ACS 95, p. 62, Eff. Mar. 23, 1978.

R 400.3403 Bureau conference.

Rule 3. (1) The bureau director or his delegate shall hold a conference with a provider or applicant prior to the determination of an adverse action upon request of the provider or applicant. The bureau director or his delegate shall review the initial findings and the written statements or oral statements, or both, of the provider or applicant.

(2) If the bureau conference is held by a delegate, the delegate shall make a recommedation to the bureau director. The recommendation shall be prepared and shall address itself to the initial findings and the written or oral statements of the provider or applicant. A copy of that recommendation shall be forwarded to the provider or applicant within 10 calendar days after the end of the conference.

History: 1954 ACS 95, p. 63, Eff. Mar. 23, 1978.

R 400.3404 Decision to take an adverse action.

Rule 4. (1) The bureau director shall, within 30 days after the completion of the bureau conference, decide whether to take an adverse action against an applicant or provider.

(2) The bureau director may, in his discretion, consult with independent professional personnel in the applicable field, as long as the recommendations of such professionals are in writing, are made available to all parties of the hearings, and are incorporated in the record.

History: 1954 ACS 95, p. 63, Eff. Mar. 23, 1978.

R 400.3405 Final determination notice.

Rule 5. Prior to the taking of an adverse action, the provider shall receive a final determination notice.

History: 1954 ACS 95, p. 63, Eff. Mar. 23, 1978.

R 400.3406 Formal hearing.

Rule 6. (1) A provider or applicant is entitled to a hearing pursuant to chapter 4 of Act No. 306 of the Public Acts of 1969, being §24.271 et seq. of the Michigan Compiled Laws, in any case in which there has been a final determination of an adverse action as defined in R 400.3401, except where that action is predicated upon the situation described in subrule (2).

(2) A request for a formal hearing shall not be granted if the adverse action is the result of the revocation, suspension, or termination, by an authority other than the department, of the provider's license or certification to practice in the provider's profession or to operate a nursing home, hospital, or other such medical facility, and if the department is in receipt of a certified copy or formal notification of such revocation, suspension, or termination.

(3) A formal hearing shall be granted if the revocation, suspension, or termination of the provider's license, certification, or authorization is the result of a department action, unless the provider previously had an opportunity to have that action reviewed.

(4) Unless a written request for a formal hearing is received within 30 calendar days of notification of intent to terminate, the provider's participation shall automatically terminate as of the thirtieth calendar day after date of notification. Such termination shall then be a final and binding administrative determination.

(5) The request shall identify those aspects of the determination with which the provider or applicant is dissatisfied; shall explain why the provider or applicant believes the determination on those matters is incorrect; shall set out the dollar amount involved, if any; and shall be submitted with any documentary evidence the provider or applicant considers necessary to support its position.

History: 1954 ACS 95, p. 63, Eff. Mar. 23, 1978.

R 400.3407 Suspension and adjustment of program payments.

Rule 7. (1) Regardless of any request for a hearing, payments on pending and subsequently submitted bills may be immediately suspended, in whole or in part, if the bureau director determines that the practice set out in the final determination requires immediate action to protect the health, safety, or welfare of recipients or the general public. This subrule does not prejudice the provider's right to a hearing as provided in R 400.3406. Any hearing requested pursuant to this subrule shall be commenced forthwith if requested by the provider.

(2) The final determination notice shall constitute the basis for making retroactive adjustment of any program payments made to the provider during the period to which the determination applies, including the suspension of further payments to the provider, in order to recover, or to aid in the recovery of, an overpayment identified in the determination to have been made to the provider or applicant. If the provider or applicant requests a hearing, adjustments and recovery shall not be made, except as provided in subrule (1), until 10 days after the mailing of the hearing decision as provided in R 400.3424.

History: 1954 ACS 95, p. 63, Eff. Mar. 23, 1978.

R 400.3408 Filing final determination notice with bureau of administrative hearings.

Rule 8. The bureau of medical assistance shall file with the bureau of administrative hearings, within 30 days after receipt by the department of the hearing request, a copy of the final determination notice and supporting documentation.

History: 1954 ACS 95, p. 64, Eff. Mar. 23, 1978.

R 400.3409 Notice of hearing.

Rule 9. Notice of the time, date, place of hearing, and name of the administrative law judge shall be mailed to the parties, or their designated representative, not less than 10 days before the date of the hearing.

History: 1954 ACS 95, p. 64, Eff. Mar. 23, 1978.

R 400.3410 Appearance and representation.

Rule 10. In any pending procedure:

(a) A natural person may appear and be heard on that person's own behalf, through an attorney at law, or through a designated representative.

(b) A corporation may appear and present evidence by any bona fide officer or employee, through an attorney at law, or through a designated representative. All persons appearing in proceedings before the department shall conform to the standards of conduct practiced by attorneys before the courts of this state. If a person does not conform to the standards, the administrative law judge may decline to permit the person to appear in the proceeding, or may exclude the person from the proceeding.

History: 1954 ACS 95, p. 64, Eff. Mar. 23, 1978.

R 400.3411 Notice of appearance.

Rule 11. A person appearing in a representative capacity shall file a written notice of appearance on behalf of a provider or applicant, identifying himself by name, address, and telephone number, and identifying the party represented, and shall have a written authorization to appear on behalf of the provider or applicant. The department shall notify the bureau of administrative hearings and the provider or applicant of the name and telephone number of its representative.

History: 1954 ACS 95, p. 64, Eff. Mar. 23, 1978.

R 400.3412 Papers filed in proceeding; formal requirements.

Rule 12. (1) All papers filed in a proceeding shall be typewritten and double-spaced on standard legal sized white paper, using 1 side of the paper only. The papers shall have a cover sheet, with a caption clearly showing the title of the proceeding in connection with which such papers are filed, together with the register number, if any.

(2) All papers shall be signed by the party attorney, or a designated representative, and shall contain the signer's business address and telephone number. The original shall be filed with the bureau of administrative hearings.

History: 1954 ACS 95, p. 64, Eff. Mar. 23, 1978.

R 400.3413 Service and proof of service.

Rule 13. (1) All papers, notices, and other documents shall be served by the party filing them upon all parties to the proceeding. Proof of that service upon all parties shall be filed with the bureau of administrative hearings.

(2) Service shall be made by delivering in person, or by depositing in the United States mail, properly addressed with postage prepaid, 1 copy to each party entitled thereto. When any party has appeared by attorney, service upon the attorney shall be deemed service upon the party.

(3) Proof of service of a paper shall be by affidavit or acknowledgement.

History: 1954 ACS 95, p. 64, Eff. Mar. 23, 1978.

R 400.3414 Computation of time periods.

Rule 14. In computing any period of time prescribed or allowed, the day of the act, event, or default after which the designated period of time begins to run is not included. The last day of the period so computed is included, unless it is a Saturday, Sunday, or legal holiday, in which event the period runs until 5 p.m. of the next business day which is neither a Saturday, Sunday, nor holiday. When the period of time prescribed is 7 days or less, intermediate Saturdays, Sundays, and holidays shall be excluded in the computation.

History: 1954 ACS 95, p. 65, Eff. Mar. 23, 1978.

R 400.3415 Certification of documents.

Rule 15. The signature of a person signing a document constitutes a certification that he has read the document and that, to the best of his knowledge, information, and belief, every statement contained in the instrument is true.

History: 1954 ACS 95, p. 65, Eff. Mar. 23, 1978.

R 400.3417 Prehearing conference.

Rule 17. The administrative law judge, on his own motion or at the request of a party, may hold a prehearing conference, to be held in an office or place designated by the bureau of administrative hearings before an administrative law judge. The conference shall be convened for, but not limited to, the following purposes:

(a) The simplification of factual and legal issues.

(b) The necessity or desirability of amendments to the pleadings.

(c) The making of admissions or stipulations of fact, including all material facts that are pertinent to the dispute.

(d) The identification of witnesses and exchange of information regarding the subject matter of their testimony.

(e) The identification and exchange of documentary evidence to be introduced at the hearing.

(f) The consideration of the possibilities for settlement of the issues.

(g) The discussion of such other matters as may aid in the simplification and disposition of the proceedings.

History: 1954 ACS 95, p. 65, Eff. Mar. 23, 1978.

R 400.3418 Administrative law judge; powers.

Rule 18. In addition to the powers granted in chapter 4 of Act No. 306 of the Public Acts of 1969, an administrative law judge shall have the power to:

(a) Administer oaths or affirmations.

(b) Sign and issue subpoenas in the name of the agency, requiring attendance and the giving of testimony by witnesses.

(c) Sign and issue subpoenas in the name of the agency for the production of books, papers, and other documentary evidence to the extent permitted by law.

(d) Regulate the course of a hearing, set the time and place for continued hearings, and fix the time for filing of briefs and other documents.

(e) Provide for the taking of testimony by depositions.

(f) Rule upon offers of proof and to receive evidence.

(g) Hold conferences before or during the hearing for the purpose of simplification of issues and for such other purposes as the demands of justice require.

(h) Rule on motions and to dispose of procedural requests or similar matters.

(i) Prescribe general rules of hearing decision or conduct.

(j) Determine any and all issues presented at the hearing, including the denial of an application or termination of a provider from the medical assistance program.

History: 1954 ACS 95, p. 65, Eff. Mar. 23, 1978.

R 400.3419 Rules of discovery.

Rule 19. Insofar as is practical, the administrative law judge shall follow the rules of discovery as applied in a nonjury civil case, as contained in the Michigan general court rules.

History: 1954 ACS 95, p. 65, Eff. Mar. 23, 1978.

R 400.3420 Hearing procedure generally; evidence; filing of written statements.

Rule 20. (1) Procedure shall be in accordance with chapter 4 of Act No. 306 of the Public Acts of 1969. The hearing shall be open to the parties, their designated representatives, and to such other persons as the administrative law judge deems proper. The administrative law judge shall receive in evidence the relevant

testimony of witnesses and any documents which are relevant and material to the subject of the hearing, pursuant to section 75 of Act No. 306 of the Public Acts of 1969. The order in which evidence and allegations are presented, and the procedure at the hearing, shall be at the discretion of the administrative law judge, and shall be of such a nature as to afford the parties due process.

(2) The parties, upon their request, shall be allowed a reasonable time, not to exceed 15 days after the close of the hearing, for the filing of written statements in support of their positions.

History: 1954 ACS 95, p. 65, Eff. Mar. 23, 1978.

R 400.3421 Confidentiality.

Rule 21. At all times during the procedures outlined in these rules, measures shall be taken to insure the confidentiality of all privileged medical information and to safeguard the disclosure and use of information regarding recipients of medical assistance.

History: 1954 ACS 95, p. 66, Eff. Mar. 23, 1978.

R 400.3422 Record of proceedings.

Rule 22. A complete record of the proceedings at the hearing shall be made. The testimony shall be transcribed and copies of other documentary evidence shall be reproduced in any case when directed by the administrative law judge. The record shall also be transcribed and reproduced at the request of a party to the review, if that party bears the cost thereof.

History: 1954 ACS 95, p. 66, Eff. Mar. 23, 1978.

R 400.3423 Recommended decision of administrative law judge; exceptions.

Rule 23. (1) As soon as practicable after the close of a hearing, the administrative law judge shall prepare a recommended decision in the case, which shall be based upon the evidence adduced at the hearing or otherwise included in the record. The recommended decision shall be made in writing and shall contain findings of fact and conclusions of law. A copy of the recommended decision shall be mailed to each party to the hearing at that party's last known address.

(2) Any party may, within 10 days of the administrative law judge's decision, file exceptions for the consideration of the director or hearing authority. The exceptions shall be mailed to all parties and shall be made a part of the record.

History: 1954 ACS 95, p. 66, Eff. Mar. 23, 1978.

R 400.3424 Final decision of director or hearing authority.

Rule 24. The director or hearing authority shall render a final decision in each case based upon the evidence in the record not later than 45 days after the administrative law judge makes his recommendation. The decision shall be made in writing. A copy of the decision shall be mailed to each party at the party's last known address. Copies of all decisions of the director or hearing authority shall be accessible to the public at the state office of the department. Copies may be obtained at actual cost.

History: 1954 ACS 95, p. 66, Eff. Mar. 23, 1978.

R 400.3425 Nonapplicability of rules to alternate method of hospital reimbursement.

Rule 25. R 400.3401 to R 400.3423 do not apply to the alternate method of hospital reimbursement. That method shall follow the procedures in the approved state medical assistance plan.

History: 1954 ACS 95, p. 66, Eff. Mar. 23, 1978.

OFFICE OF INCOME ASSISTANCE

EMERGENCY NEEDS PROGRAM

(By authority conferred on the department of social services by sections 6, 14, 24, 52, and 68 of Act No. 280 of the Public Acts of 1939, as amended, being §§400.6, 400.14, 400.24, 400.52, and 400.68 of the Michigan Compiled Laws)

R 400.3501 Definitions; A.

Rule 1. As used in these rules:

(a) "Act" means Act No. 280 of the Public Acts of 1939, as amended, being §400.1 et seq. of the Michigan Compiled Laws.

(b) "Application" means a request for assistance or services that is in writing on a form prescribed by the department and signed by the applicant, his authorized representative, or, if the applicant's mental or physical condition is such that he is unable to participate in the application process, a person acting responsibly in the applicant's behalf.

(c) "Authorization period" means the 30-day period immediately following the initial authorization of payment resulting from an application.

(d) "Authorized representative" or "a person acting responsibly in the applicant's behalf" means a person who is not less than 18 years of age and has sufficient knowledge of the client's circumstances to provide or obtain the necessary information.

(e) "Available resource" means an asset that the client can secure with a minimum of delay.

History: 1954 ACS 99, p. 94, Eff. Apr. 20, 1979.

R 400.3502 Definitions; C to E.

Rule 2. As used in these rules:

(a) "Caretaker" means a person, related or unrelated, who functions as a parent for a dependent child.

(b) "Client" means an applicant for, or recipient of, assistance or services, and includes all members of the eligible group.

(c) "Department" means the state department of social services.

(d) "Dependent child" means a person under age 18 who is living with any of the following:

(i) A parent.

(ii) An adult relative.

(iii) An unrelated adult who functions as a parent.

(e) "Designated income" means unearned income paid by or through an agency to, or in behalf of, a child in the eligible group in an amount sufficient to meet the assistance needs of that child.

(f) "Director" means the director of the state department of social services.

(g) "Divestment" means the disposition of property without receiving its quick sale market value, with the intent of becoming or remaining eligible for, or increasing the amount of, emergency needs, or to avoid making reimbursement of emergency needs received.

(h) "Dwelling unit" means a shelter, such as a house, apartment, or mobile home.

(i) "Earned income" means cash received by a person for activities engaged in as a self-employed person, as an employee, from renting property, or from providing room and board.

(j) "Eligibility factor" means a requirement that shall be met for receipt of assistance.

(k) "Eligible group" means a client; a client and the client's spouse; or a client, the client's spouse, and minor dependent children, whether related or not, who are living in a single dwelling unit.

(l) "Emergency" means a situation in which immediate action is necessary to avoid destitution, to establish or reestablish a home, or to provide for the immediate needs of an eligible group to relieve or prevent serious harm.

(m) "Emergency period" means the 30-day period immediately following the date the application is received by the department.

(n) "Equity" means the current market value of property minus any liens and indebtedness on the property and minus the reasonable expenses necessary to liquidate the property.

(o) "Exempt property" means property that is not considered in determining eligibility for assistance.

History: 1954 ACS 99, p. 94, Eff. Apr. 20, 1979.

R 400.3503 Definitions; G to I.

Rule 3. As used in these rules:

(a) "Group living facility" means a residence operated by a public agency or private organization that provides lodging, food, and social or health services to related or unrelated individuals who sleep and eat at the residence.

(b) "Home repairs" means repairs to the basic structure, plumbing system, water supply system, electrical system, waste disposal system, or heating system of a house or mobile home.

(c) "Homestead" means property that is occupied as a home and which is owned or being purchased. It includes buildings on leased land, mobile homes, or property in which a life lease or life estate is held, and includes adjoining land. A person may have only 1 homestead at any 1 time.

(d) "Household goods" means personal property customarily found in the home and used in connection with the maintenance, use, and occupancy of the premises. It includes items necessary for an adequate standard of sustenance, accommodation, comfort, information, and entertainment of occupants and guests. Examples of household goods include furniture, furnishings, linens, household appliances, and cooking and eating utensils.

(e) "Income" means all earned or unearned monies received by a client.

History: 1954 ACS 99, p. 95, Eff. Apr. 20, 1979.

R 400.3504 Definitions; L to P.

Rule 4. As used in these rules:

(a) "Living together" means persons are sharing a home. A person who is away from home for employment, hospitalization, vacations, or visits is living together with his family. A child away at school is living together with his family if he intends to resume living at home, as evidenced by the child's returning home on occasional weekends and holidays and during summer vacations.

(b) "Market value" of property means the price that the owner would receive if he disposed of the property on short notice, possibly without the opportunity to realize the full potential on his investment in the property.

(c) "Payee" means the person to whom payments are made.

(d) "Personal effects" means personal property normally recognized as incidental items intended for personal use, such as clothing, jewelry, watches, personal grooming articles, books, musical instruments, and hobby equipment.

(e) "Personal property" means everything that is subject to ownership that is not real property.

(f) "Potential resource" means an asset that may be available to a client if action is taken to obtain it.

(g) "Property" means real and personal, tangible and intangible resources that a client owns or possesses, in which he has a legal interest, and which he has the legal ability to use or dispose of.

History: 1954 ACS 99, p. 95, Eff. Apr. 20, 1979.

R 400.3505 Definitions; R to V.

Rule 5. As used in these rules:

(a) "Real property" means land and objects affixed to the land, such as buildings, fences, crops, and trees.

(b) "Resource" means income or property that may be used to meet subsistence.

(c) "Standard of need" means a dollar amount that is established by the department and intended to meet all subsistence requirements of an eligible group.

(d) "Unearned income" means any income, other than earned income, and includes, but is not limited to, money received from pensions, benefits, property, support, or compensation.

(e) "Vendor" means a provider of a service or a product.

(f) "Verification" means documentation or collateral proof used to confirm the validity of a client's reported circumstances.

History: 1954 ACS 99, p. 96, Eff. Apr. 20, 1979.

R 400.3506 Application for emergency needs; completing required forms and providing relevant documentation to department; eligibility determination based on conditions and resources existing during emergency period; request for assistance after authorization period.

Rule 6. (1) Any person may apply for emergency needs for himself or as an authorized representative of another person. This right to apply shall not be limited or denied due to age, race, nationality, ethnic background, sex, political opinions, religious beliefs, physical or mental handicaps, or ability to work.

(2) To receive emergency needs, an individual shall be named on an application that bears his signature or that of a person acting responsibly in his behalf.

(3) An application is considered completed when all of the following are done:

(a) The application form prescribed by the department has been filled out.

(b) The application has been signed by the applicant.

(c) The application has been received by the department.

(4) To assist the department in determining eligibility for assistance, a client shall complete forms required by the department or provide information needed for completion of such forms. When required by the department, completion of forms includes signature by the client and the client's spouse if the spouse is living with the client.

(5) A client shall cooperate in the eligibility determination process by providing any available documentation or by obtaining documentation in regard to identity, the existence and nature of the emergency, income, property, resources, the cost of resolving the emergency, liability for shelter, heat, and utility costs, and the amount of shelter costs.

(6) Eligibility shall be determined on the basis of conditions and resources as *they exist* during the emergency period. If assistance is requested after the end of

Google Original from UNIVERSITY OF MICHIGAN

the authorization period, a new application and determination of eligibility is required.

History: 1954 ACS 99, p. 96, Eff. Apr. 20, 1979.

R 400.3507 Proof of eligibility.

Rule 7. (1) Proof of eligibility, as required by section 55(e) of the act, is considered to exist when verification of the following items has been obtained: the existence of an emergency; the source, dates, and amount of income; the identity of the client; the cost of resolving the emergency; and the ownership and value of property.

(2) An applicant's obligation to furnish proof that the applicant is entitled to the aid, relief, assistance, or benefit sought is met if the applicant furnishes the information required on the application and the verifying statements or documents required by the department. Failure on the part of the client to cooperate in obtaining proof of eligibility shall be reason to deny assistance.

History: 1954 ACS 99, p. 96, Eff. Apr. 20, 1979.

R 400.3508 Responsibility to meet emergency needs; referral to private agencies.

Rule 8. The department has primary responsibility to meet emergency needs, as provided by the department, for persons applying for and found to be eligible for the emergency needs program. Referral of eligible persons to private agencies for assistance to meet emergency needs is to be made only when the local office of the department has a written agreement with the private agency providing for such referrals.

History: 1954 ACS 99, p. 97, Eff. Apr. 20, 1979.

R 400.3509 Assistance; general requirements.

Rule 9. No assistance shall be granted until all of the following requirements are satisfied:

(a) An application has been completed.

(b) A face-to-face interview has been conducted by the department with the person applying for assistance.

(c) The application is signed in the presence of a department worker and the worker witnesses the applicant's signature.

(d) All necessary information required for determination of eligibility has been furnished and necessary verifications are in the case record.

History: 1954 ACS 99, p. 97, Eff. Apr. 20, 1979.

R 400.3510 Determination of eligibility within 7 working days required.

Rule 10. Eligibility for emergency needs shall be determined as soon as possible, but not more than 7 working days from the date the application is completed.

History: 1954 ACS 99, p. 97, Eff. Apr. 20, 1979.

R 400.3511 Divestment of resources by client.

Rule 11. A client who divests himself or herself of property or other resources within 1 year prior to the application for emergency needs may be ineligible for emergency needs.

History: 1954 ACS 99, p. 97, Eff. Apr. 20, 1979.

R 400.3512 Eligibility of supplemental security income recipient.

Rule 12. A person who is receiving supplemental security income paid by the social security administration is eligible as to income and property for the emergency needs program insofar as such income and property were considered in determining eligibility.

History: 1954 ACS 99, p. 97, Eff. Apr. 20, 1979.

R 400.3513 Assistance; issuance; form; standard rates; approval by department.

Rule 13. (1) The department shall issue assistance for which a client is eligible in the form of direct vendor payments to the provider or in the form of direct payments to the client for assistance for food, clothing, tools and clothing for employment, or transportation. The department shall determine what items are to be provided and shall establish standard rates for items provided through the emergency needs program. These rates may vary among shelter areas and heating zones defined by the department. Prior authorization from the department shall be required except when the emergency need occurs before or after regular office hours of the department, in which case payment may be made if the client files an application within 10 days of the emergency.

(2) Issuance may be approved only during the authorization period. Payment may be made only for services approved during the authorization period.

History: 1954 ACS 99, p. 97, Eff. Apr. 20, 1979.

R 400.3514 Eligibility; exempt income; available unearned income.

Rule 14. (1) Income that is exempt from consideration in determining eligibility for emergency needs consists of the following:

(a) Income in kind.
(b) Food stamp coupons.
(c) Michigan homestead property tax credit.
(d) Relocation assistance.
(e) Child foster care payments.
(f) Benefits received under any of the following programs:
(i) Title VII nutrition program for the elderly.
(ii) Retired senior volunteer program.
(iii) Foster grandparent program.
(iv) Older Americans community service program.
(v) Domestic volunteer service program.
(vi) Child nutrition program.
(vii) National school lunch program.
(g) All of the department's services program benefits paid in behalf of a client.
(h) Earned income of persons under age 14.
(i) Work incentive payments through the Michigan employment security commission.
(j) Earned income of high school students employed less than 20 hours a week.
(k) Judgment funds and payments to members of Indian tribes.

(2) Unearned income shall be considered available to meet the need of an eligible group in the amount received. Such income includes, but is not limited to, all of the following:

(a) Social security retirement, survivors, and disability insurance benefits.
(b) Alimony.
(c) Child support.
(d) Veterans' administration benefits.

(e) Workers' compensation benefits.

(f) Unemployment benefits, including unemployment compensation benefits, railroad unemployment benefits, and other governmental unemployment benefits.

(g) Payments from private sick and accident insurance plans.

(h) Pensions and retirement benefits.

(i) Strike benefits.

(j) Income received by a client from the sale of property on a land contract or mortgage, including principal and interest.

(k) Military allotments.

(l) Investment income, such as dividends, interest, and royalties.

(m) Income from annuities, bonds, stock, and trusts.

(3) Net income received or to be received in the 30-day period following the date the application is completed shall be deducted from the budgeted need for the emergency period.

(4) A recipient of aid to families with dependent children or general assistance is eligible as to income for the emergency needs program if he has no earned income. Earned income shall be considered available to meet emergency need except for 50% of the earned income up to a maximum of $100.00 per budget period per person, which shall be considered the expense of earning the income. No other deductions from earned income shall be considered except the amount of court-ordered child support paid by a client.

(5) Eligibility as to income for a person not receiving aid to families with dependent children or general assistance shall be determined on the basis of the general assistance standards for earned and unearned income as found in the general assistance manual published by the department as DSS Manual 58 (2-76), except as otherwise provided in these rules.

History: 1954 ACS 99, p. 97, Eff. Apr. 20, 1979.

R 400.3515 Eligibility; property.

Rule 15. (1) Noncash property of recipients of aid to families with dependent children, general assistance, food stamps, or medical assistance which was considered in determining eligibility is exempt from consideration.

(2) An eligible group in which all members are not receiving supplemental security income, aid to families with dependent children, general assistance, food stamps, or medical assistance is eligible for the emergency needs program if the members' equity in noncash property does not exceed $1,750.00 for a single person or $3,000.00 for 2 or more persons.

(3) Cash property in excess of $50.00 of persons not receiving supplemental security income is considered available to meet the cost of the emergency need.

(4) To be relevant to a determination of eligibility, the property in question shall be legally available to the client and shall be salable.

(5) In determining the equity in property, the costs incurred in selling the property plus any encumbrances against the property shall be deducted from the market value of the property.

(6) Property exempt from consideration consists of all of the following:

(a) Homestead.

(b) Household goods.

(c) Personal goods.

(d) One burial space per eligible group member.

(e) Farm stock and equipment up to a value of $750.00.

(f) Hand tools of a trade or business.

(g) One motor vehicle used as the primary means of transportation.
(h) Cash value of life insurance policies.

History: 1954 ACS 99, p. 98, Eff. Apr. 20, 1979.

R 400.3516 Eligibility; reimbursement of refunded security deposits and certain assistance grants.

Rule 16. As a condition of eligibility for emergency needs, an applicant shall agree to make reimbursement of (a) a security deposit for shelter or utilities paid by the department when refunded by the landlord or utility company, (b) the assistance granted to the extent of any lump sum payment except those benefits excluded by law, or (c) the assistance granted pending reissuance of a lost or stolen assistance warrant.

History: 1954 ACS 99, p. 99, Eff. Apr. 20, 1979.

R 400.3517 Eligibility; evaluating need and resources of eligible group members.

Rule 17. The need and resources of each member of the eligible group shall be evaluated in determining eligibility for assistance to meet emergency needs. All available resources of each member of the eligible group shall be applied against the needs of the group, including the cost of the emergency, in determining the amount of assistance to be issued, except that a member of the eligible group who is under 18 years of age and who has designated income sufficient to meet his needs shall be excluded from the eligible group unless he is the only member.

History: 1954 ACS 99, p. 99, Eff. Apr. 20, 1979.

R 400.3518 Agreement by client to make potential resources available.

Rule 18. A client shall agree to take all possible action to make potential resources available before emergency needs are issued. These resources may include, but are not limited to, the following:

(a) All nonexempt property.
(b) Support from legally responsible relatives.
(c) Benefits from local, state, and federal programs for which eligibility may exist and which are not excluded by law or court order from consideration as a resource in public assistance programs.
(d) Money due from loans to others.
(e) Insurance settlements.
(f) Tax refunds.

History: 1954 ACS 99, p. 99, Eff. Apr. 20, 1979.

R 400.3519 Client actions contributing to emergency not basis for denial of initial application.

Rule 19. Actions on the part of the client that may have contributed to the emergency situation, or lack of action by the client to prevent the emergency when able, shall not be basis for denial of the initial application for emergency needs. However, the department shall determine, to the extent possible, the cause of the emergency and shall take such action as may be possible to help the client prevent a recurrence of the emergency.

History: 1954 ACS 99, p. 99, Eff. Apr. 20, 1979.

R 400.3520 Expanded services.

Rule 20. The director of a local office or the person designated by him may make specific exceptions to emergency needs policy to expand services to meet

Digitized by Google Original from UNIVERSITY OF MICHIGAN

Generated for Susan K Kendall (Michigan State University) on 2018-09-05 16:48 GMT / http://hdl.handle.net/2027/mdp.49015002898253

the emergency needs of clients, or to approve payment for a service that did not have the required prior approval when, in the judgment of the local office director, the service provided under the exception is necessary to remove a threat to life or health arising from lack of food, water, or exposure to cold or unsanitary conditions. The amount authorized for expanded services shall not exceed $500.00 without central office approval. The director of a local office shall not increase the standard rates established by the department for listed services.

History: 1954 ACS 99, p. 99, Eff. Apr. 20, 1979.

R 400.3521 Basic needs standards; determining amount of assistance.

Rule 21. The department shall establish standards to meet basic needs, consisting of food, clothing, incidentals, shelter, heating fuel, utilities, and special needs. Available income or cash property, or both, in excess of the basic needs standard for the size of the eligible group shall be deducted from the cost of the emergency need to determine the amount of assistance to be issued by the department, except that the local office director or his designee may require that the client execute a reimbursement agreement in the amount of the client's share of the cost of meeting the emergency or reduce or waive the client's share of the cost of meeting the emergency when, in the judgment of the local office director, the service provided is necessary to remove a threat to life or health arising from lack of food, water, or exposure to cold or unsanitary conditions.

History: 1954 ACS 99, p. 100, Eff. Apr. 20, 1979.

R 400.3522 Eligibility; presence of client in Michigan at time of application or application approval.

Rule 22. To be eligible for benefits of the emergency needs program, a client shall be in Michigan at the time of application or at the time the application is approved.

History: 1954 ACS 99, p. 100, Eff. Apr. 20, 1979.

R 400.3523 Food allowance.

Rule 23. An allowance for food may be made under the emergency needs program only when the case record shows that the client is not eligible for assistance under the food stamp program. A food allowance may be issued only in the following situations:

(a) The client is an applicant for general assistance or aid to dependent children.

(b) The need was caused by theft or vandalism.

(c) The need was caused by a reported lost or stolen check.

(d) The need was caused by a fire, civil disorder, or natural or chemical disaster.

(e) The client is leaving the county.

(f) The local office director determines that the need for food is critical and the client does not meet the other requirements of this rule. The food issuance under this authorization shall not exceed a 15-day supply.

History: 1954 ACS 99, p. 100, Eff. Apr. 20, 1979.

R 400.3524 Clothing allowance.

Rule 24. Issuance of a clothing allowance may be made only to replace minimum clothing lost or destroyed due to fire, civil disorder, a natural or chemical disaster, theft, or vandalism.

History: 1954 ACS 99, p. 100, Eff. Apr. 20, 1979.

R 400.3525 Rent payments.

Rule 25. Rent may be paid only to prevent eviction or to set up a dwelling unit for a homeless eligible group.

History: 1954 ACS 99, p. 100, Eff. Apr. 20, 1979.

R 400.3526 House payments.

Rule 26. House payments may be made only to prevent foreclosure or the initiation of a foreclosure action.

History: 1954 ACS 99, p. 100, Eff. Apr. 20, 1979.

R 400.3527 Payment of property taxes.

Rule 27. Property taxes may be paid only to prevent eviction or loss of redeemability of the client's homestead due to a tax sale.

History: 1954 ACS 99, p. 100, Eff. Apr. 20, 1979.

R 400.3528 Payment for emergency shelter.

Rule 28. Payment may be made for emergency shelter for clients who are without shelter or for clients whose home is temporarily not liveable. The minimum cost is paid for minimum facilities for up to 30 days.

History: 1954 ACS 99, p. 100, Eff. Apr. 20, 1979.

R 400.3529 Payment of security or damage deposit.

Rule 29. A security or damage deposit may be paid only when the landlord will not waive it. The deposit is limited to 1 month's rent, up to the county shelter maximum, including excess shelter, where applicable. The landlord shall agree in writing to return the deposit, less any justifiable claims, to the department when the client moves.

History: 1954 ACS 99, p. 100, Eff. Apr. 20, 1979.

R 400.3530 Payment for home repairs.

Rule 30. (1) Payment for home repairs may be made only if all the following conditions are met:

(a) The home is owned or being purchased by a member of the eligible group.

(b) The eligible group is living in the home, unless it is absent due to the condition of the house or the health of a member.

(c) The repair is necessary to protect the health or safety of the eligible group members. Repairs shall restore the home to a liveable condition.

(d) The most economical repair or replacement of the defect is authorized.

(2) The client may be required to obtain or assist in obtaining estimates of costs of meeting emergency needs.

(3) Home repairs shall be authorized only if the client has an equity of not less than 10% of the state equalized valuation or has made not less than 12 payments on the purchase of the home.

(4) The department shall define home repairs.

History: 1954 ACS 99, p. 101, Eff. Apr. 20, 1979.

R 400.3531 Repair or replacement of stoves, refrigerators, and washing machines.

Rule 31. Cooking stoves, refrigerators, and washing machines may be repaired or replaced. The charge for 1 service call may be paid to determine the need for, or cost of, repairs.

History: 1954 ACS 99, p. 101, Eff. Apr. 20, 1979.

R 400.3532 Payment for heating fuel or utility service.

Rule 32. Payment may be made to prevent shut off of a heating fuel or utility service or to restore the service when the service is essential to prevent serious harm to the eligible group members.

History: 1954 ACS 99, p. 101, Eff. Apr. 20, 1979.

R 400.3533 Payment of deposit to heat and utility providers.

Rule 33. A deposit may be paid as required by the heat provider or utility provider, or both, to maintain or restore service. The provider shall be requested to sign an agreement to return the deposit to the department at the time it is no longer required by the provider. If the provider does not sign an agreement, the client shall do so.

History: 1954 ACS 99, p. 101, Eff. Apr. 20, 1979.

R 400.3534 Payment for household items.

Rule 34. Payment may be made for household items, including dishes, eating utensils, pots, and pans, to replace such items lost or destroyed due to a fire, civil disorder, natural or chemical disaster, theft, or vandalism.

History: 1954 ACS 99, p. 101, Eff. Apr. 20, 1979.

R 400.3535 Payment for furniture.

Rule 35. (1) Payment may be made for 1 of the following:

(a) To replace items of furniture lost or destroyed due to a fire, civil disorder, natural or chemical disaster, theft, or vandalism.

(b) To obtain items of furniture previously furnished as part of the dwelling unit when the eligible group was forced to move.

(2) Payment is limited to the purchase of a sufficient number of tables and chairs for the eligible group to eat and beds and bedding for the eligible group to sleep.

History: 1954 ACS 99, p. 101, Eff. Apr. 20, 1979.

R 400.3536 Payment for transportation.

Rule 36. Payments may be made to provide transportation for the following purposes:

(a) To move an eligible group and personal and household goods to a new shelter, when the need is caused by eviction, health reasons, fire, civil disorder, or natural or chemical disaster.

(b) To return a client to his point of origin if he chooses to return. His point of origin may be another state or country. It may be in another county in Michigan. There shall be a dwelling unit or a job, or both, available for him at his destination.

(c) To transport a client to and from a place of employment at a new job in the normal work area when the client has previously been unemployed. Payment will be for a period ending with the receipt of the client's first pay.

(d) To transport a client to a place of employment opportunity in another work area.

History: 1954 ACS 99, p. 101, Eff. Apr. 20, 1979.

R 400.3537 Payment for special clothing and tools.

Rule 37. Special clothing and tools required by an employer as a condition of employment may be provided. Provision of clothing is limited to 2 outfits. Tools are limited to the minimum number and quality necessary for the job.

History: 1954 ACS 99, p. 102, Eff. Apr. 20, 1979.

R 400.3538 Payment for emergency shelter or foster care for children.

Rule 38. (1) Payment may be made for emergency shelter or foster care for children to provide 1 of the following:

(a) Room and board in a licensed foster home or the home of a relative other than the parents.

(b) Care in a private, nonprofit licensed institution or half-way house.

(2) These services are available to a child who meets all of the following requirements:

(a) Is under age 21.

(b) During the past 6 months, has lived with a relative specified in the aid to dependent children policy as contained in the assistance payments manual published by the department as DSS Manual 22 (1-74) and available from the department.

(c) If required to accept employment or training has not refused without good cause to accept employment or training during the last 30 days.

(3) Emergency shelter or foster care may include necessary clothing for the children involved.

(4) The department shall establish rates of payment for emergency shelter care or foster care and for clothing.

(5) Emergency shelter or foster care is available to a child for a period up to 30 consecutive days in any 12-month period.

History: 1954 ACS 99, p. 102, Eff. Apr. 20, 1979.

R 400.3539 Providing inpatient hospitalization to migrant families.

Rule 39. (1) Inpatient hospitalization for migrant families may be provided for a period up to 30 consecutive days in any 12-month period provided the migrant family has received no services from the emergency needs program in the 12-month period prior to the date the application is approved.

(2) A migrant family consists of a family who:

(a) Works primarily in agriculture or a related seasonal industry.

(b) Moves from place to place to find work.

(c) Lives in a temporary residence during the work season.

(d) Has a child under age 21 who is living with, or has lived with, a specified relative, as defined in R 400.3538(2)(b) of these rules, during the last 6 months.

(3) Covered services, exclusions, payment rates, and conditions are those defined in the medical assistance eligibility manual published by the department as DSS Manual 24 (8-73) and available from the department.

History: 1954 ACS 99, p. 102, Eff. Apr. 20, 1979.

R 400.3540 Payment for burial or cremation of deceased person.

Rule 40. (1) Payment may be made at rates established by the department for burial or cremation of a deceased person when sufficient resources from the deceased person's estate and expected contributions from responsible relatives are not available, provided an application is completed prior to burial of the deceased person.

(2) Payment may be made for any of the following:

(a) Services of a funeral director, including a casket of minimum finish cloth cover with twill or equivalent interior and flat or oval top with handles, local removal up to 30 miles, preparation of the body for burial, use of the funeral director's facilities, and filing of legal papers.

(b) An outside receptacle when required by the cemetery and consisting of a metal or concrete rough box.

(c) A single burial space.
(d) Opening and closing the grave.
(e) Use of cemetery equipment.
(f) Transportation in excess of 30 miles.
(g) Clothing.
(h) Clergyman's honorarium.

(3) A deceased person shall be buried in the county where the deceased had lived, except that burial may be in a county of a relative's choice in Michigan or in a bordering county of another state, and except that burial may be in another state if the cost of transportation does not exceed the cost of a single grave in Michigan and a grave is available in the other state, and except that burial may be in a location stipulated in a prearranged burial agreement.

(4) Payment for cremation may not exceed the maximum rate established for burial.

(5) Friends or relatives may supplement the state burial payment in any amount up to $200.00 for identifiable additional services. Responsible relatives may designate up to $200.00 of an expected contribution for this purpose. Any contribution made in excess of $200.00 shall reduce the state payment by an equal amount.

(6) The amount of any lump sum death benefit from the social security administration shall be deducted from the state payment if the surviving spouse resided with the deceased person at the time of death. If there is no surviving spouse, the department shall claim any lump sum death benefit from the social security administration.

(7) The department shall determine availability of benefits from veterans' programs, life insurance, fraternal or social organizations, and prearranged funeral agreements. Such benefits shall reduce the amount paid by the department by an amount equal to the benefits.

DEPARTMENT OF LABOR

BUREAU OF WORKERS' DISABILITY COMPENSATION

GENERAL RULES

R 408.1—R 408.24 Rescinded.

History: 1944 ACS 12, pp. 50-52; 1954 AC, pp. 4501-4504; 1954 ACS 15, p. 6, Eff. Aug. 14, 1958; rescinded 1954 ACS 65, p. 20, Eff. Nov. 30, 1970.

GENERAL RULES

(By authority conferred on the director of the bureau of workers' disability compensation by section 205 of Act No. 317 of the Public Acts of 1969, as amended, being §418.205 of the Michigan Compiled Laws)

PART 1. RECORDS

R 408.31 Reports.

Rule 1. (1) An employer shall report immediately to the bureau on form 100 all injuries, including diseases, which arise out of, and in the course of, the employment and result in any of the following:

(a) An aggregate of 7 or more days of disability, not including Sundays or the date of injury.

(b) Death.

(c) Specific losses.

(2) The employer shall give a copy of the report to the injured employee immediately, and in case of death, to his dependent. Form 100 shall indicate compliance with this requirement. A delay in reporting shall not occur because of this requirement.

(3) In case of death, an employer shall also file immediately an additional report on form 106.

(4) After an employee has given the employer the name of the physician and his intention to treat with that physician and in fact has commenced treatment with that physician in accordance with section 315 of Act No. 317 of the Public Acts of 1969, as amended, being §418.315 of the Michigan Compiled Laws, and known as the workers' disability compensation act, the employee shall obtain and promptly furnish a report to the employer, insurance carriers, state accident fund, or self-insurers' security fund, setting forth the history obtained, the diagnosis, the prognosis, and other information reasonably necessary to properly evaluate the injury, the disability, and the necessity for further rehabilitation or treatment. Thereafter, at reasonable intervals of not more than 60 days, the employee shall obtain and furnish a current medical report, paid for by the carrier, containing the same information, together with an itemized statement of charges for services rendered to date. A self-insured employer, insurance carrier, the state accident fund, or self-insurers' security fund is not required to make payment to the physician until such reports and itemized charges have been furnished to it. Medical fees shall not exceed those considered usual and reasonable for the service performed.

History: 1954 ACS 21, p. 19, Eff. Feb. 13, 1960; 1954 ACS 45, p. 32, Eff. Feb. 14, 1966; 1954 ACS 57, p. 11, Eff. Feb. 14, 1969; 1954 ACS 73, p. 27, Eff. Dec. 2, 1973; 1954 ACS 98, p. 119, Eff. Jan. 3, 1979.

R 408.32 Compensable injury reports.

Rule 2. A carrier, the second injury fund, self-insurers' security fund, and silicosis and dust disease fund, in all cases which require payment of compensation, shall file the following reports as required by the bureau:

(a) Report to the bureau on forms 101 and 101a on the day after the first payment of compensation.

(b) Report to the bureau on form 102 on the day after the stopping of payment of compensation, showing the amount of compensation paid in every case. When a supplemental form 102 is filed, only that amount not previously reported shall be shown. In a case requiring filing of form 102, the carrier and funds, in writing, shall advise the injured employee whose benefits have stopped of the reasons for the action taken at the same time.

(c) Report to the bureau on form 103 as of December 31, to be received not later than January 31 following, showing the amount of compensation actually paid in cases where payment of compensation has not been previously stopped as of that date by the filing of form 102, for that calendar year, regardless of the length of time the case was open. If during the calendar year a form 102 has been previously filed, report only those payments made during the calendar year after the filing of form 102.

(d) Notify the bureau immediately of any change in rate of compensation, stating the reason therefor.

(e) File a statement of the attending physician in every specific loss, giving the date and extent of the loss.

(f) Report, by completing form 109 after the end of each 6-month period, the number of cases reported and the total amount actually paid out during that period for all medical treatment, of lost time cases (more than 7 days lost) and no lost time cases (7 days or less lost). The amount paid out shall be on all cases without regard to the time the case was opened. The number of cases reported shall be only those reported within the 6-month period. An amount of $5.00 for each treatment or examination performed by a salaried in-plant medical service shall be used to calculate this medical cost. Any amount unpaid as of the date of report shall be included in the subsequent report. The first report is due on or before July 30 for the 6-month period ending June 30, 1966, and reports are due within 30 days after the end of each succeeding 6-month period.

History: 1954 ACS 21, p. 20, Eff. Feb. 13, 1960; 1954 ACS 45, p. 33, Eff. Feb. 14, 1966; 1954 ACS 48, p. 28, Eff. Nov. 14, 1966; 1954 ACS 73, p. 27, Eff. Dec. 2, 1972; 1954 ACS 98, p. 120, Eff. Jan. 3, 1979.

R 408.33 Disputed claims.

Rule 3. A carrier and the self-insurers' security fund shall notify the bureau on form 107 on or before the fourteenth day after the employer has notice or knowledge of the alleged injury or death in all cases where the right of the injured or dependent to compensation is disputed. If compensation thereafter is paid, report it on form 101. A copy of form 107, notice of dispute, shall be mailed or given to the injured employee.

History: 1954 ACS 21, p. 20, Eff. Feb. 13, 1960; 1954 ACS 73, p. 28, Eff. Dec. 2, 1972; 1954 ACS 98, p. 120, Eff. Jan. 3, 1979.

PART 2. HEARINGS

R 408.34 Applications for hearing and adjustment of claims.

Rule 4. (1) In cases of dispute coming under the jurisdiction of the bureau, any party may apply to the bureau for relief. The complaining party shall file his application (form 104) in triplicate with the bureau at its Lansing office. The

Open Access, Google-digitized / http://www.hathitrust.org/access_use#oa-google

bureau shall thereupon serve the adverse party with a copy of the application and, at the same time, notify the parties of the time and place of the pre-trial hearing. The adverse party shall file his answer thereto with the bureau within 15 days after service, and serve a copy of the answer on the party making the application.

(2) In any case where the compensable disability of an injured employee is undisputed and involves 1 or more disputed injury dates during the course of employment with 1 or more employers, or during the course of employment with 1 employer who is insured by 1 or more insurance carriers, the bureau may direct compensation benefits to be paid at the maximum rate or ⅔ of the average weekly wage, whichever is less, with no dependents as provided in the schedule of benefits on the earliest or initial date of injury alleged. Payments are to be made by that self-insured employer or insurance carrier having the risk on that date. Payments shall continue through the mailing date of the decision of the administrative law judge, and shall be adjusted in accordance with the decision unless an appeal is taken, in which case the provisions of section 862 of Act No. 317 of the Public Acts of 1969, being §418.862 of the Michigan Compiled Laws, shall apply. The administrative law judge shall order reimbursement where appropriate.

(3) In apportionment cases which are tried, the primary action is between the last employer and the injured employee. All other joined employers may appear, cross-examine witnesses, give evidence, and defend on the issue of liability. In setting trial dates for such cases, only the convenience of the plaintiff and the last employer, or their attorney, shall be considered.

(4) Service of all papers under this rule upon employers whose liability under the act is not insured according to the records of the bureau, or who have not been granted the privilege of self-insurance, shall be by certified mail with a return receipt requested. Filing of the return receipt shall be prima facie proof of service.

History: 1954 ACS 21, p. 20, Eff. Feb. 13, 1960; 1954 ACS 45, p. 34, Eff. Feb. 14, 1966; 1954 ACS 98, p. 120, Eff. Jan. 3, 1979.

R 408.35 Bureau hearings.

Rule 5. (1) If the director believes that there has not been compliance with the workers' disability compensation act, he may on his own motion give notice to the parties and schedule a hearing for the purpose of determining such compliance. The notice shall contain a statement of the matter to be considered.

(2) When a matter that is alleged to be grounds for a hearing in accordance with this rule is brought to the attention of the bureau, the director or his authorized representative shall review such evidence of noncompliance with the act that is presented and, after making such inquiries or investigations as he deems appropriate, determine if a hearing in accordance with this rule is necessary. The parties involved shall be notified within 30 days of the receipt of the request as to the time and date of hearing or the reasons for denial.

(3) Hearings shall be scheduled within a reasonable time, subject to the availability and schedules of hearing personnel and the parties involved. A request for a hearing pursuant to this rule shall, as a minimum, contain sufficient information to warrant investigation or inquiry into a matter. This shall include, but is not limited to, all of the following:

(a) Facts and law involved in the alleged failure to comply, including names, dates, amounts, or other pertinent information.

(b) A description of the redress or other specific action requested with specific references to sections of the workers' disability compensation act allegedly not complied with.

History: 1954 ACS 21, p. 20, Eff. Feb. 13, 1960; 1954 ACS 65, p. 20, Eff. Nov. 30, 1970; 1954 ACS 98, p. 121, Eff. Jan. 3, 1979.

R 408.36 Service of papers.

Rule 6. (1) Upon filing of the order in writing, the bureau shall furnish a copy of the order to each interested party. Upon mailing or personal service, the original order and copies shall show a mailed date or acknowledgement of personal service on their face, from which date the appropriate appeal period shall run. The mailed date shall also be considered the filed date for the order.

(2) Service of all papers, unless otherwise directed by law, may be made by mail and proof of such mailing shall be prima facie evidence of such service. A copy of all petitions and motions, except applications referred to in R 408.34, shall be served by the moving party upon the adverse party. Proof of such service shall be filed with the bureau.

History: 1954 ACS 21, p. 20, Eff. Feb. 13, 1960; 1954 ACS 57, p. 12, Eff. Feb. 14, 1969; 1954 ACS 98, p. 121, Eff. Jan. 3, 1979.

R 408.37 Subpoenas; subpoenas duces tecum; production of records; attendance at trial.

Rule 7. At the hearing in any case, the administrative law judge may call witnesses, issue subpoenas, including subpoenas duces tecum, and order the production of books, records, including hospital records, accounts, and papers which he deems necessary for the purpose of making a decision.

History: 1954 ACS 21, p. 20, Eff. Feb. 13, 1960; 1954 ACS 98, p. 121, Eff. Jan. 3, 1979.

R 408.38 Lump sum.

Rule 8. An application for advance payment of compensation shall be submitted in duplicate on form 108. If the carrier, second injury fund, self-insurers' security fund, or silicosis and dust disease fund refuses to approve the application, the matter shall be set for hearing to determine whether the application should be approved. An advance payment of compensation to a minor dependent shall not be approved or ordered until a legal guardian has been appointed.

History: 1954 ACS 21, p. 20, Eff. Feb. 13, 1960; 1954 ACS 98, p. 121, Eff. Jan. 3, 1979.

R 408.39 Redemptions.

Rule 9. An agreement to redeem the liability of the carrier, second injury fund, self-insurers' security fund, or silicosis and dust disease fund shall be submitted on form 18, agreement to redeem liability. The agreement shall be accompanied by a report, approved by the employee, from a licensed physician stating in detail the findings of a recent examination.

History: 1954 ACS 21, p. 21, Eff. Feb. 13, 1960; 1954 ACS 57, p. 12, Eff. Feb. 14, 1969; 1954 ACS 98, p. 122, Eff. Jan. 3, 1979.

R 408.40 Stoppage, reduction, or suspension of compensation.

Rule 10. (1) When compensation is being paid under an order or award of the administrative law judge or appeal board, compensation shall not be discontinued or reduced without a further order or award, except as hereinafter provided:

(a) Upon the filing of a petition to stop compensation, accompanied by proof of payment of compensation to within 15 days of the date of the filing of a petition to stop, and

(b) An affidavit setting forth the fact that the employee has returned to gainful employment and substantially describing the nature of said employment or a signed statement from a physician stating that the employee is able to return to his former employment.

(2) Payments shall not be discontinued or reduced under this rule until so ordered by an administrative law judge after a hearing except as provided in

subrules (3) and (4) of this rule. A hearing shall be scheduled by the bureau within 30 days of receiving a petition for hearing, and an order shall be entered pursuant to R 408.36.

(3) If a letter carrying a compensation check is returned by the United States post office unopened, and a diligent search has been made for the party to whom compensation payment is due under the terms of an order or award, the one liable for payment may suspend payment upon filing an affidavit of the foregoing. Such suspension shall not prejudice the reinstatement of suspended payments.

(4) Compensation benefits may be reduced in accordance with the act for changes in dependency, age 65 reductions, or other circumstances provided by law upon filing of the report required by R 408.32(d) and notification to the employee.

History: 1954 ACS 21, p. 21, Eff. Feb. 13, 1960; 1954 ACS 45, p. 34, Eff. Feb. 14, 1966; 1954 ACS 98, p. 122, Eff. Jan. 3, 1979.

R 408.40a Hearing district.

Rule 10a. (1) A hearing district is an area of the state served by 1 or more administrative law judges.

(2) The basis for assignment of administrative law judges, establishing disposition deadline dates, and implementing alternative hearings procedures shall be as required by the caseload.

History: 1954 ACS 73, p. 28, Eff. Dec. 2, 1972; 1954 ACS 98, p. 122, Eff. Jan. 3, 1979.

Editor's note: Former R 408.40a, pertaining to pre-trial procedure, was rescinded by 1954 ACS 65, p. 20. For history of the rescinded rule, see 1970-71 AACS, p. 5644.

R 408.40b Appearances at pre-trial hearings.

Rule 10b. In a contested case, in a hearing district designated by the director, the parties or their attorneys shall appear personally for a pre-trial hearing before the administrative law judge, at a date and place scheduled by the director. Failure of the petitioner or his attorney to appear may subject the petition for hearing to dismissal for lack of prosecution. Failure of defendant or its attorney to appear may subject defendant to being charged immediately under R 408.35 for noncompliance with the workers' disability compensation act.

History: 1954 ACS 73, p. 28, Eff. Dec. 2, 1972; 1954 ACS 98, p. 122, Eff. Jan. 3, 1979.

R 408.40c Trial completion times.

Rule 10c. The trial completion time shall be at the discretion of the administrative law judge, but it shall be not more than 6 weeks after the date the trial commenced. The administrative law judge may allow an extension beyond this time for good cause.

History: 1954 ACS 73, p. 28, Eff. Dec. 2, 1972; 1954 ACS 98, p. 122, Eff. Jan. 3, 1979.

R 408.40d Deadline procedures.

Rule 10d. After reasonable notice, the director may apply 1 of the following deadline procedures:

(a) A case may be given a disposition deadline date of 6 months after the original date set for pre-trial. If the case is not disposed of on or before the disposition deadline, or the trial has not been started on or before the disposition deadline, or if the redemption hearing has not been concluded, the case may be dismissed for lack of progress the day after the disposition deadline. A case in which additional defendants are added shall be given a disposition deadline date 6 months after the date of the first pre-trial after the additional defendants have been added.

(b) A case may be given a disposition deadline date of 9 months after the original date set for pre-trial. If the case is not disposed of on or before the disposition deadline, or the trial has not been started on or before the disposition deadline, or if the redemption hearing has not been concluded, the case may be dismissed for lack of progress the day after the disposition deadline. A case in which additional defendants are added shall be given a disposition deadline date 6 months after the date of the first pre-trial after the additional defendants have been added.

History: 1954 ACS 73, p. 28, Eff. Dec. 2, 1972; 1954 ACS 98, p. 122, Eff. Jan. 3, 1979.

R 408.40e Deadline extensions.

Rule 10e. (1) Before expiration of a disposition deadline date, the administrative law judge to whom a case is assigned shall hear and determine requests for extensions of time only on filing of a written motion for extension, supported by an affidavit showing facts constituting good cause therefor. A motion shall be personally presented to the administrative law judge. Proof of service of notice of hearing on the opposite party shall accompany the motion unless consent of the opposite party is endorsed thereon.

(2) If the disposition deadline date falls on a day when the bureau is closed or on a pre-trial date, the deadline shall be the next nonpre-trial day the bureau is open.

(3) The disposition deadline date does not constitute a trial date. The trial date may be set by the administrative law judge, but the trial or redemption hearing shall begin on or before the deadline. The administrative law judge may change the disposition deadline date for a case to a date earlier than that provided pursuant to R 408.40d upon reasonable notice to the parties.

History: 1954 ACS 73, p. 29, Eff. Dec. 2, 1972; 1954 ACS 98, p. 123, Eff. Jan. 3, 1979.

R 408.40f Deposition of expert witnesses.

Rule 10f. After reasonable notice, the director may apply 1 of the following procedures in a hearing district:

(a) The testimony of all expert witnesses, including medical experts, to be offered at trial shall be by deposition by the parties seeking to offer such witnesses' testimony in advance of the trial date in accordance with the following:

(i) Plaintiff shall schedule and take such depositions not less than 20 days before the trial date.

(ii) Defendants shall schedule and take such depositions not less than 10 days before the trial date.

(iii) All depositions taken in advance of the trial date shall be in the possession of the administrative law judge on the trial date.

(iv) Either party may produce such witnesses in person on the trial date provided 10 days' notice is given to the administrative law judge and all parties. In such event, the opposing party may depose said witnesses within 15 days after the trial date. An adjournment shall not be granted if a medical witness is unable to appear personally on the trial date.

(b) The testimony of all expert witnesses, including medical experts, not presented at the scheduled trial date may be taken by deposition after the conclusion of the lay testimony in accordance with the following:

(i) The plaintiff shall take such depositions within 10 days after the trial date.

(ii) The defendants shall take such depositions within 20 days after the trial date.

(iii) When depositions are taken after the trial date, such depositions shall be completed and filed with the administrative law judge within 6 weeks of completion of lay testimony.

(iv) All depositions taken in advance of the trial date shall be filed with the administrative law judge on the trial date.

(c) The parties shall be prepared for the taking of all testimony on the trial date. The testimony of all expert witnesses, including medical experts, may be taken live or presented by deposition, or both, as agreed upon at a pre-trial conference. If it is agreed that depositions are to be taken in advance, the procedure in subdivision (a) shall apply for such depositions. If it is agreed that depositions are to be submitted at the conclusion of lay testimony, the procedures in subdivision (b) shall apply for such depositions.

History: 1954 ACS 98, p. 123, Eff. Jan. 3, 1979.

R 408.40g Final disposition of cases.

Rule 10g. (1) All cases assigned to the administrative law judge shall be resolved by decision. Such decisions shall be written within 30 days of trial completion and shall be prepared for mailing with dispatch by the bureau.

(2) All redemption hearings shall be either approved or denied by the issuance of a redemption order.

(3) All lump sum advance hearings shall be either approved or denied by the issuance of a lump sum application order.

(4) In cases that are voluntarily paid, there shall be a decision issued outlining the agreement with respect to the voluntary payment.

(5) Cases that do not progress as required by these rules may be dismissed for lack of prosecution and the decision shall so state. Cases where the carrier, the second injury fund, silicosis and dust disease fund, or the self-insurers' security fund fails to comply with these rules may subject that party to a hearing in accordance with R 408.35 for noncompliance with the act.

(6) Decisions issued by administrative law judges shall be mailed to all parties with the exception of redemption orders, which may be served personally. Administrative decisions shall be mailed to the parties. All decisions shall be mailed from the Lansing office with the exception of administrative decisions issued in Detroit.

History: 1954 ACS 98, p. 123, Eff. Jan. 3, 1979.

PART 3. INSURANCE

R 408.41 Notice of insurance.

Rule 11. Every notice of issuance of a workers' disability compensation insurance policy shall be reported to the bureau on form 400, insurers' notice of issuance of policy. If the employer is a partnership, the notice shall state the names of all the partners. If the employer is doing business under an assumed name, the notice shall state the assumed name, the name or names of the parties doing business under the assumed name, and each Michigan location covered. If the employer is a corporation doing business through a number of divisions, the notice shall state the names of all the divisions of the corporation. The bureau shall be notified when any insurance company receives a change of address of an insured.

History: 1954 ACS 21, p. 31, Eff. Feb. 13, 1960; 1954 ACS 45, p. 35, Eff. Feb. 14, 1966; 1954 ACS 57, p. 12, Eff. Feb. 14, 1969; 1954 ACS 98, p. 124, Eff. Jan. 3, 1979.

R 408.42 Termination of insurance.

Rule 12. A notice of termination of the liability of an insurance company on a policy covering the risk of an employer under the workers' disability compensation act shall be reported to the bureau on form 401, notice of termination of liability. A copy of the notice shall be mailed to the employer. If the employer is a partnership, the notice shall state the names of all the partners. If the employer is doing business under an assumed name, the notice shall state the assumed name and the names of all parties doing business under the assumed name. If the employer is a corporation doing business under a number of divisions, the notice shall state the names of all the divisions of the corporation. If a business changes names, notice shall be given stating both the new and former names. Notice of termination of a policy which has expired shall not be reported when the insurance carrier has accepted responsibility under a further or renewal policy, except for an assured's name change.

History: 1954 ACS 21, p. 21, Eff. Feb. 13, 1960; 1954 ACS 57, p. 12, Eff. Feb. 14, 1969; 1954 ACS 73, p. 29, Eff. Dec. 2, 1972; 1954 ACS 98, p. 124, Eff. Jan. 3, 1979.

R 408.43 Self-insurers.

Rule 13. (1) An employer seeking exemption from insuring its risk under the workers' disability compensation act and the privilege of becoming a self-insurer shall apply to the bureau on form 402, application for self-insurance. The approval of an application for self-insurance shall be for no longer than 1 year after the effective date of the approval. An approval may, upon application and review, be renewed for no more than 1 year at a time. The employer shall submit a renewal application to the director 30 days before expiration of the self-insurance privilege. Upon receipt of a renewal application, the privilege may be extended until denied by the director.

(2) The director may require a surety bond, proof of excess insurance, or such other type of security as he deems necessary.

(3) Pursuant to section 611 of the act and this rule, the director, upon his own motion, may review his prior approval granting an employer the privilege of becoming self-insured. If, as a result of such review, the director determines that it is necessary to revoke the self-insurance privilege, he shall do so in accordance with the following:

(a) Notify the employer of his review and intention to revoke the employer's previously granted privilege to be self-insured. The reasons for revocation shall be included in the notice of review.

(b) The self-insured employer may request a hearing before the director within 15 days of the mailing date of the director's notice as to why it should be allowed to remain self-insured.

(c) If the employer fails to request a hearing within 15 days after mailing of the director's notice, the director may revoke the self-insurance privilege.

(d) If, after a hearing, the director still finds it necessary to alter his decision granting an employer the privilege to be self-insured, he shall notify the employer to that effect.

(e) A hearing, when requested, shall be scheduled within reasonable time subject to the availability of the director or his authorized representative.

(f) If, after a hearing, the self-insurance privilege is revoked, it shall become effective 30 days after the director's decision is mailed. Thereafter, the employer shall be required to have private insurance coverage.

PART 4. MISCELLANEOUS

R 408.44 Attorney fees.

Rule 14. (1) The limitation in this rule as to fees applies to plaintiff's attorneys, including combined charges of attorneys who combine their efforts toward the enforcement or collection of any compensation claim.

(2) In a case tried to completion with proofs closed or compensation voluntarily paid, an attorney, before computing the fee, shall deduct from the accrued compensation the reasonable expenses incurred on plaintiff's behalf. The fee which the administrative law judge may approve shall not be more than 30% of the balance.

(3) In a case involving a redemption of liability, the attorney, before computing the fee, shall deduct the reasonable expenses incurred on plaintiff's behalf from the total settlement. The fee which the administrative law judge may approve shall be as follows:

(a) Of the first $25,000.00, a fee of not more than 15%.

(b) Of any amount exceeding $25,000.00, a fee of not more than 10%.

(4) In a case tried to completion with proofs closed but before a final order, after which there is a redemption of liability, the attorney, before computing the fee, shall deduct the reasonable expenses incurred on plaintiff's behalf from the total settlement. The total settlement in such redemptions shall be deemed to include the gross amounts of any partial payments made pursuant to section 862 of the act if such redemption specifically includes a waiver of the right of reimbursement of such amounts from either the plaintiff or the second injury fund. The fee which the administrative law judge may approve shall not be more than 20% of the balance.

(5) Reasonable expenses, as used in this rule, include all of the following:

(a) Medical examination fee and witness fee.

(b) Any other medical witness fee, including cost of subpoena.

(c) Cost of court reporter service.

(d) Appeal costs.

(6) Subrules (2) to (4) apply to a case with an injury date on or after September 1, 1965. The rule as to attorney fees in effect before September 1, 1965, applies to a case with an injury date before September 1, 1965.

(7) In a case dismissed for lack of progress or prosecution or in which the petition for hearing is withdrawn for reasons other than voluntary payment or other meritorious reasons, and further action is taken by the same attorney or law firm, the fee which the administrative law judge may approve in cases specified in subrule (2) shall be not more than 25% of the balance; in subrule (3), of the first $25,000.00, not more than 12½%, and of any amount exceeding $25,000.00, 10%; in subrule (4), the fee shall be not more than 15% of the balance.

(8) A group disability or hospitalization insurance company which enforces an assignment given to it as provided in the workers' disability compensation act shall pay a part of the fee of the attorney who secured the compensation recovery in the same proportion that the group insurance company payments bear to the total compensation recovery upon which the attorney's fee is based.

History: 1954 ACS 21, p. 22, Eff. Feb. 13, 1960; 1954 ACS 45, p. 35, Eff. Feb. 14, 1966; 1954 ACS 57, p. 13, Eff. Feb. 14, 1969; 1954 ACS 65, p. 21, Eff. Nov. 30, 1970; 1954 ACS 73, p. 29, Eff. Dec. 2, 1972; 1954 ACS 98, p. 125, Eff. Jan. 3, 1979.

R 408.45 Medical examination and rehabilitation.

Rule 15. (1) A carrier and the self-insurers' security fund shall report to the bureau on form 110, report on rehabilitation, 3 months after the date of injury and after each subsequent 4 months, showing what evaluation and what provision has

been made for rehabilitation on all cases for which a final form 102, notice of stopping of compensation payments, has not been filed. All reports shall be accompanied by a current medical report. In case of a specific loss where the injured has returned to work without rehabilitation before expiration of the specific loss period, notation of return to work shall be made on form 110, report on rehabilitation, and thereafter further reports shall not be necessary. Where rehabilitation has been undertaken in the form of favored work or on-the-job training by the employer, the rehabilitation shall be so identified in all reports.

(2) When an employee consents or is ordered by the bureau to submit to a medical examination, medical treatment, or rehabilitation, by an employer-sponsored facility located a distance of more than 5 miles from his home, the carrier or funds shall pay in advance the traveling expenses incidental to such examination, medical treatment, or rehabilitation, including those of the first 5 miles. Where total expenses for a period of 30 days do not exceed $10.00, such sum may be paid at the end of the 30-day period. The traveling expenses shall be as authorized in the state standardized travel regulations, except when special transportation is medically required, in which case payment shall be made at actual cost. The allowance for other expenses, if any, shall be those allowed by this state.

The provisions of subrule (2) do not apply to the first examination requested by the employer or insurer when all of the following conditions exist:

(a) An application for hearing is filed upon which no payment of compensation or medical expense has been made for 1 year prior to the date of filing.

(b) The employee's home at the time of filing the application for hearing is outside of this state.

(c) The citation to appear for examination is at a time reasonably close to the date of hearing so as to obviate the necessity of an additional trip on the part of the employee to attend the hearing.

(3) Pursuant to section 319 of the act, the director may, on his own motion or upon receipt of an application from the employee or employer, refer the employee for an evaluation of the need for and the kind of rehabilitation program necessary to return the employee to work. If a hearing is requested, it shall be provided in accordance with the following:

(a) When a request for rehabilitation service is made by the employee or employer, the director or his authorized representative may schedule a hearing.

(b) If the director, on his own motion, orders a rehabilitation program he shall notify both parties and, if requested by either party within 15 days, schedule a hearing.

(c) Hearings shall be scheduled within a reasonable time subject to the availability of the director or his representative and the parties involved. A request for a hearing shall, at a minimum, contain the following:

(i) A brief statement of the question concerning rehabilitation.

(ii) If requested by the employer, a citation of the specific instances of failure to cooperate in the rehabilitation program.

(iii) If requested by the employee, the reason for and the type of program requested.

(d) Unless a request for review by an administrative law judge is filed by a party within 15 days, the order of the director or his authorized representative shall stand as the order of the bureau. For sufficient cause shown, the administrative law judge may grant further time in which to claim such review.

R 408.46 Application for dust disease and second injury fund benefits.

Rule 16. (1) An application for reimbursement of benefits from the dust disease fund shall be made on form 111 and sent to the office of the funds administrator in Lansing, Michigan.

(2) An application for reimbursement of benefits from the second injury fund shall be made on form 112 and sent to the office of the funds administrator in Lansing, Michigan.

History: 1954 ACS 21, p. 22, Eff. Feb. 13, 1960; 1954 ACS 45, p. 36, Eff. Feb. 14, 1966; 1954 ACS 65, p. 21, Eff. Nov. 30, 1970; 1954 ACS 98, p. 126, Eff. Jan. 3, 1979.

R 408.47 Extensions of time granted by the director.

Rule 17. The director or his authorized representative may grant extensions of time in which to comply with any rule as the director deems reasonable.

History: 1954 ACS 21, p. 22, Eff. Feb. 13, 1960; 1954 ACS 57, p. 13, Eff. Feb. 14, 1969; 1954 ACS 98, p. 126, Eff. Jan. 3, 1979.

R 408.48 Compensation payments.

Rule 18. Weekly payments shall be made payable and mailed directly to the injured employee or his dependents. When the claimant is represented by counsel, the accrued compensation shall be made payable to the persons entitled thereto and mailed to the attorney representing such persons.

History: 1954 ACS 21, p. 22, Eff. Feb. 13, 1960; 1954 ACS 98, p. 126, Eff. Jan. 3, 1979.

PART 5. REVIEW AND APPEAL

R 408.49 Claim for review.

Rule 19. (1) If a claim for review from an award of the administrative law judge is filed, the party making such claim for review shall, at his expense, file with the appeal board a complete transcript of all the testimony taken and the proceedings had before the administrative law judge within 30 days from the date the claim for review is filed. In all cases where the employer files a claim for review, a copy of the testimony, depositions, and other documents necessary for such appeal shall be furnished by the employer to the employee or his attorney.

(2) The appealing party's brief shall be filed within 15 days after the filing of the transcript and a copy served upon the opposite party. The opposite party's reply brief shall be filed within 10 days after receipt of the appellant's brief. Oral argument may be requested by any party to the proceedings. Such request shall be in the form of a motion directed to the board within 30 days of the filing of the transcript of proceedings, and shall contain good cause why such oral argument should be granted. The board shall act on motions within 30 days of the filing of said motions, and notify the parties in interest of its decision. Otherwise, and subsequent to the expiration of said 30 days, the appeal board shall hear the case upon the record and such briefs as have been filed and make a decision upon the appeal.

History: 1954 ACS 21, p. 22, Eff. Feb. 13, 1960; 1954 ACS 98, p. 127, Eff. Jan. 3, 1979.

R 408.50 Additional testimony.

Rule 20. The appeal board may order the taking of additional testimony, either on its own motion or on the application of 1 or both of the parties, when it considers that such action shall be taken in the furtherance of justice. If the opposite party desires to contest such application, an answer shall be filed within 10 days. The appeal board shall consider the application and answer, if any, without oral argument of the parties and enter an order either granting or denying

the application. If the application is granted, the opposite party may present rebuttal testimony.

History: 1954 ACS 21, p. 23, Eff. Feb. 13, 1960; 1954 ACS 98, p. 127, Eff. Jan. 3, 1979.

R 408.51 Extensions of time granted by appeal board.

Rule 21. The appeal board may grant extensions of time in which to comply with any rule when it shall deem such extensions of time reasonable.

History: 1954 ACS 21, p. 23, Eff. Feb. 13, 1960; 1954 ACS 98, p. 127, Eff. Jan. 3, 1979.

R 408.52 Certiorari.

Rule 22. When any party makes an application for leave to appeal for the review by the court of appeals of a final order of the appeal board, the appeal board shall make the certification in accordance with section 232 of Act No. 236 of the Public Acts of 1961, being §600.232 of the Michigan Compiled Laws, and General Court Rule 806.6.

History: 1954 ACS 21, p. 23, Eff. Feb. 13, 1960; 1954 ACS 45, p. 36, Eff. Feb. 14, 1966; 1954 ACS 98, p. 127, Eff. Jan. 3, 1979.

SKI AREA SAFETY BOARD

GENERAL RULES

(By authority conferred on the ski area safety board by sections 6 and 7 of Act No. 199 of the Public Acts of 1962, as amended, being §§408.326 and 408.327 of the Michigan Compiled Laws)

R 408.61 Definitions.

Rule 1. (1) As used in these rules:

(a) "Authority having jurisdiction" means the ski area safety board created pursuant to the act.

(b) "Authorized personnel" means a person designated and trained by the owner or operator, or both, of the ski area.

(c) "Ski lift" means a device for transporting persons uphill on skis, or in cars on tracks, or suspended in the air by the use of cables, chains, belts, or ropes, and usually supported by trestles or towers with 1 or more spans. It includes a rope tow.

(2) The terms defined in the act have the same meaning when used in these rules.

History: 1954 ACS 92, p. 43, Eff. July 21, 1977.

R 408.65 Incorporation by reference.

Rule 5. (1) A ski lift shall be constructed, installed, and operated as prescribed in ANSI B77.1-1976, safety requirements for aerial passenger tramways, which is incorporated herein by reference, except as noted in subrule (2) of this rule, and may be inspected at the Lansing office of the Michigan department of labor. This standard may be purchased from the American National Standards Institute, 1430 Broadway, New York, New York 10018, or from the Michigan Department of Labor, P. O. Box 30015, 7150 Harris Drive, Lansing, Michigan 48909, at a cost of $7.75.

(2) The following sections of ANSI B77.1-1976 are excepted: 1.2.4, 1.5, 2.1.4.2.1, 2.1.4.5.1, 2.1.5.4.2(2), 2.1.7.4.1, 2.1.7.4.2, 2.1.9.4, 2.1.9.7.3(1)(3), 2.1.11.5, 2.1.14, 2.2.4.3, 2.2.12.2, 3.2.1.6, 3.2.2.4, 3.2.4.3.7, and 3.6.4.

(3) A ski lift operating prior to December 16, 1975, with proof of a good safety record, need not comply with sections 2.1.9.1, 2.1.9.2, 2.1.9.6, 2.2.1.2, 2.2.7.3, 2.2.11.2.2(2), 2.3.2.2(1)(a) and (b), 2.3.2.2.1, 2.3.3.1.2, and 2.4.5.2.4 of ANSI B77.1-1976 or R 408.76.

History: 1954 ACS 92, p. 43, Eff. July 21, 1977.

R 408.66 Downcoming rope; protection; towing device.

Rule 6. (1) If the downcoming rope of a fiber rope tow is less than 7 feet above the ski track, protective fencing or other approved means shall be provided to prevent persons from coming in contact with the downcoming rope.

(2) A towing device of a wire rope tow shall not contact the ground or snow surface at any point along the tow.

History: 1954 ACS 92, p. 43, Eff. July 21, 1977.

R 408.67 Vertical clearance for chair lifts.

Rule 7. (1) Where a person may ski beneath a lift line, or at points where ski trails cross under a lift line, a minimum vertical clearance of 13 feet between the design maximum snow depth and the top of the carrier seat shall be maintained under conditions of maximum sag.

(2) Where the vertical clearance is less than 15 feet, public transportation is prohibited beneath the tramway. Where the vertical clearance is less than 8 feet for gondolas and empty chairs, or less than 10 feet for chairs carrying foot passengers, or less than 13 feet for chairs carrying skiers, provision shall be made to prevent access by unauthorized persons to the area beneath the tramway. Under the most adverse loading conditions, a minimum vertical clearance of 5 feet shall be maintained between the lower edge of carriers or ropes and the ground or other obstacles, including snow path.

History: 1954 ACS 92, p. 43, Eff. July 21, 1977.

R 408.68 Tow loading and unloading areas.

Rule 8. A loading area shall be nearly level. The area shall be free of obstructions and designed in a manner that guides passengers to the loading point. Unloading areas shall be nearly level, or shall be graded to form a ramp inclined downward in the direction of travel and outward from the line of the uphill track to provide movement away from the tow.

History: 1954 ACS 92, p. 43, Eff. July 21, 1977.

R 408.69 Speed of tows.

Rule 9. (1) The authority having jurisdiction may require lower speeds for fiber rope tows under some conditions and may grant special exceptions for operation at higher speeds if safe operation is satisfactorily demonstrated.

(2) Acceleration of a drive on surface lifts and tows shall be regulated with due regard to lift or tow-type, profile, speed, and use.

History: 1954 ACS 92, p. 43, Eff. July 21, 1977.

R 408.70 Lift machinery; lock out procedures; lift towers as support for circuits and lights.

Rule 10. (1) All ski lift machinery shall have a disconnect switch and shall be locked out in the "off" position before work is performed on the machinery.

(2) The owner of the machinery shall establish and maintain a written procedure for lock out of the machinery.

(3) Only signal, communication, and control circuits shall be supported between towers which support a tramway, lift, or tow. Voltage on overhead, safety gate circuits shall not exceed 55 volts.

(4) Approval shall be obtained from the chief inspector before lift tower and terminal structures are used for supporting lights.

History: 1954 ACS 92, p. 44, Eff. July 21, 1977.

R 408.71 Snowgrooming equipment and other vehicles; lights.

Rule 11. Snowgrooming equipment or any other vehicle, except a snowmobile, shall be equipped with a flashing yellow or red light, which shall be in operation at any time the vehicle is moving on, or in the vicinity of, a ski run. A snowmobile operated in a ski area shall be operated with the lights on.

History: 1954 ACS 97, p. 67, Eff. Nov. 2, 1978.

R 408.75 Inspection and test of system; conditions; lifts not operated for 30 months.

Rule 15. (1) Before a system is opened to the public, it shall be given a thorough inspection and tests by qualified personnel and by an inspector of the Michigan department of labor to assure installation in accordance with the plans and specifications of the designer or manufacturer and in accordance with the applicable rules of the authority having jurisdiction. The designer or manufacturer shall recommend load test procedures.

(2) The owner shall be responsible for determining whether all of the following conditions have been met:

(a) Tightness of all structural connections.

(b) Lubrication of all moving parts.

(c) Alignment and clearances of all open gearing.

(d) Installation and alignment of all drive components.

(e) Position and freedom of movement of counterweights or other tensioning means and carriages.

(f) Haul rope alignment at entrance to bull wheels.

(g) Operation of all electrical components, including circuit protection and grounding.

(h) Load test for chair lifts every 5 years pursuant to the requirements of the ski area safety board.

(3) A lift that has not operated for 30 consecutive months shall comply with all requirements of this rule and section 12 of the act applicable to new lifts before it can be approved for public operation.

History: 1954 ACS 92, p. 44, Eff. July 21, 1977.

R 408.76 Splicing; single splices; long splices; reversible bicable systems.

Rule 16. (1) Splicing shall be performed by an approved splicer acceptable to the authority having jurisdiction. The minimum length of the splice shall be 1,200 times the nominal rope diameter. The tails, or lengths of the rope strands tucked into the core of the spliced rope during splicing, shall be not less than 30 times the nominal rope diameter in length.

(2) More than 1 single splice in a rope is prohibited unless approved by the board. Two or more contiguous long splices in a rope shall be separated by an undisturbed length of rope not less than 2,400 times the nominal rope diameter in length.

(3) A type of connection other than the conventional long splice shall not be used in a haul rope without the specific approval of the tramway designer and the authority having jurisdiction.

(4) Reversible bicable systems: Splicing of haul ropes on reversible bicable systems is prohibited except:

(a) When the application of this rule requires a shipping package too large to be handled by existing means of transportation.

(b) When 2 haul ropes are used, either of which can sustain the maximum load with a static factor of safety of 5 if the other haul rope is broken.

History: 1954 ACS 92, p. 44, Eff. July 21, 1977.

R 408.77 Splicing; emergency repair; wire rope; continuation in service; conditions.

Rule 17. If damage to a wire rope is confined to a single strand, the damaged strand may be replaced on an emergency basis. The repair rope may be returned to service under the following conditions:

(a) Approval for such repairs shall first be obtained from the authority having jurisdiction or from the chief inspector.

(b) An approved wire rope splicer verbally advises the authority having jurisdiction or the chief inspector, with written confirmation to the authority having jurisdiction or the chief inspector, before the repaired rope is returned to service that a suitable replacement strand was available and it was possible to properly repair the rope by the use of the patch method.

(c) The minimum length of the new piece of strand shall be not less than 360 times the nominal rope diameter between end tucks, and the length of tail tucked into the core at each end shall be not less than 30 times the nominal rope diameter in length.

(d) The repaired area is outside of an existing splice, and both new tucks are not less than 96 times the nominal rope diameter in length from the end tuck of an existing splice.

(e) The repaired area is inspected daily for the first 5 days of operation and at least once a week thereafter during the operating season. The rope shall be removed from operation immediately if core collapse, pulling, high stranding, or other significant distortions occur.

(f) The repaired rope may be continued in operation for 6 months or until the end of the season, whichever comes first. At the end of the season, or after 6 months, whichever occurs first, the damaged section shall be cut out and a full-splice repair shall be made.

(g) Documents showing the splice diagrams and overall length of the patch prepared by an approved wire rope splicer shall be filed with the authority having jurisdiction or the chief inspector, and shall be placed in the owner's wire rope log for such rope.

History: 1954 ACS 92, p. 44, Eff. July 21, 1977.

R 408.78 Splicers; approval.

Rule 18. A splicer shall be approved if: (a) he has 5 years splicing experience; (b) makes an acceptable splice in Michigan witnessed by an inspector of the Michigan department of labor; and, (c) the inspector then recommends approval to the authority having jurisdiction; or he may present suitable credentials certifying his qualifications as a splicer from a major wire rope company or tramway manufacturer to the authority having jurisdiction to consider for approval.

R 408.79 Operation of multiple tows by single operator; conditions; attendant.

Rule 19. (1) A single operator may operate more than 1 fiber rope tow, but not more than 2, if each of the following conditions are met:

(a) The length of the tows, measured from the loading area to the safety gate, is not more than 800 feet.

(b) All terminal areas, loading and unloading areas of all tows, and the entire tow lines, are clearly visible to the operator.

(c) The operator has all tow controls available to him while maintaining the surveillance required in subdivision (b).

(d) The operator stops all tows under his supervision if he leaves the controls for any reason.

(2) If the conditions in subrule (1) are not met, an attendant shall be required at each loading and unloading station, and a permanently installed 2-way voice communication system shall be provided between the motor control point, loading stations, and unloading stations. The power for this sytem shall be independent of the primary power source.

History: 1954 ACS 92, p. 45, Eff. July 21, 1977.

R 408.90 Ski lift accident or breakdown; report; securing scene of accident.

Rule 30. (1) An operator shall immediately report to the department of labor by telephone an accident involving a ski lift that results in serious injury to, or the death of, a person, including an employee; or a breakdown resulting from structural, mechanical, electrical, or operational failure of a ski lift. The operator shall confirm this report by using the appropriate form provided by the department and forwarding it to the department within 7 days after the occurrence of the accident or breakdown.

(2) The director of the department of labor or his authorized representative, after consulting with the operator, may require the scene of the accident be secured and undisturbed in order to assure the safety of persons in the area and for the removal of injured or deceased persons. If a ski lift is removed from service by the director of the department of labor, the director shall order an immediate investigation by the department.

History: 1954 ACS 92, p. 45, Eff. July 21, 1977.

R 408.91 First aid.

Rule 31. At least 1 person trained to administer first aid and to transport injured persons shall be available at all times a tramway, lift, or tow is operating and transporting passengers.

History: 1954 ACS 92, p. 46, Eff. July 21, 1977.

R 408.92 Evacuation of ski lifts; drills.

Rule 32. (1) A method shall be provided by the owner operator wherein a skier entangled in the rope of a rope tow may be evacuated safely within a reasonable time.

(2) Provisions shall be made by the owner operator for emergency evacuation of reversible aerial tramways and aerial lifts. These shall include a detailed written plan of evacuation, equipment available that is necessary for evacuation, and an adequate training program for personnel. Evacuation drills shall be conducted at regularly established intervals not less than 1 every 12 calendar months, and the drills shall be recorded in the operational log of each tramway or lift.

R 408.94 Toboggans and sleds.

Rule 34. A lift or tow, while transporting skiers, shall not be used to transport toboggans or sleds, except by authorized personnel.

History: 1954 ACS 92, p. 46, Eff. July 21, 1977.

R 408.95 Rescission.

Rule 35. R 408.101 to R 408.117 and R 408.131 to R 408.144 of the Michigan Administrative Code, appearing on page 4750 of the 1968 Annual Supplement to the Code, pages 6189 and 6190 of the 1972 Annual Supplement to the Code, pages 7313 to 7315 of the 1974 Annual Supplement to the Code, and pages 8045 to 8050 of the 1975 Annual Supplement to the Code, are rescinded.

History: 1954 ACS 92, p. 46, Eff. July 21, 1977.

R 408.97 Skier, spectator, and public conduct in ski areas.

Rule 37. The following rules pertaining to skier, spectator, and public conduct shall be posted by the ski area operator in and around the ski area in a conspicuous place open to the public:

(a) A person unloading from a ski lift shall move immediately out of the unloading area.

(b) A person shall not willfully board or embark upon, or disembark from, a ski lift, except at an area designated for this purpose.

(c) A person shall conduct himself or herself within the limits of his or her individual ability and shall not act or ski in a manner that may contribute to his or her injury or that of any other person.

(d) A person shall not do any act which interferes with the running or operation of a ski lift, such as, but not limited to: swinging or bouncing on an aerial lift; attempting to contact supporting towers, machinery, guides, or guards while riding on a ski lift; or skiing out of the designated ski track on a surface lift or tow.

(e) A person shall not ski in an area that is designated as closed, nor shall a person remove any sign used to designate a closed area.

(f) A person involved in an accident causing injury to himself or herself or others shall immediately notify the ski patrol, the ski area operator, or the area manager and shall clearly identify himself or herself.

(g) A skier shall maintain control of his or her speed and course at all times and shall stay clear of any snowgrooming equipment, any vehicle, any lift tower, any other persons, or any other equipment at a ski area.

MINE SAFETY BOARD

MINE SAFETY

(By authority conferred on the mine safety board by section 6 of Act No. 264 of the Public Acts of 1967, being §425.136 of the Michigan Compiled Laws)

R 408.121 Incorporation of federal standards.

Rule 1. (1) The following standards all in Title 30 of the Code of Federal Regulations are incorporated herein by reference:

(a) Part 55 entitled Health and Safety Standards—Metal and Non-Metallic Open Pit Mines, filed on July 30, 1969, as amended, revised or redesignated through December 7, 1970.

(b) Part 56 entitled Health and Safety Standards—Sand, Gravel and Crushed Stone Operations, filed on July 30, 1969, as amended, revised or redesignated through December 7, 1970.

(c) Part 57 entitled Health and Safety Standards—Metal and Non-Metallic Underground Mines, filed on July 30, 1969, as amended, revised or redesignated through December 7, 1970.

(2) Parts 55, 56 and 57 of Title 30 of the Code of Federal Regulations are available for inspection by the public at the Michigan Department of Labor, 300 East Michigan Avenue, Lansing, Michigan 48926. A copy thereof may be purchased from the United States Government Printing Office, Superintendent of Documents, Washington, D.C. 20402, or at the Michigan Department of Labor, 300 East Michigan Avenue, Lansing, Michigan 48926, at a cost of $1.50.

History: 1954 ACS 69, p. 55, Eff. Feb. 7, 1972.

R 408.122 Authority to take action or give approval.

Rule 2. Where in the standards enumerated in R 408.121 authority to take action or give approval is vested in the secretary of the interior or in the director of the bureau of mines, the authority shall be deemed to be vested in the director of the Michigan department of labor.

History: 1954 ACS 69, p. 56, Eff. Feb. 7, 1972.

SKI AREA SAFETY BOARD

AMENDMENTS TO BASIC STANDARD

R 408.131—R 408.144 Rescinded.

R 408.171 Definitions.

Rule 1. (1) "Abandoned mine" means a mine at which operations have ceased, and where resumption of production is not reasonably expected.

(2) "Idle mine" means a mine on which active production has ceased and where resumption of production can be reasonably expected and where the owner has not dismantled existing structures or equipment.

(3) "Mine" means an underground mine, open pit mine, stone quarry or sand and gravel pit.

History: 1954 ACS 74, p. 79, Eff. Feb. 15, 1973.

R 408.172 Sealing of abandoned underground mines.

Rule 2. (1) An underground mine shaft opening of an underground mine which has become abandoned subsequent to the effective date of these rules shall be sealed by the owner or operator at bedrock with reinforced concrete and back-filled to the surface with rock, earth or other suitable fill. An underground mine shaft opening may be filled with rock, earth or other nondegradable fill. A mine shaft opening which has a concrete lining from bedrock to surface may be sealed with a reinforced concrete slab at the surface level. An opening already closed shall be maintained in a condition approved by the state mine inspector to protect the public from harm.

(2) An adit or horizontal tunnel opening into an underground mine which has become abandoned subsequent to the effective date of these rules shall be sealed by the owner or operator by completely sealing the opening in rock with a reinforced concrete bulkhead or by closing the opening at the entrance for a distance of at least 15 feet by blasting down the roof rock. An adit or a horizontal tunnel opening into an underground mine which cannot be sealed in rock shall be sealed in a manner acceptable to the state mine inspector. An adit or tunnel opening that is concrete lined may be sealed at the entrance wtih a reinforced concrete bulkhead. An adit or horizontal tunnel opening already closed shall be maintained in a condition approved by the state mine inspector to protect the public from harm.

(3) Each filled opening shall be mounted with earth or rock or both to a height of at least 6 feet, except openings which have been sealed with a concrete cap, and marked with 1 or more signs mounted on a post extending at least 6 feet above the ground and bear a warning sign as provided in R 408.180.

History: 1954 ACS 74, p. 79, Eff. Feb. 15, 1973.

R 408.174 Inspection of idle mines.

Rule 4. An idle mine shall be inspected and maintained in a condition approved by the state mine safety inspector. During the period required to bring the property in compliance with R 408.176, the owner shall maintain a daily inspection.

History: 1954 ACS 74, p. 79, Eff. Feb. 15, 1973.

R 408.175 Idle or abandoned sand and gravel pits.

Rule 5. The owner or operator of an idle or abandoned sand and gravel pit shall:

(a) Maintain all slopes and walls in a manner to protect against slides or falling ground.

(b) Have all vehicle entrances locked against unauthorized entry with properly posted danger signs notifying of the potential hazards or provide an on-site watchman.

Digitized by Google Original from UNIVERSITY OF MICHIGAN

(c) Inspect all gates at least once every 30 days to insure that they are securely locked and posted.

(d) If in the judgment of the state mine inspector a potential hazard exists on an idle property, the property shall be fenced in accordance with R 408.179.

History: 1954 ACS 74, p. 79, Eff. Feb. 15, 1973.

R 408.176 Idle open pit mines and quarries.

Rule 6. The owner or operator of an idle open pit mine or quarry shall:

(a) Maintain all slopes and walls in a manner to protect against slides or falling ground.

(b) If in the opinion of the state mine inspector a potential hazard exists in any area of an open pit or quarry that cannot be sloped, install a barrier in such areas and post it with signs specified in R 408.180.

(c) Maintain and inspect barriers and signs at least once every 30 days.

History: 1954 ACS 74, p. 79, Eff. Feb. 15, 1973.

R 408.177 Abandoned open pit mines.

Rule 7. The owner of an abandoned open pit mine shall:

(a) Design and maintain all slopes and walls in a manner to protect against slides or falling ground.

(b) Install perimeter fences in accordance with R 408.179.

History: 1954 ACS 74, p. 80, Eff. Feb. 15, 1973.

R 408.178 Abandoned quarries.

Rule 8. The owner of an abandoned quarry shall:

(a) Design and maintain all slopes and walls in a manner to protect against slides or falling ground.

(b) Fence the property in accordance with R 408.179 if in the judgment of the state mine inspector a potential hazard exists.

History: 1954 ACS 74, p. 80, Eff. Feb. 15, 1973.

R 408.179 Fencing.

Rule 9. The owner shall install and maintain a fence set at a distance from the edge of the opening which insures that the fence will not be displaced or distorted by any subsequent subsidence around the opening. At no point in the fence shall the top be less than 6 feet above the ground and the bottom of the fence shall be not more than 4 inches off the ground. The fence shall be constructed of either diamond lawn fence 60 inches high of 12½ gauge metal with not more than 2 x 4 inch openings and be topped with 3 strands of 2 point 12½ gauge barbed wire not less than 4 inches between strands; or chain link fence of 11 gauge metal with not more than 2 x 2 inch openings and of galvanized metal and be nonclimbable fencing 5 feet high, topped with 2 strands of 2 point 12½ gauge barbed wire 5 inches between strands, installed on 8-foot studded T or U, cross section, reflectorized posts. Posts shall be on not more than 10-foot centers. Signs as described in R 408.180 shall be mounted on 1 of the fence posts on all sides of the fence at not more than 200-foot intervals.

History: 1954 ACS 74, p. 80, Eff. Feb. 15, 1973.

R 408.180 Signs.

Rule 10. All signs shall be constructed of not less than 18 gauge metal of a 14 x 20 inch size and shall bear the following wording in minimum lettering dimensions:

BUREAU OF SAFETY AND REGULATION

EMPLOYMENT OF MINORS

(By authority conferred on the director of labor by section 12 of Act No. 157 of the Public Acts of 1947, and sections 9 and 377 of Act No. 380 of the Public Acts of 1965, being §§409.12, 16.109, and 16.477 of the Michigan Compiled Laws)

R 408.201 Questions answered on the employment of minors.

Rule 1. Q. What do the laws of Michigan require for the legal employment of minors under 18 years of age?

A. The employer must have on file working permit and proof of age of each minor employed together with the approval of the occupations in which the minors are engaged.

Q. How is the approval of occupation obtained?

A. By application to the department of labor on the official forms provided, copy of approval with identifying serial number is returned to the employer.

Q. On what basis are approvals granted?

A. The occupations are approved as not being injurious to health or morals or unduly hazardous.

Q. Are approvals of occupations required for each minor employed?

A. No. Any number of minors may be employed on the jobs indicated on the official approval in the files of the employer.

Q. Where is the working permit obtained?

A. The working permit and age certificate is issued by the local school authorities on receiving the information requested on the offer of employment form given to the minor by the school.

Q. What steps are necessary to get the working permit?

A. The school requires the following:

a. Evidence of approval of the occupation.

b. An offer of employment on the official school form, describing the jobs and hours of employment covered under the approval number.

Working permits and approvals of occupation must be available to factory inspectors of the department of labor.

History: 1944 AC, p. 351; 1954 AC, p. 4601.

R 408.202 Regulations.

Rule 2. (1) Minors 16-18 years of age, unless otherwise prohibited by statute, may be employed up to 10:00 p.m. on jobs approved by the department of labor as not being detrimental to morals or unduly hazardous, such hour being considered as not detrimental to the health of employed minors.

(2) Minors 16-18 years of age, unless otherwise prohibited by statute, may be employed beyond 10:00 p.m. on jobs approved by the department of labor as not being detrimental to morals or unduly hazardous, under conditions approved by the department of labor as not being injurious to health.

(3) Minors 14-16 years of age, unless otherwise prohibited by statute, may be employed up to 8:30 p.m. on jobs approved by the department of labor as not

Digitized by Google Original from UNIVERSITY OF MICHIGAN

being detrimental to morals or unduly hazardous, such hour being considered as not detrimental to the health of employed minors.

(4) Minors 14-16 years of age, unless otherwise prohibited by statute, may be employed beyond 8:30 p.m. on jobs approved by the department of labor as not being detrimental to morals or unduly hazardous, under conditions approved by the department of labor as not being injurious to health.

(5) War emergency (in cooperation with the war manpower commission): Male minors 16-18 years of age, not attending school, employed in occupations declared essential to the war effort by the war manpower commission, in the manufacture of war materials, may be employed not later than 11:30 p.m. subject to the additional policies of the war manpower commission hereinafter mentioned.

(6) Minors attending school and working part time may not have a combined work and school day of more than 10 hours or combined work and school week of more than 48 hours.

History: 1944 AC, p. 352; 1954 AC, p. 4601.

R 408.203 Michigan laws regulating hours of employment for minors.

Rule 3. (1) No minor under 18 years of age may be employed in any place where the manufacture of any kind of goods is carried on, or where any goods are prepared for manufacture, or in any office or restaurant, theatre, concert hall, music hall, hotel, hospital, etc., for a period longer than an average of 9 hours a day or 54 hours in any week, nor more than 10 hours in any 1 day; provided, however, that the provisions of this rule in relation to the hours of employment shall not apply to nor affect any person, corporation, or association engaged in preserving and shipping perishable goods in fruit and vegetable canning or fruit packing establishments, or student and graduate nurses in hospitals or nurses in fraternal or charitable homes. Such employment, however, must be approved by the department of labor as being not injurious to health.

(2) All establishments shall keep posted a copy of this section printed in large type in a conspicuous place. In establishments having a time clock, such copy shall be posted near the time clock.

(3) Copies of this section, suitable for posting, shall be furnished upon the application of any employer to the commissioner of labor, Lansing.

(4) No minor under 15 may work during hours when school is regularly in session.

(5) No girl under 18 may work in a manufacturing establishment from 6:00 p.m. to 6:00 a.m.

(6) No minor under 16 shall be employed in any manufacturing establishment, workshop, etc., between the hours of 6 p.m. and 6 a.m.

History: 1944 AC, p. 352; 1954 AC, p. 4602.

R 408.204 Hazardous occupations.

Rule 4. (1) The occupations in which minors under 18 years of age are employed and for which work permits are required shall be approved by the department of labor as not being injurious to health or morals or unduly hazardous. Neither this rule nor R 408.203 shall apply to the employment exemptions described in sections 14 and 15 of Act No. 157 of the Public Acts of 1947, being §§409.14 and 409.15 of the Michigan Compiled Laws.

(2) Under section 12 of Act No. 157 of the Public Acts of 1947, being §409.12 of the Michigan Compiled Laws, after consultation with employers, employee representatives, school officials, insurance representatives, health department

officials and legislators, the following occupations were declared to be injurious either to health or morals or unduly hazardous for the employment of minors under 18 years of age and employment at these occupations is prohibited:

(a) All occupations in and around chemical plants, manufacturing explosives or dangerous chemicals, cement, paint or varnish. Except—under approved conditions.

(b) Vehicle drivers. Except—under approved conditions.

(c) All occupations in and around mines or quarries. Except—approved work in offices or laboratory; approved work surveying outside the mine or quarry.

(d) All occupations in or in connection with sawmills or logging industry. Except—approved work in offices; approved work in timber cruising, surveying or logging engineering parties; approved work marking or tallying lumber in yards; approved work involving clean up in the lumber yards; approved clerical work in yards or shipping sheds, such as done by ordermen, tallymen and shipping clerks.

(e) Operating or tending woodworking machinery.

(f) Setting up, adjusting, cleaning, or oiling machinery in motion.

(g) Brazing, welding, soldering, heat treating.

(h) Blast furnaces, foundries, ore reduction. Except—certain approved operations.

(i) Motion picture projectionists. (State law.)

(j) Sand blasting.

(k) Females on general public messenger service.

(l) No minor under 18 years of age shall serve any liquor or entertain or work, either on a paid or voluntary basis, in that portion of the premises of an establishment wherein liquor is being served or consumed.

(m) The outside erection and repair of electric light and power lines, installing or removing electric light and power meters, inside wiring. Except—where approved for minors between 16 and 18 years to work as assistants to trained electricians or electrical engineers over 21 years of age.

(n) All occupations that require operation of or helping on hazardous power-driven machinery.

(o) Any occupation requiring lifting of more than 50 pounds for males 16 and 17 years of age, 35 pounds for males 14 and 15, and 35 pounds for females.

(p) All occupations in or around construction jobs. Except—where approved for minors between 16 and 18 years of age to work as assistants to trained craftsmen.

(q) Occupations in laboratories that are deemed hazardous.

(r) Employment of minors under 16 in garages. Employment of minors under 16 at gas stations and parking lots.

(s) Employment of minors under 16 in bowling alleys as pin setters.

(t) All occupations involving slaughtering, butchering and meat cutting. Except—approved occupations in retail establishments.

(u) Certain occupations in and around transportation terminals.

(v) Occupations requiring operating of elevators or other hoisting equipment. Except—minors age 16 or over may operate automatic push button control elevators incidental to their work.

(w) Street or road work where minors are exposed to moving traffic.

(x) Occupations involving grinding, stone cutting, polishing, and buffing.

(y) Occupations requiring painting, spray painting or dipping. Except—certain approved painting occupations.

(z) Occupations in the glass industry. Except—certain approved occupations.

(aa) Occupations in the tanning industry. Except—certain approved occupations.

(bb) Occupations where minor is exposed to dust, poisonous gases, lead fumes or other health hazards.

(cc) Occupations where there is exposure to ionizing radiation including x-ray.

History: 1944 AC, p. 352; 1954 AC, p. 4603; 1954 ACS 41, p. 19, Eff. Feb. 14, 1965; 1954 ACS 59, p. 39, Eff. Aug. 14, 1969.

Departmental note: The terminology describes the general occupation. Specific jobs within the occupation may be approved if investigation discloses such jobs to be not detrimental to health and morals or unduly hazardous.

R 408.205 Michigan laws regulating employment of women.

Rule 5. (1) No female may be employed at any task disproportionate to her strength nor shall she be employed in any place detrimental to her morals, her health, or her potential capacity for motherhood.

(2) Females are prohibited from operating polishing wheels, belts, buffers, and so forth, in any basement or room which is wholly or partly beneath the surface of the ground.

(3) All persons who employ females in stores, shops, office or manufactories as clerks, assistants, operatives, or helpers in any business, trade or occupations carried on or operated by them, shall be required to procure and provide proper and suitable seats for all such females and shall permit the use of such seats, rests or stools, as may be necessary and shall not make any arbitrary rules, regulations or orders preventing the use of such stools or seats at reasonable times.

(4) Women may not be employed in any place where the manufacture of goods is carried on, or where the goods are prepared for manufacture, or in service or retail establishments, etc., for more than an average of 9 hours a day or 54 hours in any week, nor for more than 10 hours in any 1 day. Specifically excluded from these provisions is employment by concerns engaged in preserving and shipping perishable goods in fruit and vegetable canning or fruit packing establishments. Student and graduate nurses in hospitals and fraternal and charitable homes are also excluded. The excluded employment, however, must be approved by the department of labor as not being injurious to health of the person or persons so engaged.

(5) No women under the age of 18 may be employed in any manufacturing establishment between 6 p.m. and 6 a.m.

(6) Employers are prohibited from discriminating as between sexes in the payment of wages in the manufacture or production of any article of like value, workmanship and production.

(7) Stairways in establishments where women are employed must be properly screened at sides and bottom.

(8) Every establishment employing 2 or more women must be provided with proper wash and dressing rooms. The law requires these rooms to be kept in a clean and sanitary condition. Employees must have reasonable access to them. If 1 or more women are employed, an adequate number of separate and distinct toilets must be provided plainly marked for each sex; at least 1 of such toilet seats for each 25 persons employed is required.

History: 1944 AC, p. 353; 1954 AC, p. 4603.

R 408.206 Policy on employment of youth under 18 years of age.

Rule 6. (1) The necessary expansion of our military and industrial personnel requires maximum utilization of all available and potential sources of labor. These potential sources include youth between the ages of 14 and 18 years whose services would not be immediately required in normal times. If employed,

however, it should be only under conditions which adequately safeguard their physical and intellectual development.

(2) The first responsibility and obligation of youth under 18 even in wartime is to take full advantage of their educational opportunities in order to prepare themselves for war and postwar services and for the duties of citizenship. It is essential that young people have the fullest possible opportunity consistent with the war effort to complete their education. Those with special aptitudes and capacity for further training should continue their education in order to develop their maximum abilities applicable to war and postwar needs.

(3) In most cases youth under 18 can best contribute to the war program by continuing in school and, when their services are required, accepting vacation and part-time employment. However, it is recognized that the demands of the war period will increase the number who in normal times leave school to enter full-time employment before reaching 18. In any case, all forms of employment of such youth, including employment in agriculture, must be specially safeguarded. Their services must be used in such ways as to bring about their maximum contribution to manpower needs consistent with the protection of their health and welfare and the fullest utilization and development of their aptitudes, abilities, and interests. The achievement of these objectives requires the active cooperation of young people, their parents, government agencies, educational authorities, management, and labor.

(4) To promote proper utilization of the labor resources of youth with due regard to the welfare of youth and to the future needs of the nation, the war manpower commission hereby declares as basic national policy that:

(a) School-attendance laws and child-labor standards embodied in state and federal laws be preserved and enforced, and the minimum standards hereinafter listed not to be construed to warrant any relaxation of these laws or lowering of the standards embodied in them.

(b) No one under 14 years of age be employed full-time or part-time as a part of the hired labor force.

(c) Youth under 18 years of age be employed only:

(i) After the employer obtains proof of age in the form of employment or age certificates or, in case such certificates are not legally required, other reliable evidence.

(ii) In work suited to their age and strength, avoiding especially occupations that are hazardous or detrimental to health or welfare.

(iii) Where provision is made for adequate meal and rest periods, or time, and facilities therefor; adequate sanitary facilities; and safeguards for health and safety.

(iv) For periods suited to their age and strength, and in no case for more than 8 hours a day or 6 consecutive days except as deviations may be necessary where the worker is engaged in continuing farm work of a nonseasonal character as is domiciled at the place of employment, or except as temporary departures from the above standard under adequate safeguards, where permitted for youth aged 16 and 17 under existing federal or state laws, rules or regulations, may be necessary to meet a special emergency.

(v) During hours of day not detrimental to their health and welfare.

(vi) At wages paid adult workers for similar job performance.

(d) Youth aged 14 or 15 be employed only when, in addition to the foregoing conditions:

(i) Qualified older workers are not available.

(ii) The employment is not in manufacturing or mining occupations.

(e) In-school youth be employed only to the extent that the combined school and work activities involve no undue strain, at least for youth under 16.

(f) In-school youth not be employed during school hours unless the area or regional manpower director has determined that temporary needs of an emergency character cannot be met by full use of other available sources of labor, in which case school programs shall be adjusted under plans that:

(i) Provide for the educational progress of those who take employment.

(ii) Avoid interference with the school attendance of those who do not take employment.

(iii) Avoid the closing of any school or grades therein except to the extent that the hours, terms, or curricula are readjusted to preclude the curtailment of educational opportunities.

(g) When wartime emergency cooperative arrangements have been entered into with school authorities for the part-time employment of in-school youth as a part of the school program, the employer be responsible for certifying to the school authorities that such employment will be in conformity with state and federal laws governing the employment of minors and with the standards contained in sections 3 to 7 above, and the school authorities be responsible for permitting schoolchildren to take only those jobs that will contribute definitely to their educational welfare and useful work experience.

(h) When it is necessary to transport young people to and from work, safe and adequate means of transportation be provided, and the period of work and transportation not exceed 10 hours a day.

(i) Where youth under 18 years of age are recruited in groups for agricultural work requiring them to live away from home, prior to placement, assurances be furnished by appropriate community or other agencies that suitable living conditions, sanitary facilities, health protection, supervision, and leisure-time activities will be provided; and in no case youth aged 14 or 15 be recruited for work requiring them to live away from home except where such work is in connection with the program conducted by recognized youth-serving agencies that provide close supervision.

(j) Any youth interested in work in another area not leave his own area in search of work without first:

(i) Registering for employment at the nearest local office of the United States employment service or such other agency as may be designated by the war manpower commission.

(ii) Presenting evidence of parental consent.

(iii) Being referred by such office to a specific job opening where he can be lawfully employed, and where there are suitable arrangements for housing.

History: 1944 AC, p. 354; 1954 AC, p. 4604.

Departmental note: In occupations declared essential to the war effort by the war manpower commission, male minors over 16 years of age, and not attending school, may be employed not later than 11:30 p.m.

OXYGEN SUPPLY EQUIPMENT

(By authority of section 23 of Act No. 285 of the Public Acts of 1945, as amended, being §408.73 of the Michigan Compiled Laws)

R 408.491 Oxygen supply equipment standards.

Rule 1. "The requisite oxygen" is covered by the following minimum requirements:

(a) A minimum of 2 masks, self-contained, oxygen type, bureau of mines approved, to be at each fire or alarm, with the exception of predetermined grass, rubbish, or automobile fires or alarms. No apparatus carrying masks to have less than 2.

(b) Chiefs' cars are not considered fire fighting apparatus for the purposes of these requirements.

(c) All masks, self-contained, oxygen type, shall be of the U. S. bureau of mines standards and of such design as to adequately meet the requirements of the fire service.

(d) Masks shall be a minimum 1-hour mask with ½-hour minimum charge or supply.

(e) Provisions shall be made for servicing and replenishing of masks.

(f) Masks shall be inspected at least quarterly by qualified persons and maintained in serviceable condition.

(g) Fire chiefs shall give information semi-annually as outlined on report forms provided by the department of labor.

History: 1944 ACS 5, p. 15; 1954 AC, p. 4675.

R 408.492 Report form covering oxygen supply equipment.

Rule 2. City _____ Date _____

Act No. 220 of the Public Acts of 1945 provides: "The employees of a fire department shall be furnished equipment, meeting the approval of the Department of Labor providing the requisite oxygen for such employees, when required in the line of duty, in the fighting of fire, to enter any place where the supply of oxygen is insufficient or unsafe."

To indicate compliance with Act No. 220 of the Public Acts of 1945 the following information is necessary:

1. Have you the minimum number of masks required under the standards? _____

2. When were masks purchased? Date _____

_____

(Use additional sheets if necessary)

3. Do masks meet bureau of mines standards? _____
4. Are masks checked for efficiency by qualified person? _____
5. When were masks last inspected? Date _____
6. Are masks now in condition as to afford adequate protection? _____

Recommendation

Proper training in the use of oxygen masks is recommended. Is such training provided? _____

_____

Fire Chief

(Reports are semi-annual and are due April 1 and October 1. Send reports to the Commissioner of Labor, 6th Floor, Lewis Cass Building, Lansing 13, Michigan.)

HEARINGS

(By authority of Act No. 197 of the Public Acts of 1952, being §24.101 et seq. of the Michigan Compiled Laws)

R 408.501 "Person" defined.

Rule 1. (1) Whenever the word "person" is used, it shall mean 1 or more individuals, partnerships, associations, corporations, legal representatives, trustees, trustees in bankruptcy, receivers, and institutions.

(2) "Commissioner" shall mean the commissioner of labor.

History: 1944 ACS 36, p. 28; 1954 AC, p. 4676.

R 408.502 Notice of hearing.

Rule 2. Notification of any hearing by the commissioner of labor will be by registered mail, and will state the date, time and place the hearing is to be held and the reasons for holding such hearing. Such notice shall be mailed at least 20 days prior to said hearing. Unless indicated otherwise, all hearings shall be held in the commissioner's office in Lansing.

History: 1944 ACS 36, p. 28; 1954 AC, p. 4676.

R 408.503 Appearances.

Rule 3. When an appearance is made at a hearing, it shall be made either in person, by a duly authorized agent, or by counsel.

History: 1944 ACS 36, p. 28; 1954 AC, p. 4676.

R 408.504 Answer or statement on charges.

Rule 4. The person or persons who have been served with a notice of hearing may, at his option, file a written answer thereto prior to the date set for hearing, or at said hearing may appear and present an oral or written statement on the charges contained in the notice of hearing.

History: 1944 ACS 36, p. 28; 1954 AC, p. 4676.

R 408.505 Failure to appear.

Rule 5. If the person or persons who have been previously served with a notice of hearing fail to appear at a noticed hearing, the commissioner may proceed with a hearing of the cases brought before him and may, on the evidence presented, make his decision.

History: 1944 ACS 36, p. 29; 1954 AC, p. 4676.

R 408.506 Statement of pertinent information; evidence.

Rule 6. At the contested hearing there shall be presented a fair and accurate statement of the information pertinent to the contested case and the whole or any part thereof may be offered at said hearing as evidence on behalf of the state department of labor.

History: 1944 ACS 36, p. 29; 1954 AC, p. 4676.

DEPARTMENT OF LABOR

WAGE DEVIATION BOARD

GENERAL RULES

(By authority conferred on the director of labor and the wage deviation board by sections 6, 7, and 14 of Act No. 154 of the Public Acts of 1964, as amended, and sections 7, 9, and 377 of Act No. 380 of the Public Acts of 1965, being §§408.386, 408.387, 408.394, 16.107, 16.109, and 16.477 of the Michigan Compiled Laws)

R 408.701 Records.

Rule 1. (1) An employer shall keep employment records for each employee showing his:

(a) Name.

(b) Home address.

(c) Date of birth.

(d) Occupation in which employed.

(e) Total daily hours worked, showing beginning and ending time of each work period, computed to the nearest unit of 15 minutes.

(f) Total hours worked in each pay period.

(g) Total hourly, daily or weekly basic wage.

(h) Total wages paid each pay period.

(i) Separate items on payroll records for each allowance for meals, lodging, gratuities and housing used as part of the minimum wage.

(2) An employer shall keep records, for employees paid on a piecework basis pursuant to a piece rate scale approved by the wage deviation board, showing the piece rate paid and the total number of units of each crop harvested by each employee during each pay period.

(3) Records required under this rule shall be preserved by the employer for 3 years after the date thereof.

History: 1954 ACS 48, p. 29, Eff. Nov. 14, 1966; 1954 ACS 66, p. 17, Eff. July 1, 1971.

R 408.702 Deductions from minimum wage rate for meals and lodging.

Rule 2. Deductions from the state minimum wage rate are permissible for the following items furnished to an employee:

(a) Meals shall consist of adequate portions of a variety of wholesome and nutritious foods, provided by the employer to the employee without charge, at the usual meal times or as nearly as possible thereto, and accepted and consumed by the employee. For a meal including a selection of an entree of eggs, meat, fish or poultry, 2 vegetables, salad, beverage, and bread and butter a deduction of 5¢ per hour per meal is allowed, except (i) for a light meal consisting of a selection of sandwiches, beverage and a dessert a deduction of 3¢ per hour per meal is allowed, and (ii) for a breakfast consisting of a selection of fruit, cereals or meat, eggs, beverage, and bread and butter a deduction of 3¢ per hour per breakfast is allowed.

(b) Lodging, 8¢ per hour for single worker occupancy and 4¢ per hour for multiple worker occupancy of the same room.

History: 1954 ACS 48, p. 29, Eff. Nov. 14, 1966; 1954 ACS 50, p. 52, Eff. May 15, 1967; 1954 ACS 66, p. 17, Eff. July 1, 1971.

R 408.703 Deductions from minimum wage rate for gratuities.

Rule 3. (1) For the purposes of these rules, "gratuity" means a tip or voluntary monetary contribution received by an employee directly from a guest, patron, or customer for services rendered to that guest, patron, or customer and reported by the employee to the employer for federal insurance contribution act (social security) purposes.

(2) A deduction for gratuities received by the employee shall not exceed 25% of the state minimum wage rate.

History: 1954 ACS 48, p. 30, Eff. Nov. 14, 1966; 1954 ACS 50, p. 52, Eff. May 15, 1967; 1954 ACS 66, p. 17, Eff. July 1, 1971; 1954 ACS 86, p. 68, Eff. Jan. 3, 1976.

R 408.704 Deductions from minimum wage rate for agricultural housing.

Rule 4. (1) A housing deduction is permissible for 1 agricultural wage earner per family occupying a unit, on wages paid up to 50 hours a week. In the case of 2 or more single wage earners occupying a unit, the allowable deduction shall be equally divided among the occupants.

(2) A deduction of 8¢ per hour is permissible for single worker occupancy and 4¢ per hour for multiple worker occupancy of the same room. An additional deduction is permissible for each additional bedroom of 3¢ per hour for family occupancy. To qualify for these deductions, the housing shall be fully licensed under Act No. 289 of the Public Acts of 1965, being §§286.621 to 286.634 of the Michigan Compiled Laws.

(3) For additional conveniences immediately contiguous to the family space, in either year-round or seasonal type housing, deductions per hour per family unit will be permitted as follows:

Pressure water	4¢
Toilet	2¢
Shower	1¢
Central heating	4¢
Refrigerator	1¢

History: 1954 ACS 48, p. 30, Eff. Nov. 14, 1966; 1954 ACS 50, p. 53, Eff. May 15, 1967; 1954 ACS 66, p. 18, Eff. July 1, 1971.

R 408.705 Limitations on total deductions allowed.

Rule 5. In no event shall the total deductions under R 408.702, R 408.703, and R 408.704 exceed the maximum percentage prescribed by statute.

History: 1954 ACS 50, p. 53, Eff. May 15, 1967.

R 408.711 Scale of piecework for harvesting vegetables.

Rule 11. The following scale of piecework applicable to the harvesting of vegetables is determined by the wage deviation board to be equivalent to the prevailing minimum hourly wage for such work:

Crop/Unit	Rate Eff. 1/1/79	Rate Eff. 1/1/80	Rate Eff. 1/1/81
Asparagus (Pound)	.091	.097	.105
Beans (Snap) (Bushel)	$2.58	$2.76	$2.98
Cucumber (Pickles) (Pound)	.036	.038	.041
Greens (25 Pound Crate)	.534	.571	.617
Lettuce (Head) (24 Head Crate)	.158	.169	.183
Onions, Dry (Yellow) (5 Peck Crate)	.217	.232	.251
Onions, Dry (White) (5 Peck Crate)	.381	.407	.440

BUREAU OF SAFETY AND REGULATION

OVERTIME COMPENSATION

(By authority conferred on the director of labor by section 6 of Act No. 154 of the Public Acts of 1964, being §408.386 of the Michigan Compiled Laws)

R 408.731 Determining workweek for overtime compensation.

Rule 1. (1) As used in these rules:

(a) "Act" means Act No. 154 of the Public Acts of 1964, being §408.381 et seq. of the Michigan Compiled Laws.

(b) "Workweek" means, as applied to an employee, a fixed and regularly recurring period of 168 hours or 7 consecutive 24-hour periods. It need not coincide with the calendar week, but may begin on any day and at any hour of the day. For purposes of computing overtime pay, a single workweek may be established for 1 employee, or different workweeks may be established for different employees or groups of employees.

(2) An employer shall establish an employee's workweek and indicate the beginning time and day of the workweek in the employment record for the employee.

(3) Once the beginning time of an employee's workweek is established, it remains fixed and may be changed only if the change is intended to be permanent and is not designed to evade the overtime requirements of the act.

(4) Each workweek stands alone, and averaging of hours over 2 or more weeks is prohibited, regardless of whether the employee works on a standard or swing shift schedule and regardless of whether the employee is paid on an hourly, daily, weekly, biweekly, monthly, piecework, commission, or other basis.

History: 1954 ACS 84, p. 51, Eff. Sept. 9, 1975.

R 408.732 Computing regular rate of pay for overtime compensation.

Rule 2. (1) As used in these rules, "regular rate" means a rate per hour not less than the statutory minimum, and includes all remuneration for employment at which an employee is employed, except for certain payments noted in subrule (2). Earnings may be determined on a piece rate, salary, commission, or some other basis, but in that case the overtime pay shall be computed on the basis of the hourly rate derived from the earnings.

(2) As used in these rules, regular rate does not include:

(a) Sums paid as gifts, or payments in the nature of gifts made at Christmas time, or on other special occasions as a reward for service, the amounts of which are not measured by or dependent on hours worked, production, or efficiency.

(b) Payments made for occasional periods when work is not performed due to a vacation, a holiday, an illness, a failure of the employer to provide sufficient work, or other similar causes; reasonable payments for traveling expenses; other

expenses incurred by an employee in the furtherance of his employer's interests and properly reimbursable by the employer; and other similar payments to an employee which are not made as compensation for employment.

(c) Sums paid in recognition of services performed during a given period when either the fact that payment is to be made and the amount of the payment are determined at the sole discretion of the employer at or near the end of the period and not pursuant to any prior contract, agreement, or promise causing the employee to expect such payments regularly; or the payments are made pursuant to a bona fide profit sharing plan or trust, or bona fide thrift or savings plan, having due regard, among other relevant factors, to the extent to which the amounts paid to the employee are determined without regard to hours of work, production, or efficiency.

(d) Contributions irrevocably made by an employer to a trustee or third person pursuant to a bona fide plan for providing life, accident, or health insurance, or old age, retirement, or similar benefits for employees.

(e) Extra compensation provided at a premium rate for certain hours worked by the employee in any day or workweek in that the hours are hours worked in excess of 8 in a day or in excess of the maximum workweek applicable to the employee under the act or in excess of the employee's normal or regular working hours, as the case may be, where the premium rate is not less than 1½ times the rate established in good faith for like work performed in nonovertime hours during the workday or workweek.

(f) Extra compensation provided at a premium rate for work by the employee on Saturdays, Sundays, holidays, or regular days of rest, or on the sixth or seventh day of the workweek, where the premium rate is not less than 1½ times the rate established in good faith for like work performed in nonovertime hours on other days.

(g) Extra compensation provided at a premium rate to the employee pursuant to an applicable employment contract or collective bargaining agreement for work outside of the hours established in good faith by the contract or agreement as the basic, normal, or regular workday, not exceeding 8 hours, or a workweek, not exceeding the maximum workweek applicable to the employee under section 4a(1) of the act where the premium rate is not less than 1½ times the rate established in good faith by the contract or agreement for like work performed during the workday or workweek.

(3) If an employee is paid on the basis of a single hourly rate, the hourly rate is the employee's regular rate.

(4) If an employee is paid on the basis of a weekly salary, with the agreement that the salary is compensation for a specified number of hours, the regular rate is computed by dividing the salary by the number of hours the salary is intended to compensate.

(5) If an employee is paid on the basis of a weekly salary and an express agreement as to the number of hours the salary is intended to compensate does not exist, the employee's regular rate is computed by dividing the salary by the appropriate hours specified in section 4a(1) of the act.

(6) If an employee is paid on an hourly rate plus commission or bonus, or salary plus commission or bonus, the bonus or the commission, or both, shall be considered as gross earnings for the workweek, and the regular rate is obtained by dividing the sum by the number of hours for which the salary was paid.

(7) If an employee is paid on a piece-rate basis, the regular rate of pay is computed by adding together the total earnings for the workweek from piece rates and all other earnings, such as bonuses, and any sums paid for waiting time

Digitized by Google

or other hours worked. This sum total is divided by the number of hours worked in that week to yield the piece worker's regular rate for that week.

(8) When payments are made to employees in the form of gratuities, meals, or lodging, permissible deductions to the extent permitted by rules of the general rules shall be included in determining the regular rate.

(9) When the salary covers a period longer than a workweek, such as a month, it shall be reduced to its workweek equivalent. A monthly salary is converted to its equivalent weekly wage by multiplying by 12, the number of months, and dividing by 52, the number of weeks. A semimonthly salary is converted to its equivalent weekly wage by multiplying by 24 and dividing by 52.

(10) If an employee in a single workweek works at 2 or more different types of work for which different time rates have been established, the regular rate for the workweek is the weighted average of the rates. "Weighted average" means the earnings from all rates added together and divided by the number of hours worked at all jobs.

(11) An employer shall establish an employee's regular rate of pay and designate that rate in the employment record for each employee.

DIRECTOR OF LABOR AND WAGE DEVIATION BOARD

CERTIFICATES FOR SHELTERED WORKSHOPS AND EMPLOYMENT OF HANDICAPPED WORKERS

(By authority conferred on the director of labor by section 6 of Act No. 154 of the Public Acts of 1964 and sections 7, 9, and 377 of Act No. 380 of the Public Acts of 1965, and on the wage deviation board by section 7 of Act No. 154 of the Public Acts of 1964, as amended, being §§408.386, 16.107, 16.109, 16.477, and 408.307 of the Michigan Compiled Laws)

R 408.751 Definitions.

Rule 1. (1) "Act" means the minimum wage law of 1964, being Act No. 154 of the Public Acts of 1964, as amended, and §§408.381 to 408.396 of the Michigan Compiled Laws.

(2) "Handicapped worker" means an individual who is clearly unable because of a physical or mental handicap to meet normal production standards in the work which he is to perform.

(3) "Sheltered workshop" or "workshop" means a charitable organization or institution conducted not for profit, but for the purpose of carrying out a recognized program of rehabilitation for handicapped workers, or providing such individuals with remunerative employment or other occupational rehabilitating activity of an educational or therapeutic nature.

(4) "Work activities center" means a workshop, or a separate department of a workshop having an identifiable program, separate supervision and records, planned and designed exclusively to provide therapeutic activities for handicapped workers whose physical or mental impairment is so severe as to extremely limit their productive capacity.

(5) "Training program" means a program of not more than 12 months' duration designed to (a) develop the patterns of behavior which will help a handicapped worker adjust to a work environment, or (b) teach the skills and knowledge related to a specific occupational objective of a job family, and which meets the

standards of the vocational rehabilitation division of the state department of education.

(6) "Evaluation program" means a program of not more than 6 months' duration, except that longer periods may be approved, using the medium of work to determine a handicapped worker's potential, and which meets the standards of the vocational rehabilitation division.

(7) "Special education work-study" means a public school program conducted by a teacher approved by the state department of education in cooperation with a coordinator of its vocational rehabilitation division for the purpose of carrying out a recognized program of rehabilitation for handicapped youth, or providing an evaluation and training program through the medium of remunerative employment.

History: 1954 ACS 53, p. 20, Eff. Feb. 14, 1968.

R 408.752 Applications for workshop and work activities center certificates.

Rule 2. (1) Application forms for certification of proposed rate structures for sheltered workshops or work activities centers shall be made available by the department of labor.

(2) The applications shall be submitted in duplicate on forms approved by the department of labor. A separate application may be required for each branch operated at a separate location or for each separate department subject to the act, regardless of whether a federal certificate is in effect for the total workshop.

(3) Sheltered workshop or work activities centers possessing an approved federal certificate shall submit a copy of the federal application in lieu of the department of labor application form. The federal certificate number shall be indicated on the application submitted to the department of labor.

(4) The application shall state the types of employment provided, the rehabilitation services offered, and the nature of the disabilities of the handicapped workers served, and state the estimated earnings of each handicapped worker who is unable to earn the minimum required by the act.

(5) If individual rates are requested, the application for a sheltered workshop certificate shall be accompanied by applications for special individual certificates for each worker for whom an individual rate is requested.

History: 1954 ACS 53, p. 21, Eff. Feb. 14, 1968.

R 408.753 Applications for special individual certificates.

Rule 3. (1) Application forms for special individual certificates authorizing the employment of handicapped workers at less than the minimum wage shall be made available by the department of labor.

(2) The application shall be signed jointly by the employer and the handicapped worker or his authorized representative and submitted in duplicate to the department of labor.

(3) The application shall state the dates of employment, the nature of the disability, a description of the occupation at which the worker is to be employed, and the wage the employer proposes to pay the handicapped worker per hour. The nature of the disability shall be stated in detail.

(4) Upon request of the department of labor, applications shall be accompanied by medical, psychological and productivity reports.

History: 1954 ACS 53, p. 21, Eff. Feb. 14, 1968.

R 408.754 Applications for special education work-study certificates.

Rule 4. (1) Applications for special education work-study certificates shall be made available by the department of labor.

(2) The applications shall be submitted in duplicate on forms approved by the department of labor and a separate application shall be made for each special education center operating a work-study program.

(3) The applications shall contain answers to all the questions presented on the form provided by the department, including a description of the types of employment provided and of the rehabilitation services offered, a description of the nature of disabilities of the handicapped workers served, the estimated earnings of each handicapped worker who is unable to earn the minimum required by the act, and program information, including special education approval by the state department of education and confirmation that a vocational rehabilitation division coordinator has been designated on a continuing basis.

(4) If individual rates are requested, the application shall be accompanied by applications for special individual certificates for each worker for whom an individual rate is requested, as provided by R 408.753.

History: 1954 ACS 53, p. 21, Eff. Feb. 14, 1968.

R 408.755 Investigations and additional information.

Rule 5. (1) Investigations with respect to applications for certificates will be conducted by representatives designated by the director of labor and reports of such investigation shall be filed with the department of labor.

(2) The department of labor may require additional information supporting special individual certificate requests including medical or psychological examination reports when deemed necessary in order to determine whether the issuance of a certificate is justified.

History: 1954 ACS 53, p. 22, Eff. Feb. 14, 1968.

R 408.756 Issuance and denial of certificates.

Rule 6. (1) If an application by a shelter workshop is in proper form and all available information indicates that the applicant is conforming to the standards contained in these rules, a sheltered workshop wage certificate may be issued by the director of labor.

(2) If an application for an individual handicapped worker is in proper form and states facts showing that the handicap prevents the worker from meeting normal production standards in the work which he is to perform, a special individual wage certificate may be issued by the director of labor.

(3) If the wage deviation board finds that the requirements of the act are satisfied with respect to any application submitted, it shall notify the director of labor who shall issue a certificate. Otherwise the board shall advise the director of labor that the application should be denied.

(4) Copies of certificates which are issued shall be transmitted to the employer, the vocational coordinator, and the handicapped worker or his parents or legal guardian. If a certificate is denied, the same persons shall be given written notice of the denial.

History: 1954 ACS 53, p. 22, Eff. Feb. 14, 1968.

R 408.757 Terms of certificates.

Rule 7. (1) A certificate for a sheltered workshop shall designate the location of the workshop, the occupation in which handicapped workers are to be employed, and the authorized subminimum wage rate.

(2) A special individual certificate shall designate the name of the employer, the name of the handicapped worker, the occupation in which he is to be employed, and the authorized subminimum wage rate.

(3) Certificates shall be effective for not to exceed 1 year from the date of issuance.

History: 1954 ACS 53, p. 22, Eff. Feb. 14, 1968.

R 408.758 Renewal of certificates.

Rule 8. Application for renewal of a certificate shall be made in the same manner as application for the original certificate and shall be filed 30 days before the expiration date of the original certificate or at any time that a material change occurs in the conditions of employment stated in the original application.

History: 1954 ACS 53, p. 22, Eff. Feb. 14, 1968.

R 408.761 Complaints.

Rule 11. An employer, vocational coordinator, or handicapped worker, at any time, may request cancellation or modification of a certificate, based upon facts stated in a petition evidencing material changes in the conditions of employment under which the certificate was issued.

History: 1954 ACS 53, p. 22, Eff. Feb. 14, 1968.

R 408.767 Amendment of rules.

Rule 17. A person desiring any change in these rules may submit in writing to the director of labor a petition stating the changes desired and the reason for proposing them. If the director believes that reasonable cause to amend these rules is stated, he shall request the wage deviation board to schedule a hearing in accordance with law.

CARNIVAL-AMUSEMENT SAFETY BOARD

CARNIVAL AND AMUSEMENT RIDES

(By authority conferred on the carnival-amusement safety board by section 6 of Act No. 225 of the Public Acts of 1966, and sections 2 and 4 of Act No. 197 of the Public Acts of 1952, as amended, being §§24.102, 24.104, and 408.656 of the Michigan Compiled Laws)

PART 1. SCOPE AND DEFINITIONS

R 408.801 Scope.

Rule 1. These rules establish administrative and operational procedures for implementation of the carnival-amusement safety act of 1966. They also establish, for the protection of the general public, minimum safety standards for the installation, repair, maintenance, use, operation, and inspection of carnival-amusement rides, and are based upon generally accepted engineering standards, formulas, and practices.

History: 1954 ACS 52, p. 61, Eff. Nov. 15, 1967; 1954 ACS 59, p. 40, Eff. Aug. 14, 1969; 1954 ACS 86, p. 68, Eff. Jan. 16, 1976.

R 408.802 Safety requirements for carnival-amusement rides and devices.

Rule 2. (1) The standards contained in the national electrical code, 1971 edition, sponsored by the national fire protection association, NFPA No. 70-1971, and approved by the American national standards institute, C1-1971, are adopted and incorporated herein by reference as rules for carnival and amusement rides in this state.

(2) These incorporated rules may be purchased from the National Fire Protection Association, 60 Batterymarch Street, Boston, Massachusetts 02110, or from the Michigan Department of Labor, 7150 Harris Drive, Lansing, Michigan 48926, at a cost of $3.50. A copy of this code, published by the national fire protection association, and the general rules of the board, are on file in the Lansing office of the department of labor and are available for public inspection.

History: 1954 ACS 86, p. 69, Eff. Jan. 16, 1976.

R 408.803 Definitions; A to C.

Rule 3. (1) "Act" means the carnival-amusement safety act of 1966, as amended, being Act No. 225 of the Public Acts of 1966, being §§408.651 to 408.667 of the Michigan Compiled Laws.

(2) "Aerial passenger tramway" means any of the following devices used to transport passengers:

(a) "Single and double reversible aerial tramways" means devices in which passengers are carried in 1 or more enclosed cars that reciprocate between terminals.

(b) "Chair lift, gondola lift, and monorail" means a device in which passengers are carried on chairs or cars, or in gondola cabs, attached to and suspended from a moving wire rope or attached to a moving wire rope or chain and supported on a standing wire rope, rail or other structure.

(3) "Amusement park" means a tract or area used principally as a permanent location for carnival-amusement rides or devices or both.

(4) "Average adult passenger" means for purposes of design a person weighing 170 pounds.

(5) "Average child passenger" means for purposes of design a child weighing 75 pounds.

(6) "Board" means the carnival-amusement safety board created by the act.

(7) "Carnival" means an enterprise principally devoted to offering amusement or entertainment to the public in, upon or by means of amusement rides or devices or temporary structures in any number or combination, whether or not associated with other structures or forms of public attraction.

History: 1954 ACS 52, p. 62, Eff. Nov. 15, 1967; 1954 ACS 59, p. 40, Eff. Aug. 14, 1969.

R 408.805 Definitions; carnival-amusement rides.

Rule 5. "Carnival-amusement ride" or "ride" means a device which carries or conveys passengers along, around or over a fixed or restricted route or course for the purpose of giving its passengers amusement, pleasure, thrills or excitement. Specific kinds of rides are defined as follows:

(a) "Major ride" means a device designed to carry a specific number of passengers, adults or children, either by power or gravity in cars or other suitable fixtures for conveying persons.

(b) "Kiddie ride" means a device designed primarily for use by children but which may accommodate adults.

(c) "Miscellaneous ride or device" means any other ride or device not specifically provided for, described or defined in these rules.

(d) "New ride" means a ride or device for which a permit has not been previously issued by the department for operation in the state, or a newly purchased ride or any other ride or device upon change of title or ownership.

History: 1954 ACS 52, p. 62, Eff. Nov. 15, 1967.

R 408.806 Definitions; D to F.

Rule 6. (1) "Department" means the department of labor.

(2) "Device" means a piece of carnival or amusement equipment or mechanism designed to serve a special purpose or perform a special function.

(3) "Director" means the director of labor.

(4) "Factor of safety" or "safety factor" means the ratio of the ultimate or breaking strength of a member or piece of material to the actual working stress or to the maximum permissible or safe load stress when in use.

History: 1954 ACS 52, p. 62, Eff. Nov. 15, 1967.

R 408.807 Definitions; fees.

Rule 7. (1) "Permit fee" means an annual fee, established by the board as prescribed by section 8 of the act, for a permit to operate.

(2) "Annual inspection fee" means a fee, established by the board, for the annual inspection required by the act.

(3) "Reinspection fee" means a fee, established by the board, for a reinspection as provided for in R 408.883.

(4) "Special inspector commission fee" means an annual fee established by the board for the commissioning of special inspectors.

History: 1954 ACS 52, p. 62, Eff. Nov. 15, 1967.

R 408.809 Definitions; inspections.

Rule 9. (1) "Annual inspection" means the official inspection of a ride or device made by the director or his authorized representative as prescribed by the act and in conformance with rules promulgated by the board.

(2) "Reinspection" means an inspection, other than the annual inspection made during the current season, of a ride or device as a result of a major breakdown, major alteration, or for any cause which may be deemed necessary by the department.

History: 1954 ACS 52, p. 63, Eff. Nov. 15, 1967.

R 408.811 Definitions; load design.

Rule 11. "Load design" or "design load" means the load established by the design engineer or the department for normal operation plus required or acceptable factors of safety. A device shall be designed to withstand both static and dynamic loads including dead, live and wind loads, plus impact.

History: 1954 ACS 52, p. 63, Eff. Nov. 15, 1967.

R 408.813 Definitions; M to R.

Rule 13. (1) "Major alteration" means a change in the type or capacity of a carnival-amusement ride or device or a change in the structure or mechanism that materially affects its function or operation.

(2) "Major breakdown" means a stoppage of operation from whatever cause resulting in damage, failure or breakage of a structural or stress bearing part of a ride or device.

(3) "Owner/operator" means a person who owns or controls, or has the duty to control, the operation of 1 or more rides or devices. This includes individuals, partnerships, corporations, the state and any of its political subdivisions and their agencies.

(4) "Permit to operate" means a permit issued annually by the department to an *owner/operator for authorization* to operate rides or devices in this state.

(5) "Rated capacity" means a capacity established by the design engineer for the normal loading and operation of a ride or device, or in the absence thereof, as established by the department after inspection and determination.

(6) "Rope," "wire rope," and "cable" are interchangeable terms except where the term fiber rope is used.

History: 1954 ACS 52, p. 63, Eff. Nov. 15, 1967; 1954 ACS 59, p. 41, Eff. Aug. 14, 1969.

R 408.815 Definitions; restraining and containing device.

Rule 15. (1) "Restraining device" means a safety belt, harness, chain, bar, or other device which affords actual physical support, retention, or restraint to the passenger of a ride or device.

(2) "Containing device" means a strap, belt, bar, gate, or other safety device designed to prevent accidental or inadvertent dislodgement of a passenger from a ride or device, but which does not actually provide physical support.

History: 1954 ACS 52, p. 63, Eff. Nov. 15, 1967.

R 408.816 Definitions; safety retainer.

Rule 16. "Safety retainer" means a secondary safety cable, bar, attachment, or other device designed to prevent parts of a ride or device from becoming disengaged from the mechanism or from tipping or tilting in a manner to cause hazard to persons riding on, or in the vicinity of, a ride or device.

History: 1954 ACS 52, p. 63, Eff. Nov. 15, 1967.

R 408.817 Definitions; S.

Rule 17. (1) "Shall" is mandatory and "may" is permissive.

(2) "Special inspector commission" means a commission issued annually by the department to an owner/operator or to an employee designated by, and in the employment of, an owner/operator.

History: 1954 ACS 52, p. 63, Eff. Nov. 15, 1967.

R 408.819 Chains.

Rule 19. Chains should be referred to according to the material from which they are constructed: alloy steel chains, wrought iron chains, commonly called dredge chains or log chains, and proof coil chains, commonly known as hardware chains.

History: 1954 ACS 52, p. 63, Eff. Nov. 15, 1967.

PART 2. CONSTRUCTION AND OPERATION

R 408.821 Manufacturers' analyses.

Rule 21. Manufacturers shall furnish a certified stress analysis and other pertinent data deemed necessary by the department for new rides, devices, or other equipment and for all existing rides and devices for which this information may be requested. Such stress analysis and other data pertinent to the design, structure, factors of safety or performance characteristics shall be acceptable to the department. Such data may be requested for, but not limited to, the following materials, parts or components of rides or devices: structural materials including bars; cables; chains; ropes; rods; tubing; pipes; girders; braces; fittings; fasteners; trusses; pressure vessels; pressure piping; gears; clutches; speed reducers; welds; bearings; couplings; shaftings; carriers such as tubs, cars, chairs, gondolas or seating and carrying apparatus of any description; axles; hangers; pivots; safety bars, belts, harnesses, chains, gates or other restraining, containing or retaining

devices. Data shall be furnished at the request of the department concerning forces generated by acceleration or deceleration, centrifugal action, kinetic or other forces either constant, reversible or eccentric.

History: 1954 ACS 52, p. 64, Eff. Nov. 15, 1967.

R 408.822 Owner/operator analysis and certification.

Rule 22. (1) A permit to operate shall not be issued to an owner/operator on a ride, the design of which has not been approved by the department or board, until the following materials have been submitted to the department:

(a) A stress analysis and prints.

(b) An erection manual.

(c) An operational manual.

(2) A stress analysis and prints shall be certified by a professional engineer, registered in the United States, and all material shall be written in the English language.

History: 1954 ACS 86, p. 69, Eff. Jan. 16, 1976.

R 408.824 Materials and construction.

Rule 24. Structural materials and construction of rides and devices shall conform to established engineering practices, procedures, standards and specifications. If a designer or manufacturer of equipment wishes to use materials not now covered by these rules or by reference to existing standards, full information concerning these materials or methods shall be submitted to the department. The design details, materials, and construction features shall provide safety factors acceptable to the department and the board.

History: 1954 ACS 52, p. 64, Eff. Nov. 15, 1967.

R 408.825 Identification plate.

Rule 25. (1) Carnival-amusement rides or devices shall have an identification plate affixed to a basic part of the ride or structure in such a manner as to be readily accessible to the authorized inspector.

(2) The identification plate shall include, but not be limited to, the following data:

(a) Name of ride.

(b) Manufacturer.

(c) Serial number.

(d) Date of manufacture.

(e) Speed.

(f) Capacity.

History: 1954 ACS 86, p. 69, Eff. Jan. 16, 1976.

R 408.826 Protection against moving parts.

Rule 26. (1) Moving machine parts to which employees, patrons, or other personnel may become exposed under any circumstances shall be fitted with safety guards.

(2) Areas on a ride or device or in its vicinity wherein persons may be struck by, caught in, caught between or otherwise exposed to moving parts or hazards shall be adequately fenced, barricaded, shielded, or otherwise guarded in accordance with inspection procedures to prevent public intrusion or the possibility of any person becoming exposed to hazard.

History: 1954 ACS 52, p. 64, Eff. Nov. 15, 1967.

R 408.827 Signal systems.

Rule 27. (1) Signal systems shall be provided for controlling starting and stopping of a ride or device when the operator of the ride or device does not have a clear view of the point where passengers are loaded or unloaded if, after inspection and determination by an authorized representative of the department, the board deems a signal system necessary.

(2) Where the need for coded signals is indicated, the code of signals adopted for operation of the ride or device shall be printed and kept posted at both the operator's and signal man's stations.

(3) Persons who may be required to use signals shall be carefully instructed in their use and shall be trained to understand thoroughly their operation and meaning. Signal systems shall be tested on each day prior to operation of the ride or device. A ride or device requiring a signal system shall not be operated if the system is not performing correctly.

History: 1954 ACS 52, p. 64, Eff. Nov. 15, 1967.

R 408.828 Safety stop circuits.

Rule 28. Interruption of normal operation by a safety device or through loss of power shall require manual restarting by the operator. Safety stop circuits shall not be bypassed during operation.

History: 1954 ACS 52, p. 64, Eff. Nov. 15, 1967; 1954 ACS 86, p. 69, Eff. Jan. 16, 1976.

R 408.829 Seating and carrying devices.

Rule 29. (1) Tubs, cars, chairs, seats, gondolas, and other carriers used on rides or devices shall be designed and constructed as strong as practical. Their interior and exterior parts with which passengers may come in contact shall be smooth, rounded, free from sharp, rough, or splintered edges or corners, and with no protruding screws or projections which might cause injury. Parts upon or against which passengers might be thrown by action of the ride shall be adequately padded to prevent or minimize the possibility of injury. The upholstery shall be kept in repair, and no loose or flapping portions of upholstery or decoration shall be permitted.

(2) Propellers or other moving parts or decorations attached to tubs, cars, chairs, seats, gondolas, and other carriers shall be securely fastened to such equipment and keyed or otherwise secured so that they cannot come off during operation of the ride. Vanes, canopies, or other attachments which might become disengaged shall be secured with safety straps to prevent their flying away in case of breakage or dislocation.

History: 1954 ACS 52, p. 64, Eff. Nov. 15, 1967.

R 408.830 Restraining and containing safety devices.

Rule 30. (1) Restraining devices used on tubs, cars, chairs, seats, gondolas, and other carriers on a ride wherein the forces generated by the action of the ride require retention, restraint, or actual physical support of the passenger shall be designed, constructed, and installed to withstand impact and forces of a minimum of 8,000 pounds.

(2) On a ride where, after inspection by an authorized representative of the department, it is deemed necessary by the board to install safety devices to prevent accidental or inadvertent dislodgement of a passenger from any tub, car, chair, seat, gondola, or other carrier, a containing device shall be installed. This device shall be designed to withstand minimum forces of 800 pounds for a ride

intended for the use of adults or 400 pounds for a ride intended for the exclusive use of children.

History: 1954 ACS 52, p. 65, Eff. Nov. 15, 1967.

R 408.831 Safety retainers.

Rule 31. Tubs, cars, chairs, seats, gondolas, and other carriers used on a ride that depend upon a single means of attachment or support shall be equipped with a safety retainer to prevent the carrier, if it becomes disengaged from its support or attachment, from being catapulted from the ride and to prevent any action of the carrier which might throw the occupants from the carrier while the ride is in motion. This rule only applies to rides or situations determined to be hazardous by the board after inspection by an authorized representative of the department and review of the conditions.

History: 1954 ACS 52, p. 65, Eff. Nov. 15, 1967.

R 408.832 Permit-inspection decal.

Rule 32. (1) After a ride has been inspected and authorized for operation, the department shall issue a permit-inspection decal which shall be affixed to a basic part of the ride or device structure in such manner as to be readily accessible to the authorized inspector. The decal shall set forth the identification number issued by the department for the individual ride or device and other information deemed necessary by the department.

(2) If the ride or device is resold, rebuilt, or has undergone major alterations, it shall be reinspected. Upon completion of the inspection, a new permit-inspection decal shall be issued.

(3) If a ride or device is sold, the permit-inspection decal shall be obliterated by the seller. If a decal is mutilated so that it is no longer legible, the operator shall notify the department and a new decal shall be issued.

History: 1954 ACS 52, p. 65, Eff. Nov. 15, 1967; 1954 ACS 59, p. 41, Eff. Aug. 14, 1969; 1954 ACS 86, p. 69, Eff. Jan. 16, 1976.

R 408.834 Wire rope.

Rule 34. (1) Wire rope shall be thoroughly examined. Wire rope found to be damaged shall be condemned and replaced with new rope of proper design and capacity. Any of the following conditions shall be cause for rope replacement:

(a) In running ropes, 6 randomly distributed broken wires in 1 rope lay, or 3 broken wires in 1 strand in 1 rope lay. A rope lay is the length along the rope in which 1 strand makes a complete revolution around the rope.

(b) In pendants or standing ropes (ropes bearing the entire load and subjected to constant pressure and surge shocks), evidence of more than 1 broken wire in 1 rope lay.

(c) Abrasion, scrubbing, or peening causing loss of more than ⅓ of the original diameter of the outside wires.

(d) Severe corrosion.

(e) Severe kinking, severe crushing, or other damage resulting in distortion of the rope structure.

(f) Heat damage resulting from a torch or arc caused by contact with electrical wires.

(g) Reduction from normal diameter of more than $\frac{3}{64}$ inch for diameters up to and including ¾ inch; $\frac{1}{16}$ inch for diameters ⅞ inch to 1⅛ inches; $\frac{3}{32}$ inch for diameters 1¼ inches to 1½ inches. Marked reduction in diameter indicates deterioration of the core resulting in lack of proper support for the load-carrying

strands. Excessive rope stretch or elongation may be an indication of internal deterioration.

(h) Bird-caging or other distortion resulting in some members of the rope structure carrying more load than others.

(i) Noticeable rusting or development of broken wires in the vicinity of attachments. If this condition is localized in an operating rope, the section in question can be eliminated by making a new attachment. This may be done rather than replacing the entire rope.

(2) Wire ropes used to support, suspend, bear, or control forces and weights involved in the movement and utilization of tubs, cars, chairs, seats, gondolas, other carriers, the sweeps or other supporting members of a ride or device shall not be lengthened or repaired by splicing.

(3) Couplings, sockets, and fittings shall be of a design and type approved by the board and installed in accordance with the instructions or specifications of the designer, engineer or manufacturer.

History: 1954 ACS 52, p. 65, Eff. Nov. 15, 1967.

R 408.835 Wooden components.

Rule 35. Footings, splices, uprights, track timbers, ledgers, sills, laps, bracing, flooring, and all other wooden components of rides, devices, and structures shall be inspected for deterioration, cracks, or fractures. Wooden members found to be defective shall be replaced with material of equal or greater strength and capacity. Repairs and replacements to fixed roller coasters shall be made in accordance with the recommendations of the manufacturer.

History: 1954 ACS 52, p. 66, Eff. Nov. 15, 1967.

R 408.837 Location.

Rule 37. (1) A ride shall be placed on solid footings and be secured to prevent shifting, tipping, swaying, or erratic motion. The provision pertinent to erratic motion or sway does not apply to a ride designed to permit flotation characteristics or flexibility. Use of shim blocks shall be kept to a minimum. Depressions in the ground near the ride footings shall be filled and tamped and adequate means of drainage provided to prevent water from collecting and softening supporting areas in case of rain. The area surrounding the ride shall be clear and kept free from trash and tripping hazards.

(2) A fixed ride permanently erected in an amusement park shall be set on properly designed and constructed foundations or footings and secured to these footings in a manner to prevent shifting, tipping, swaying or erratic motion. The provision pertinent to erratic motion or sway does not apply to a ride designed to permit flotation characteristics or flexibility.

(3) The standards contained in the American national standards institute safety requirements for aerial passenger tramways, ANSI B77.1-1973, are adopted and incorporated herein by reference as rules for aerial passenger tramway amusement rides in this state.

(4) These incorporated rules may be purchased from the American National Standards Institute, 1430 Broadway, New York, New York 10018 or from the Michigan Department of Labor, 7150 Harris Drive, Lansing, Michigan 48926, at a cost of $6.50. A copy of this code, published by the American national standards institute, and the general rules of the board, are on file in the Lansing office of the department of labor and are available for public inspection.

History: 1954 ACS 52, p. 66, Eff. Nov. 15, 1967; 1954 ACS 86, p. 70, Eff. Jan. 16, 1976.

R 408.838 Leveling and alignment.

Rule 38. Corner posts, central columns, or support structures of a ride designed to operate on a perpendicular axis shall be plumb and secured so that the path of the sweeps or platforms shall be level and operate on a true horizontal plane at right angles to the axis of the pivot. A ride whose carriers are designed to operate on a horizontal axis shall be leveled so that the carriers will orbit in a true perpendicular plane. The base of a ride employing a combination of orbiting planes or a ride whose carriers operate normally in a plane other than true horizontal or vertical shall be leveled and plumbed and secured so that they will not tip or shift and will be stable under the most adverse operating conditions, except for a ride designed to permit flotation characteristics or flexibility or designed to operate properly whether the base is plumb or level or not.

History: 1954 ACS 52, p. 66, Eff. Nov. 15, 1967.

R 408.840 Rescinded.

History: 1954 ACS 52, p. 66, Eff. Nov. 15, 1967; rescinded 1954 ACS 86, p. 70, Eff. Jan. 16, 1976.

R 408.841 Hazardous conditions.

Rule 41. During a lightning storm, high wind storm, a period of tornado alert or warning, fire, or when violence, riot, or other civil disturbance occurs or threatens in an amusement park or a carnival lot or in the area adjacent thereto, passengers shall be unloaded or evacuated from a ride or device and the ride or device shut down and secured immediately. Operation shall not resume until the situation has returned to a normal, safe operating condition.

History: 1954 ACS 52, p. 67, Eff. Nov. 15, 1967.

R 408.843 Personal injuries and deaths.

Rule 43. (1) Provision shall be made to render first aid when persons are injured on or around any ride or device.

(2) An owner/operator shall report in writing to the department an accident resulting in injury to any person within 24 hours after occurrence of the incident. Forms for accident reporting may be furnished to operators by the department, or reports of accidents shall be duplicate copies of such as are now submitted to insurance companies.

(3) In addition to the requirements of subrule (2), the owner/operator shall immediately report to the department by telephone any accident in which a fatality occurs or a person suffers a fracture, concussion, laceration or other traumatic injury requiring immediate surgical or medical care resulting from structural or mechanical failure of a ride or device, or in which it may appear that the construction, design or function of the ride or device is directly involved. The director or his authorized representative, after consultation with the owner/operator and determination, may require that the scene of such an accident be secured and not disturbed to any greater extent than necessary for removal of the deceased or injured persons. If a ride is removed from service by the director, he shall order an immediate investigation and the ride or device shall be released for repair and operation only after complete investigation.

History: 1954 ACS 52, p. 67, Eff. Nov. 15, 1967.

R 408.844 Mechanical failure reports.

Rule 44. The owner/operator of a carnival-amusement ride or device shall report a major breakdown to the department within 24 hours after occurrence of

the incident by telephone or other media of immediate communication. The owner/operator shall confirm this report using the form provided by the department. This report shall be forwarded to the department within 7 days after the occurrence of the reportable incident. Upon being advised of such an incident the director or his authorized agent, after reviewing the circumstances, may order the ride or device to be withheld from operation, and in such cases the department shall conduct an immediate investigation. The ride or device shall be released for repair and operation only after thorough and complete investigation by the director or his authorized representative.

History: 1954 ACS 52, p. 67, Eff. Nov. 15, 1967.

R 408.846 Fire prevention and protection.

Rule 46. (1) An owner/operator shall be responsible for the establishment of fire prevention procedures and emergency control measures. Fire prevention procedures shall include the treatment of fabrics and flammable structural materials, the location and identification of means of egress, and other control measures or procedures to assure the safety of a person frequenting an amusement park or carnival.

(2) An owner/operator shall provide covered metal containers for flammable waste such as oily rags and other flammable materials which shall be kept in easily accessible locations. Such containers shall be located so that they will not obstruct means of ingress or egress or aisles.

(3) An owner/operator shall provide and maintain portable fire extinguishers of the classification, capacity, and number prescribed by the department and the board.

(4) An owner/operator shall store and handle liquid petroleum gases employed either as fuel for internal combustion engines, for heat or for illumination in a manner approved by the department and the board.

(5) An owner/operator shall store and handle flammable liquids in a manner approved by the department and the board. Bulk storage (quantities above 60 gallons) shall not be permitted in the area accessible to the public.

History: 1954 ACS 52, p. 67, Eff. Nov. 15, 1967.

R 408.848 Control and operation.

Rule 48. (1) A ride or device shall be operated by a competent operator trained for the duty. The operator of a ride or device designed for the exclusive use of children shall be at least 16 years of age. For all other rides or devices, an operator shall be at least 18 years of age.

(2) An operator shall have knowledge of the use and function of normal operating controls, signal systems, and safety devices applicable to the ride or device and of the proper use, function, capacity, and speed of the particular ride or device which he is operating. An operator shall have complete control of the ride or device at all times that it is being operated. When the ride or device is shut down, provision shall be made to prevent operation by the public. A person other than a trained operator shall not be permitted to handle the controls of a ride or device during normal operation, except where it is designed to be controlled by the passenger.

History: 1954 ACS 52, p. 68, Eff. Nov. 15, 1967; 1954 ACS 86, p. 70, Eff. Jan. 16, 1976.

R 408.849 Overspeeding and overloading.

Rule 49. A ride or device shall not be loaded beyond its rated capacity nor shall it be operated at an unsafe speed or at any speed other than that prescribed by the

Digitized by Google Original from UNIVERSITY OF MICHIGAN

design engineer or manufacturer. When this information is not obtainable, the criteria for safe operating speeds and rated capacity shall be established by the department. A ride or device constructed to be capable of exceeding maximum safe operating speed shall be provided with a maximum speed limiting device or governor. Modification of this requirement may be granted by the director with the advice of the board after inspection and determination that the public safety is secured.

History: 1954 ACS 52, p. 68, Eff. Nov. 15, 1967.

R 408.851 Brakes and stops.

Rule 51. On a ride or device where coasting renders the operation dangerous, either during the period while the ride or device is being loaded or unloaded or in case of power failure or other unforeseeable situation, a method of braking shall be provided. Where rollback might create a hazard, anti-rollback devices shall be provided.

History: 1954 ACS 52, p. 68, Eff. Nov. 15, 1967.

R 408.852 Air compressors.

Rule 52. An air compressor, including the tanks, piping, and safety equipment, in an amusement park or carnival shall be constructed, equipped, and maintained to insure safe operation at all times.

History: 1954 ACS 52, p. 68, Eff. Nov. 15, 1967.

R 408.854 Illumination.

Rule 54. (1) Adequate illumination shall be provided for operation, adjustment, maintenance, assembly and disassembly operations, and inspection of a ride or device.

(2) Adequate illumination shall be provided at all regular and emergency exits of a ride or device operated in an enclosed area so that safe egress from the area is assured.

History: 1954 ACS 52, p. 68, Eff. Nov. 15, 1967.

R 408.856 Internal combustion power sources.

Rule 56. (1) Internal combustion power sources shall be of adequate type, design, and capacity to handle the design load.

(2) Fuel tanks should be of adequate capacity to permit uninterrupted operation during normal operating hours. Where it is impossible to provide tanks of proper capacity for a complete day, the ride or device shall be shut down and unloaded or evacuated during the refueling procedure. Under no circumstances shall the fuel supply be replenished while the engines are running.

(3) An enclosed area in which an internal combustion engine is operated shall be ventilated. Exhaust fumes from the engine shall be discharged outside the area. The equipment shall be properly grounded.

(4) Internal combustion power sources shall be located in a manner permitting proper maintenance and shall be protected either by guards, fencing, or enclosure to prevent exposure to hazard and to secure the equipment from the public.

History: 1954 ACS 52, p. 68, Eff. Nov. 15, 1967.

R 408.857, R 408.858 Rescinded.

PART 3. PROCEDURES

R 408.871 Applications for permits to operate; routing schedules.

Rule 71. Before operation each year the owner/operator of a ride or device shall apply for a permit to operate rides or devices or both in this state for the forthcoming season as prescribed in the act. The application shall be made upon forms to be furnished by the department. The application shall be accompanied by a certificate of insurance or surety bond indicating that the owner/operator has obtained insurance in the amount conforming to section 16 of the act. As early as possible before operation each year, the operator shall submit to the department a notice of his routing schedule, identifying the rides and devices that he intends to operate and the dates and locations where they will be used. Notice of cancellation of location dates, previously unscheduled dates or emergency dates shall be forwarded to the department immediately by telephone or other means of immediate communication and confirmed in writing. Upon receipt of the application for permit and notice of routing schedule, an inspector shall be assigned to make the required inspection.

History: 1954 ACS 52, p. 69, Eff. Nov. 15, 1967; 1954 ACS 59, p. 41, Eff. Aug. 14, 1969.

R 408.872 Emergency applications for permits to operate.

Rule 72. When an owner/operator has not previously intended to operate a ride or device in this state and has not made application for a permit to operate, the owner/operator, upon confirming a Michigan booking, shall notify the department and apply for a permit to operate. The notice shall be given at least 30 days prior to the book date. When an emergency booking makes the 30-day notice impossible, the owner/operator shall notify the department of the booking by telephone or other means of immediate communication and confirm this notice in writing. The director shall schedule and arrange for inspection of the rides and devices and the issuance of a permit to operate as will best serve the needs of the owner/operator and the orderly administration of the act and these rules.

History: 1954 ACS 52, p. 69, Eff. Nov. 15, 1967.

R 408.873 Inspection and authorization to operate individual rides.

Rule 73. (1) A ride or device operating in this state shall be subjected to a thorough inspection and tests as required by the act. The scope of these tests and inspection and the manner and method of their execution shall be established by the department with the advice of the board. In order to confirm that a ride or device conforms to these rules, the results of the inspection shall be recorded by the inspector upon forms furnished by, and filed with, the department.

(2) Upon receipt of the inspection forms and certification that the ride or device meets with the standards established for its operation and upon receipt of the required inspection and permit fees, the department shall issue an authorization to operate the ride or device which has been inspected.

(3) No person shall operate a ride or device unless it has been inspected and an authorization to operate has been issued by the department. However, a ride or device inspected and covered by a valid authorization to operate in the preceding year may continue to operate until further inspected.

(4) No person shall operate a new ride or device or one which has undergone major alteration until it has been inspected and an authorization to operate issued by the department.

R 408.874 Daily inspection.

Rule 74. A ride or device shall be inspected and tested on each day it is intended to be used. This inspection shall be made by a person commissioned to perform such inspections by the director. Results of these daily inspection and performance tests shall be recorded in the manner prescribed by, and on forms provided by, the department and certified by the person commissioned to perform these inspections. An owner/operator shall not knowingly use, or permit to be used, a ride or device which is not properly assembled or which is defective or unsafe in any of its parts, controls or safety equipment.

History: 1954 ACS 52, p. 69, Eff. Nov. 15, 1967.

R 408.876 Permit and inspection fees; amounts.

Rule 76. (1) Permit fees to operate the rides or devices, or both, in this state shall be assessed at $10.00 for each ride in accordance with the procedures specified in R 408.877.

(2) An application for a special inspector commission shall be accompanied by a fee of $2.00 for each individual.

(3) Inspection fees shall be assessed as follows:

	Annual	Reinspection
Individual ride or device	$15.00	$15.00
Fixed roller coaster	$50.00	$50.00
Aerial tramways used for amusement	$75.00	$50.00

History: 1954 ACS 52, p. 70, Eff. Nov. 15, 1967; 1954 ACS 86, p. 70, Eff. Jan. 16, 1976.

R 408.877 Permit and inspection fees; receipt and disbursement.

Rule 77. (1) Revenue from permits, annual inspections, reinspections, commissions, or for any other services or requirements prescribed by the act or the rules shall be paid to the department which shall give receipts thereof. Checks for these fees shall be made payable to "State of Michigan." The department shall transmit such revenues to the state treasurer for credit to the general fund of the state.

(2) An owner/operator or his agent or representative is not required to make payment in any form for any service or any cause or purpose to an inspector or other representative of the department or the board. All fees are to be paid directly to the office of the department.

History: 1954 ACS 52, p. 70, Eff. Nov. 15, 1967.

R 408.881 Functions of director; general.

Rule 81. (1) The director shall administer and enforce the provisions of the act and the rules promulgated in accordance with the provisions of the act.

(2) He shall receive and review applications for permits to operate rides and devices and for special inspector commissions.

(3) He shall receive and issue receipts for: fees for permits to operate rides and devices; fees for inspection for authorization to operate individual rides and devices; fees for special inspector commissions; and fees for reinspections.

(4) He shall determine whether or not an applicant for a permit to operate rides or devices or for a special inspector commission conforms to these rules for the issuance of such a permit or commission and reject an application upon good cause.

(5) He shall issue, upon payment of the proper fees, permits to operate rides and devices, identification symbols, special inspector commissions to qualified

applicants, and authorization to operate specific rides and devices conforming to these rules.

History: 1954 ACS 52, p. 70, Eff. Nov. 15, 1967.

R 408.882 Director; modification of rules.

Rule 82. The director may, with the approval of the board, grant a modification of these rules in a situation where practical difficulties or unnecessary hardship to comply with the rules is established if the spirit of the rule is observed and public safety is secured. A request for modification shall be made in writing to the director stating the grounds upon which the request is based. A modification shall be in writing and shall describe the conditions under which the modification is permitted. A record of the modification shall be kept in the office of the department at Lansing and be open to inspection by the public.

History: 1954 ACS 52, p. 70, Eff. Nov. 15, 1967.

R 408.883 Director; inspections.

Rule 83. The director shall schedule and arrange for the inspection and reinspection of rides and devices as will best serve the needs of the owner/operator and the orderly administration of the act and these rules.

History: 1954 ACS 52, p. 70, Eff. Nov. 15, 1967.

R 408.885 Director; suspension and revocation of permits to operate.

Rule 85. The director, subject to the appeal provisions herein provided, may suspend or revoke the permit to operate of an owner/operator for gross negligence, repeated disregard of inspection standards, misrepresentation of material information required as a part of the application for permit to operate, failure to comply with a safety order issued by the director or his authorized representative, conduct in the operation of a carnival or an amusement park in derogation or disregard of public safety and welfare, lapsing of the required insurance coverage, or failure to pay fees within 30 days after issuance of authorization to operate rides or devices that are required under the provisions of the act and these rules.

History: 1954 ACS 52, p. 70, Eff. Nov. 15, 1967; 1954 ACS 59, p. 41, Eff. Aug. 14, 1969.

R 408.886 Director; suspension and revocation of special inspectors' commissions.

Rule 86. The director, subject to the appeal provisions herein provided, may suspend or revoke a special inspector commission for gross incompetence or gross negligence in the performance of duties and responsibilities for which such commission is granted, misrepresentation, violation of the act or these rules, or other conduct prejudicial to the safe and proper operation and maintenance of a ride or device and capable of affecting the public safety and welfare.

History: 1954 ACS 52, p. 71, Eff. Nov. 15, 1967.

R 408.887 Functions of special inspectors or owner/operators.

Rule 87. A special inspector or the owner/operator shall:

(a) Certify to the daily inspection reports required by these rules which he has prepared and completed or caused to be prepared and completed.

(b) Be responsible for making prompt and timely reports of all matters requiring reports as provided by the act or these rules.

(c) Be present on the premises when a ride or device is being operated for use by the public. The number of special inspectors required shall be determined by

the board and shall be in reasonable ratio to the number of rides and devices being operated.

History: 1954 ACS 52, p. 71, Eff. Nov. 15, 1967.

R 408.891 Appeals.

Rule 91. (1) Within 10 days after a decision made by the director affecting an owner/operator or other person subject to the act and these rules, the aggrieved owner/operator or individual may file an appeal with the board in writing stating therein the basis and reasons for his appeal. The board, in the most expeditious manner possible, shall schedule a hearing for receiving oral or written evidence in support of the appeal and any other evidence deemed necessary upon which to render the final decision. The board at the conclusion of the hearing, or within 5 days thereafter, may issue in writing its decision in the appeal.

(2) Appeal hearings may be scheduled by the board in Lansing or Detroit.

(3) Appeals and their disposition by the board shall be recorded in the Lansing office of the department and shall be indexed and made available for inspection by the public.

History: 1954 ACS 52, p. 71, Eff. Nov. 15, 1967.

CONSTRUCTION SAFETY STANDARDS COMMISSION

GENERAL RULES

PART 1. PURPOSE AND SCOPE

R 408.1101—R 408.1107 Rescinded.

History: 1954 ACS 42, pp. 57, 58, Eff. May 15, 1965; rescinded 1954 ACS 78, p. 36, Eff. Mar. 2, 1974.

PART 2. DEFINITIONS

(By authority conferred on the construction safety commission by section 7 of Act No. 89 of the Public Acts of 1963, as amended, sections 2 and 4 of Act No. 197 of the Public Acts of 1952, as amended, and sections 3, 9 and 383 of Act No. 380 of the Public Acts of 1965, being §§408.717, 24.102, 24.104, 16.103, 16.109, and 16.483 of the Michigan Compiled Laws)

R 408.1200 Approved.

Rule 200. Approval by the construction safety commission or its authorized representatives or by the agency specified.

History: 1954 ACS 52, p. 71, Eff. Nov. 15, 1967.

R 408.1201—R 408.1259 Rescinded.

History: 1954 ACS 42, pp. 58-61, Eff. May 15, 1965; rescinded 1954 ACS 78, p. 30, Eff. Mar. 2, 1974.

PART 3. JOB TRAINING AND JOB INSTRUCTIONS

R 408.1301—R 408.1305 Rescinded.

History: 1954 ACS 42, p. 61, Eff. May 15, 1965; rescinded 1954 ACS 78, p. 30, Eff. Mar. 2, 1974.

PART 4. HOUSEKEEPING AND SANITATION

R 408.1401 Rescinded.

History: 1954 ACS 42, p. 62, Eff. May 15, 1965; rescinded 1954 ACS 78, p. 37, Eff. Mar. 2, 1974.

of the Michigan Compiled Laws. Written transcripts shall be provided if demanded by any party at such party's expense.

History: 1954 ACS 47, p. 23, Eff. Aug. 14, 1966.
Editor's note: R 408.3901—R 408.3907 formerly appeared as R 408.8101—R 408.8107 in 1954 ACS 47.

R 408.3902 Statements and briefs.

Rule 3902. A party requesting a hearing shall submit to the commission in writing a fair and accurate statement of the reasons therefor, the facts and issues involved and may file a brief upon the law. Copies shall be served by the applicant upon all interested parties who are then known to him or who subsequently file appearances.

History: 1954 ACS 47, p. 23, Eff. Aug. 14, 1966.

R 408.3903 Notices and appearances.

Rule 3903. Necessary parties shall be notified of a hearing by registered mail, which shall be posted at least 15 days prior to the date of hearing and shall state the date, time, place, issues involved, and reasons for holding the hearing, and the applicable law. A party may appear in person or by a duly authorized representative or attorney.

History: 1954 ACS 47, p. 23, Eff. Aug. 14, 1966.

R 408.3904 Answers.

Rule 3904. Necessary parties may file written answers to charges or claims made or may present an oral statement at the hearing. Copies of written pleadings and briefs shall be served on the commission and all other parties directly interested at least 5 days prior to the date set for hearing.

History: 1954 ACS 47, p. 23, Eff. Aug. 14, 1966.

R 408.3905 Depositions.

Rule 3905. Depositions shall be taken only upon order of the commission upon a showing that it is impracticable or impossible to obtain necessary evidence otherwise. Where permitted, they shall be taken in accordance with provisions for taking depositions in civil cases, as set forth in Michigan general court rules of 1963, nos. 302 and 304 to 309, or other applicable court rules.

History: 1954 ACS 47, p. 23, Eff. Aug. 14, 1966.

R 408.3906 Adjournments.

Rule 3906. The commission or its director, for good cause shown in writing, may grant adjournments. A request for an adjournment shall be filed at least 5 days prior to the date assigned for hearing or showing made that reasons beyond the control of the party making the request prevent such filing.

History: 1954 ACS 47, p. 23, Eff. Aug. 14, 1966.

R 408.3907 Defaults.

Rule 3907. If parties fail to appear after proper service of notice, if no adjournment is granted, the commission may proceed with the hearing and make its decisions in the absence of such parties.

History: 1954 ACS 47, p. 23, Eff. Aug. 14, 1966.

R 408.3911 Procedure on violations.

Rule 3911. The following procedure shall be followed when a violation of these rules has been cited:

(a) Upon completion of the inspection of a construction project, each inspection report containing a violation of rules not corrected before the inspector leaves the site shall contain the date for correction of each violation.

(b) One copy of the inspection report shall be left at the job site with the employer's representative; 1 copy of the report shall be filed in the Lansing office and a record posted of any uncorrected violations; and 1 copy of the report citing violations and a compliance form or forms to be returned to the Lansing office shall be sent by first class mail to the registrant.

(c) The registrant shall return the form certifying compliance within 10 days after the required date of compliance. If the form is received by the department within the 10 days certifying that the registrant has corrected the violations, the file on the report shall be closed. If the registrant fails to return the form, his record shall be posted to show noncompliance.

(d) The department shall consider extensions of time for compliance upon receipt from a registrant of a request indicating progress to date and reasons for an extension of time. The department shall notify the registrant of its decision by first class mail, within 10 days.

(e) When the department determines that a violation exists which may result in serious injury, the department shall transmit such information to each individual commission member, and upon concurrence of a majority of the commission members, shall notify the registrant or employer to appear before the commission in accordance with section 11 of the construction safety act, Act No. 89 of the Public Acts of 1963, as amended, being §408.721 of the Michigan Compiled Laws.

History: 1954 ACS 69, p. 56, Eff. Sept. 15, 1971.

BOARD OF BOILER RULES

GENERAL RULES

(By authority conferred on the director of labor and board of boiler rules by section 4 of Act No. 290 of the Public Acts of 1965, section 385 of Act No. 380 of the Public Acts of 1965, and sections 2 and 4 of Act No. 197 of the Public Acts of 1952, as amended, being §§408.754, 16.485, 24.102, and 24.104 of the Michigan Compiled Laws)

PART 1. GENERAL PROVISIONS

R 408.4001 Scope.

Rule 1. These rules establish minimum standards of safety for the use, construction, installation, inspection, alteration, and repair of boilers; licensing of boiler inspectors, boiler repairers, and boiler installers; requirements for permits to install, repair, and alter; and fees to be charged.

History: 1954 ACS 49, p. 47, Eff. Feb. 14, 1967.

R 408.4011 Definitions; A, B, except boilers.

Rule 11. (1) "Accident" means a sudden and accidental breakdown of a boiler or any part thereof that manifests itself at the time of its occurrence by physical damage to the boiler necessitating the repair or replacement of the boiler or part thereof. "Accident" does not mean normal erosion, corrosion, wastage of metal requiring restoration, leaking tubes or weakened metal such as water legs, handhole areas, etc., unless a unique or unusual explosion hazard exists as a result of any failure.

(2) "Act" means Act No. 290 of the Public Acts of 1965, as amended, being §§408.751 to 408.776 of the Michigan Compiled Laws.

(3) "Aftercooler" means a device used for lowering the temperature of boiler blowoff discharge before it enters the building drain.

(4) "ASME boiler and pressure vessel code," "ASME code" or "code" means the boiler and pressure vessel code of the American society of mechanical engineers with amendments and interpretations thereto made and approved by the council of the society.

(5) "Blowoff valve" means a valve connected to the boiler for the purpose of reducing the concentration of solids in the boiler or for draining purposes.

(6) "Board of boiler rules" means the board created by Act No. 290 of the Public Acts of 1965 and empowered to make, alter, amend, and interpret rules and regulations for the safe and proper construction, installation, inspection, repair, alteration, and use of any boiler in this state.

(7) "Boiler alteration" means a change in a boiler or pressure vessel that substantially alters the original design and requires consideration of the effect of the change on the original design. The addition of a nozzle or opening which does not require added reinforcement is not considered an alteration.

(8) "Boiler alterer" means a corporation, company, partnership, or individual who performs physical alterations or repairs to any pressure portion of a boiler and which involve any change in the original design.

(9) "Boiler assembler" means a corporation, company, partnership, or individual who assembles a boiler which has been delivered knocked down in multiple pieces by bolting, threading, or other method of fastening to produce a finished pressure vessel. A boiler assembler may also be a boiler installer.

(10) "Boiler blowoff piping" means the piping connections provided with valves from the boiler to the blowoff tank, blowoff separator, or other safe point of discharge through which the water in the boiler may be blown out under pressure, excepting drains such as used in water columns, gauge glasses, or piping to feed water regulators, etc.

(11) "Boiler blowoff separator" means a closed container equipped with internal baffles or an apparatus for the purpose of separating moisture from flash steam as it passes through the vessel.

(12) "Boiler blowoff tank" means an unfired pressure vessel into which water is discharged above atmospheric pressure from a boiler blowoff line.

(13) "Boiler erector" means a corporation, company, partnership, or individual who erects a boiler which has been delivered knocked down in multiple pieces, by welding or riveting or other method of fabrication to produce a finished pressure vessel. A boiler erector may also be a boiler installer or boiler repairer.

(14) "Boiler installation" means the installation of a boiler, including all connected piping, valves, fittings, flanges, firing equipment, controls, appurtenances, and auxiliaries, and may include the field assembly of boilers.

History: 1954 ACS 49, p. 47, Eff. Feb. 14, 1967; 1954 ACS 56, p. 25, Eff. Nov. 14, 1968; 1954 ACS 73, p. 31, Eff. Nov. 4, 1972.

R 408.4013 Definitions of boilers.

Rule 13. (1) "Boiler for agricultural purposes" means a portable boiler used in fields or similar open areas for the sole purpose of operating farm equipment or farm machinery.

(2) "Condemned boiler" means a boiler that has been inspected and declared unsafe or disqualified by legal requirements by an inspector qualified to take such action who has applied a stamping or marking designating its rejection.

(3) "Hot water supply boiler" means a boiler furnishing hot water to be used externally to itself when any 1 of the following conditions are exceeded:

(a) A heat input of 200,000 Btu per hour.

(b) A water temperature of 210 degrees Fahrenheit.

(c) A nominal water-containing capacity of 120 gallons.

(4) "Miniature boiler" means a boiler, the dimensions and working pressure of which do not exceed the following limits: diameter, 16 inches; working pressure, 100 psig; gross volume, 5 cubic feet. Where any of the above limits are exceeded, the rules for power boilers shall apply.

(5) "Noncode boiler" means any boiler not built to comply with the code, that is, any boiler not stamped with the ASME code symbol stamp or state code stamp.

(6) "Nonstandard boiler" means a boiler that does not bear the state stamp, the national board stamping, or the stamp of any state or political subdivision which has adopted a standard of construction equivalent to that required by the board of boiler rules.

(7) "Portable boiler" means a boiler which is primarily intended for temporary location and the construction and usage of which is obviously portable.

(8) "Process boiler" means a boiler operated at any pressure or temperature from which more than 10% of its capacity is used for direct steam humidification, direct process work, or operation requiring constant fresh water make up. Such boilers shall be inspected annually.

(9) "Reinstalled boiler" means a boiler removed from its original setting and re-erected at the same location or erected at a new location without change of ownership.

(10) "Rental boiler" means a boiler in temporary use for not more than 1 year, and which may or may not be installed inside a boiler room, temporary shed, or without external covering.

(11) "Secondhand boiler" means a boiler which has changed ownership and location after primary use.

(12) "Standard boiler" means a boiler which bears the stamp of the state or of the national board of boiler and pressure vessel inspectors or of another state or political subdivision which has adopted a standard of construction equivalent to that required by the board of boiler rules of the state.

(13) "Traction boiler" means a boiler designed for the express purpose of pulling farm equipment or to convert steam power into fly wheel energy driving farm apparatus, such as threshers, saws, or grinding equipment.

History: 1954 ACS 49, p. 48, Eff. Feb. 14, 1967; 1954 ACS 59, p. 46, Eff. Aug. 14, 1969; 1954 ACS 68, p. 35, Eff. June 3, 1971; 1954 ACS 98, p. 128, Eff. Jan. 24, 1979.

R 408.4015 Definitions; C to E.

Rule 15. (1) "Certificate of competency" means a certificate issued to a person who has passed an examination prescribed by the board of boiler rules.

(2) "Director" means the director of labor.

(3) "Existing installation" means and includes any steam boiler constructed, installed, placed in operation or contracted for before August 10, 1917, or any hot water heating or supply boiler constructed, installed, placed in operation, or contracted for before the effective date of these rules.

(4) "External inspection" means an inspection while the boiler is under pressure and which does not involve examination of the internal surfaces of the pressure parts of the boiler.

History: 1954 ACS 49, p. 49, Eff. Feb. 14, 1967; 1954 ACS 56, p. 25, Eff. Nov. 14, 1968; 1954 ACS 68, p. 35, Eff. June 3, 1971.

R 408.4017 Definitions; F.

Rule 17. (1) "Field assembly" means the assembly of prefabricated boiler pressure parts, not requiring the use of field welding or riveting.

(2) "Field erection" means the erection and assembly of boiler parts by utilizing welding, riveting, or other fabrication processes.

(3) "Flash tank" means an unfired pressure vessel in which steam is released upon the discharge of water, having a saturated temperature at a lower pressure.

History: 1954 ACS 49, p. 49, Eff. Feb. 14, 1967; 1954 ACS 68, p. 36, Eff. June 3, 1971.

R 408.4019 Definitions; I to L.

Rule 19. (1) "Inspector" means the chief boiler inspector or his deputy inspectors, or any inspectors holding Michigan licenses as boiler inspectors.

(2) "Chief inspector" means the chief boiler inspector appointed under the act.

(3) "Deputy inspector" means any inspector holding a license who is appointed by the director under the provisions of the act.

(4) "Special inspector" means an inspector holding a license and who is regularly employed by an insurance company authorized to insure against loss from explosion of boilers in this state, any city having an authorized boiler inspection department, or any company operating boilers in this state for which the owner or user maintains a regularly established inspection service which is under the supervision of 1 or more registered professional engineers regularly employed by such owner or user.

(5) "Internal furnace" means a furnace with a boiler consisting of a straight or corrugated flue, or a fire-box substantially surrounded with water-cooled heating surface.

(6) "Internally fired boiler" means a fire tube boiler having an internal furnace such as a scotch, locomotive fire-box, vertical tubular or other type having a water-cooled plate-type furnace.

(7) "Internal inspection" means an inspection made when a boiler is shut down and handholes or manholes are opened for inspection of the interior.

(8) "Licensed boiler installer" means a person engaged in the business of making piping connections to a boiler or a person engaged in the business of field assembly of boilers.

(9) "Licensed boiler repairer" means a person engaged in making or supervising all phases of boiler repairs, alterations, or the field erection of boilers.

History: 1954 ACS 49, p. 49, Eff. Feb. 14, 1967.

R 408.4021 Definitions; M to R.

Rule 21. (1) "Major repair" means a repair which may materially affect the strength of the pressure parts of a boiler.

(2) "New boiler installation" means a boiler constructed, installed, placed in operation, or contracted for after November 30, 1966.

(3) "Owner or user" means a person, firm, partnership, or corporation owning or operating, under pressure, a boiler within this state.

(4) "Repair" means work necessary to return the pressure parts of a boiler to a safe and satisfactory operating condition.

History: 1954 ACS 49, p. 50, Eff. Feb. 14, 1967; 1954 ACS 61, p. 55, Eff. Feb. 16, 1970.

R 408.4023 Definitions; S to W.

Rule 23. (1) "Safe point of discharge" means an approved blowoff tank or blowoff separator or the discharge to a pond, marsh or other similar safe point which is not subject to freezing and is enclosed and inaccessible.

(2) "Steam cleaner" means a hot water boiler which is constructed of continuous coils of tubing or piping completely filled with water without any steam space, which produces a spray of vapor consisting of hot water droplets and flash steam, and which is used only for cleaning, sanitizing or deodorizing of such things as machinery, equipment and buildings.

(3) "Wet bottom boiler" means a boiler which has a stayed or unstayed, partially or fully water-cooled shell or furnace.

History: 1954 ACS 49, p. 50, Eff. Feb. 14, 1967; 1954 ACS 67, p. 49, Eff. Mar. 31, 1971.

R 408.4025 ASME code.

Rule 25. A boiler shall be constructed as prescribed by the rules of the board of boiler rules and the ASME boiler and pressure vessel code, 1977 edition, and its addenda, which are incorporated herein by reference and may be inspected at the Lansing office of the department of labor. This code may be purchased at a cost of $1,200.00 from the American Society of Mechanical Engineers, 345 East 47th Street, New York, New York 10017, or from the Michigan Department of Labor, 7150 Harris Drive, P.O. Box 30015, Lansing, Michigan 48909.

History: 1954 ACS 49, p. 50, Eff. Feb. 14, 1967; 1954 ACS 56, p. 25, Eff. Nov. 14, 1968; 1954 ACS 68, p. 36, Eff. June 3, 1971; 1954 ACS 73, p. 32, Eff. Nov. 4, 1972; 1954 ACS 86, p. 71, Eff. Jan. 16, 1976; 1954 ACS 98, p. 128, Eff. Jan. 24, 1979.

R 408.4027, R 408.4028 Rescinded.

History: 1954 ACS 49, p. 50, Eff. Feb. 14, 1967; rescinded 1954 ACS 68, p. 36, Eff. June 3, 1971.

R 408.4029 Allowable pressure of noncode boilers.

Rule 29. The maximum allowable pressure of a boiler which does not carry the American society of mechanical engineers code symbol may be computed in accordance with the requirements of R 408.4212(1).

History: 1954 ACS 49, p. 50, Eff. Feb. 14, 1967.

R 408.4031 Installation and reinstallation of boilers.

Rule 31. A new boiler installation, including a reinstalled boiler, shall be installed in accordance with the requirements of these rules and the 1977 edition of the ASME boiler and pressure vessel code and its addenda, which are incorporated by reference in R 408.4025.

History: 1954 ACS 49, p. 50, Eff. Feb. 14, 1967; 1954 ACS 56, p. 25, Eff. Nov. 14, 1968; 1954 ACS 73, p. 32, Eff. Nov. 4, 1972; 1954 ACS 86, p. 71, Eff. Jan. 16, 1976; 1954 ACS 98, p. 128, Eff. Jan. 24, 1979.

R 408.4033 Permits to install, reinstall, alter, or repair.

Rule 33. No person shall install, reinstall, alter, or repair a boiler without first securing a permit to install, reinstall, alter, or repair from the boiler division, bureau of safety and regulation, department of labor.

History: 1954 ACS 49, p. 50, Eff. Feb. 14, 1967.

R 408.4035 Permits issued only to licensed persons.

Rule 35. Permits shall be issued only to persons licensed as required by the act and these rules, and no work shall be performed except by or under the immediate supervision of such licensed person.

History: 1954 ACS 49, p. 51, Eff. Feb. 14, 1967.

R 408.4036 Multiple contractors.

Rule 36. Each contractor performing separate work on the same boiler installation shall possess a valid boiler installer's license and shall obtain a permit to install for that part of the installation he is to perform.

History: 1954 ACS 56, p. 25, Eff. Nov. 14, 1968.

R 408.4037 Rescinded.

History: 1954 ACS 49, p. 51, Eff. Feb. 14, 1967; rescinded 1954 ACS 68, p. 36, Eff. June 3, 1971.

R 408.4039 Permits to alter.

Rule 39. (1) A permit to alter a boiler or vessel covered by these rules may only be issued to a Michigan licensed boiler repairer in possession of a valid certificate of authorization from the ASME boiler and pressure vessel committee to build the type boiler or vessel being altered. Drawings and calculations covering all details of the proposed alteration shall accompany the application for permit to alter. Permission shall be obtained by the licensed repairer from the national board to stamp such boilers or vessels "National Board" if the boiler or vessel was originally so stamped.

(2) The alterations shall comply with the section of the ASME code pursuant to which the original boiler or vessel was constructed, including any service restrictions.

(3) The required inspections shall be made by an inspector holding a valid national board commission and otherwise qualified as required by the ASME code and these rules. The inspector shall authorize the proposed alteration before it is undertaken.

(4) The licensed repairer making the alterations shall prepare a data report on the appropriate form (P-2, P-3, U-1, U-1A, H-2 or H-3) for the alteration changing the words "Manufactured by" to read "Altered by." The data report shall clearly indicate what changes have been made to the original construction. It shall show in the proper spaces provided the manufacturer's serial number assigned to the boiler or vessel by the licensed repairer making the alterations and under "Remarks" the name of the original manufacturer, the manufacturer's serial number and National Board number assigned to the boiler or vessel by the original manufacturer. In addition to the requirements of R 408.4637, the original and 1 legible copy of this report signed by the licensed repairer and the authorized inspector shall be filed with the national board if the boiler was originally stamped "National Board" and 1 legible copy with the boiler division, bureau of safety and regulation, Michigan department of labor by the licensed repairer.

(5) The licensed repairer making the alteration shall prepare a name plate giving all the information required by the national board for new boilers or vessels of the type altered except that the word "Altered" in letters at least $\frac{5}{16}$ inch high shall be stamped on the plate in lieu of the code symbol and national board number. The date shown on this name plate shall be the date of alteration. This name plate shall be permanently attached to the boiler or vessel adjacent to the original manufacturer's name plate or stamping which shall remain on the boiler or vessel. If the alteration requires removal of the original manufacturer's name plate or stamping, it shall be retained and reattached to the altered vessel in the proper location and the relocation shall be noted on the data report prepared by the licensed repairer making the alteration.

(6) Under no circumstances shall the working pressure or temperature be increased above that allowed by the original manufacturer without specific approval of new working pressure or temperature, in writing by the original manufacturer and with concurrence by the boiler division.

(7) Under no circumstances shall this procedure for certification of alterations be permitted if the original manufacturer's name plate or stamping is missing from the boiler or vessel.

History: 1954 ACS 49, p. 51, Eff. Feb. 14, 1967; 1954 ACS 73, p. 32, Eff. Nov. 4, 1972.

R 408.4041 Rescinded.

History: 1954 ACS 49, p. 51, Eff. Feb. 14, 1967; rescinded 1954 ACS 61, p. 55, Eff. Feb. 16, 1970.

R 408.4043 Installation of other than Michigan standard boilers.

Rule 43. A boiler having the standard stamping of another state that has adopted a standard of construction equivalent to the standard of the state of Michigan may be accepted by the chief inspector; provided, however, that the person desiring to install the boiler is licensed as required by the act and these rules and makes application to the boiler division of the bureau of safety and regulation, department of labor, for the installation and files with this application the manufacturers' data report covering the construction of the boiler in question. A fee of $5.00 shall accompany the installation permit application.

History: 1954 ACS 49, p. 51, Eff. Feb. 14, 1967.

R 408.4045 Registration of boilers.

Rule 45. Within 6 months from the effective date of these rules, all owners or users of boilers and their installations now in use or installed ready for use in the state shall report to the chief inspector on forms prescribed by the department, giving the location, type, capacity, age, and date of installation.

History: 1954 ACS 49, p. 51, Eff. Feb. 14, 1967.

R 408.4047 Exempt boilers.

Rule 47. These rules do not apply to:

(a) Boilers under federal control.

(b) Swimming pool heaters, open car wash heaters, and similar type equipment provided with no intervening valves on the return or discharge piping and no reduction in pipe size in the return or discharge piping which do not generate more than normal circulating pump pressure.

(c) Miniature steam or marine engines used as a hobby.

(d) Boilers used in the power plants of self-propelled vehicles designed primarily for transportation of persons or property on a highway, except vehicles used exclusively on stationary rails or tracks.

(e) Boilers used on mint farms for mint processing purposes.

History: 1954 ACS 49, p. 51, Eff. Feb. 14, 1967; 1954 ACS 61, p. 55, Eff. Feb. 16, 1970; 1954 ACS 68, p. 36, Eff. June 3, 1971; 1954 ACS 86, p. 71, Eff. Jan. 16, 1976.

R 408.4049 Boilers subject to and exempt from inspection.

Rule 49. Each boiler used or proposed to be used within this state shall be thoroughly inspected as to its construction, installation, and condition except:

(a) A boiler used solely for agricultural purposes.

(b) A steam or vapor boiler carrying a pressure of not more than 15 psig which is located in a private residence or an apartment house of less than 6 families.

(c) A hot water boiler operated at pressures not exceeding 160 psig or temperatures not exceeding 250 degrees Fahrenheit, which is located in a private residence or apartment house of less than 6 families.

History: 1954 ACS 49, p. 51, Eff. Feb. 14, 1967; 1954 ACS 68, p. 36, Eff. June 3, 1971.

R 408.4051 Inspection of boilers.

Rule 51. Upon completion of the installation, all boilers, except those exempted from inspection by R 408.4049, shall be inspected by the chief inspector or a deputy inspector.

History: 1954 ACS 49, p. 51, Eff. Feb. 14, 1967.

R 408.4052 Michigan serial number; steel boilers.

Rule 52. When making an inspection of a boiler, other than cast iron, which does not bear a Michigan serial number, it is the duty of the inspector making the inspection to stamp the boiler with a number of the state of Michigan, preceded and followed by the letter "M," said letters and figures to be not less than 5/16 inches in height. The stamping shall not be concealed by lagging or paint and shall be exposed at all times.

History: 1954 ACS 49, p. 51, Eff. Feb. 14, 1967.

R 408.4053 Michigan serial number; cast iron boilers.

Rule 53. When making an inspection of a cast iron boiler which does not bear a Michigan serial number, it is the duty of the inspector making the inspection to cause an indestructible tag bearing a Michigan serial number to be irremovably attached to the boiler, jacket or other visible, accessible and prominent part of the boiler installation.

History: 1954 ACS 49, p. 52, Eff. Feb. 14, 1967.

R 408.4055 Right of access.

Rule 55. The director, chief inspector, or any deputy inspector shall have free access, during reasonable hours, to any premises in the state where a boiler is being constructed, installed, repaired, or operated for the purpose of ascertaining whether the boiler is in accordance with the provisions of this act.

History: 1954 ACS 49, p. 52, Eff. Feb. 14, 1967.

R 408.4057 Inspections required.

Rule 57. (1) A boiler used or proposed to be used within this state, except a boiler exempt from inspection, shall be thoroughly inspected as to its construction, installation, and condition as follows:

(a) A power boiler, process boiler, or high pressure high temperature water boiler shall receive a certificate inspection annually and shall also be externally inspected annually while under pressure within 6 months from the date of the internal inspection.

(b) A low pressure steam or vapor heating boiler, hot water heating boiler, and hot water supply boiler shall receive a certificate inspection biennially.

(c) A grace period of 2 months beyond the periods specified in subdivisions (a) and (b) may elapse between certificate inspections, and the board may permit longer periods between certificate inspections.

(d) A black liquor recovery boiler used in sulphate pulp manufacturing process shall receive a certificate inspection annually and a fire surfaces inspection within 6 months from the date of the certificate inspection.

(2) The inspections shall be made by the chief inspector, by a deputy inspector, or by a special inspector provided for in the act.

(3) If, at the discretion of the inspector, a hydrostatic test is necessary, it shall be made by the boiler owner or user.

History: 1954 ACS 49, p. 52, Eff. Feb. 14, 1967; 1954 ACS 56, p. 25, Eff. Nov. 14, 1968; 1954 ACS 98, p. 128, Eff. Jan. 24, 1979.

R 408.4059 Notification for inspection.

Rule 59. The owner or user shall prepare each boiler for internal inspection and shall prepare for and apply a hydrostatic pressure test, whenever necessary, on the date specified by the chief inspector, deputy inspector, or special inspector, which date shall be not more than 7 days after the date of notification.

R 408.4061 Inspection and stamping during construction.

Rule 61. (1) All boilers, other than cast iron sectional boilers, to be installed in this state shall be inspected during construction as required by the applicable rules and regulations of the board by an inspector licensed to inspect boilers in this state, or, if constructed outside of the state, by an inspector holding a license as an inspector of boilers for a state that has a standard of examination substantially equal to those of this state as provided for in R 408.4071 or a license issued by the national board of boiler and pressure vessel inspectors, provided such inspector is licensed as prescribed in R 408.4075.

(2) All boilers other than cast iron sectional boilers built or constructed for use in the state of Michigan after the effective date of these rules shall be stamped national board.

History: 1954 ACS 49, p. 52, Eff. Feb. 14, 1967.

R 408.4063 Manufacturers' data reports to be filed.

Rule 63. Manufacturers' data reports for boilers signed by such licensed inspector shall be filed by the manufacturer with the chief inspector before installation. This data report, signed by a licensed inspector, together with the ASME stamp on the boiler shall be the record denoting that the boiler has been constructed in accordance with these rules. If the boilers are of special design, blueprints showing details of the proposed construction shall be submitted to the chief inspector and his approval secured before construction is started. If new or used equipment is being installed by the owner or user of any plant, similar notice shall be furnished the chief inspector.

History: 1954 ACS 49, p. 52, Eff. Feb. 14, 1967.

R 408.4065 Examinations for inspector licenses; place and time.

Rule 65. Examinations for boiler inspector licenses and certificates of competency shall be held at the office of the director or at any location to be selected by the board, 4 times each year, namely, the first Wednesday and Thursday in March, June, September, and December.

History: 1954 ACS 49, p. 52, Eff. Feb. 14, 1967.

R 408.4067 Qualification of applicants for a boiler inspector license.

Rule 67. An applicant for examination for a boiler inspector license shall have had not less than 3 years' practical experience in the design, construction, or operation of high pressure boilers, as mechanical engineer, steam engineer, or boilermaker or shall have had not less than 3 years' inspection experience as an inspector of high pressure boilers. A credit of 2 years of the required experience shall be given to applicants holding an engineering degree from an accredited college of engineering.

History: 1954 ACS 49, p. 53, Eff. Feb. 14, 1967; 1954 ACS 98, p. 129, Eff. Jan. 24, 1979.

R 408.4069 Examination; contents of applications.

Rule 69. Application for an examination for a certificate of competency shall be in writing upon a form to be furnished by the director stating the school education of the applicant, a list of his employers, his period of employment and position held with each employer. An application containing a willful falsification or untruthful statement shall be rejected.

History: 1954 ACS 49, p. 53, Eff. Feb. 14, 1967.

R 408.4071 Examination; types.

Rule 71. If the applicant's history and experience meet with the approval of the board of boiler rules, he shall be given a written examination dealing with the design, construction, installation, operation, maintenance and repair of boilers and their appurtenances, and the applicant shall be accepted or rejected on the merits of this examination. If the applicant is successful in meeting the requirements of the board, a license and certificate of competency will be issued by the director. An applicant who fails to pass the examination may appeal to the board for another examination which shall be given by the board within 90 days. The record of an applicant's examination shall be accessible to the applicant and his employer.

History: 1954 ACS 49, p. 53, Eff. Feb. 14, 1967.

R 408.4073 Examination; fees.

Rule 73. A fee of $10.00 will be charged for each applicant taking the examination for boiler inspector's license and shall accompany the application filed with the department of labor. This fee shall entitle the applicant to take the examination twice if necessary. An additional fee of $10.00 shall accompany each subsequent application.

History: 1954 ACS 49, p. 53, Eff. Feb. 14, 1967.

R 408.4075 Special inspector's license.

Rule 75. The director, upon the request of any company authorized to insure against loss from explosion of boilers in this state, any city having an authorized boiler inspection department, or any company operating boilers in this state for which the owner or user maintains a regularly established inspection service which is under the supervision of 1 or more registered professional engineers regularly employed by such owner or user, shall issue to any inspectors of the company licenses as special inspectors if each such inspector before receiving his license satisfactorily passes the examination provided for in R 408.4071, or, in lieu of such examination, holds a license or a certificate of competency as an inspector of boilers for a state that has a standard of examination substantially equal to that of this state or a license as an inspector of boilers issued by the national board of boiler and pressure vessel inspectors. A license as a special inspector of a company operating boilers in this state shall be issued only if, in addition to meeting the requirements stated herein, the inspector is employed full time by the company and his duties include making inspections of boilers used, or to be used, by such company and not for resale. Each licensed inspector shall present himself for review of Michigan boiler rules and regulations before the board at the next regular examination.

History: 1954 ACS 49, p. 53, Eff. Feb. 14, 1967.

R 408.4077 Boiler inspector's license fee.

Rule 77. An application for a license as an inspector of boilers shall be filed with the department of labor accompanied by a fee of $10.00.

History: 1954 ACS 49, p. 53, Eff. Feb. 14, 1967.

R 408.4079 Annual renewal of license.

Rule 79. Each license issued to a special inspector shall be renewed at the beginning of each calendar year following the date of issuance accompanied by a fee of $5.00.

History: 1954 ACS 49, p. 53, Eff. Feb. 14, 1967.

R 408.4081 Special inspectors employed by insurance companies.

Rule 81. Special inspectors' licenses issued to inspectors in the employ of insurance companies shall be held at the home office of the employing company. The license and the identification card shall be returned to the chief inspector when the special inspector to whom the license and identification card was issued is no longer in its employ or at the request of the chief inspector, as specified by section 14 of the act.

History: 1954 ACS 49, p. 54, Eff. Feb. 14, 1967.

R 408.4083, R 408.4085 Rescinded.

History: 1954 ACS 49, p. 54, Eff. Feb. 14, 1967; rescinded 1954 ACS 68, p. 36, Eff. June 3, 1971.

R 408.4087 Reporting of boilers.

Rule 87. When a special inspector visits a specific location to conduct an inspection as required by these rules, he shall report the presence of all boilers not inspected, in addition to the report required covering his inspection of insured boilers and their installations.

History: 1954 ACS 49, p. 54, Eff. Feb. 14, 1967.

R 408.4089 Boiler installers' licenses.

Rule 89. Boiler installers shall be licensed as required by section 13 of the act.

History: 1954 ACS 49, p. 54, Eff. Feb. 14, 1967.

R 408.4091 Application for boiler installer's license.

Rule 91. (1) An application for a license shall be on the form provided by the boiler division, bureau of safety and regulation, department of labor, and shall give evidence of the applicant's past experience in the installation of boilers covered by the application, and shall give evidence of his workmanship and engineering skills which would qualify him for a license. The board may require inspection and approval of installations previously made by the applicant, including those listed on his application as a condition of issuance of the license.

(2) An applicant for a boiler installer's license shall have had not less than 5 years' experience in the installation of boilers. A credit of 2 years of the required experience shall be given for 2 years' experience in the design, construction, manufacture, maintenance, or inspection of boilers.

History: 1954 ACS 49, p. 54, Eff. May 15, 1968; 1954 ACS 56, p. 26, Eff. Nov. 14, 1968; 1954 ACS 98, p. 129, Eff. Jan. 24, 1979.

R 408.4093 Evidence of ASME authorization.

Rule 93. An applicant for a license shall give evidence of his familiarity and knowledge of the nationally recognized rules and regulations regarding the installation of boilers known as the American society of mechanical engineers boiler code; and the applicant, or the firm, partnership or corporation under whose name the applicant is conducting business, shall have the required certificates of authorization from the American society of mechanical engineers to qualify for the license.

History: 1954 ACS 49, p. 54, Eff. Feb. 14, 1967.

R 408.4095 Filing of welding procedures with boiler division.

Rule 95. An applicant shall be required to file any required qualified welding procedures with the boiler division, bureau of safety and regulation, department of labor, prior to issuance of any license.

History: 1954 ACS 49, p. 54, Eff. Feb. 14, 1967.

R 408.4099 Applicant's business affiliation.

Rule 99. (1) An applicant for a boiler installer's license shall state the name of the business, firm, partnership, or corporation under which he intends to carry on the business of installing boilers; and he may be the owner, a partner, an officer of a corporation, or a supervisory employee of the business, firm, partnership, or corporation.

(2) No person may engage in installing boilers under the name of more than 1 business at any 1 time.

History: 1954 ACS 49, p. 54, Eff. Feb. 14, 1967.

R 408.4101 Licenses not required.

Rule 101. An individual employed by and working under the supervision of a licensed boiler installer shall not be required to be licensed.

History: 1954 ACS 49, p. 55, Eff. Feb. 14, 1967.

R 408.4103 Examination for boiler installer's license.

Rule 103. An applicant for a license shall be required to take an examination as set forth by the board of boiler rules. Such examinations will be held quarterly at a location determined by the board.

History: 1954 ACS 49, p. 55, Eff. Feb. 14, 1967.

R 408.4105 Fees for boiler installers' licenses.

Rule 105. A fee of $30.00 shall accompany the application for a boiler installer's license.

History: 1954 ACS 49, p. 55, Eff. Feb. 14, 1967; 1954 ACS 56, p. 26, Eff. Nov. 14, 1968.

R 408.4107 Annual renewal of boiler installer's license.

Rule 107. Boiler installers' licenses shall be renewed at the beginning of each calendar year following the date of issuance. A fee of $30.00 shall accompany each application for renewal of license.

History: 1954 ACS 49, p. 55, Eff. Feb. 14, 1967.

R 408.4109 Classes of boiler installers' licenses.

Rule 109. (1) A class A installer's license shall qualify a person to install low pressure steam boilers, hot water heating boilers, and hot water supply boilers not exceeding 1,000,000 Btu/hour input firing rate as certified by the boiler manufacturer.

(2) A class B installer's license shall qualify a person to install low pressure steam boilers, hot water heating boilers, and hot water supply boilers not exceeding 5,000,000 Btu/hour input firing rate as certified by the boiler manufacturer.

(3) A class C installer's license shall qualify a person to install low pressure steam boilers, hot water heating boilers, and hot water supply boilers not exceeding 10,000,000 Btu/hour input firing rate as certified by the boiler manufacturer.

(4) A class D installer's license shall qualify a person to install low pressure steam boilers, hot water heating boilers, and hot water supply boilers not exceeding 20,000,000 Btu/hour input firing rate as certified by the boiler manufacturer.

R 408.4114 Inspection of components and systems in a nuclear power plant.

Rule 114. Preservice (baseline) inspection, inservice inspection, repair, replacement, modification, alteration, examination, testing, records, and reports of individual nuclear components, parts, appurtenances, piping, supports, nuclear systems, applicable associated auxiliary systems, and complete nuclear power plants that have met all the requirements of the construction code, at the point in time the requirements have been completed, irrespective of the physical location, shall be as prescribed in section XI, rules for inservice inspection of nuclear reactor coolant systems, of the ASME boiler and pressure vessel code, 1977 edition, and its addenda, which are incorporated herein by reference and may be inspected at the Lansing office of the department of labor. Section XI may be purchased at a cost of $60.00 from the American Society of Mechanical Engineers, 345 East 47th Street, New York, New York 10017, or from the Michigan Department of Labor, 7150 Harris Drive, P.O. Box 30015, Lansing, Michigan 48909.

History: 1954 ACS 68, p. 37, Eff. June 3, 1971; 1954 ACS 86, p. 72, Eff. Jan. 16, 1976; 1954 ACS 98, p. 129, Eff. Jan. 24, 1979.

R 408.4115 Naming of person in responsible charge.

Rule 115. On installations of power boilers of a capacity of 100,000 pounds of steam per hour or the equivalent, and on all boilers using a nuclear heat source, the licensee shall be required to name a responsible person in charge at the installation site. That person shall be named on the application for a permit.

History: 1954 ACS 49, p. 56, Eff. Feb. 14, 1967.

R 408.4116 Transferring of installer's licenses.

Rule 116. A licensed installer may transfer his license from 1 company to another if the license classification remains the same and he applies for and is issued a new license bearing the name of the company under which the licensee intends to carry on the business of installing boilers. A fee of $30.00 shall accompany the application for a boiler installer's license.

History: 1954 ACS 56, p. 26, Eff. Nov. 14, 1968.

R 408.4117 Boiler repairers; licenses.

Rule 117. Boiler repairers shall be licensed as required by section 13 of the act.

History: 1954 ACS 49, p. 56, Eff. Feb. 14, 1967.

R 408.4119 Boiler repairers; applications.

Rule 119. (1) An applicant for a boiler repairer's license shall have had at least 5 years' experience in all phases of boiler repair in the class of license for which he is applying. A credit of 3 years toward the 5 years will be given for 3 years' experience in design, construction, manufacture, or inspection of boilers.

(2) An application for examination and license shall be on forms provided by the boiler division, bureau of safety and regulation, department of labor. It shall

require the applicant to state the name of the business, firm, partnership, or corporation whom he intends to represent in the business of repairing boilers and to give evidence of his past experience in the repair of boilers and evidence of his workmanship and engineering skills which will qualify him for examination and license.

(3) The chairman of the board of boiler rules shall establish an application review committee who shall review and recommend acceptance or rejection of all applications for boiler repairer examination.

(4) The boiler division shall inspect all repairs required to be reported on the application to establish definitely the applicant's minimum practical repair experience in his desired license classification. Copies of the boiler division inspection reports of these repairs shall be made part of the application and these applications shall be submitted to the application review committee for approval at least 30 days before the examination date.

History: 1954 ACS 49, p. 56, Eff. Feb. 14, 1967; 1954 ACS 61, p. 55, Eff. Feb. 16, 1970.

R 408.4120 Filing of welding procedures with boiler division.

Rule 120. An applicant for a boiler repairer's license shall file welding procedures qualified in accordance with the requirements of section IX, welding qualifications, ASME boiler and pressure vessel code, with the boiler division, bureau of safety and regulation, department of labor, prior to issuance of any license to him.

History: 1954 ACS 56, p. 26, Eff. Nov. 14, 1968.

R 408.4121 Boiler repairers; examinations.

Rule 121. (1) The board shall establish the boiler repairer's examination which shall be given by an examining committee, composed of at least 1 member of the board and 1 other person as designated by the board chairman, on the first Wednesday of each quarter at the department of labor office in Lansing. In addition to examinations held in Lansing, at least 1 examination shall be held annually in the Upper Peninsula at a time and place designated by the board.

(2) An applicant for a boiler repairer's license including a person wishing to upgrade his license to a higher classification shall take the examination prescribed in subrule (1).

History: 1954 ACS 49, p. 56, Eff. Feb. 14, 1967; 1954 ACS 61, p. 56, Eff. Feb. 16, 1970.

R 408.4123 Boiler repairers; application fees.

Rule 123. A fee of $30.00 shall accompany each application for boiler repairer's license.

History: 1954 ACS 49, p. 56, Eff. Feb. 14, 1967.

R 408.4125 Boiler repairers; annual renewal of licenses.

Rule 125. Boiler repairer's licenses shall be renewed at the beginning of each calendar year following the date of issuance. A fee of $30.00 shall accompany each application for renewal of license.

History: 1954 ACS 49, p. 56, Eff. Feb. 14, 1967.

R 408.4127 Boiler repairers; classes of licenses.

Rule 127. (1) A class I license allows the licensee to repair boilers by means other than by welding, riveting or other fabrication processes.

(2) A class II license allows the licensee to repair low pressure boilers, hot water supply boilers, and fire tube boilers of any pressure and to perform work allowed by a class I licensee.

(3) A class III license allows the licensee to repair water tube boilers designed for a maximum allowable working pressure not exceeding 700 psi and boilers covered by a class II license.

(4) A class IV license allows the licensee to repair boilers of any pressure except boilers having a nuclear heat source.

(5) A class V license allows the licensee to erect and repair boilers having a nuclear heat source, or its parts, appurtenances or system components. An applicant for a class V license shall give evidence of familiarity and knowledge of all federal rules and regulations regarding the construction of boilers having a nuclear heat source and shall be authorized to use and be in possession of valid ASME nuclear code symbols applicable to those portions of any nuclear boiler system he proposes to repair, before issuance of the license.

(6) A class VI license allows the licensee to field erect boilers of any pressure coming within the jurisdiction of these rules, except nuclear boilers.

History: 1954 ACS 49, p. 56, Eff. Feb. 14, 1967; 1954 ACS 61, p. 56, Eff. Feb. 16, 1970; 1954 ACS 73, p. 33, Eff. Nov. 4, 1972.

R 408.4129 Boiler repairers; responsibility to make repairs.

Rule 129. It will be the responsibility of the licensed boiler repairer to make all boiler repairs in accordance with these rules. All materials and workmanship shall be in accordance with the requirements of the ASME boiler and pressure vessel code. Any deviation from these requirements shall be cause for denial, suspension, or revocation of license.

History: 1954 ACS 49, p. 57, Eff. Feb. 14, 1967.

R 408.4131 Examination of persons with revoked licenses.

Rule 131. The board shall require examination or reexamination of any licensee whose license has been revoked for cause.

History: 1954 ACS 49, p. 57, Eff. Feb. 14, 1967.

R 408.4133 Reports of inspection to be filed.

Rule 133. Each company employing licensed boiler inspectors, within 30 days following each boiler certificate inspection made by the inspectors, shall file a report of the inspection with the chief inspector upon appropriate forms approved by the board. Reports of external inspections shall not be required except when such inspections disclose that the boiler is in dangerous condition. Manufacturers, national board and ASME numbers shall be reported on all reports of inspection.

History: 1954 ACS 49, p. 57, Eff. Feb. 14, 1967.

R 408.4135—R 408.4137 Rescinded.

History: 1954 ACS 49, p. 57, Eff. Feb. 14, 1967; 1954 ACS 56, p. 26, Eff. Nov. 14, 1968; rescinded 1954 ACS 68, p. 37, Eff. June 3, 1971.

R 408.4139 Rental boilers.

Rule 139. Inspection of rental boilers must be made prior to rental and the boiler approved for reinstallation. Inspection certificates for approved rental boilers shall be issued with the installation permit and shall be valid only for each period of rental but not to exceed 14 months.

History: 1954 ACS 49, p. 58, Eff. Feb. 14, 1967.

R 408.4141 Rescinded.

R 408.4143 Refusal of inspection or nonpayment of fee.

Rule 143. If the owner or user of each boiler required to be inspected refuses to allow an inspection to be made or refuses to pay the above fee, the certificate of inspection shall be suspended by the chief inspector until the owner or user complies with the requirements.

History: 1954 ACS 49, p. 58, Eff. Feb. 14, 1967.

R 408.4145—R 408.4147 Rescinded.

History: 1954 ACS 49, p. 58, Eff. Feb. 14, 1967; rescinded 1954 ACS 68, p. 37, Eff. June 3, 1971.

R 408.4149 Notice of violation.

Rule 149. A written notice of violation containing the corrections necessary shall be forthwith sent to or served upon the owner or user by the chief inspector, a deputy inspector, or a special inspector advising of the existing conditions and stating a time limit within which the correction ordered must be completed. This notice shall serve as a notice of suspension of certificate of inspection upon failure to comply with these orders by the compliance date. When the notice of violation is issued as a notice of suspension of certificate of inspection or as a rejection or condemnation of the boiler, a copy of such notice shall be posted under glass adjacent to the inspection certificate. Such suspension of an inspection certificate shall continue in effect until such boiler shall have been made to conform to the rules and regulations and until said certificate shall have been reinstated.

History: 1954 ACS 49, p. 58, Eff. Feb. 14, 1967.

R 408.4151 Defacing or removing certificate or numbers.

Rule 151. No person except the chief inspector or a deputy inspector shall deface or remove any certificate of inspection or mark of identification number on a boiler.

History: 1954 ACS 49, p. 58, Eff. Feb. 14, 1967.

R 408.4153 Illegal to operate without valid certificate.

Rule 153. A person, firm, partnership, or corporation shall not operate a boiler under pressure in this state to which these rules apply without a valid inspection certificate. An owner or user who causes a boiler to be operated without possessing a valid certificate shall be subject to the penalty prescribed in section 24 of the act.

History: 1954 ACS 49, p. 58, Eff. Feb. 14, 1967; 1954 ACS 86, p. 72, Eff. Jan. 16, 1976.

R 408.4155 Boiler policies; newly written, canceled, or suspended.

Rule 155. All insurance companies shall notify the chief inspector within 30 days of all boilers newly insured, canceled, not renewed, or suspended because of unsafe conditions.

History: 1954 ACS 49, p. 58, Eff. Feb. 14, 1967.

R 408.4157 Notification; defective boilers.

Rule 157. If a special inspector, upon the first inspection of a new risk, finds that the boiler or any of the appurtenances are in such condition that his company refuses insurance, the company shall immediately notify the chief inspector and submit a report of the defects.

History: 1954 ACS 49, p. 58, Eff. Feb. 14, 1967.

R 408.4159 Suspension of inspection certificates.

Rule 159. If the owner or user of a boiler required to be inspected refuses to allow an inspection to be made or refuses to pay the statutory fee, the chief inspector shall suspend the certificate of inspection until the owner or user complies with the requirements.

History: 1954 ACS 49, p. 59, Eff. Feb. 14, 1967; 1954 ACS 68, p. 37, Eff. June 3, 1971.

R 408.4161 Defective conditions; external inspections.

Rule 161. If, upon an external inspection, there is evidence of a leak or crack, enough of the covering of the boiler shall be removed to satisfy the inspector in order that he may determine the safety of the boiler; or if the covering cannot be removed at that time, he may order the operation of the boiler stopped until such time as the covering can be removed and proper examination made.

History: 1954 ACS 49, p. 59, Eff. Feb. 14, 1967.

R 408.4163 Notification in case of accident.

Rule 163. (1) When an accident occurs which renders a boiler inoperative, the owner or user shall immediately notify the chief inspector and submit a detailed report of the accident. In case of serious accident, notice shall be given immediately by telephone, and confirmed by telegraph or messenger, and neither the boiler nor any of its parts shall be removed or disturbed before an inspection has been made by the chief inspector, deputy inspector, or special inspector, unless for the purpose of saving human life. A condition or failure which results in bodily injury or physical damage to equipment or property other than the boiler or creates a unique or unusual explosion hazard shall be reported as a serious accident.

(2) A detailed accident report shall be submitted by the owner's or user's insurance company boiler inspector on an accident report form furnished by the boiler division, department of labor. If not insured, a state deputy boiler inspector shall submit the required report.

History: 1954 ACS 49, p. 59, Eff. Feb. 14, 1967; 1954 ACS 56, p. 27, Eff. Nov. 14, 1968; 1954 ACS 86, p. 72, Eff. Jan. 16, 1976.

R 408.4165 Restamping of boilers.

Rule 165. When the stamping on a boiler becomes indistinct, the inspector shall instruct the owner or user to have it restamped. Request for permission to restamp the boiler shall be made to the chief inspector and proof of the original stamping shall accompany the request made to the chief inspector. Restamping authorized by the chief inspector shall be done only by an inspector, and shall be identical with the original stamping, except that it will not be required to restamp the ASME code symbol. Notice of completion of such restamping shall be filed with the chief inspector by the inspector who stamped the boiler, together with a facsimile of the stamping applied.

History: 1954 ACS 49, p. 60, Eff. Feb. 14, 1967.

R 408.4167 Penalty for operation of unsafe boilers.

Rule 167. If, upon inspection, a boiler is found to be in such a condition that it is unsafe to operate, the inspection certificate shall be suspended pursuant to section 20(4) of the act. A person, firm, partnership, or corporation causing such a boiler to be operated shall be subject to the penalty prescribed in section 24 of the act.

History: 1954 ACS 49, p. 60, Eff. Feb. 14, 1967; 1954 ACS 86, p. 72, Eff. Jan. 16, 1976.

R 408.4169 Condemned boilers.

Rule 169. Any boiler having been inspected and declared unsafe by the chief or deputy inspector shall be stamped by the inspector with an arrowhead stamp having an overall length of ½ inch and a width of ⅜ inch on either side of the letter "X" and the letters "MICH" as shown by the following facsimile which will designate a condemned boiler:

⧫ X MICH X ⧫

Any person, firm, partnership or corporation using or offering for sale a condemned boiler for operation within this state shall be subject to the penalties provided in R 408.4199.

History: 1954 ACS 49, p. 60, Eff. Feb. 14, 1967.

R 408.4171 Removal of used boilers from the state.

Rule 171. If an ASME boiler located in this state is to be moved to another state for temporary use or repairs, application shall be made by the owner or user to the chief inspector for permission to reinstall the boiler in this state.

History: 1954 ACS 49, p. 60, Eff. Feb. 14, 1967.

R 408.4172 Nonstandard boilers; bringing into state.

Rule 172. A nonstandard boiler now in use in this state, if removed outside the boundaries of the state, cannot be brought in and reinstalled without permission of the board of boiler rules. Shipment of nonstandard boilers into this state for use is prohibited.

History: 1954 ACS 49, p. 60, Eff. Feb. 14, 1967.

R 408.4173 Installing used or secondhand boilers.

Rule 173. Before a used or secondhand boiler can be reinstalled or shipped into this state, an inspection must be made by a national board inspector or by an inspector qualified by an examination of grade equal to that required by the state and data submitted by him shall be filed by the owner or user of the boiler with the chief inspector for his approval.

History: 1954 ACS 49, p. 60, Eff. Feb. 14, 1967.

R 408.4174 Portable boilers.

Rule 174. Portable boilers, such as used by contractors, agriculturists, sawmills, etc., used for portable purposes and transported from place to place, shall be deemed secondhand in the event of change of ownership, irrespective of change of location, and shall comply with the rules for new construction when reinstalled at a new location.

History: 1954 ACS 81, p. 47, Eff. Nov. 7, 1974.

R 408.4175 Inspection of used boilers for reinstallation and operation.

Rule 175. All used or secondhand boilers must first be inspected by the chief inspector or a deputy inspector and the boiler approved for reinstallation. No used or secondhand boiler may be placed in operation until its installation has been approved for operation by the chief inspector or a deputy inspector.

History: 1954 ACS 49, p. 60, Eff. Feb. 14, 1967.

R 408.4177 Reinstallation; used or secondhand boilers; fee.

Rule 177. Reinstallation of a used or secondhand boiler shall only be performed by a licensed boiler installer. A permit fee of $5.00 shall be paid directly to

the department of labor and shall accompany the permit to reinstall a used or secondhand boiler.

History: 1954 ACS 49, p. 60, Eff. Feb. 14, 1967.

R 408.4179 Reinstalled boilers; fittings and appliances.

Rule 179. In any case where a boiler is moved and reinstalled, the fittings and appliances must comply with the rules for new installations in the ASME code and these rules.

History: 1954 ACS 49, p. 60, Eff. Feb. 14, 1967.

R 408.4180 Rescinded.

History: 1954 ACS 49, p. 61, Eff. Feb. 14, 1967; rescinded 1954 ACS 68, p. 37, Eff. June 3, 1971.

R 408.4181 Factors of safety for existing installations.

Rule 181. The board of boiler rules authorizes an inspector to increase factors of safety if the condition of the boiler warrants it. If the owner or user does not concur with the inspector's decision, the owner or user may appeal to the board of boiler rules who may request a joint inspection by the chief inspector and the deputy or special inspector. Each inspector shall render his report to the boiler division and the board shall render the final decision based upon the data contained in all the inspector's reports.

History: 1954 ACS 49, p. 61, Eff. Feb. 14, 1967.

R 408.4182 Steam cookers.

Rule 182. (1) A steam cooker of less than 5 cubic feet volume which is not provided with piped feed connections is not covered by these rules.

(2) A fired or electrically heated steam cooker, irrespective of size, which is provided with piped feed connections shall comply with these rules.

History: 1954 ACS 56, p. 27, Eff. Nov. 14, 1968.

R 408.4183 Inspection of drum heads.

Rule 183. For new installations, provision shall be made to permit making inspections of the drum heads of all boilers. For existing installations, heads of lower drums shall be examined thoroughly at the annual inspection, and either a sufficient amount of brickwork shall be removed or inspection doors provided to enable this examination to be made.

History: 1954 ACS 49, p. 61, Eff. Feb. 14, 1967.

R 408.4184 Individually fired modular units.

Rule 184. (1) Individually fired low pressure modular units installed in a battery and connected to a common water inlet and a common stream or water outlet shall be considered as an individual low pressure boiler, if the individual modules are installed without isolation valves and if the modules are installed as prescribed by the rules of this part.

(2) A steam boiler installed as prescribed in subrule (1) shall have each module protected with a properly rated safety valve and an automatic low water fuel cut-off.

History: 1954 ACS 56, p. 27, Eff. Nov. 14, 1968; 1954 ACS 67, p. 49, Eff. Mar. 31, 1971; 1954 ACS 86, p. 72, Eff. Jan. 16, 1976; 1954 ACS 98, p. 129, Eff. Jan. 24, 1979.

R 408.4185 Safety appliances and controls.

Rule 185. No person, except under the direction of an inspector, shall attempt to remove or shall do any work upon any safety appliance or control prescribed by these rules while a boiler is in operation. Should any of these appliances or controls be repaired during an outage of a boiler, they must be reinstalled and in proper working order before the object is placed again in service. No person shall in any manner load the safety valve or valves to maintain a working pressure in excess of that stated on the certificate of inspection.

History: 1954 ACS 49, p. 61, Eff. Feb. 14, 1967.

R 408.4186 Steam cleaners.

Rule 186. (1) A steam cleaner shall be subject to all provisions of these rules and the act when any of the following limitations are exceeded:

(a) Three-fourths inch diameter tubing or pipe size with no drums or headers attached.

(b) Nominal water containing capacity does not exceed 6 gallons.

(c) Water temperature does not exceed 350 degrees Fahrenheit.

(d) Steam is not generated within the coil.

(e) Btu input per hour does not exceed 800,000.

(2) A steam cleaner exceeding none of the limitations of subrule (1) is exempt from these rules and the act if equipped with adequate controls and with ASME safety valves approved in accordance with the requirements of section 1, power boilers, dated 1977, or section IV, heating boilers, dated 1977, of the ASME boiler and pressure vessel code, and its addenda, whichever is applicable. These sections are incorporated herein by reference and may be inspected at the Lansing office of the department of labor. These sections may be purchased at a cost of $40.00 for section 1, and $50.00 for section IV, from the American Society of Mechanical Engineers, 345 East 47th Street, New York, New York 10017, or from the Michigan Department of Labor, 7150 Harris Drive, P.O. Box 30015, Lansing, Michigan 48909.

History: 1954 ACS 49, p. 61, Eff. Feb. 14, 1967; 1954 ACS 67, p. 49, Eff. Mar. 31, 1971; 1954 ACS 86, p. 72, Eff. Jan. 16, 1976; 1954 ACS 98, p. 130, Eff. Jan. 24, 1979.

R 408.4187 Prevention of contamination of potable water supply.

Rule 187. When a boiler other than a hot water supply boiler is connected directly to a potable water supply system, an approved design double check system or a protective backflow preventer device must be provided to prevent contamination of the potable water supply. The method of protecting the potable water supply must be a reduced pressure backflow preventer approved by the Michigan department of public health or a device whose design is approved by the board. Such devices should be located in the boiler room above floor level and readily accessible for maintenance and inspection. The drain device shall not be directly connected to any waste water line.

History: 1954 ACS 49, p. 61, Eff. Feb. 14, 1967.

R 408.4189 Air for combustion.

Rule 189. Owners and users shall provide an adequate air supply from the atmosphere to the burner for proper and complete combustion when the boiler is being fired at maximum capacity.

History: 1954 ACS 49, p. 61, Eff. Feb. 14, 1967.

R 408.4191 Rules for care of power boilers; when mandatory.

Rule 191. The requirements of suggested rules for the care of power boilers, section VII, ASME boiler and pressure vessel code, shall be mandatory where the wording is mandatory.

History: 1954 ACS 49, p. 61, Eff. Feb. 14, 1967.

R 408.4193 Stairways, ladders, platforms, and runways.

Rule 193. (1) Where the distance from the floor to the top of a boiler or boiler setting exceeds 8 feet, a permanent stairway or permanently attached inclined or vertical ladder shall be installed to give safe access to and permit exit from boiler tops. A permanent platform providing access to the main stop valve and safety valves of the boiler shall be installed except where the tops of the boiler setting are flat, without obstruction to the valves.

(2) Where the distance from the floor to the tops of adjacent boilers or boiler settings exceeds 8 feet, a steel runway or platform at least 18 inches wide, provided with standard handrails and toeboards on either side, shall be installed across the tops of adjacent boilers or at some other convenient level for the purpose of affording safe access to the boilers. A runway shall have at least 2 means of exit, remotely located from each other, and connected to a permanent stairway or inclined ladder leading to the floor level.

(3) Where the distance from the top of a boiler or boiler setting to the ceiling is less than 6 feet, special consideration to meet the requirements of this rule will be given by the chief inspector upon receipt of detailed plan information. The chief inspector shall notify the owner or user of his decision regarding the request for such special consideration, and if denied shall indicate his reasons for such denial.

(4) Where the low point of a water column is located 15 feet or more above the floor or walkway, a platform with standard toeboard shall be installed.

(5) A platform shall be installed opposite 1 end of all drums of a water tube boiler which is over 4 feet above the floor or walkway to permit safe access to the interior of drums for clean-out and inspection.

(6) A boiler shall be provided with platforms at clean-out openings on the side walls of setting which are over 4 feet above the floor or walkway.

(7) An inspector shall notify the chief inspector of an owner or user who is required to conform to this rule and the chief inspector shall give written notice to the owner or user that the installation of the required stairway, runway, platform or ladder is to be made. The owner or user shall be allowed 1 year from the date of the chief inspector's notification in which to complete the work.

History: 1954 ACS 49, p. 61, Eff. Feb. 14, 1967; 1954 ACS 61, p. 56, Eff. Nov. 14, 1968.

R 408.4195 Exits from boiler rooms.

Rule 195. (1) All boiler rooms shall have at least 2 means of exit, as may be considered necessary by the chief inspector. Each exit shall be remotely located from the others. Each elevation shall have at least 2 means of egress, each remotely located from the others.

(2) Inspectors shall notify the chief inspector of owners and users who must provide for these requirements. The chief inspector shall give written notice to the owner or user that the necessary work must be completed within 6 months from the date of notification.

History: 1954 ACS 49, p. 62, Eff. Feb. 14, 1967.

R 408.4197 Clearance between boilers and other objects.

Rule 197. A minimum clearance of 24 inches shall be provided between a boiler, its controls, firing equipment, and appurtenances and the building walls

and partitions or other boilers or machinery. A boiler installation with clearances of less than 24 inches between boilers may be approved by the chief inspector but only after his review and written approval of installation engineering drawings submitted to him before installation of such boilers. The applicant for deviation from the requirements of this rule shall be notified of approval or denial and if denied, the chief inspector shall indicate the reasons for such denial.

History: 1954 ACS 49, p. 62, Eff. Feb. 14, 1967; 1954 ACS 61, p. 57, Eff. Feb. 16, 1970.

R 408.4199 Rescinded.

PART 2. EXISTING INSTALLATIONS
STEAM BOILERS

R 408.4201 Existing steam boilers.

Rule 201. "Existing steam boilers," as used in this part, means steam boilers that are in actual use, or which are installed and ready for use prior to August 10, 1917. It should not be applied to secondhand boilers, rental boilers or to boilers that are subject to change in ownership or are to be reset, in which case the rules for new construction shall apply.

History: 1954 ACS 49, p. 62, Eff. Feb. 14, 1967.

R 408.4202 Age limit of nonstandard existing steam boilers.

Rule 202. The age limit of any boiler of nonstandard construction, installed prior to the date this law became effective, shall be 30 years except that after a thorough internal and external inspection and a hydrostatic pressure of 1½ times the allowable working pressure and held for a period of at least 30 minutes, during which no distress or leakage develops, any boilers having other than a lap-riveted longitudinal joint may be continued in operation without reduction in working pressure.

History: 1954 ACS 49, p. 62, Eff. Feb. 14, 1967.

R 408.4203 Age limit of lap seam boilers.

Rule 203. The age limit of any boiler having lap-riveted longitudinal joints and operating at a pressure in excess of 50 psi shall be 20 years; this type of boiler, when removed from an existing setting, shall not be reinstalled for a pressure in excess of 15 psi. A reasonable time for replacement, not to exceed 1 year, may be given at the discretion of the chief inspector.

History: 1954 ACS 49, p. 62, Eff. Feb. 14, 1967.

R 408.4205 Lap seam crack.

Rule 205. The shell or drum of a boiler in which a typical "lap seam crack" is discovered along a longitudinal riveted joint or lap joints shall be permanently discontinued for use under pressure. By "lap seam crack" is meant the typical crack frequently found in lap seams extending parallel to the longitudinal joint and located either between or adjacent to rivet holes.

History: 1954 ACS 49, p. 63, Eff. Feb. 14, 1967.

R 408.4206 Age limit of standard existing boilers.

Rule 206. The age limit of boilers of standard construction shall be dependent on thorough internal and external inspection and hydrostatic pressure test of 1½ times the allowable working pressure for a period of 30 minutes. If the boiler

under these test conditions exhibits no distress or leakage, it may be continued in operation at the same working pressure.

History: 1954 ACS 49, p. 63, Eff. Feb. 14, 1967.

R 408.4207 Factors of safety.

Rule 207. (1) The lowest factor of safety that will be permissible on existing installations under any conditions is 4.5. Secondhand boilers shall have a minimum factor of safety of 5 when the longitudinal joints are of butt- and double-strap construction, and a minimum factor of safety of 6 when the longitudinal joints are of lap-riveted construction. Horizontal-return tubular boilers having continuous lap-riveted joints of more than 12 feet in length shall have a factor of safety of not less than 8.

(2) The factors of safety for all standard boilers having longitudinal joints other than lap-riveted construction shall be increased at the end of its specified age limit by not less than $\frac{5}{10}$, except that after a thorough internal and external inspection and a hydrostatic pressure test of 1½ times the pressure allowed and held for a period of at least 30 minutes, during which no distress or leakage develops, the pressure may be continued at a factor of 5.5. These factors may be increased by the inspector as the condition and safety of the boiler may dictate, and in no case shall the factor of safety be less than called for by the rules for new construction.

(3) In no case shall the maximum allowable working pressure on old boilers be increased, unless they are being operated at a lesser pressure than would be allowable for new boilers, in which case the changed pressure shall not exceed that allowable for new boilers of the same construction.

History: 1954 ACS 49, p. 63, Eff. Feb. 14, 1967.

R 408.4208 Portable boilers.

Rule 208. Portable boilers, such as used by contractors, agriculturists, sawmills, etc., used for purely portable purposes and transported from place to place, shall be deemed secondhand in the event of change of ownership, irrespective of change of location, and shall comply with the rules for new construction when reinstalled at a new location. They shall have a factor of safety of at least 5.5 where of butt-strap construction and a factor of safety of not less than 6 where of lap-seam construction.

History: 1954 ACS 49, p. 63, Eff. Feb. 14, 1967.

R 408.4210 Cast-iron headers and mud drums.

Rule 210. The maximum allowable working pressure on a water-tube boiler, the tubes of which are secured to cast-iron or malleable-iron headers, or which have cast-iron mud drums, shall not exceed 160 psig. The maximum allowable working pressure of a steam boiler constructed wholly or principally of cast iron shall not exceed 15 psi. Hot water boilers operating at temperatures not to exceed 250 degrees Fahrenheit may be operated at pressures up to 160 psi.

History: 1954 ACS 49, p. 63, Eff. Feb. 14, 1967.

R 408.4212 Maximum allowable working pressure.

Rule 212. (1) The maximum allowable working pressure on the shell or drum of a boiler shall be determined by the strength of the weakest section of the structure, computed from the thickness of the plate, the tensile strength of the plate, the efficiency of the longitudinal joint or of the ligaments between tube holes in the shell or drum (whichever is the least), the inside diameter of the outside course and the factor of safety allowed by these rules.

$\frac{TStE}{RFS}$ = Maximum allowable working pressure, psi

where TS = ultimate tensile strength of shell plates, psi.
t = minimum thickness of shell plate, in weakest course, inches
E = efficiency of longitudinal joint:
For riveted construction, E shall be determined by the rules based on the ratio which the strength of the joint bears to the strength of the solid plate. For fusion-welded construction, E shall be determined by the rules applying to the class of welding used.
For tube ligaments, E shall be determined by the rules based on the ratio of the cross-sectional area of the ligaments to the entire section of the plate.
For seamless construction, E shall be considered 100%.
R = one half the inside diameter of the weakest course of shell or drum, inches
FS = factor of safety permitted by these rules.

(2) When the tensile strength of steel or wrought-iron shell plates is not known, it shall be taken as 55,000 psi for steel and 45,000 psi for wrought iron.

(3) In computing the efficiency of riveted joints, the resistance to crushing of mild steel shall be taken at 95,000 psi of cross-sectional area.

(4) When computing the ultimate strength of rivets in shear, the following values in pounds per square inch of the cross-sectional area of the rivet shank shall be used:

Iron rivets in single shear.....38,000
Iron rivets in double shear.....76,000
Steel rivets in single shear.....44,000
Steel rivets in double shear.....88,000

When the diameter of the rivet holes in the longitudinal joints of a boiler is not known, the diameter and cross-sectional area of rivet shanks may be selected from table 1, or they may be ascertained by cutting out 1 rivet in the body of the joint.

(5) In no case shall a boiler be designed for a pressure less than 30 psi.

TABLE 1

Sizes of Rivets Based on Plate Thickness

Thickness of plate, inches	1/4	9/32	5/16	11/32	3/8	13/32
Diameter of rivet after driving, inches	11/16	11/16	3/4	3/4	13/16	13/16
Thickness of plate, inches	7/16	15/32	1/2	9/16	5/8	....
Diameter of rivet after driving, inches	15/16	15/16	15/16	1 1/16	1 1/16	....

History: 1954 ACS 49, p. 63, Eff. Feb. 14, 1967.

R 408.4214 Safety and release valves.

Rule 214. The use of weighted-lever safety valves, or safety valves having either the seat or disk of cast iron, shall be prohibited and valves of this type or construction shall be replaced by direct spring-loaded pop-type valves or safety relief valves that conform to the requirements of the ASME power boiler code and shall be connected to the boiler with the spindle vertical.

History: 1954 ACS 49, p. 64, Eff. Feb. 14, 1967.

R 408.4215 Number of safety valves.

Rule 215. Each boiler shall have at least 1 safety valve; and if power boilers have more than 500 square feet of water-heating surface, such boilers shall have 2 or more safety valves.

History: 1954 ACS 49, p. 64, Eff. Feb. 14, 1967.

R 408.4216 Safety valve connections.

Rule 216. The valve or valves shall be connected to the boiler, independent of any other steam connection, and attached as close as possible to the boiler, without unnecessary intervening pipe or fittings. Where alteration is required to conform to this requirement, owners or users shall be allowed reasonable time in which to complete the work.

History: 1954 ACS 49, p. 64, Eff. Feb. 14, 1967.

R 408.4217 Safety valve discharge pipes.

Rule 217. No valves of any description shall be placed between the safety valve and the boiler nor on the escape pipe between the safety valve and the atmosphere. When an escape pipe is used, it shall be full size of the safety valve discharge and fitted with an open drain to prevent water lodging in the upper part of the safety valve or escape pipe. When an elbow is placed on a safety valve escape pipe, it shall be located close to the safety valve outlet and the escape pipe shall be anchored and supported securely. All safety valve discharges shall be so located or piped as to be carried clear from walkaways or platforms used for access to main stop valves of boilers or steam headers.

History: 1954 ACS 49, p. 64, Eff. Feb. 14, 1967.

R 408.4218 Safety valve capacity.

Rule 218. The safety valve capacity of each boiler shall be such that the safety valve or valves will discharge all the steam that can be generated by the boiler without allowing the pressure to rise more than 6% above the highest pressure to which any valve is set, and in no case to more than 6% above the maximum allowable working pressure. The steam safety valve capacity for each steam heating boiler shall be such that with the fuel-burning equipment installed, the pressure cannot rise more than 5 psi above the maximum allowable working pressure of the boiler.

History: 1954 ACS 49, p. 65, Eff. Feb. 14, 1967.

R 408.4219 Safety valve pressure setting.

Rule 219. One or more safety valves on every boiler shall be set at or below the maximum allowable working pressure. The remaining valves may be set within a range of 3% above the maximum allowable working pressure, but the range of setting of all of the safety valves on a boiler shall not exceed 10% of the highest pressure to which any valve is set.

History: 1954 ACS 49, p. 65, Eff. Feb. 14, 1967.

R 408.4220 Safety valves on connected boilers of different pressures.

Rule 220. When 2 or more boilers operating at different pressures and safety valve settings are interconnected, the lower pressure boilers or interconnected piping shall be equipped with safety valves of sufficient capacity to prevent overpressure, considering the maximum amount of steam that can flow into the lower pressure system.

History: 1954 ACS 49, p. 65, Eff. Feb. 14, 1967.

R 408.4222 Safety valve setting on boilers with direct feed.

Rule 222. In those cases where the boiler is supplied with feedwater directly from water mains without the use of feeding apparatus (not to include return traps), no safety valve shall be set at a pressure higher than 94% of the lowest pressure obtained in the supply main feeding the boiler.

History: 1954 ACS 49, p. 65, Eff. Feb. 14, 1967.

R 408.4223 Determining safety valve capacity.

Rule 223. (1) The relieving capacity of the safety valves on any boiler shall be checked by 1 of the 3 following methods and, if found to be insufficient, additional valves shall be provided:

(a) By making the accumulation test, which consists of shutting off all other steam discharge outlets from the boiler and forcing the fires to the maximum. The safety valve capacity shall be sufficient to prevent a rise of pressure in excess of 6% of the maximum allowable working pressure. This method should not be used on a boiler with a superheater or reheater.

(b) By measuring the maximum amount of fuel that can be burned and computing the corresponding evaporative capacity (steam generating capacity) upon the basis of the heating value of this fuel. These computations shall be made as outlined in the appendix of the ASME power boiler code.

(c) By measuring the maximum amount of feedwater that can be evaporated.

(2) When either of the methods outlined in subrule (1)(b) or (c) is employed, the sum of the safety valve capacities shall be equal to or greater than the maximum evaporative capacity (maximum steam generating capacity) of the boiler.

History: 1954 ACS 49, p. 65, Eff. Feb. 14, 1967.

R 408.4225 Replacement of safety valves.

Rule 225. When it becomes necessary to replace safety or relief valves on low pressure heating or process boilers for any reason, the replacement shall be made with other than top-outlet type valve.

History: 1954 ACS 49, p. 65, Eff. Feb. 14, 1967.

R 408.4230 Means of boiler feeding.

Rule 230. Each boiler shall have a feed supply which will permit it to be fed at any time while under pressure. A power boiler having more than 500 square feet of water heating surface shall have at least 2 means of feeding, 1 of which shall be an approved feed pump, injector, or inspirator, except boilers fired by gaseous, liquid, or solid fuel in suspension may be equipped with a single source of feeding provided means are provided for immediate shut off of heat release, and the boiler furnace and fuel system do not retain sufficient stored heat to cause damage to the boiler if the feed supply is interrupted. A source of feed directly from water mains at a pressure of 6% greater than the release pressure of the safety valve with the highest release setting may be considered 1 of the means.

History: 1954 ACS 49, p. 65, Eff. Feb. 14, 1967.

R 408.4232 Introduction of feedwater into boilers.

Rule 232. The feedwater shall be introduced into power and heating boilers in such manner that it will not be discharged close to riveted joints of shell or furnace sheets or directly against surfaces exposed to products of combustion, or to direct radiation from the fire.

History: 1954 ACS 49, p. 66, Eff. Feb. 14, 1967.

R 408.4235 Feed valves required.

Rule 235. The feed piping to a power boiler shall be provided with a check valve near the boiler and a valve or cock between the check valve and the boiler. When 2 or more boilers are fed from a common source, there shall also be a valve on the branch to each boiler between the check valve and source of supply. Whenever a globe valve is used on feed piping, the inlet shall be under the disk of the valve. In all cases where returns are fed back to power or heating boilers by gravity, there shall be a check valve and stop valve in each return line, the stop valve to be placed between the boiler and the check valve, and both shall be located as close to the boiler as is practicable.

History: 1954 ACS 49, p. 66, Eff. Feb. 14, 1967.

R 408.4236 Feedwater temperature.

Rule 236. Where deaerating heaters are not employed, it is recommended that the temperature of the feedwater be not less than 120 degrees Fahrenheit to avoid the possibility of setting up localized stress. Where deaerating heaters are employed, it is recommended that the minimum feedwater temperature be not less than 215 degrees Fahrenheit so that dissolved gases may be thoroughly released.

History: 1954 ACS 49, p. 66, Eff. Feb. 14, 1967.

R 408.4240 Water column connections.

Rule 240. No outlet connections (except for damper regulator, feedwater regulator, low-water fuel cut-out, drains, steam gauges, pressure controls or such apparatus that does not permit the escape of an appreciable amount of steam or water therefrom) shall be placed on the piping that connects the water column to the boiler. The water column shall be provided with a valved drain of at least ¾ inches pipe size, the drain to be piped to a safe location.

History: 1954 ACS 49, p. 66, Eff. Feb. 14, 1967.

R 408.4241 Gauge cocks.

Rule 241. Each power boiler shall have 3 or more gauge cocks, located within the visible length of the water glass, except when the boiler has 2 water glasses located on the same horizontal lines. Boilers not over 36 inches in diameter, in which the heating surface does not exceed 100 square feet, need have but 2 gauge cocks. For all installations where the water gauge glass or glasses are more than 30 feet above the boiler operating floor, it is recommended that water-level indicating or recording gauges be installed at eye height above the operating floor.

History: 1954 ACS 49, p. 66, Eff. Feb. 14, 1967.

R 408.4242 Pressure gauges.

Rule 242. (1) Each steam boiler shall have a pressure gauge, with dial range not less than 1½ times the maximum allowable working pressure, connected to the steam space or to the steam connection to the water column.

(2) The pressure gauge shall be connected to a siphon or equivalent device of sufficient capacity to keep the gauge tube filled with water and so arranged that the gauge cannot be shut off from the boiler except by a cock placed near the gauge and provided with a tee or lever handle arranged to be parallel to the pipe in which it is located when the cock is open.

(3) When a pressure gauge connection longer than 8 feet becomes necessary, a shutoff valve may be used near the boiler provided the valve is of the outside-

screw-and-yoke type and is locked open. The line shall be of ample size with provision for free blowing.

(4) Each boiler shall be provided with a ¼-inch nipple and globe valve connected to the steam space for the exclusive purpose of attaching a test gauge when the boiler is in service so that the accuracy of the boiler pressure gauge may be ascertained.

(5) The scale on the dial of a steam heating boiler shall be graduated to not less than 30 psi. The travel of the pointer from 0 to 30 psi shall be at least 3 inches.

History: 1954 ACS 49, p. 66, Eff. Feb. 14, 1967.

R 408.4244 Stop valves.

Rule 244. (1) Each steam outlet from a power boiler (except safety valve connections) shall be fitted with a stop valve located as close as practicable to the boiler.

(2) When a stop valve is so located that water can accumulate, ample drains shall be provided. The drainage shall be piped to a safe location and shall not be discharged on the top of the boiler or its setting.

(3) When power boilers provided with manholes are connected to a common steam main, the steam connection from each boiler shall be fitted with 2 stop valves having an ample free-blow drain between them. The discharge of the drain shall be visible to the operator while manipulating the valves and shall be piped clear of the boiler setting. The stop valves shall consist preferably of 1 automatic nonreturn valve (set next to the boiler) and a second valve of the outside-screw-and-yoke type.

(4) A stop valve shall be used in each supply and return pipe connection of 2 or more heating boilers connected to a common system.

(5) When a stop valve is used in the supply pipe connection of a single heating boiler, there shall be 1 used in the return pipe connection.

History: 1954 ACS 49, p. 67, Eff. Feb. 14, 1967.

R 408.4246 Blowoff connections; existing power boilers.

Rule 246. (1) The construction of the setting around each blowoff pipe shall permit of free expansion and contraction. Careful attention shall be given to the problem of sealing these setting openings without restricting the movement of the blowoff piping.

(2) All blowoff piping, when exposed to furnace heat, shall be protected by firebrick or other heat-resisting material, so constructed that the piping may be inspected readily.

(3) Each boiler shall have a blowoff pipe, fitted with a valve or cock, in direct connection with the lowest water space. Cocks shall be of the gland or guard type and suitable for the pressure allowed. The use of globe valves shall not be permitted.

(4) When the allowable working pressure exceeds 100 psi gauge, each blowoff pipe shall be provided with 2 valves or a valve and cock, such valves and cocks to be at least of the extra-heavy type.

(5) When the maximum allowable working pressure exceeds 100 psi gauge, blowoff piping shall be at least extra-heavy and shall be run full size without use of reducers or bushings. The piping shall be at least extra-heavy wrought iron or steel and shall not be galvanized.

(6) All fittings between the boiler and blowoff valve shall be of steel. In case of renewal of blowoff pipe or fittings, they shall be installed in accordance with the rules and regulations for new installations.

(7) Each steam heating boiler shall have a blowoff pipe connection fitted with a valve or cock not less than ¾ inches pipe size connected with the lowest water space practicable.

History: 1954 ACS 49, p. 67, Eff. Feb. 14, 1967.

HOT WATER HEATING AND SUPPLY BOILERS

R 408.4251 Existing hot water boilers.

Rule 251. "Existing hot water boilers," as used in this part, means hot water boilers which are in actual use, or which were installed and ready for use at the time the act became effective. It should not be applied to secondhand boilers, or to boilers that are subject to change in ownership, or are to be reset, in which case the rules for new construction should apply.

History: 1954 ACS 49, p. 67, Eff. Feb. 14, 1967.

R 408.4253 Hot water boilers included; exempted.

Rule 253. (1) These rules for hot water boilers shall apply to all hot water heating and hot water supply boilers to be designed for pressures not exceeding 160 psi and temperatures not exceeding 250 degrees Fahrenheit.

(2) For conditions exceeding those specified above, the rules for power boilers shall apply.

(3) Except as provided in R 408.4253(4), the following classifications are considered not to be within the jurisdiction of this part of these rules: hot water supply boilers which are directly fired with oil, gas, or electricity when none of the following limitations is exceeded:

(a) A heat input of 200,000 Btu per hour.

(b) A water temperature of 200 degrees Fahrenheit.

(c) A nominal water-containing capacity of 120 gallons.

(4) All hot water supply boilers, including those exempted in R 408.4253(3) shall be equipped with safety devices of proper type and size as specified in R 408.4278 and be of code construction.

(5) For conditions exceeding those specified in subrule (1), cast iron construction is not permitted.

History: 1954 ACS 49, p. 67, Eff. Feb. 14, 1967.

R 408.4255 Working pressure and temperature; hot water steel-plate boilers.

Rule 255. (1) Wherever the term "maximum allowable working pressure" is used herein, it refers to gauge pressure or the pressure above the atmospheric in pounds per square inch. The maximum allowable working temperature at or near the outlet of a hot water steel-plate boiler shall not exceed 250 degress Fahrenheit, nor the maximum allowable working pressure to 160 psi. The maximum allowable working pressure on the shell or drum of steel-plate hot water boilers shall be determined in accordance with the following formulas. In no case shall a boiler be designed for a pressure less than 30 psi.

$$P = \frac{SEt}{R + 0.6t} \qquad \text{or} \qquad t = \frac{PR}{SE - 0.6P}$$

where P = maximum allowable working pressure, pounds per square inch,

S = 20% of the minimum ultimate tensile strength stamped on the shell plate, or as indicated in (2),

t = minimum thickness of shell plates in weakest course, inches,

E = efficiency of longitudinal joint or of ligament between tube holes (whichever is the lesser),

R = inside radius of weakest course of the shell or drum, inches.

(2) When the tensile strength of steel or wrought-iron shell plates is not known, it shall be taken as 55,000 psi for steel and 45,000 psi for wrought iron.

History: 1954 ACS 49, p. 68, Eff. Feb. 14, 1967.

R 408.4257 Working temperature; cast-iron hot water boilers.

Rule 257. The maximum allowable working temperature at or near the outlet of a hot water cast-iron boiler shall not exceed 250 degrees Fahrenheit.

History: 1954 ACS 49, p. 68, Eff. Feb. 14, 1967.

R 408.4258 Washout openings; other than cast-iron boilers.

Rule 258. All boilers other than cast-iron shall be provided with suitable manhole openings or handhole or washout plug openings to permit inspection and permit removal of any sediment which may accumulate.

History: 1954 ACS 49, p. 68, Eff. Feb. 14, 1967; 1954 ACS 86, p. 73, Eff. Jan. 16, 1976.

R 408.4259 Washout openings; cast-iron boilers.

Rule 259. All cast-iron steam and hot water boilers shall be provided with suitable washout openings to permit the removal of any sediment that may accumulate therein.

History: 1954 ACS 49, p. 68, Eff. Feb. 14, 1967.

R 408.4260 Furnace access openings.

Rule 260. A firedoor or other access opening, not less than 11 x 15 inches or 10 x 16 inches or 15 inches in diameter, shall be provided for the furnace of an internally fired boiler other than cast-iron in which the least furnace dimension is 28 inches or over.

History: 1954 ACS 49, p. 68, Eff. Feb. 14, 1967.

R 408.4262 Rescinded.

History: 1954 ACS 49, p. 68, Eff. Feb. 14, 1967; rescinded 1954 ACS 56, p. 27, Eff. Nov. 14, 1968.

R 408.4263 Threaded connections.

Rule 263. Pipe connections, if threaded, shall be tapped into material having a minimum thickness as specified in table HG-370, except that when a curved surface is to be tapped the minimum thickness shall be sufficient to permit at least 4 full threads to be engaged.

TABLE HG-370

Minimum Thickness of Material for Threaded Connections to Boilers

Size of Pipe Connection, Inches	Minimum Thickness of Material Required, Inches
Under ¾	¼
¾ to 1, inclusive	5/16
1¼ to 2½, inclusive	7/16
3 to 3½, inclusive	⅝
4 to 5, inclusive	⅞
6 to 8, inclusive	1
9 to 12, inclusive	1¼

History: 1954 ACS 49, p. 69, Eff. Feb. 14, 1967.

R 408.4265 Minimum distance required between boiler and floor.

Rule 265. Boilers other than cast iron of the wet-bottom type having an external width of over 36 inches shall have not less than 12 inches between the bottom of the boiler and the floor line, with access for inspection. When the width is 36 inches or less, the distance between the bottom of the boiler and the floor line shall be not less than 6 inches and when any part of the wet bottom is not farther from an outer edge than 12 inches, it shall be not less than 4 inches.

History: 1954 ACS 49, p. 69, Eff. Feb. 14, 1967.

R 408.4267 Minimum size access door in a boiler setting.

Rule 267. The minimum size of access door used in a boiler setting shall be 12 x 16 inches or equivalent area, the least dimension being 11 inches.

History: 1954 ACS 49, p. 69, Eff. Feb. 14, 1967.

R 408.4268 Feedwater connections.

Rule 268. Feedwater, make-up water, or water treatment shall be introduced into a boiler through the return piping system or through an independent feedwater connection which does not discharge against parts of the boiler exposed to direct radiant heat from the fire. Feedwater, make-up water, or water treatment shall not be introduced through openings or connections provided for inspection or cleaning, safety valve, safety-relief valve, surface or main blowoff, water column, water gauge glass, pressure gauge, or temperature gauge.

History: 1954 ACS 49, p. 69, Eff. Feb. 14, 1967.

R 408.4269 Oil heaters.

Rule 269. A heater for oil or other liquid harmful to boiler operation shall not be installed directly in the water space within a boiler.

History: 1954 ACS 49, p. 69, Eff. Feb. 14, 1967.

R 408.4270 Provisions for thermal expansion in hot water systems.

Rule 270. (1) All hot water heating systems incorporating hot water tanks or fluid relief columns shall be so installed as to prevent freezing under normal operating conditions.

(2) If the system is equipped with an open expansion tank, an indoor overflow from the upper portion of the expansion tank shall be provided in addition to an open vent, the indoor overflow to be carried within the building to a suitable plumbing fixture or to the basement.

(3) If the system is of the closed type, an airtight tank or other suitable air cushion shall be installed that will be consistent with the volume and capacity of the system, and shall be suitably designed for a hydrostatic test pressure of 2½ times the allowable working pressure of the system. Expansion tanks for systems designed to operate at or above 50 psi shall be constructed in accordance with ASME section VIII code. Provisions shall be made for draining the tank without emptying the system.

History: 1954 ACS 49, p. 69, Eff. Feb. 14, 1967.

R 408.4272 Minimum capacity of closed-type tank.

Rule 272. The minimum capacity of the closed-type expansion tank may be determined from tables 272A and 272B or from the following formula where the necessary information is available.

$$V_t = \frac{(0.00041\ T\text{-}).0466V_s}{\frac{Pa}{Pf} - \frac{Pa}{Po}}$$

where V_t = minimum volume of tanks, gallons
V_s = volume of system, not including tanks, gallons
T = average operating temperature, degrees Fahrenheit
Pa = atmospheric pressure, psia
Pf = fill pressure, psia
Po = maximum operating pressure, psia

TABLE 272A

Expansion Tank Capacity for Gravity Hot Water Systems

Based on 2-pipe system with average operating water temperature 170 degrees Fahrenheit, using cast-iron column radiation with heat emission rate 150 Btu per hour square foot equivalent direct radiation.

Square Feet of Installed Equivalent Direct Radiation[1]	Tank Capacity Gallons
Up to 350	18
Up to 450	21
Up to 650	24
Up to 900	30
Up to 1,100	35
Up to 1,400	40
Up to 1,600	2 - 30
Up to 1,800	2 - 30
Up to 2,000	2 - 35
Up to 2,400	2 - 40

[1]For systems with more than 2,400 square feet of installed equivalent direct water radiation, the required capacity of the cushion tank shall be increased on the basis of 1 gallon tank capacity per 33 square feet of additional equivalent direct radiation.

TABLE 272B

Expansion Tank Capacities for Forced Hot Water Systems

Based on average operating water temperature 195 degrees Fahrenheit, a fill pressure 12 psig and maximum operating pressure 30 psig.

System Volume, Gallons[1]	Tank Capacity, Gallons
100	15
200	30
300	45
400	60
500	75
1,000	150
2,000	300

[1]Includes volume water in boiler, radiation, and piping, not including expansion tank.

History: 1954 ACS 49, p. 70, Eff. Feb. 14, 1967; 1954 ACS 86, p. 73, Eff. Jan. 16, 1976.

R 408.4274 Internal parts subject to deterioration.

Rule 274. Materials shall not be used for internal parts which are liable to fail due to deterioration when subjected to saturated steam temperatures at or below the maximum allowable working pressure.

History: 1954 ACS 49, p. 70, Eff. Feb. 14, 1967.

R 408.4275 Stop valves on supply and return connections.

Rule 275. (1) A stop valve shall be used in the supply pipe connection of a single boiler and 1 stop valve used in the return pipe connection except in a boiler exempt from inspection as provided in section 7 of the act. The use of a stop valve in the supply outlet of a hot water supply boiler is optional.

(2) A stop valve shall be used in each supply and return pipe connection of 2 or more boilers connected to a common system.

(3) Provision shall be made for cleaning the interior of the return piping at or close to the boiler.

(4) When stop valves over 2 inches in size are used, they shall be of the outside screw-and-yoke rising-spindle type or of such type as to indicate at a distance by the position of its spindle or other operating mechanism whether it is closed or open, and the wheel may be carried either on the yoke or attached to the spindle. If the valve is of the plug cock type, it must be fitted with a slow-opening mechanism and an indicating device, and the plug must be held in place by a guard or gland.

(5) Stop valves shall be properly designated substantially as indicated by the following tags of metal or other durable materials fastened to them:

Supply Valve—Number ( )
Do Not Close Without Also
Closing Return Valve—
Number ( )

Return Valve—Number ( )
Do Not Close Without Also
Closing Supply Valve—
Number ( )

History: 1954 ACS 49, p. 71, Eff. Feb. 14, 1967; 1954 ACS 56, p. 27, Eff. Nov. 14, 1968.

R 408.4277 Connections for relief valves.

Rule 277. The area of the opening shall be at least equal to the aggregate area based on the nominal diameters of all of the relief valves with which it connects. A screwed connection may be used for attaching a relief valve.

History: 1954 ACS 49, p. 71, Eff. Feb. 14, 1967.

R 408.4278 Relief valves.

Rule 278. (1) Each hot water heater boiler shall have at least 1 officially rated pressure relief valve set to relieve at or below the maximum allowable working pressure of the boiler.

(2) Each hot water supply boiler shall have at least 1 officially rated safety relief valve or at least 1 officially rated pressure-temperature relief valve of the automatic-reseating type set to relieve at or below the maximum allowable working pressure of the boiler.

(3) When more than 1 relief valve is used on either hot water heating or hot water supply boilers, the additional valve or valves shall be officially rated and may be set within a range not to exceed 6 psi above the maximum allowable working pressure of the boiler up to and including 60 psi and 10% for those having a maximum allowable working pressure exceeding 60 psi.

(4) Relief valves shall be spring loaded without disk guides on the pressure side of the valve.

(5) Relief valves shall be so arranged that they cannot be reset to relieve at a higher pressure than the maximum permitted by this rule.

History: 1954 ACS 49, p. 71, Eff. Feb. 14, 1967; 1954 ACS 56, p. 27, Eff. Nov. 14, 1968.

R 408.4280 Lifting devices.

Rule 280. Each relief valve shall have a substantial device which will positively lift the disk from its seat at least 1/16 inch when there is no pressure on the boiler.

History: 1954 ACS 49, p. 71, Eff. Feb. 14, 1967.

R 408.4281 Material of seats and disks of relief valves.

Rule 281. Seats and disks of relief valves shall be of material suitable to resist corrosion. No materials liable to fail due to deterioration or vulcanization when subject to saturated steam temperature corresponding to capacity test pressure shall be used for any part.

History: 1954 ACS 49, p. 71, Eff. Feb. 14, 1967.

R 408.4283 Relief valve size.

Rule 283. No relief valve shall be smaller than ¾ inch nor larger than 4½ inches standard pipe size. The inlet opening shall have an inside diameter approximately equal to, or greater than, the seat diameter. In no case shall the minimum opening through any part of the valve be less than ¼ inch diameter or its equivalent area.

History: 1954 ACS 49, p. 71, Eff. Feb. 14, 1967.

R 408.4284 Relieving capacity required.

Rule 284. (1) The required steam-relieving capacity, in pounds per hour, of the pressure-relieving device or devices on a boiler shall be the greater of that determined by dividing the maximum output in Btu at the boiler nozzle obtained by the firing of any fuel for which the unit is designed by 1,000 or by multiplying the square feet of heating surface by 5. In many cases a greater relieving capacity of valves will have to be provided than the minimum specified by these rules. In every case, the requirements of subrule (3) shall be met.

(2) When operating conditions are changed, or additional boiler heating surface is installed, the valve capacity shall be increased, if necessary, to meet the new conditions and be in accordance with subrule (3). The additional valves required, on account of changed conditions, may be installed on the outlet piping provided there is an intervening valve.

(3) Relief valve capacity for each boiler shall be such that with the maximum heat input the pressure cannot rise more than 6 psi above the maximum allowable pressure for pressures up to and including 60 psi and 10% for maximum allowable working pressures over 60 psi.

History: 1954 ACS 49, p. 72, Eff. Feb. 14, 1967.

R 408.4286 Relief valve connections.

Rule 286. (1) Relief valves shall be connected to the top of boilers, with the spindle vertical either directly to a tapped or flanged opening in the boiler, to a fitting connected to the boiler by a close nipple, to a Y-base, to a valveless water pipe between adjacent boilers, or to a valveless header connecting water outlets on the same boiler. When a Y-base is used the inlet area shall be not less than the combined outlet areas.

(2) When the size of the boiler requires a relief valve larger than 4½ inches diameter, 2 or more valves having the required capacity shall be used. When 2 or

Open Access, Google-digitized / http://www.hathitrust.org/access_use#oa-google

more valves are used on a boiler, they may be single, directly attached, or mounted on a Y-base.

History: 1954 ACS 49, p. 72, Eff. Feb. 14, 1967.

R 408.4287 Shutoff valves prohibited.

Rule 287. No shutoff of any description shall be placed between the relief valve and the boiler, nor on discharge pipes between such valves and the atmosphere. Relief valves shall not be connected to an internal pipe in the boiler.

History: 1954 ACS 49, p. 72, Eff. Feb. 14, 1967.

R 408.4288 Area of and support of relief valve discharge pipes.

Rule 288. (1) When a discharge pipe is used, its area shall be not less than the area of the valve or aggregate area based on the nominal diameters of the valves with which it connects, and the discharge pipe shall be fitted with an open drain to prevent water from lodging in the upper part of the valve or in the pipe. When an elbow is placed on a relief-valve discharge pipe, it shall be located close to the valve outlet. The pipe shall be supported so that no undue stress is placed on the valve body.

(2) The discharge from relief valves shall be arranged so that there will be no danger of scalding attendants.

History: 1954 ACS 49, p. 72, Eff. Feb. 14, 1967.

R 408.4290 Marking of safety or relief valves.

Rule 290. Each safety or relief valve shall be plainly marked by the manufacturer in such a way that the markings will not be obliterated in service. The markings shall be cast or stamped on the valve body or on the lifting lever, providing the lifting lever is permanently attached to the valve, or, when desirable because of size, all or part of the required markings may be stamped, cast or etched on a plate or plates, each securely fastened to the valve body, lever or other permanent part of the valve, and such markings shall include the following:

(a) The name or identifying trademark of manufacturer.

(b) Size _____ inches.
(The pipe size of the inlet)

(c) Pressure _____ psi.
(The pressure at which it is set to blow)

(d) Capacity _____ lb. per hour, or
Capacity _____ Btu per hour in accordance with Par. H-51(d) ASME code.

(e) ASME symbol as shown in Fig. H-4 ASME code.

History: 1954 ACS 49, p. 72, Eff. Feb. 14, 1967.

R 408.4291 Indirectly heated hot water supply tanks.

Rule 291. When a hot water supply is heated indirectly by steam in a coil or pipe, the pressure of the steam used shall not exceed the safe working pressure of the hot water tank, and a relief valve of at least 1 inch in diameter, set to relieve at or below the maximum allowable working pressure of the tank, shall be applied on the tank.

History: 1954 ACS 49, p. 73, Eff. Feb. 14, 1967.

R 408.4292 Pressure or altitude gauges.

Rule 292. Each hot water boiler shall have a pressure or altitude gauge connected to it or to its flow connection in such a manner that it cannot be shut off

Digitized by Google

from the boiler except by a cock with tee or level handle, placed on the pipe near the gauge. The handle of the cock shall be parallel to the pipe in which it is located when the cock is open. The scale on the dial of the pressure or altitude gauge shall be graduated to not less than 1½ times the maximum allowable working pressure. The gauge shall be provided with effective stops for the indicating pointer at the zero point and at the maximum pressure point. Pressure or altitude-gauge connections shall be of nonferrous composition when smaller than 1-inch pipe size and longer than 5 feet between the gauge and point of connection of pipe to boiler, and also when smaller than ½-inch pipe size and shorter than 5 feet between the gauge and point of connection of pipe to boiler.

History: 1954 ACS 49, p. 73, Eff. Feb. 14, 1967.

R 408.4293 Thermometers.

Rule 293. Each hot water boiler shall have a thermometer so located and connected that it shall be easily readable when observing the water pressure or altitude. The thermometer shall be so located that it shall at all times indicate the temperature in degrees Fahrenheit of the water in the boiler at or near the outlet.

History: 1954 ACS 49, p. 73, Eff. Feb. 14, 1967.

R 408.4294 Temperature combustion regulators.

Rule 294. (1) In addition to the mandatory requirements for a pressure relief device required by R 408.4278, an individual automatically fired hot water heating or hot water supply boiler in addition to the operating control used for normal boiler operation, shall have a separate high-limit-temperature-actuated combustion control that will cut off the fuel supply. The temperature range of a high-limit-actuated combustion control shall not allow a maximum setting over 250 degrees Fahrenheit and shall control the rate of combustion to prevent the temperature of the water from rising above 250 degrees Fahrenheit at or near the boiler outlet. Separate controls may have a common connection to the boiler.

(2) When it is known that the Btu input to a hot water supply boiler does not exceed 200,000 or the volume does not exceed 120 gallons, the maximum setting of the high-limit control determines whether the hot water supply boiler is subject to these rules. The settings at which stops are inserted can be considered to be the determining factor if the setting is with metallic fixed stops.

History: 1954 ACS 49, p. 73, Eff. Feb. 14, 1967; 1954 ACS 56, p. 27, Eff. Nov. 14, 1968.

R 408.4296 Bottom blowoffs or drain valves.

Rule 296. (1) Each boiler shall have a bottom blowoff or drain pipe connection fitted with a valve or cock connected with the lowest water space practicable, with the minimum size of blowoff piping and valves as shown in table 296.

TABLE 296

Size of Bottom Blowoff Piping and Valves

Minimum Required Safety or Relief Valve Capacity Lb. of Steam per Hour	Blowoff Valves Size, Inches
Up to 500	¾
501 to 1,250	1
1,251 to 2,500	1¼
2,501 to 6,000	1½
6,001 and larger	2

To determine the discharge capacity of relief valves in terms of Btu, the relieving capacity in pounds of steam per hour is multiplied by 1,000.

(2) Any discharge piping connected to bottom blowoff and/or bottom drain connection shall be full size to the point of discharge.

History: 1954 ACS 49, p. 73, Eff. Feb. 14, 1967.

R 408.4298 Jacketed boilers.

Rule 298. Any or all of the fittings and appliances required by these rules may be installed inside of boiler jackets provided the water gauge and pressure gauge on a thermometer and pressure gauge on a water boiler are visible through an opening or openings at all times.

History: 1954 ACS 49, p. 73, Eff. Feb. 14, 1967.

PART 3. INSPECTION OF NEW CONSTRUCTION, ALTERATION, PIPING AND REPAIR

R 408.4301 Scope.

Rule 301. "New boiler" means any boiler constructed, installed, placed in operation, or contracted for after the effective date of these rules. The rules in this part apply to new boilers under construction in the shop, to boilers undergoing major repairs, to alterations, and to connected piping, including valves, fittings, and flanges covered by these rules.

History: 1954 ACS 49, p. 74, Eff. Feb. 14, 1967.

R 408.4302 Boiler repairs.

Rule 302. If a repair outside the scope of these rules is deemed feasible by an authorized inspector or licensed repairer, such a repair may be undertaken only with the full knowledge and consent of the boiler division. It is the intent of these rules that repairs to boilers shall be as safe as the original boiler construction.

History: 1954 ACS 81, p. 47, Eff. Nov. 7, 1974.

R 408.4303 Inspection of material.

Rule 303. Surface inspection of plate, rivets, steel bars, steel castings, gray-iron castings, malleable castings, staybolt material, brace bars, tubes, and all other material for code boilers shall be made preferably by the inspector who is to inspect the completed boilers. Material having injurious defects as referred to or defined in the code shall be rejected. This inspection shall be made, when practicable, before the material is used. The inspection of plate material to be used in a boiler or pressure vessel to be constructed in accordance with the code shall include the identification of the material by checking the manufacturer's test identification numbers found on all plates, with the numbers being given on the mill test report as certified to by the manufacturer of the material.

History: 1954 ACS 49, p. 74, Eff. Feb. 14, 1967.

R 408.4306 Material and mill test data.

Rule 306. The inspector shall satisfy himself that all material used in the manufacture of a boiler is in accordance with the code requirements and when inspecting new construction, alterations, or major repairs shall require the manufacturer, installer, repairer, or alterer to secure from the manufacturer a mill test data certifying as to the chemical and physical properties of the material.

History: 1954 ACS 49, p. 74, Eff. Feb. 14, 1967.

R 408.4309 Parts examination and fit-up inspection.

Rule 309. All parts shall be examined whenever possible before they are assembled as well as afterward. A fit-up inspection of all shop and field fabricated piping within code jurisdiction, alterations, and major repairs shall be made.

History: 1954 ACS 49, p. 74, Eff. Feb. 14, 1967.

R 408.4312 Heat numbers.

Rule 312. The material used for alterations and both riveted and welded repairs shall contain the heat number. If only part of a plate is required and this part does not contain the heat number, the heat number shall be transferred to the patch plate in the presence of a commissioned boiler inspector or a representative of the plate manufacturer before the plate is cut. Rivets, patch bolts, or staybolts shall be of material as permitted under section II of the code.

History: 1954 ACS 49, p. 74, Eff. Feb. 14, 1967.

R 408.4315 Measuring for thickness.

Rule 315. All material shall be gauged or measured to determine whether the thickness meets with the code requirements, due allowance being made for code variations.

History: 1954 ACS 49, p. 74, Eff. Feb. 14, 1967.

R 408.4318 Material defects.

Rule 318. All plates shall be examined for surface defects such as scale, depressions and laminations. Plates having depressions not over 4 inches in length or a depth not exceeding 15% of the thickness of the plate may be accepted if, upon careful measurement of the depression, it is found that the reduced thickness does not leave the plate weaker than where machined for rivet holes or tube holes. Plates that are found to be laminated shall be rejected.

History: 1954 ACS 49, p. 74, Eff. Feb. 14, 1967.

R 408.4321 Inspection during manufacture.

Rule 321. During the process of manufacturing a boiler, the material shall be inspected for surface defects, cracks, blisters, pit marks, blowholes, or any other defects liable to develop in fabrication and for excessive hammer marks. If defects are sufficient to impair the strength materially, the boiler shall not be stamped with the code symbol.

History: 1954 ACS 49, p. 74, Eff. Feb. 14, 1967.

R 408.4324 Curvature of plates and straps.

Rule 324. The inspector shall see that butt straps and the ends of shell plates forming the longitudinal joints shall be rolled or formed to the proper curvature by pressure as required by the code. Cylindrical shapes shall be rolled or formed to as nearly a perfect circle as is practicable.

History: 1954 ACS 49, p. 75, Eff. Feb. 14, 1967.

R 408.4327 Plate beveling and calking.

Rule 327. Calking and welding edges of plates shall be beveled in accordance with the code and shall be even and free from ragged edges. Examination of the beveling shall be made before the calking or welding. Calking shall be done evenly and carefully in accordance with the code.

History: 1954 ACS 49, p. 75, Eff. Feb. 14, 1967.

R 408.4330 Fitting cylindrical courses.

Rule 330. (1) The inside circumference of an outside course shall not exceed the outside circumference of the inside course or head by more than ¼ inch, the circumferences to be measured before being bolted together.

(2) The space between the edges of the ends of the plate when rolled and bolted together for butt-strap riveting shall not exceed ¼ inch. The distance between edges and the shape of the groove when welding shall not exceed the limits established in the process and operator qualifications.

History: 1954 ACS 49, p. 75, Eff. Feb. 14, 1967.

R 408.4333 Punching and reaming, or drilling rivet holes.

Rule 333. When rivet or tube holes are punched, they shall be inspected before and after reaming to determine whether they have been reamed in accordance with code requirements. When the holes are not punched but are drilled from the solid, the inspector shall satisfy himself that the holes are of proper size before and after reaming, and that burrs, chips, and turnings are removed.

History: 1954 ACS 49, p. 75, Eff. Feb. 14, 1967.

R 408.4336 Tolerance for rivet holes.

Rule 336. The maximum diameter of finished rivet holes shall not exceed the nominal diameter of the rivet when cold by more than 1/16 inch. For rivets up to ⅞ inch, it is preferable to limit the hole to 1/32 inch larger than the cold rivet.

History: 1954 ACS 49, p. 75, Eff. Feb. 14, 1967.

R 408.4339 Rivet heads.

Rule 339. Rivets shall be of sufficient length to fill the rivet holes completely. They shall be so driven as to give a full rivet head without showing excessive depression in the sheet from the dies. The head formed by the boiler manufacturer shall be in accordance with the code. No rivet head shall have an eccentricity of more than 20% of the diameter of the cold rivet shank.

History: 1954 ACS 49, p. 75, Eff. Feb. 14, 1967.

R 408.4342 Inspection of tubes before use.

Rule 342. Tubes shall be examined for surface defects and, so far as possible, shall be free from depressions caused by scale or scoring. Code tolerances in gauging shall not be exceeded.

History: 1954 ACS 49, p. 75, Eff. Feb. 14, 1967.

R 408.4345 Tube hole tolerance.

Rule 345. The initial diameter of finished tube holes shall not exceed the nominal diameter of the tubes by an amount greater than shown in the following table:

	Inches
Fire end of fire-tube boilers	1/32
Opposite end of fire-tube boilers	1/16
Water-tube boilers	1/32

If ferrules are used, proper allowance shall be made in the holes for their thickness. Rough and sharp edges of the tube holes shall be removed as required by the code.

History: 1954 ACS 49, p. 75, Eff. Feb. 14, 1967.

R 408.4348 Flaring and beading tube ends.

Rule 348. After tubes are set, the inspector shall examine their ends to see that they are properly rolled or expanded and properly beaded, flared, or welded, the beading to be formed as required by the code.

History: 1954 ACS 49, p. 75, Eff. Feb. 14, 1967.

R 408.4351 Flanging.

Rule 351. The inspector shall see that in flanged sections there are no cracks due to the flanging operation, no deep hammer marks, burned sections, scars, or other injurious surface defects. It is to be noted that reduction in thickness is not below the designated thickness at the heel of the flange, and that the flanged section is practically true-to-form as designed. The manhole flange shall be formed and the reinforcing ring shall, when used, be installed in accordance with the requirements of the code.

History: 1954 ACS 49, p. 76, Eff. Feb. 14, 1967.

R 408.4354 Flanged furnace openings and flanged door rings.

Rule 354. Flanged furnace openings and flanged door rings shall be properly heated and properly laid up before drilling rivet holes or welding the edges.

History: 1954 ACS 49, p. 76, Eff. Feb. 14, 1967.

R 408.4357 Staying of flat surfaces.

Rule 357. All flat surfaces shall be straight, held in place, and kept in position until the stays are fitted. In the case of threaded staybolts, the threads of the bolts and tapped holes shall be cut clean and fit snug as far as practicable. The ends of such staybolts shall extend through the plates a sufficient distance on each side to be riveted over properly and neatly. If staybolts are laminated or brittle they must be rejected.

History: 1954 ACS 49, p. 76, Eff. Feb. 14, 1967.

R 408.4360 Fitting braces or stays.

Rule 360. Riveted diagonal braces or stays in boilers shall be heated properly and fitted. Braces or stays of any type must have correct and even tension. Crown bars shall be fitted and stayed, shall bear evenly and rest firmly upon their supporting members.

History: 1954 ACS 49, p. 76, Eff. Feb. 14, 1967.

R 408.4363 Alignment of handholes or plugs.

Rule 363. When the openings for handholes or plugs are to be used for the removal of tubes, they shall register with the tube holes in such a manner that the tubes may be removed and replaced without damage to the tubes or to the holes.

History: 1954 ACS 49, p. 76, Eff. Feb. 14, 1967.

R 408.4366 Location of handholes, manholes, and washout openings.

Rule 366. The number and location of handholes, manholes, and washout openings shall conform to the code. Process boilers shall be provided with additional handhole openings or washout openings to insure ready access for cleaning and inspection.

History: 1954 ACS 49, p. 76, Eff. Feb. 14, 1967.

R 408.4369 Cast material.

Rule 369. All cast parts when ready for use shall be examined carefully to determine that the walls are not less than the designed thickness, free from injurious defects, and annealed as required by the code.

History: 1954 ACS 49, p. 76, Eff. Feb. 14, 1967.

R 408.4372 Fitting attachments.

Rule 372. All lugs, saddles, supports, brackets, nozzles, flanges, manhole frames, and other appurtenances shall fit snugly and conform to the curvature of the shell or surface to which they are attached.

History: 1954 ACS 49, p. 76, Eff. Feb. 14, 1967.

R 408.4375 Openings for fittings.

Rule 375. The inspector shall see that the water column, safety valve, blowoff openings, etc., are of proper size and location as required by the code.

History: 1954 ACS 49, p. 76, Eff. Feb. 14, 1967.

TESTING AND INSPECTION

R 408.4378 Hydrostatic test.

Rule 378. When a boiler, boiler alteration, major repair, or fabricated piping is completed, or part of an incomplete boiler is ready for hydrostatic test, it shall be filled with water of a temperature not less than the temperature of the surrounding atmosphere and in no case less than 70 degrees Fahrenheit. All air shall be allowed to escape so that water will come in contact with all parts that are assembled. The pressure shall be raised slowly until it meets with the code requirements for the type under test and shall be held constant long enough to enable the inspector to examine all visible parts in order to determine the quality of the workmanship and the safety of the entire structure. If any leak is developed which may be stopped without excessive calking or rolling, the boiler or part under test may be accepted when made tight; but if there are leaks which cannot be stopped by reasonable calking or rolling, the defective part or parts must be replaced.

History: 1954 ACS 49, p. 76, Eff. Feb. 14, 1967.

R 408.4381 Code stamping.

Rule 381. Before a boiler or its connected piping is stamped, the inspector shall ascertain that the manufacturer has properly secured an ASME code symbol stamp from the American Society of Mechanical Engineers, 345 E. 47th Street, New York, New York 10017. When a boiler, part of a boiler, or its connected piping has been fully tested and ready for marking, the identifying marks shall be applied as required by the code. Care should be exercised to have the marking distinct and durable.

History: 1954 ACS 49, p. 77, Eff. Feb. 14, 1967.

R 408.4384 Inspection at place of installation.

Rule 384. (1) Boilers or piping shipped in parts for assembly at the place of installation shall have, in addition to the examination in process of manufacture at the shop, a further hydrostatic test and inspection to determine whether the work of assembling has been done in accordance with the code requirements. This will also necessitate observation as to boiler supports, free expansion of the drums, legs, and other parts.

(2) When an inspection is made at the place of installation, irrespective of the type of boiler, the inspector shall ascertain further whether the safety valves and other valves, water columns, gauge cocks, and steam gauges or other apparatus meet the code requirements.

History: 1954 ACS 49, p. 77, Eff. Feb. 14, 1967.

R 408.4387 Record of completed boiler, piping, alteration, or repair.

Rule 387. When the shop or field hydrostatic test has been completed and the boiler and piping within code jurisdiction is found to comply with the code and these rules, its record of material dimensions and workmanship shall be taken by the manufacturer, pipe fabricator, alterer, or repairer, recorded on a data report certified to by the inspector as being correct, and a copy of the record shall be retained by both. In all cases original signed data reports must be submitted to the boiler division of the department of labor.

History: 1954 ACS 49, p. 77, Eff. Feb. 14, 1967.

R 408.4390 Inspection of operator's qualifications; fit-up and welding.

Rule 390. If the boiler, piping, alteration, or major repair is of welded construction, it is the duty of the inspector to make sure that both the welding process and the welding operators are qualified for not only the materials to be welded but also the positions in which the welding will be applied. Before welding is started, he shall check the assembly and fitting up of the parts. Then he shall inspect the work during welding and examine and approve any weld tests that are to be made (as in the case of boiler welding). In inspecting the welding, he should look for evidences of lack of fusion, undercutting, slag inclusions, porosity, and cracking. If stress-relieving or heat-treating is involved, he shall make sure that proper temperatures have been reached but not exceeded.

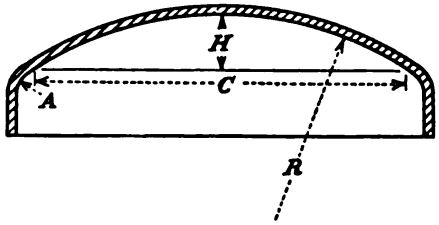
History: 1954 ACS 49, p. 77, Eff. Feb. 14, 1967.

R 408.4393 Radius of a dished head.

Rule 393. (1) The radius of a dished head, R, may be determined as follows:

Let C = chord or distance straight across between 2 points on the inner surface of the head (See note),

H = distance from the middle point of chord C to the inner surface of the head, measured at right angles to the chord,



then

$$R = \frac{H}{2} + \frac{C^2}{8H}$$

(2) The distance C in subrule (1) should be taken as large as practicable, but not large enough to include any portion of the rounded surface at A between the flange and the dished portion of the head. See figure 1.

FIGURE 1

Method of Measuring the Radius of Dished Head

History: 1954 ACS 49, p. 77, Eff. Feb. 14, 1967.

R 408.4396 Tolerances for ellipsoidal heads.

Rule 396. Heads of ellipsoidal form shall be checked for their conformity to the true elliptical shape. If a template is made of wood or metal as nearly exact, truly semi-elliptical as practical, the total tolerance at points A or B in figure 2 shall not exceed 1¼% of the inside diameter of the head.

FIGURE 2

Points for Measurement of Tolerances of Ellipsoidal Heads

True Semi-elliptical Template

History: 1954 ACS 49, p. 77, Eff. Feb. 14, 1967.

PART 4. INSPECTION OF FUSION WELDING

GENERAL

R 408.4401 Definitions of "part" and "fabricator."

Rule 401. For the purpose of application of these rules, the term "part" shall include any part of a boiler, piping, blowoff tank, blowoff separator, appurtenance, or auxiliary covered by these rules and regulations, and the term "fabricator" shall mean a manufacturer, a licensed boiler installer, or a licensed boiler repairer.

History: 1954 ACS 49, p. 78, Eff. Feb. 14, 1967.

R 408.4402 Inspection required.

Rule 402. Fusion welding, when used to repair, alter, or fabricate boilers, drums, piping, and other pressure parts constructed to the requirements of the ASME boiler and pressure vessel code and these rules shall be inspected during construction, repair, or alteration by an authorized inspector. Fabricators of boilers, piping, or other pressure parts shall notify their inspection agency and obtain the required inspection service before fabrication is started.

History: 1954 ACS 49, p. 78, Eff. Feb. 14, 1967.

R 408.4405 Inspection of welding techniques and weld quality.

Rule 405. The inspection of welding operations properly falls under 2 headings: (a) The examination of welding techniques; and (b) The evaluation of weld quality through the application of standard tests. The former requires an intimate practical knowledge of welding operations, while the latter calls for complete familiarity with the standard physical tests which are written in terms of results, independent of the process used. From this it may be seen that the only difference in inspecting arc and oxyacetylene welding operations lies in the inherent differences between the 2 processes.

History: 1954 ACS 49, p. 78, Eff. Feb. 14, 1967.

R 408.4407 Destructive tests.

Rule 407. The testing of welds is the same for both arc and gas welding. It should be remembered that in all weld testing there are relatively few non-

destructive tests. All of the tests employed in qualifying procedures and operators (see section IX of the ASME code) are definitely destructive tests and consequently are not practicable for finished structures.

History: 1954 ACS 49, p. 78, Eff. Feb. 14, 1967.

R 408.4409 Nondestructive tests.

Rule 409. (1) The nondestructive tests which are available are x-ray, gamma-ray, ultrasonic testing, trepanning, dye penetrant, and magnetic powder testing, but, unfortunately, none of these may be considered applicable universally. These tests are principally qualitative in results, although a measure of quantitative evaluation is possible in the case of x-ray and gamma-ray examination. The x-ray and gamma-ray methods of testing, while differing in application and technique of execution, are sufficiently alike in results to permit considering them together.

(2) The pressure test (hydrostatic or air) is suited only to closed containers such as pressure vessels, tanks, pipes, etc.

History: 1954 ACS 49, p. 79, Eff. Feb. 14, 1967.

SHOP INSPECTIONS

R 408.4410 Materials used in fabrication of welded structures.

Rule 410. The materials used in the fabrication of welded structures shall be of a weldable quality and meet the requirements of the specifications for such materials. These factors should have been thoroughly considered at the time the structure was designed and during the inspection of the raw materials at the mills. If such inspection is provided, it shall be seen that the specified requirements are complied with. Lacking inspection at the mill, the mill test reports shall be checked carefully. If these precautions are not taken, difficulties which can be attributed to improper materials may be encountered later during the welding.

History: 1954 ACS 49, p. 79, Eff. Feb. 14, 1967.

R 408.4412 Inspection and testing materials for defects.

Rule 412. (1) The plates, shapes, heads, forgings, etc., should be inspected preferably at the various sources of supply, but, wherever inspected, any materials which show injurious defects should be rejected.

(2) The materials should have been tested as to physical properties and these, together with the chemical analyses, shall meet the specified requirements.

(3) If the finished structure is to be post weld heat treated or given any special heat treatment, it should be determined that the acceptance tests are made on specimens receiving the same treatment. A record of all test results and analyses shall be kept for reference during fabrication and after the structure has gone into service.

(4) The inspector shall see that the proper markings are applied with steel stamps when applicable as these may be required in the course of fabrication or later for identification in the field after the equipment has been placed in service. The inspection of plate edges by etching or testing by the gas torch or otherwise will disclose any discontinuities or laminations which, if present to a marked degree, become a factor contributing to weld defects, particularly with the submerged melt process of welding. Laminations may, in some cases, be chipped out and the groove filled by manual welding before welding the joints.

History: 1954 ACS 49, p. 79, Eff. Feb. 14, 1967.

R 408.4414 Preparing welding joints.

Rule 414. The edges of the plates, shapes, heads or other surfaces where welding is involved shall be prepared properly for welding. The most common

Digitized by Google Original from UNIVERSITY OF MICHIGAN

Generated for Susan K Kendall (Michigan State University) on 2018-09-05 16:48 GMT / http://hdl.handle.net/2027/mdp.49015002898253
Open Access, Google-digitized / http://www.hathitrust.org/access_use#oa-google

joints in welding are the butt type, using a V, U, or modified-U groove, and the fillet type. The root face shall be of uniform thickness in order to avoid difficulties during the deposition of the first few beads of weld metal at the bottom of the groove. The uniformity with which this is held lessens the possibility of not removing sufficient metal when chipping for back welding, since the chipper will have a uniform amount of metal to remove. The edges of rolled plates shall have the proper curvature in order to avoid a flat zone along the seam.

History: 1954 ACS 49, p. 79, Eff. Feb. 14, 1967.

R 408.4416 Fit-up prior to welding.

Rule 416. (1) After the plates or shapes have been formed to the proper diameter or shape, the fit-up prior to welding shall be checked to see that the edges are butted or fitted properly and held in place by tack welds or other means.

(2) In fitting up shell sections, heads to shells or furnaces, or other parts for welding of the circumferential and other joints, the alignment close fit-up shall be checked carefully to avoid any improper practices which would necessitate lengthy and costly repairs later, with resulting delays in completion.

History: 1954 ACS 49, p. 79, Eff. Feb. 14, 1967.

R 408.4418 Qualification of welding operators.

Rule 418. All welding operators to be employed on the job shall be qualified in accordance with the requirements of section IX, ASME boiler and pressure vessel code. The fabricator's records of operators' qualification tests shall be checked to see whether all operators have passed the tests satisfactorily. A point to be checked in this respect is to see whether each operator has been qualified individually on plates of the thickness being welded and not on a plate made by several operators. It shall also be ascertained that welding operators, who are to be employed on work not in a flat position or on assemblies such as piping, are qualified for welding in the position in which the work must be performed. Each operator employed on the work shall be qualified before welding operations are started.

History: 1954 ACS 49, p. 80, Eff. Feb. 14, 1967.

R 408.4420 Filler metal.

Rule 420. The type of electrode or rod to be used shall be checked. Although there are a number of satisfactory coated electrodes, it is usually advantageous to use the same 1 throughout the job. The storage room for electrodes shall be checked since damp or humid atmospheres can have a detrimental effect on the coating and an unsatisfactory weld result. The welding characteristics of any automatic machine shall also be investigated to determine that uniform welds of high quality can be obtained.

History: 1954 ACS 49, p. 80, Eff. Feb. 14, 1967.

R 408.4422 Back chipping and welding.

Rule 422. (1) The practice in most cases is to weld the seams in pressure vessels on the outside, then back-chip and complete the weld on the inside. Care should be taken to see that all unfused metal, cracks, etc., are removed at the bottom of the weld before backwelding and that the chipped groove is smooth and of the proper contour to permit backwelding without the entrapment of slag. This is 1 of the vital points in obtaining a sound and homogeneous weld.

(2) In the case of ferrous materials, magnetic powder inspection of the root-chipped groove may be performed in case there is doubt concerning the complete removal of defects in the bottom of the groove. The welding technique for identical jobs will vary in different shops, but equally satisfactory results can be obtained. It is not a function of the inspector to dictate the technique to be used.

History: 1954 ACS 49, p. 80, Eff. Feb. 14, 1967.

R 408.4424 Preheating.

Rule 424. For heavy plates, high tensile steels, or alloy steels, the procedure will call for preheating. Preheating shall be in accordance with the requirements of section I, power boilers, ASME boiler and pressure vessel code and as specified in the approved procedure.

History: 1954 ACS 49, p. 80, Eff. Feb. 14, 1967.

R 408.4426 Cleaning welds; repair of undercutting.

Rule 426. Each bead of welding shall be cleaned thoroughly of all slag before applying each successive bead. The cleaning operation is essential as many defects in welds can be attributed to improper cleaning. In finishing a weld, the last bead shall be made so that a uniform, neat-looking weld will result. Undercutting shall be guarded against, and any undercut areas shall be repaired by applying a stringer bead over the undercutting which later shall be chipped and ground flush with the plate.

History: 1954 ACS 49, p. 80, Eff. Feb. 14, 1967.

R 408.4428 Fillet welds.

Rule 428. The fillet welds of all connections, such as manways, nozzles, attachments, etc., shall be at the correct angle and of the proper depth. There is a tendency to apply most of the weld metal of a fillet weld on 1 leg and have insufficient depth through the throat. The first layer of fillet welds shall be made with an electrode small enough to assure penetration into the root of the joint.

History: 1954 ACS 49, p. 80, Eff. Feb. 14, 1967.

R 408.4430 Nondestructive examination of welds.

Rule 430. In some cases the code and these rules require nondestructive examination of welds, such as x-ray, gamma-ray, magnetic powder testing, ultrasonic testing, dye penetrant, or a sectioning method as described below.

History: 1954 ACS 49, p. 80, Eff. Feb. 14, 1967.

R 408.4432 Radiography.

Rule 432. Radiography, particularly with x-rays, is a common nondestructive method of examining welds. If the equipment is of sufficient capacity for the thickness of plate involved, this examination should reveal any defects or inclusions that are 2% of the plate thickness or greater. As a means of determining this, suitable penetrameters are provided for in the code. The penetrameters shall be attached properly and identified with numbers as to the location. If any film does not show the proper identification numbers, or if the required penetrameter indication is not picked up, the radiograph should be retaken. The technique used in taking x-rays depends largely on the equipment which the fabricator has and what his experience has shown will produce the best results. It is not the function of the inspector to dictate the procedure to be followed provided the films resulting from the fabricator's practice are satisfactory. The manufacturers of

Digitized by Google Original from UNIVERSITY OF MICHIGAN

Generated for Susan K Kendall (Michigan State University) on 2018-09-05 16:48 GMT / http://hdl.handle.net/2027/mdp.49015002898253
Open Access, Google-digitized / http://www.hathitrust.org/access_use#oa-google

x-ray equipment set up certain procedures applicable to their machines. However, in most instances, it has been found necessary to vary from these set rules in order to obtain the best results.

History: 1954 ACS 49, p. 81, Eff. Feb. 14, 1967.

R 408.4434 Interpretation of radiographic film.

Rule 434. The interpretation of radiographic films requires not only a knowledge of welding and welding defects, but also the exercise of good judgment as to whether the questionable areas are actually defects. Where a difference of opinion exists, rather than cut out the weld, a retake of the areas in question may prove whether or not the welding is sound. Other areas may be questioned that may be the result of a low spot in the weld, undercutting, an inside seam line, or other conditions which are not usually considered to be welding defects. In such cases, the film should be placed on the weld, the areas in question located on the surface, and the necessary corrections made. The removal of slag, cracks, lack of fusion, and other obvious defects is seldom questionable, and the defective areas shall be chipped out, rewelded, and re-x-rayed.

History: 1954 ACS 49, p. 81, Eff. Feb. 14, 1967.

R 408.4436 Porosity charts.

Rule 436. The interpretation of porosity resulting from gas inclusions and the extent to which such porosity can be accepted have constituted sources of disagreement in the past. This has been largely eliminated through the adoption of standards by the ASME codes, showing what is not acceptable. The use of these standards, together with a knowledge of welding and the application of good judgment, should result in a satisfactory product and keep any discussions between the fabricator and inspector to a minimum.

History: 1954 ACS 49, p. 81, Eff. Feb. 14, 1967.

R 408.4438 Spot x-ray examination.

Rule 438. When complete x-raying is not specified, the welds may be examined by taking spot x-rays at points indicated by the inspector.

History: 1954 ACS 49, p. 81, Eff. Feb. 14, 1967.

R 408.4440 Gamma-ray examination.

Rule 440. In heavy-wall structures or those where x-raying is not practicable, radium is sometimes used in examining the welds. This is called gamma-raying and while the technique of taking the pictures is different, the results are quite similar to x-raying.

History: 1954 ACS 49, p. 81, Eff. Feb. 14, 1967.

R 408.4442 Trepanning welds.

Rule 442. When radiographic equipment is not available, examination is often made by a sectional method such as trepanning plugs or otherwise cutting samples from the welds. Trepanning is done by means of a special cylindrical saw operated by motor, which is readily obtainable. Another method is to saw from the welded joint a boat-shaped specimen by means of a special spherical saw. The plugs should be taken at those points where the welds look questionable. One of the common points where such plugs are taken is at the intersection of circumferential and longitudinal seams.

History: 1954 ACS 49, p. 81, Eff. Feb. 14, 1967.

Generated for Susan K Kendall (Michigan State University) on 2018-09-05 16:48 GMT / http://hdl.handle.net/2027/mdp.49015002898253
Open Access, Google-digitized / http://www.hathitrust.org/access_use#oa-google

R 408.4444 Sectioning and etching trepanned plugs.

Rule 444. Trepanned plugs shall be sectioned so as to get a plane surface and be etched and examined for objectionable defects such as cracks, lack of fusion, and inclusions. If any are found defective, additional plugs should be taken at intervals on each side of the defective ones. This shall be continued until no further defective plugs are found in the particular seam and all welding represented by the defective plugs shall be chipped out, rewelded and retested. When equipment is available, spot x-raying is preferable.

History: 1954 ACS 49, p. 81, Eff. Feb. 14, 1967.

R 408.4446 Magnetic powder testing.

Rule 446. The magnetic powder method of testing may also be employed on finishing welded products of ferrous material. The metal part is first magnetized, generally by an external coil or solenoid. The magnetized piece is then covered with finely divided iron particles either by sprinkling or by immersing in a bath of light in which the particles of iron are kept in suspension by agitation. A crack or defect in the part, either surface or subsurface, causes a discontinuity in the magnetic flux lines, and the iron particles collect at that point outlining the defect. Again, this is a qualitative test and is limited to those assemblies which permit of magnetization. Considerable experience is required to properly apply and judge the results of this method of testing.

History: 1954 ACS 49, p. 82, Eff. Feb. 14, 1967.

R 408.4448 Post-weld heat treating.

Rule 448. After the welding of all seams and attachments has been completed and all welds repaired, the vessel or part shall be post-weld heat treated if required by the code. The post weld heat treating furnace or equipment shall be of a type adaptable to the work involved and designed so that the heat will be applied uniformly and in a manner not injurious to the vessel or part. In the case of thin shells or shells which may be susceptible to some deformation during the post weld heat treating operation, they should be braced on the interior so as to minimize the distortion. The vessel should be blocked in the furnace in such a manner as to prevent sagging or blowing during the post weld heat treating. The rate of cooling of structures which have a great variation in section should be controlled in order that residual stress will not be set up from excessive temperature differentials in the weldment during the cooling cycle.

History: 1954 ACS 49, p. 82, Eff. Feb. 14, 1967.

R 408.4450 Fuels used for post weld heat treatment.

Rule 450. The fuel used in a post weld heat treating furnace should be checked as certain types of fuels cause heavier scaling or greater oxidation than others. The fuel used in a post weld heat treating furnace is not for an inspector to decide, but it is well for him to familiarize himself with it and the conditions that may result from its use, such as excessively heavy scaling. Certain elements in fuels may have a deleterious effect on nonferrous metals; for example, 0.5% or more of sulphur in a fuel will have an embrittling effect on high nickel materials and, therefore, shall not be used.

History: 1954 ACS 49, p. 82, Eff. Feb. 14, 1967.

R 408.4452 Control of post-weld heat treatment.

Rule 452. The temperature controls, recording charts, location of thermocouples, etc., shall be checked to insure uniformity in the heating of the vessel.

Digitized by Google Original from UNIVERSITY OF MICHIGAN

Generated for Susan K Kendall (Michigan State University) on 2018-09-05 16:48 GMT / http://hdl.handle.net/2027/mdp.49015002898253

The temperature used shall conform to the code; the rate of heating, time held and rate of cooling should agree with the prescribed practice.

History: 1954 ACS 49, p. 82, Eff. Feb. 14, 1967.

R 408.4454 Hydrostatic testing.

Rule 454. After all other processes or operations required by the code have been performed, the boiler or part shall be tested hydrostatically. The test pressure shall be that called for by the code. The boiler or part should be blocked up for testing in such a manner as to permit examination of all parts during the test period. Sagging due to the water load should be guarded against. When filling the boiler or part with water, care should be taken to avoid all air pockets. The temperature of the water should be approximately the same as, but not lower than, the atmospheric temperature; otherwise sweating will result and a proper examination will be difficult.

History: 1954 ACS 49, p. 82, Eff. Feb. 14, 1967.

R 408.4456 Testing reinforcing pads.

Rule 456. The telltale holes in the reinforcing pads should not be plugged during the hydrostatic test, and all such pads shall be tested prior to the hydrostatic test, this test to consist of applying air pressure on the pad through the ¼ inch tapped opening and slushing soapy water on the welds, both inside and outside. A gauge should be used to indicate the air pressure applied to the pad.

History: 1954 ACS 49, p. 82, Eff. Feb. 14, 1967.

R 408.4458 Inspection during hydrostatic test.

Rule 458. The hydrostatic pressure shall be applied gradually and the gauge checked to see that it is functioning properly. If available, a second gauge attached to the vessel at some suitable point is desirable in order to check the pressure readings. When the time limit of the test has been reached, a final examination shall be made of all seams, joints, telltale holes, etc., and, if the results are satisfactory, the pressure can be released.

History: 1954 ACS 49, p. 83, Eff. Feb. 14, 1967.

R 408.4460 Air pressure test.

Rule 460. The use of air for the testing of pressure vessels should not be employed unless the vessel has been tested first with water to a pressure in excess of the air-test pressure.

History: 1954 ACS 49, p. 83, Eff. Feb. 14, 1967.

R 408.4462 Final inspection and check.

Rule 462. (1) After the hydrostatic test the boiler or part shall be drained, any silt or scale cleaned out, and final inspection of the interior and exterior made, as well as a check of the alignment, circularity, and general dimensions. The vessel shall be leveled as carefully as possible for this check and the measurements shall be taken accurately.

(2) During the final inspection, any welding which has not been properly cleaned shall be ground or chipped to give a satisfactory appearance. Any areas where clips or attachments were welded on for testing or handling shall be chipped and ground smooth. The welds shall be checked carefully for evidence of cracks which might have developed on test.

History: 1954 ACS 49, p. 83, Eff. Feb. 14, 1967.

R 408.4466 Stamping of part and signing data reports.

Rule 466. Upon completion of the tests and inspection, the boiler or part should be stamped with the design pressure, allowable working pressure, test pressure, code symbol, etc., as required by the applicable code section, along with the inspector's identifying marks. The inspector shall see that the manufacturer or fabricator has prepared and signed the proper record forms, and sign them himself, retaining 1 or more copies together with other pertinent data such as copies of the post weld heat treating charts, test charts, weld test results, material data, etc., which should be retained as a permanent record of the vessel.

History: 1954 ACS 49, p. 83, Eff. Feb. 14, 1967.

FIELD INSPECTIONS

R 408.4468 New work.

Rule 468. Fabricating new work in the field shall be considered as only deferred shop operations, to which the same requirements apply as for shop work.

History: 1954 ACS 49, p. 83, Eff. Feb. 14, 1967.

R 408.4470 Existing vessels or parts.

Rule 470. The inspection of existing welded boilers and parts is not nearly so definite a procedure as that involved in the inspection of new welded construction. The principal purpose of inspection of existing vessels is to ascertain the physical condition of the object with particular reference to the welded joints and fastenings. It is important to observe whether they have deteriorated either from overstressing or corrosion, and signs of weakening of the structure shall be looked for carefully.

History: 1954 ACS 49, p. 83, Eff. Feb. 14, 1967.

R 408.4472 Defects of existing welds.

Rule 472. It is obviously impossible to tell by the appearance of a welded joint what its interior condition may be, but in many instances the condition of welded seams can be determined quite definitely by trepanned plugs as hereinbefore described. In many cases 1 of the most dangerous effects is corrosion. The inspector must use his best judgment in endeavoring to determine the locations of critical stresses and inspect the parts, including particularly the welds, by which those stresses are carried. In the presence of corrosive agents parts of structures that are subjected to high stress are subject to accelerated corrosion. This is particularly noticeable in boilers or parts containing corrosive liquids or gases. The effect is particularly dangerous if the deposited weld metal is porous or not properly placed to assure uniform stress distribution. Any unusual effects observed on the welds or structural members that may have a weakening effect shall be noted carefully.

History: 1954 ACS 49, p. 83, Eff. Feb. 14, 1967.

R 408.4474 Localization of concentrated stresses at welds.

Rule 474. The inspector shall also watch carefully for the deformation of parts of the structure which may result from improper loading of the structure of temporary overloading. Usually the effects of such conditions are independent of the welded attachments, but unless the welded joints are practically perfect, the concentrated stresses from such loadings are likely to localize at the welds. When such conditions are observed, the inspector should report them immediately and

Open Access, Google-digitized / http://www.hathitrust.org/access_use#oa-google

recommend that the structure be taken out of service until any condition of localized weakness can be corrected.

History: 1954 ACS 49, p. 84, Eff. Feb. 14, 1967.

R 408.4476 Duties of inspector on welded construction.

Rule 476. The duties of the inspector on welded construction will, for most structures, follow the order of fabrication procedure, which generally starts with:

(a) The designs and materials to be used.
(b) Methods of assembly and fitting up.
(c) Checking of the procedure and qualification of operators.
(d) Inspection during construction.
(e) Proof or acceptance tests.
(f) Records.

History: 1954 ACS 49, p. 84, Eff. Feb. 14, 1967.

R 408.4478 Designs and materials.

Rule 478. The inspector shall study the design in advance, particularly with respect to the loads to be carried by the several parts and the construction details of the work with special reference to the provisions made for welded fabrication. It is also important to consider the material used in the structure as some materials, such as alloy steels or the nonferrous metals, may require special treatment to obtain satisfactory welding. The welding details and materials shall be checked by the inspector before fabrication begins, for compliance with the applicable code section.

History: 1954 ACS 49, p. 84, Eff. Feb. 14, 1967.

R 408.4480 Assembly and fitting up.

Rule 480. The inspector shall have the opportunity to check the fitting and alignment of parts to make sure that the welds can be applied to meet the requirements of the design and that the stresses will be distributed as intended. He shall also carefully follow the welding operations to make sure that warpage and misalignment will be avoided to the greatest possible extent and thus avoid possible rejection.

History: 1954 ACS 49, p. 84, Eff. Feb. 14, 1967.

R 408.4482 Procedure for welding and operator qualifications.

Rule 482. (1) It is required that the manufacturer shall adopt a definite procedure by which the welding in the shop or field is to be done. This procedure shall be such as to deposit weld metal and produce welded joints with acceptable characteristics as called for in section IX of the ASME code. It is the inspector's duty to witness the demonstration test to prove the sufficiency of the procedure, or to see authentic documentary evidence to that effect. This procedure shall be written out, giving in detail all pertinent data, such as the type of electrode or rod to be used, the shape of the welding groove, the number and sequence of the several beads, cleaning of slag, peening, and the current characteristics for electric welding or the size of tip and nature of flame, forehand or backhand technique, etc., for gas welding.

(2) All welding operators shall be tested as required by section IX of the ASME code to determine their ability to apply the procedure selected and obtain sound welds.

History: 1954 ACS 49, p. 84, Eff. Feb. 14, 1967; 1954 ACS 81, p. 47, Eff. Nov. 7, 1974; 1954 ACS 98, p. 130, Eff. Jan. 24, 1979.

R 408.4484 Inspection of prefabricated parts in field.

Rule 484. Inspections, on which acceptance of the welded structure, alteration, or repair will be based, are usually made in the manufacturer's or contractor's shop when the work is of such dimensions that when completed it can be shipped or transported to the installation site. If the work exceeds the limiting dimensions of shipping facilities, it must be fabricated at the place of erection, either in whole or by erecting parts and sections that were prefabricated in the shop. In the former case the inspection is all carried on in the shop, while in the latter the inspection is divided between the fabricating shop and the field erection site. Alterations will generally be performed in the field as will most boiler repairs.

History: 1954 ACS 49, p. 84, Eff. Feb. 14, 1967.

R 408.4486 Operators prohibited to weld unless qualified.

Rule 486. It is the welding operator's duty to be guided by the specified procedure when making welds, but prior to doing any work on a welded structure, he must have demonstrated his ability to make sound welds when following the prescribed procedure. It is the inspector's duty to assure himself that each welding operator has made a satisfactory qualification test, either by seeing the test made or by checking the results of tests previously made and which shall be part of the shop record. Only such operators shall be permitted to work on welded structures coming under the inspector's jurisdiction.

History: 1954 ACS 49, p. 85, Eff. Feb. 14, 1967.

R 408.4488 Testing.

Rule 488. After fabrication is completed, the inspector shall check the structure and part to make sure that all code requirements have been met. This may, in many classes of work, involve some tests or other special treatments. Post-weld heat treatment, radiographing, trepanning, or hydrostatic testing may be required or other approved means. Boilers and parts are required to be subjected to hydrostatic tests to determine their tightness, as well as to obtain some indication of the strength of the welds.

History: 1954 ACS 49, p. 85, Eff. Feb. 14, 1967.

R 408.4489 Records.

Rule 489. Work that requires inspection will also require adequate records; and in addition the inspector should keep full notes of his inspection work. It is his duty to check the required records to make certain that they are complete, in accordance with the rules, accurate, and available when and as required. Records that require the manufacturer's, installer's or repairer's signature shall be prepared by the manufacturer or responsible licensed installer or repairer and shall be in accordance with the code and these rules and regulations.

History: 1954 ACS 49, p. 85, Eff. Feb. 14, 1967.

R 408.4490 Field erection of boilers; master data report.

Rule 490. (1) Licensed boiler repairers field erecting boilers utilizing welding shall be responsible for the proper handling of the manufacturer's data reports P-2 or P-3 and P-4 required by the ASME code and shall prepare a master data sheet to which shall be attached those data reports covering the component boiler parts forwarded to him by the manufacturers of the parts.

(2) The licensed boiler repairer shall properly certify the master data sheet and stamp the boiler as required by the ASME boiler and pressure vessel code.

Digitized by Google Original from UNIVERSITY OF MICHIGAN

Generated for Susan K Kendall (Michigan State University) on 2018-09-05 16:48 GMT / http://hdl.handle.net/2027/mdp.49015002898253

(3) The certificate of field inspection on the master data sheet shall be executed by the authorized inspector after the hydrostatic test and final inspection. The licensed boiler repairer shall forward the data reports to the boiler division, bureau of safety and regulation, Michigan department of labor.

History: 1954 ACS 49, p. 85, Eff. Feb. 14, 1967.

R 408.4491 P-4A data reports; contents; filing.

Rule 491. Licensed boiler installers shop or field welding piping within the scope of these rules shall prepare P-4A data reports. These data reports shall include material specifications of all pipe used, pressure and temperature design conditions, diameter and length of pipe, number of welds, types and sizes of flanges, fittings and valves; nondestructive test information, whether preheated and post weld heat treated, and shall include a sketch of the pipe layout, including all of the above; the job number, date of drawings, sheet number and licensed installers license number, company name and address. Upon completion, P-4A datas shall be forwarded by the licensed boiler installer to the boiler division, bureau of safety and regulation, Michigan department of labor.

History: 1954 ACS 49, p. 85, Eff. Feb. 14, 1967.

R 408.4492 P-4A data reports; serial numbers appended.

Rule 492. The inspector, when signing the P-4A data report, after the required hydrostatic test, shall append the Michigan state serial number of the boiler to which the piping is to be connected. If the inspection covers piping such as a boiler blowoff header which will serve more than one boiler, a P-4A data must be submitted for each individual boiler which the boiler will service.

History: 1954 ACS 49, p. 85, Eff. Feb. 14, 1967.

R 408.4493 Stamping of pipe with code symbol.

Rule 493. All welded piping exceeding 2-inch pipe size, within the jurisdiction of these rules must be stamped with the applicable code symbol.

History: 1954 ACS 49, p. 85, Eff. Feb. 14, 1967.

R 408.4494 Authorized use of ASME code symbols.

Rule 494. The use of ASME code symbols in the state of Michigan issued after the effective date of these rules authorizing the manufacture of boilers, fabrication of piping or assembly of boilers is prohibited unless approval is granted by the chief inspector. The use of code symbols in the state of Michigan shall be granted only after thorough investigation by the chief inspector or deputy inspector of the symbol applicant's knowledge of Michigan rules and ASME code requirements, his competency and engineering ability, mechanical equipment available to perform the work, the quality of his work previously performed, and his welding procedures and qualification of procedures.

History: 1954 ACS 49, p. 86, Eff. Feb. 14, 1967.

PREHEAT AND POSTHEAT OF CARBON STEELS

R 408.4495 Preheat as an alternative to stress-relief.

Rule 495. Conventional stress-relief often is impractical in the field after repairs or alterations have been made by welding. For this reason, preheat is suggested as an alternative to stress-relief for the P-1 steels (SA-7, SA-201, SA-212, SA-283, SA-285, etc.) in section IX of the ASME code. For the P-3 steels (C-Mo, ½ Cr.½ Mo, etc.), preheat sometimes can be considered as an alternative, especially

Digitized by Google

Generated for Susan K Kendall (Michigan State University) on 2018-09-05 16:48 GMT / http://hdl.handle.net/2027/mdp.49015002898253
Open Access, Google-digitized / http://www.hathitrust.org/access_use#oa-google

when the operating temperature is high enough to assure reasonable ductility of the weldment during operation and there is no excessive hazard during hydrostatic tests. Because the steels, other than P-1, require additional special consideration, the rules in this part are intended primarily for application to the P-1 steels.

History: 1954 ACS 49, p. 86, Eff. Feb. 14, 1967.

R 408.4496 Thickness as affecting preheat and postheat requirements.

Rule 496. Plate in thickness below ½ inch is reasonably tough. In most steels, when the plate thickness exceeds ¾ inch to 1 inch, toughness, particularly as welded, decreases sharply. The decrease in toughness can be reduced by the conventional postheat treatment and in many steels by preheat treatment. The benefits of preheat treatment in steels ¾ to 1¼ inch in thickness have been demonstrated; similar benefits in thicker steels are expected but, at present, experimental data is lacking.

History: 1954 ACS 49, p. 86, Eff. Feb. 14, 1967.

R 408.4497 Postheat treatment generally.

Rule 497. The conventional postheat treatment given pressure vessels is of established value although, as indicated in the foregoing, the mechanism by which the improvement is realized may be open to debate. The ASME code requires postheat treatment of new vessels constructed of P-1 steels when the plate thickness exceeds stated values. In certain cases, postheat treatment after repairs may have benefits beyond structural considerations. For example, when the service conditions are expected to produce stress-corrosion cracking in ferritic steels, relief of stresses is necessary. Preheat has not been shown to be an adequate substitute for postheat treatment as applied to avoid such cracking.

History: 1954 ACS 49, p. 86, Eff. Feb. 14, 1967.

R 408.4498 Postheat treatment at controlled low temperature.

Rule 498. This system of progressively heating and cooling selected bands parallel to the weld, in order to eliminate residual stresses in the weld while including thermal stresses in the parent metal, might possibly have application. Before this system is used, it is suggested that tests acceptable to the inspector be conducted on full thickness plates of the specification material to determine the degree of benefit derived from the treatment. It is suggested that the system not be used unless tests indicate it imparts greater toughness to the actual materials of construction or unless it is known to be effective in reducing stress-corrosion cracking in the specific service environment involved. Specific recommendations regarding the use of this system cannot be made until additional data becomes available.

History: 1954 ACS 49, p. 86, Eff. Feb. 14, 1967.

R 408.4499 Preheat.

Rule 499. (1) Preheat of carbon steel to 300 to 400 degrees Fahrenheit has been shown by some laboratory tests to be the equivalent of the conventional postheat treatment at 1,200 degrees Fahrenheit insofar as physical properties of the weldment are concerned. Several tests have indicated some advantage for the use of postheat treatment. However, for all practical purposes, improvement resulting from preheating is sufficiently well established so that preheat should be considered for field welding of plates of more than ¾ inch in thickness whenever toughness is highly desirable and the thermal postheat treatment is impractical.

The preheating requirements of paragraph PW-38, section I, power boilers, ASME boiler and pressure vessel code, are minimum mandatory values.

(2) Preheating should be performed by heating to at least 300 degrees Fahrenheit and maintaining this heat in appreciable lengths of the joint to be welded, preferably using a strip burner with a mild flame rather than a harsh flame, such as from a cutting torch. Electrical strip heaters are available and have been found to be satisfactory. The minimum preheat of 300 degrees Fahrenheit should be checked with temperature-sensitive crayon or similarly accurate means, so that 4 inches of the steel on each side of the joint or 4 times the plate thickness, whichever is the greater, will be maintained at the minimum preheat temperature. Ring burners or heaters are recommended for nozzle and manway welds. At no time during the welding should the base metal fall below a temperature of 300 degrees Fahrenheit.

History: 1954 ACS 49, p. 86, Eff. Feb. 14, 1967.

Departmental note: Some test results indicate that the improvement in toughness resulting from the use of preheat may be more pronounced on weldments made with cellulosic (EXX-10) electrodes than on those made with low-hydrogen (EXX-16) electrodes. However, the toughness and other properties of weldments made with the latter type of electrodes should normally be as good or better than those of the weldments made with cellulosic electrodes.

PART 5. INSPECTION OF BOILERS

R 408.4501 Times of inspection.

Rule 501. The inspection of boilers as provided for under general provisions shall be made when the boiler is registered and at regular periods thereafter, except rental boilers which shall receive prior inspection internally and externally in accordance with these rules and be approved for each reinstallation.

History: 1954 ACS 49, p. 87, Eff. Feb. 14, 1967.

R 408.4503 Owner or user to prepare boiler for inspection.

Rule 503. (1) All boilers, unless otherwise exempt by these rules and which are subject to regular inspections as provided for in R 408.4057, shall be prepared for such inspections and hydrostatic tests, whenever necessary, by the owner or user when notified by the chief inspector, deputy inspector, or special inspector.

(2) The owner or user shall prepare each boiler for internal inspection and shall prepare for and apply the hydrostatic test whenever necessary on the date specified in the presence of a duly qualified inspector.

History: 1954 ACS 49, p. 87, Eff. Feb. 14, 1967.

R 408.4505 Manner of preparing boiler for inspection.

Rule 505. (1) Before inspection, every part of a boiler that is accessible shall be open and properly prepared for examination, internally and externally.

(2) All boilers have openings through which an examination may be made and which for operation are closed; all such parts shall be opened whether for access to water surfaces or to heating surfaces.

(3) In cooling down a boiler for inspection or repairs, the water should not be withdrawn until the setting is sufficiently cooled to avoid damage to the boiler, and when possible it should be allowed to cool down naturally.

History: 1954 ACS 49, p. 87, Eff. Feb. 14, 1967.

R 408.4507 Frequency of inspections.

Rule 507. (1) A boiler operating at pressures exceeding 15 psig when having attained 30 years of age and each 4 years thereafter, shall have all riveted longitudinal seams, girth seams, boiler supports and attachments exposed and

Digitized by Google
Original from UNIVERSITY OF MICHIGAN
Generated for Susan K Kendall (Michigan State University) on 2018-09-05 16:48 GMT / http://hdl.handle.net/2027/mdp.49015002898253
Open Access, Google-digitized / http://www.hathitrust.org/access_use#oa-google

shall be subjected to a special hydrostatic test of 1½ times the maximum allowable working pressure stamped on the boiler to be followed by an internal inspection. Other inaccessible attachments that could manifest leakage, deterioration, or cracking shall be exposed for the special inspection with the following exceptions:

(a) Lap seam boilers less than 36 inches diameter and operating at 100 psig or less will be subject to the special inspection after 20 years and each 4 years thereafter. Lap seam boilers over 36 inches diameter and 100 psig are not permitted.

(b) Welded boilers shall be inspected under special hydrostatic test after 30 years of age and each 9 years thereafter.

(c) A steam boiler operating at 15 psi and less and a hot water boiler operating at 160 psi and 250 degrees Fahrenheit and less shall be inspected upon attaining 30 years of age and each 4 years thereafter. All supports and attachments are to be exposed for inspection. A steam boiler operating at 15 psi or less shall be subjected to a hydrostatic test of 30 psi. A hot water boiler shall be subjected to a hydrostatic test of 1½ times the maximum allowable working pressure stamped on the boiler. A cast-iron boiler upon attaining 30 years of age shall be subjected to a hydrostatic leak test not exceeding the safety/relief valve setting.

(d) If, in the opinion of the director, it is found in riveted construction boilers that a frequency of 4 years for reinspection is unwarranted, an extension may be granted not to extend beyond 8 years.

(e) Nondestructive tools, such as sonic crystals, x-ray, dye penetrant, or comparable inspection aids may be utilized if seams or weldments are inaccessible due to fused refractory covering such joints.

(f) The removal of rivets to ascertain condition shall be at the discretion of the inspector.

(2) All access openings through refractory leading to seams, supports or attachments shall be arched or reinforced in such manner that the inspector will not be unduly exposed to the danger of collapsing refractory structure. The inspector shall order additional exposure of boiler appurtenances if, in his opinion, such further exploration is warranted.

History: 1954 ACS 49, p. 87, Eff. Feb. 14, 1967; 1954 ACS 56, p. 28, Eff. Nov. 14, 1968; 1954 ACS 81, p. 47, Eff. Nov. 7, 1974.

R 408.4510 Traction boilers.

Rule 510. (1) A traction boiler is a boiler designed for the express purpose of pulling farm equipment or to convert steam power into flywheel energy driving farm apparatus, such as thrashers, saws, or grinding equipment. Such boilers shall be subject to the following provisions:

(a) They shall be annually tested hydrostatically to a hydrostatic pressure of 1½ times working pressure, held for sufficient time to permit visual observation of all seams, joints, supports, and attachments.

(b) All seams, attachments, supports, and joints will be exposed for each such annual inspection.

(2) Traction boilers used for display or hobby purposes shall not be operated for any other purpose but that for which they were originally constructed.

(3) Lap seam boilers shall not be operated in excess of 100 psi.

(4) Any repairs by welding or riveting to traction boilers shall be made by licensed repair shops only after approved permit has been obtained and subject to the approval of the inspector before and after repair is made. The licensed repair shop shall furnish the department the record of welded repair signed by the authorized inspector who approved the repair.

History: 1954 ACS 49, p. 88, Eff. Feb. 14, 1967.

R 408.4513 Stripping boiler to determine its condition.

Rule 513. It is not necessary to meet the needs of ordinary prudence to remove insulation material, masonry, or fixed parts of the boiler, unless defects or deterioration peculiar to certain types or inaccessible parts of boilers are suspected. Where there is moisture or vapor showing through the covering, the covering shall be removed at once and a complete investigation made. Upon sufficient visible evidence or suspicion due to age or other causes, every effort shall be made to discover the true condition, even to the removal of insulating material, masonry, or fixed parts of a boiler. Sometimes drilling or cutting away of parts is justifiable and necessary to determine this condition positively.

History: 1954 ACS 49, p. 88, Eff. Feb. 14, 1967.

R 408.4515 Plant operator to conduct tests in presence of inspector.

Rule 515. The inspector shall get as close to the parts of the boiler, both internal and external, as is practicable, to obtain the best possible vision of the surface and use a good artificial light if natural light is not sufficient. Whenever attachments or apparatus require testing, the tests shall be made by a plant operator in the presence of the inspector, unless otherwise ordered.

History: 1954 ACS 49, p. 88, Eff. Feb. 14, 1967.

R 408.4517 Preparation of boiler for internal inspection.

Rule 517. The owner or user shall prepare a boiler for internal inspection in the following manner:

(a) Water shall be drawn off and the boiler washed thoroughly.

(b) All manhole and handhole plates, washout plugs, and water column connections shall be removed and the furnace and combustion chambers thoroughly cooled and cleaned.

(c) All grates of internally fired boilers shall be removed.

(d) At each annual inspection brickwork shall be removed as required by the inspector to determine the condition of the boiler, headers, furnace, supports, or other parts.

(e) The steam gauge shall be removed for testing.

(f) Any leakage of steam or hot water into the boiler shall be cut off by disconnecting the pipe or valve at the most convenient point.

History: 1954 ACS 49, p. 88, Eff. Feb. 14, 1967.

R 408.4520 Failure to prepare boiler for internal inspection.

Rule 520. If a boiler has not been properly prepared for an internal inspection or the owner or user fails to comply with the requirements for hydrostatic test as set forth in these rules, the inspector may decline to make the inspection or test and the certificate of inspection shall be withheld until the owner or user complies with the requirements.

History: 1954 ACS 49, p. 89, Eff. Feb. 14, 1967.

R 408.4522 Stripping of boiler to determine data required.

Rule 522. If the boiler is jacketed so that the longitudinal seams of shells, drums, or domes cannot be seen, enough of the jacketing, setting wall, or other form of casing or housing shall be removed so that the size of the rivets, pitch of the rivets, and other data necessary to determine the safety of the boiler may be obtained, provided such information cannot be determined by other means.

History: 1954 ACS 49, p. 89, Eff. Feb. 14, 1967.

R 408.4524 Scale, oil, or other substance on internal surfaces.

Rule 524. The inspector shall examine all surfaces of the exposed metal inside to observe any action caused by treatment, scale solvents, oil or other substances which may have intentionally or unintentionally entered with the feedwater. Any evidence of oil shall be noted carefully. The smallest amount of oil is dangerous and immediate steps shall be taken to prevent any further entrance of oil into the boiler. Oil or scale in the tubes of water-tube boilers or on plates over the fire or any boiler is particularly bad, often causing sufficient weakening to bag or rupture.

History: 1954 ACS 49, p. 89, Eff. Feb. 14, 1967.

R 408.4526 Corrosion; grooving.

Rule 526. (1) Corrosion along or immediately adjacent to a seam is more serious than a similar amount of corrosion in the solid plate away from the seams. Grooving and cracks along longitudinal seams are especially significant as they are likely to occur when the material is highly stressed. Severe corrosion is likely to occur at points where the circulation of the water is poor; such places shall be examined most carefully.

(2) For the purpose of estimating the effect of corrosion or other defects upon the strength of a shell, comparison shall be made with the efficiency of the longitudinal riveted joint of the same boiler, the strength of which is always less than that of the solid sheet.

History: 1954 ACS 49, p. 89, Eff. Feb. 14, 1967.

R 408.4529 Flanging.

Rule 529. All flanging shall be thoroughly inspected and particularly the flanges of heads that are not stayed. Internal grooving in the fillets of such heads and external grooving in the outer surfaces of heads concave to pressure are very common since there is a slight movement in heads of this character which produces this kind of defect. Some types of boilers have the OG or reversed-flange construction in some of their parts that may be inaccessible to the eye, but the condition shall be determined by the insertion of a mirror which, at a proper angle, will reflect back to the eye the condition of such a part.

History: 1954 ACS 49, p. 89, Eff. Feb. 14, 1967.

R 408.4531 Stays.

Rule 531. All stays, whether diagonal or through, shall be examined to note that they are in even tension. All fastened ends shall be examined to note whether cracks exist where the stays are punched or drilled for rivets or bolts and, if not found in proper tension, their proper adjustment shall be recommended.

History: 1954 ACS 49, p. 89, Eff. Feb. 14, 1967.

R 408.4534 Manholes and other openings.

Rule 534. The manhole and other reinforcing plates, as well as nozzles or other connections flanged or screwed into a boiler, shall be examined internally as well as externally to see that they are not cracked or deformed. Wherever possible, observation shall be made from the inside of the boiler as to the thoroughness with which its pipe connections are made to the boiler. All openings to external attachments, such as water column connections, openings in dry pipes, and openings to safety valves shall be noted to see that they are free from obstructions.

History: 1954 ACS 49, p. 90, Eff. Feb. 14, 1967.

R 408.4536 Fire surfaces; bulging; blistering; leaks.

Rule 536. Particular attention shall be given to the plate or tube surfaces exposed to the fire. The inspector shall observe whether any part of the boiler has become deformed during operation by bulging or blistering. If bulges or blisters are of such size as would seriously weaken the plate or tube, and especially when leakage is noted coming from those defects, the boiler shall be discontinued from service until the defective part or parts have received proper repairs. Careful observation shall be made to detect leakage from any portion of the boiler structure, particularly in the vicinity of seams and tube ends. Fire tubes sometimes blister but rarely collapse; the inspector shall examine the tubes for such defects; if found to have a sufficient degree of distortion, they shall be removed.

History: 1954 ACS 49, p. 90, Eff. Feb. 14, 1967.

R 408.4538 Lap joints; fire cracks.

Rule 538. Lap joint boilers may crack where the plates lap in the longitudinal or straight seam; if there is any evidence of leakage or other distress at this point, it shall be investigated thoroughly and, if necessary, rivets removed or the plate slotted in order to determine whether cracks exist in the seam. Any cracks noted in shell plates are usually dangerous except fire cracks that run from the edge of the plate into the rivet holes of girth seams. A limited number of such fire cracks is not usually very serious.

History: 1954 ACS 49, p. 90, Eff. Feb. 14, 1967.

R 408.4540 Testing staybolts.

Rule 540. The inspector shall test staybolts by tapping 1 end of each bolt with a hammer and, when practicable, a hammer or other heavy tool should be held on the opposite end to make the test more effective.

History: 1954 ACS 49, p. 90, Eff. Feb. 14, 1967.

R 408.4542 Tubes and nipples.

Rule 542. (1) Tubes in horizontal, fire-tube boilers deteriorate more rapidly at the ends toward the fire, and they shall be carefully tapped with a light hammer on their outer surfaces to ascertain whether there has been serious reduction in thickness.

(2) The tubes of vertical tubular boilers are more susceptible to deterioration at the upper ends when exposed to the products of combustion without water cooling. They should be reached as far as possible either through the handholes, if any, or inspected at the ends.

(3) The surfaces of tubes shall be carefully examined to detect bulges or cracks or any evidences of defective welds. Where there is a strong draft the tubes may become thinned by erosion produced by the impingement of particles of fuel and ash, or the improper use of soot blowers. A leak from a tube frequently causes serious corrosive action on a number of tubes in its immediate vicinity.

(4) Where short tubes or nipples are employed in joining drums or headers, there is a tendency for fuel and ash to lodge in the junction points and such deposits are likely to cause corrosion if moisture is present. All such places shall be cleaned out thoroughly and examined.

History: 1954 ACS 49, p. 90, Eff. Feb. 14, 1967.

R 408.4545 Ligaments between tube holes.

Rule 545. The ligaments between tube holes in the heads of all types of fire-tube boilers and in shells of water-tube boilers shall be examined. If leakage is noted, broken ligaments should be looked for.

History: 1954 ACS 49, p. 90, Eff. Feb. 14, 1967.

R 408.4547 Pipe connections and fittings.

Rule 547. (1) The steam and water pipes, including connections to the water column, shall be examined for leaks; if they are found it should be determined whether they are the result of excess strains due to expansion and contraction, or other causes. The general arrangement of the piping in regard to the provisions for expansion and drainage, as well as adequate support at the proper points, shall be carefully noted. The location of the various stop valves shall be observed to see that water will not accumulate when the valves are closed and thereby establish cause for water-hammer action.

(2) The arrangement of connections between individual boilers and the main steam header shall be especially noted to see that any change of position of the boiler due to settling or other causes has not placed an undue strain on the piping.

(3) It shall be ascertained whether all pipe connections to the boiler possess the proper strength in their fastenings, whether tapped into the boiler, a fitting, or flange riveted to the boiler. The inspector shall determine whether there is proper provision for the expansion and contraction of such piping and that there is no undue vibration tending to damage the parts subjected to it. This includes all steam and water pipes; and special attention should be given to the blowoff pipes with their connections and fittings, because the expansion and contraction due to rapid changes in temperature and water-hammer action bring a great strain upon the entire blowoff system. The freedom of the blowoff connection on each boiler shall be tested whenever possible by opening the valve for a few seconds, at which time it can be determined whether there is excessive vibration.

History: 1954 ACS 49, p. 90, Eff. Feb. 14, 1967.

R 408.4550 Water column piping.

Rule 550. The piping to the water column shall be carefully noted to see that there is no chance of water accumulating in the pipe forming the steam connection to the water column. The steam pipe should drain preferably toward the water column. The water-pipe connection to the water column must drain toward the boiler.

History: 1954 ACS 49, p. 91, Eff. Feb. 14, 1967.

R 408.4552 Position of water column relative to boiler fire surfaces.

Rule 552. The relative position of the water column to the fire surfaces of the boiler shall be observed to determine whether the volume is placed in accordance with code requirements. The attachments shall be examined to determine their operating condition.

History: 1954 ACS 49, p. 91, Eff. Feb. 14, 1967.

R 408.4554 Testing of water columns and gauge cocks.

Rule 554. If examination is made with steam on the boiler, the water columns and gauge glasses shall be observed to see that the connections to the boilers are free as shown by the action of the water in the glass. The water columns and gauge glasses shall be blown down on each boiler to determine definitely the

Digitized by Google Original from UNIVERSITY OF MICHIGAN

freedom of the connections to the boiler, as well as to see that the blowoff piping from the columns and gauge glasses are free. The gauge glasses shall be observed to see that they are clean and that they are properly located to permit ready observation. The freedom of the gauge cocks shall be determined by test.

History: 1954 ACS 49, p. 91, Eff. Feb. 14, 1967.

R 408.4556 Low-water cutoff controls.

Rule 556. (1) An automatically fired boiler, except a hot water supply boiler and except a boiler having a constant attendant, shall be equipped with an automatic low-water fuel cutoff so located as to automatically cut off the fuel supply when the surface of the water falls to a point not lower than the top of the lower water gauge glass nut. A low-water cutoff device for a hot water boiler shall be installed not lower than the lowest point allowed for the installation of this device on a steam boiler as determined by this rule.

(2) Such a fuel control device may be attached direct to a boiler or the tapped openings provided for attaching a water glass direct to a boiler, provided that such connections from the boiler are nonferrous tees or Y's not less than ½ inch pipe size between the boiler and the water glass so that the water glass is attached direct and as close as possible to the boiler; the straightway tapping of the Y or tee to take the water glass fittings, the side outlet of the Y or tee to take the fuel cutoff.

(3) Designs embodying a float and float bowl shall have a vertical straightway-valve drain pipe at the lowest point in the water-equalizing pipe connections by which the bowl and the equalizing pipe can be flushed and the device tested.

(4) A paddle type nonreversing flow switch may be used in lieu of a low-water cutoff on an individually automatically fired coil-type instantaneous hot water heating boiler with intermittent pump operation. The flow switch shall be installed on the supply outlet downstream of the relief valve and upstream of the stop valve.

History: 1954 ACS 49, p. 91, Eff. Feb. 14, 1967; 1954 ACS 56, p. 28, Eff. Nov. 14, 1968.

R 408.4559 Baffling in water-tube boilers.

Rule 559. In water-tube boilers it should be noted as far as possible whether or not the proper baffling is in place. The absence of baffling often causes high temperatures on portions of the boiler structures which are not intended for such temperature, and from this a dangerous condition may result. The location of combustion arches with respect to tube surfaces shall be noted to make sure they do not cause the flame to impinge on a particular part of a boiler and produce overheating of the material and consequent danger of rupture.

History: 1954 ACS 49, p. 92, Eff. Feb. 14, 1967.

R 408.4561 Localization of heat.

Rule 561. Localization of heat brought about by improper or defective burner or stoker installation, or operation creating a blowpipe effect upon the boiler, shall be condemned.

History: 1954 ACS 49, p. 92, Eff. Feb. 14, 1967.

R 408.4566 Inspection and testing of safety and relief valves.

Rule 566. The safety and relief valves are the most important attachments on the boiler and they shall be inspected with the utmost caution. There shall be no accumulation of rust, scale or other foreign substances in the casings which will interfere with the free operation of the valves. The setting and freedom of the safety and relief valves shall be tested preferably by raising the pressure to the

blowing-off point; or if this cannot be done, the valves shall be tested by means of the try levers to ascertain if they are free.

History: 1954 ACS 49, p. 92, Eff. Feb. 14, 1967.

R 408.4569 Safety valve discharge pipe.

Rule 569. Where a safety valve has a discharge pipe, the inspector shall determine at the time the valve is operating whether or not the drain opening in the discharge pipe is free and in accordance with the code requirement. If the inspector deems it necessary, in order to determine the freedom of discharge from a safety and relief valve, the discharge connection shall be removed.

History: 1954 ACS 49, p. 92, Eff. Feb. 14, 1967.

R 408.4570 Safety valve setting on boilers with direct feed.

Rule 570. Where a boiler is supplied with feedwater directly from water mains without the use of feeding apparatus, not to include return traps, the safety valve shall not be set at a pressure higher than 94% of the lowest pressure obtained in the supply main feeding the boiler.

History: 1954 ACS 81, p. 48, Eff. Nov. 7, 1974.

R 408.4572 Stop valve between boiler and safety or relief valve.

Rule 572. Under no circumstances shall a stop valve be permitted between a steam boiler and its safety and relief valves.

History: 1954 ACS 49, p. 92, Eff. Feb. 14, 1967.

R 408.4575 Replacement of heating or process boiler safety and relief valves.

Rule 575. When it becomes necessary to replace safety or relief valves on low pressure heating or process boilers for any reason, the replacement shall be made with other than top-outlet type valves.

History: 1954 ACS 49, p. 92, Eff. Feb. 14, 1967.

R 408.4578 Pressure gauges.

Rule 578. The pressure gauges on all boilers shall be removed and the inspector shall test them and compare their readings with a standard test gauge. The readings of the pressure gauges shall be observed and compared when making an inspection with steam on the boiler, where several boilers are in service connected to a common steam main. The location of the pressure gauge shall be noted to see whether it is exposed to high temperature externally or to heat internally due to lack of protection with a proper siphon or trap. The inspector shall see that provisions are made for blowing out the pipe leading to the pressure gauge.

History: 1954 ACS 49, p. 92, Eff. Feb. 14, 1967.

R 408.4580 Imperfect repairs.

Rule 580. When repairs have been made, especially tube replacements, the inspector shall observe whether the workmanship is done properly and safely. Excessive rolling of tubes, where they are accessible, is a common fault of inexperienced workmen. However, when it is difficult to reach the tube end and observe the extent of rolling, they are frequently under-rolled, from which insufficient rolling separation of the parts is almost inevitable.

History: 1954 ACS 49, p. 92, Eff. Feb. 14, 1967.

R 408.4581 Rerolling tubes.

Rule 581. Rerolling a tube is considered maintenance, except rerolling a tube required as a result of an accident is considered a repair. This repair work shall require a repair permit and shall be performed by a licensed repairer.

History: 1954 ACS 56, p. 28, Eff. Nov. 14, 1968.

R 408.4583 Hydrostatic test to determine seriousness of defects.

Rule 583. When there is a question or doubt about the extent of a defect found in a boiler, the inspector, in order to more fully decide upon its seriousness, shall cause the application of hydrostatic pressure under the code provisions.

History: 1954 ACS 49, p. 92, Eff. Feb. 14, 1967.

R 408.4586 Hydrostatic pressure and water temperature.

Rule 586. (1) A hydrostatic pressure test, when applied to boilers of riveted or welded construction, except locomotive boilers, shall not exceed 1½ times the maximum allowable working pressure. Hydrostatic pressure applied to locomotive boilers shall not exceed 1¼ times the maximum allowable working pressure. During the hydrostatic pressure test, the safety valve or valves shall be removed or each valve disk shall be held down by means of a testing clamp and not by applying additional load to the spring with the compression screw. It is suggested that the minimum temperature of the water used to apply a hydrostatic test be not less than 70 degrees Fahrenheit, but the maximum temperature shall not exceed 160 degrees Fahrenheit.

(2) When hydrostatic test is to be applied to existing installations, the pressure shall be as follows:

(a) For all cases involving tightness, the pressure shall be equal to the release pressure of the safety valve or valves having the highest release setting.

(b) For all cases involving the question of safety, the pressure shall be equal to 1½ times the maximum allowable working pressure, except for locomotive boilers, in which case it shall be 1¼ times the maximum allowable working pressure.

History: 1954 ACS 49, p. 93, Eff. Feb. 14, 1967.

R 408.4590 Inspectors to make thorough inspections.

Rule 590. The inspector shall be well informed of the natural and neglectful causes of defects and deterioration of boilers. He shall be conscientious and extremely careful in his observations, taking sufficient time to make the examinations thorough in every way, taking no one's statement as final as to conditions not observed by him, and, in the event of inability to make thorough inspection, he shall note it in his report and not accept the statements of others. The inspector shall make a general observation of the condition of the boiler room and apparatus, as well as of the attendants, as a guide in forming an opinion of the general care of the equipment. He shall weigh very carefully the condition of any defect in order to determine its relation to, or influence upon, the safety of the inspected boiler. He shall question the responsible employees as to the history of old boilers, their peculiarities and behavior, ascertain what, if any, repairs have been made and, if any, their character and he shall investigate and determine whether they were made properly and safely.

History: 1954 ACS 49, p. 93, Eff. Feb. 14, 1967.

PART 6. REPAIR OF BOILERS

REPAIR BY RIVETING

R 408.4601 Stress carried by shell plates and patch seams.

Rule 601. The first thing to be determined when proceeding with the design of a patch is whether or not all of the end stress is to be carried by the patch; that is,

Digitized by Google

Open Access, Google-digitized / http://www.hathitrust.org/access_use#oa-google

whether the heads are supported or unsupported. In drums of water-tube boilers, the full endwise stress has to be carried by the shell plates and the patch seams; whereas in shells of horizontal-tubular boilers some of the endwise stress is carried by the through rods, tubes or flues and consequently there is less stress on the shell and patch seams. It is evident then that a patch in the 1 case need not have the same width for a given length as in the other case. In other words, different constants may be used in determining the width. Tables 3 and 4 take into account these 2 different conditions.

History: 1954 ACS 49, p. 93, Eff. Feb. 14, 1967.
Editor's note: The tables and figures referred to in Part 6 follow R 408.4697.

R 408.4602 Relation of angle of patch to diameter of boiler.

Rule 602. The angle of a patch when laid out in the flat does not change when formed to the curvature of the boiler; therefore, the diameter of the boiler does not need to be taken into consideration in the design when the provisions of R 408.4603 are met.

History: 1954 ACS 49, p. 93, Eff. Feb. 14, 1967.

R 408.4603 Forming and thickness of patches.

Rule 603. A patch shall be laid out in the flat and then carefully formed to accurately fit the contour of the boiler where it is to be applied. Patch plates shall be of the same thickness as the original thickness of the plate they replace.

History: 1954 ACS 49, p. 93, Eff. Feb. 14, 1967.

R 408.4604 Seams exposed and not exposed to products of combustion.

Rule 604. Seams exposed to the products of combustion shall be single-riveted lap construction. Seams not exposed to the products of combustion shall be double-riveted or constructed similar to the original seams of the boiler.

History: 1954 ACS 49, p. 93, Eff. Feb. 14, 1967.

R 408.4605 Size and shape of patches.

Rule 605. Patches exceeding 24 inches in length shall have the proper width as determined by the rules herewith. Patches 24 inches and less in length shall be triangular, crescent, diamond or oval in form and the width, W, shall be at least twice the length, L.

History: 1954 ACS 49, p. 94, Eff. Feb. 14, 1967.

R 408.4606 Shortening width of patches extending high.

Rule 606. If it is found that a patch would extend extremely high, it may be shortened in width to the extent that not more than 4 rivets will be in a longitudinal line, as shown in figure 4. Likewise, to avoid the necessity of calking in sharp corners, a patch may be shortened in width to the extent that not more than 4 rivets will be in a longitudinal line, as shown in figure 4.

History: 1954 ACS 49, p. 94, Eff. Feb. 14, 1967.

R 408.4607 Patches 60 inches or more in length.

Rule 607. If it is found that a patch would have to be 60 inches or more in length, consideration shall be given to the use of a sheet having a width equivalent to ⅝ of the circumference of the boiler, and the longitudinal seam shall be of a design similar to the design of the original seam of the boiler.

History: 1954 ACS 49, p. 94, Eff. Feb. 14, 1967.

R 408.4608 Patches over 24 inches; triangular or diamond shape.

Rule 608. In laying out new patches over 24 inches long, they shall be triangular or diamond in shape as may be required for the particular job, with definite straight-line sides but with the corners rounded out to permit proper calking, as illustrated in figures 3, 4, 5, and 6. The length, L, and the width, W, are also shown in figures 3, 4, 5, and 6.

History: 1954 ACS 49, p. 94, Eff. Feb. 14, 1967.

R 408.4609 Rivets, patch bolts or staybolts in riveted stayed surfaces.

Rule 609. Rivets, patch bolts, or staybolts may be used in riveted seam surfaces that are stayed or braced provided at least 1 rivet or patch bolt is used between adjacent staybolts. The riveting shall be completed first. Rivet holes may be countersunk in patches on shells that have braced heads, if desired, without materially affecting the calculated strength of the patch. The angle of the chamfer with center line of the rivet hole shall not exceed 45 degrees, and the depth shall not exceed half the thickness of the plate.

History: 1954 ACS 49, p. 94, Eff. Feb. 14, 1967.

R 408.4610 Determining effective diagonal efficiency.

Rule 610. Where patches have already been applied, the problem is to determine the effective diagonal efficiency. If the seams are all rounded, that is to say, the patch is crescent or oval in shape, the length, L, shall be taken between the center of the extreme 2 rivets on the longitudinal center line and the width, W, between the center of the extreme 2 rivets on the girthwise center line, as shown in figures 7 and 8.

History: 1954 ACS 49, p. 94, Eff. Feb. 14, 1967.

R 408.4611 Material.

Rule 611. Patch material shall be of firebox or flange quality steel depending upon the plate it replaces. All material shall conform to the specifications of section II, ASME boiler and pressure vessel code. The repair shop shall be required to produce a copy of the manufacturer's mill test report of the material to be used.

History: 1954 ACS 49, p. 94, Eff. Feb. 14, 1967.

R 408.4612 Material to contain heat number.

Rule 612. The material used for alterations and both riveted and welded repairs shall contain the heat number. If only part of a plate is required and this part does not contain the heat number, the heat number should be transferred to the patch plate in the presence of a commissioned boiler inspector or a representative of the plate manufacturer before the plate is cut. Rivets, patch bolts, or staybolts shall be of material conforming to the requirements of the applicable code section.

History: 1954 ACS 49, p. 94, Eff. Feb. 14, 1967.

R 408.4613 Workmanship.

Rule 613. All patch plates shall be placed inside a boiler shell or drum where exposed to the products of combustion, and where deposits would be pocketed. Where a patch plate includes the part to which the blowoff is attached, the patch shall be placed on the outside.

History: 1954 ACS 49, p. 94, Eff. Feb. 14, 1967.

R 408.4614 Defective material exposed to products of combustion.

Rule 614. All defective material exposed to the products of combustion shall be removed and properly trimmed to provide for neat workmanship in attaching the patch. Defects not exposed to the products of combustion need not be removed unless necessary to insure a workmanlike job.

History: 1954 ACS 49, p. 95, Eff. Feb. 14, 1967.

R 408.4615 Setting back distorted sheets.

Rule 615. A distorted sheet which is to be patched shall first be set back straight as much as possible before proceeding with the cutting out of the plate so that the patch may be kept as small as possible.

History: 1954 ACS 49, p. 95, Eff. Feb. 14, 1967.

R 408.4616 Manner of beveling edges and driving rivets.

Rule 616. The edge of a patch shall be beveled by planing, chipping, or gas cutting before applying it to the boiler. Rivets shall be driven by gun, if at all possible.

History: 1954 ACS 49, p. 95, Eff. Feb. 14, 1967.

R 408.4617 Size of rivet holes.

Rule 617. All rivet holes shall be drilled full size or the holes may be punched not to exceed ¼ inch less than full size for plates over $\frac{5}{16}$ inch, and ⅛ inch less for plates $\frac{5}{16}$ inch or less in thickness and then reamed to full size with the patch in place. Rivet holes are usually $\frac{1}{16}$ inch greater in diameter than the normal diameter of the rivet, but a $\frac{1}{32}$ inch difference is preferable when the rivets are of uniform size.

History: 1954 ACS 49, p. 95, Eff. Feb. 14, 1967.

R 408.4618 Seal welding.

Rule 618. If seal welding is used, it shall be laid in a single bead with a throat thickness not less than $\frac{3}{16}$ inch nor more than $\frac{5}{16}$ inch. The patch shall be tight before seal welding under a hydrostatic test equal to the operating pressure.

History: 1954 ACS 49, p. 95, Eff. Feb. 14, 1967.

R 408.4619 Scarfing edges.

Rule 619. When 3 plates must be lapped at the corners of a patch, the middle plate shall be scarfed carefully to a feather edge the entire width of the lap, as shown in figure 3.

History: 1954 ACS 49, p. 95, Eff. Feb. 14, 1967.

R 408.4620 Hydrostatic test.

Rule 620. Upon completion of repairs, a hydrostatic test of 150% of the operating pressure shall be applied; the patch seams shall be tight at this pressure.

History: 1954 ACS 49, p. 95, Eff. Feb. 14, 1967.

R 408.4621 Determining length and width of patch and efficiencies.

Rule 621. (1) The length, L, of the patch shall be determined. The dimension is, of course, governed by the area of the defect.

(2) The normal efficiency, e, of the single-riveted seam that is to be used in the patch shall be determined from table 2. This is governed by the thickness of plate and diameter of rivet holes.

Digitized by Google Original from UNIVERSITY OF MICHIGAN

Generated for Susan K Kendall (Michigan State University) on 2018-09-05 16:48 GMT / http://hdl.handle.net/2027/mdp.49015002898253

(3) Determine its width girthwise. This is found by multiplying the length by the constant C as shown in table 3 or 4, depending upon the type of boiler to be repaired. These tables give a constant C for a given efficiency, e, of patch and efficiency, E, of longitudinal seam (see R 408.4622).

(4) To determine the longitudinal efficiency of an existing patch, L and W, the pitch, p, and diameter of rivet, d, shall be measured. W divided by L will give the constant C. Table 2 will give e. Then under e in table 3 or 4, depending upon the type of boiler to be repaired, find the constant C. Then whatever is E in the first column is the longitudinal or allowed efficiency of the patch seam (see R 408.4623).

History: 1954 ACS 49, p. 95, Eff. Feb. 14, 1967.

EXAMPLES

R 408.4622 Design of patch for horizontal-tubular boiler.

Rule 622. A patch is to be placed in the fire sheet of a horizontal return tubular boiler having a shell plate 7/16 inch thick, a longitudinal seam efficiency of 74% and a length of patch of 36 inches. Find the width W of patch to be applied so that there will not be any reduction in pressure, using a single-riveted seam of normal design. Referring to table 2, it is found that a 7/16 inch plate with 15/16 inch diameter rivet holes, pitch 2¼ inches, gives a seam efficiency of 56%. Referring to table 3, E-0.74 and e-0.56 give a constant C-1.75; then width W = L x C = 36 x 1.75 = 63 inches.

History: 1954 ACS 49, p. 95, Eff. Feb. 14, 1967.

R 408.4623 Pressure allowance on an existing patch.

Rule 623. A crescent-shaped patch has already been installed on a horizontal-tubular boiler. It is found to be 30 inches long and 48 inches wide. The seam is noted to be single-riveted with 13/16 inch rivet holes pitched 1 15/16 inch. The boiler shell plate is ⅜ inch thick. The longitudinal seam is of the double-riveted, butt-strap type having an efficiency of 82%. The safety valve is set for 125 pounds pressure. What maximum pressure should be allowed on the boiler? Referring to table 2, it shows that the normal efficiency of the patch seam is 57%. If the efficiency is not found in the table, refer to any other available table or determine it in the customary manner described in paragraphs A-1 and A-2 of the appendix of the ASME power boiler code. Divide the width of the patch, W = 48 inches, by the length, L = 30 inches, to find the constant C = 48/30 = 1.60. Follow down column 0.57 of table 3 until 1.60 is found. It will be noted that this is somewhat between 1.56 and 1.62 representing E somewhere between 0.72 and 0.73. As the difference between 1.56 and 1.62 is 6, and the difference between 1.56 and 1.60 is 4, E will be 0.72 plus 4/6 of 0.01 which is 0.7266. The pressure approved varies directly as the seam efficiency. Accordingly, P = 0.7266/0.82 x 125 = 110 pounds. If this allowance interferes with the operation of the plant, the patch will have to be replaced by a new one with proper dimensions giving a diagonal efficiency of 82%.

History: 1954 ACS 49, p. 96, Eff. Feb. 14, 1967.

R 408.4624 Design of patch for water-tube boiler.

Rule 624. Sections of the plate having a total length of 36 inches, measured at the pitch line, are to be removed on each side of a girth seam. The patch is to be diamond or oval in shape. The shell plate is 7/16 inch thick and the longitudinal seam is double-riveted, butt-strap construction, having an efficiency of 82%. What

Generated for Susan K Kendall (Michigan State University) on 2018-09-05 16:48 GMT / http://hdl.handle.net/2027/mdp.49015002898253
Open Access, Google-digitized / http://www.hathitrust.org/access_use#oa-google

should be the width of the patch for maintaining the same pressure allowance? Table 2 shows that a single-riveted lap seam with 7/16 inch plate, 15/16 inch diameter rivet holes and 2¼ inch pitch has a normal efficiency of 56%. Table 4 shows for E = 0.82 and e = 0.56, the constant C is 3/16. Then, width W = C x L ÷ 2 W = 3/16 x 36 ÷ 2 = 56.88, say 57 inches.

History: 1954 ACS 49, p. 96, Eff. Feb. 14, 1967.

REPAIR BY FUSION WELDING

R 408.4625 Scope of rules for repair by welding.

Rule 625. These rules are for application when repairs are to be made to boilers by welding. Should a repair outside the scope of these rules be deemed feasible by the authorized inspector, such a repair may be undertaken only with the full knowledge and consent of the boiler division, bureau of safety and regulation, department of labor. It is the intent of these rules that the repairs made in accordance therewith shall be as safe as the original construction. These rules are not intended to prohibit repairs from being made strictly in accordance with the rules in the ASME code.

History: 1954 ACS 49, p. 96, Eff. Feb. 14, 1967.

R 408.4627 Welding of cast iron boilers prohibited.

Rule 627. The welding of cast iron boilers at any time or for any purpose is prohibited.

History: 1954 ACS 49, p. 96, Eff. Feb. 14, 1967.

R 408.4629 Rescinded.

History: 1954 ACS 49, p. 96, Eff. Feb. 14, 1967; rescinded 1954 ACS 61, p. 55, Eff. Feb. 16, 1970.

R 408.4631 Welding procedures.

Rule 631. Licensed boiler repairers making repairs under these rules shall have available for the inspector a written welding procedure specification that must be followed in making the necessary repair and also a record of procedure qualification tests. Welding procedure specifications shall have been prepared and qualified in accordance with the requirements of section IX, welding qualifications of the ASME code.

History: 1954 ACS 49, p. 96, Eff. Feb. 14, 1967.

R 408.4633 Welder qualifications.

Rule 633. Licensed boiler repairers shall have available for the inspector records of welder qualification tests showing that each welder to be employed on the work has satisfactorily passed tests as prescribed in section IX of the ASME code for the type of filler metal to be used and for each position in which he will be called upon to operate in making the repair.

History: 1954 ACS 49, p. 97, Eff. Feb. 14, 1967.

R 408.4635 Welding tests; licensed boiler repairers' responsibility.

Rule 635. Preparation of welding procedure specifications and the conducting of tests of procedures and welders are the responsibility of the licensed boiler repairer. Before repairs are started, the inspector shall satisfy himself, by examination of the written welding procedure and records of qualification tests, that procedures and welders are properly qualified. The inspector shall have the

right to call for and witness the making of test plates by any welder at any time and to observe the physical testing of such plates.

History: 1954 ACS 49, p. 97, Eff. Feb. 14, 1967; 1954 ACS 81, p. 48, Eff. Nov. 7, 1974.

R 408.4637 Reports of welded repairs.

Rule 637. Licensed boiler repairers making welded repairs in accordance with these rules shall furnish the boiler division, bureau of safety and regulation, department of labor, with 2 copies of a report of a welded repair. The report shall contain an affidavit signed by the licensed repairer certifying that the reported repair was made in strict conformity with all of the requirements of these rules. The licensed boiler repairer shall also furnish the boiler owner or user with a copy of the report of welded repair and shall retain a copy in his files for review by an authorized inspector.

History: 1954 ACS 49, p. 97, Eff. Feb. 14, 1967; 1954 ACS 61, p. 57, Eff. Feb. 16, 1970.

R 408.4639 Limitation of carbon content of weldable steels.

Rule 639. The repairs that may be made under these rules are limited to steels having known weldable quality and are further limited to carbon steels having a carbon content of not more than 0.35% and low alloy steels having a carbon content of not more than 0.25%.

History: 1954 ACS 49, p. 97, Eff. Feb. 14, 1967.

R 408.4641 High alloy and nonferrous material.

Rule 641. The welding of high alloy material and nonferrous material shall be done in accordance with the requirements of the ASME code.

History: 1954 ACS 49, p. 97, Eff. Feb. 14, 1967.

R 408.4643 Material to contain heat number.

Rule 643. The material used for alterations and both riveted and welded repairs shall contain the steel maker's heat number. If only part of a plate is required and this part does not contain the heat number, it shall be transferred to the patch plate in the presence of a commissioned boiler inspector or a representative of the plate manufacturer before the plate is cut. Material of rivets, patch bolts or staybolts shall be as required in section II of the ASME boiler and pressure vessel code.

History: 1954 ACS 49, p. 97, Eff. Feb. 14, 1967.

R 408.4645 Material thickness limited by welder test.

Rule 645. A welder shall not make repairs in a plate thickness in excess of that permitted under the qualification tests in section IX of the ASME code. A welder shall not make repairs on a material or in a thickness that is not permitted within his qualification tests.

History: 1954 ACS 49, p. 97, Eff. Feb. 14, 1967.

R 408.4647 Completed weld requirements.

Rule 647. Groove welds shall completely penetrate the thickness of the material being welded. If possible, welding shall be applied from both sides of the plate or a backing strip or ring may be used to insure complete penetration. Manually applied welds shall have a convex surface on both sides if applied on both sides of the plates being joined; or on 1 side if welding is applied from 1 side only. Valleys and undercutting at edges of welded joints shall not be permitted.

The reinforcement may be chipped, ground, or machined off flush with the base metal, if so desired, after the welding has been completed.

History: 1954 ACS 49, p. 97, Eff. Feb. 14, 1967.

R 408.4649 Repair of welds.

Rule 649. In making a repair to a weld that has failed in service, the defective weld shall be removed by chipping, grinding, or gouging until sound metal is reached on all sides. The resulting groove shall be filled as required by the applicable welding procedure.

History: 1954 ACS 49, p. 97, Eff. Feb. 14, 1967.

R 408.4651 Thermal stress relieving.

Rule 651. (1) In repairing carbon or low alloy steels, when required by these rules and considered necessary by the authorized inspector, thermal stress-relieving shall be applied to the completed work. The heat may be applied by any means that will raise the temperature of the material being heated gradually and uniformly to approximately 1,100 degrees Fahrenheit. (In the absence of more accurate means of determining temperature, a dull red glow in daylight will suffice.) This temperature shall be maintained for a period of 1 hour per inch of thickness of material.

(2) For circumferential joints, the area heated shall comprise a band extending completely around the cylinder and having a width on each side of the center line of the weld not less than 3 times the greatest width of the finished weld.

(3) For nozzles, the heated area shall comprise a circumferential area around the nozzle and welded attachment or reinforcement and shall extend at least 6 times the plate thickness beyond the welding which connects the nozzle or other attachment to the vessel.

(4) It should be noted that under certain conditions, thermal stress-relieving as outlined above may be inadvisable. In such cases any other method of stress-relieving acceptable to the authorized inspector may be used. Under certain conditions preheating may be necessary and required.

History: 1954 ACS 49, p. 98, Eff. Feb. 14, 1967.

R 408.4653 Rate of cooling.

Rule 653. Upon completion of the stress-relieving operation, the plate shall be allowed to cool at a rate not greater than 500 degrees Fahrenheit per hour divided by the maximum thickness of the welded part, in inches, but in no case more than 500 degrees Fahrenheit per hour. This rate of cooling shall be maintained until a temperature of approximately 600 degrees Fahrenheit is reached, after which normal cooling by exposure in a still atmosphere may be permitted.

History: 1954 ACS 49, p. 98, Eff. Feb. 14, 1967.

R 408.4655 Thermal stress-relieving of austenitic steels.

Rule 655. Thermal stress-relieving of austenitic steels is a controversial subject. It should not be attempted except in accordance with the recommendations of the manufacturer of the material or the requirements of the ASME code.

History: 1954 ACS 49, p. 98, Eff. Feb. 14, 1967.

R 408.4657 Stress-relieving by peening or other methods.

Rule 657. In lieu of thermal stress-relieving of carbon steels, peening or other methods acceptable to the authorized inspector may be employed.

History: 1954 ACS 49, p. 98, Eff. Feb. 14, 1967.

PERMISSIBLE WELDED REPAIRS

R 408.4659 Investigation of cause of cracks.

Rule 659. Before making repairs, care should be taken to investigate the cause of the cracks. Where circumstances indicate that welding the cracks is likely to result in recurrence, consideration should be given to cutting out the cracked area and installing a patch.

History: 1954 ACS 49, p. 98, Eff. Feb. 14, 1967.

R 408.4660 Cracks in unstayed shells, drums, or headers.

Rule 660. Cracks in unstayed shells, drums, or headers of power boilers may be repaired by welding if the cracks do not extend between rivet holes in a longitudinal seam or parallel to a longitudinal riveted seam within 8 inches measured from the nearest caulking edge. The total length of any 1 such crack shall not exceed 8 inches. Cracks of greater length may be welded, if the complete repair is radiographed and post-weld heat treated in accordance with R 408.4651.

History: 1954 ACS 49, p.98, Eff. Feb. 14, 1967; 1954 ACS 61, p. 57, Eff. Feb. 16, 1970.

R 408.4661 Fire cracks at girth seams.

Rule 661. Prior to repairing fire cracks by welding, the rivets to which such cracks may extend and the rivets on each side thereof shall be removed. Tack bolts shall be placed in alternate holes to hold the plate laps firmly. Cracks shall then be chipped, ground, or gouged to produce required welding groove. Cracks which extend past the inner edge of the plate lap shall be welded from both sides. Rivet holes shall be reamed before new rivets are driven.

History: 1954 ACS 49, p. 98, Eff. Feb. 14, 1967.

R 408.4662 Fire cracks at door openings.

Rule 662. Repairs of fire cracks at door openings shall be made as for fire cracks at girth seams as required in R 408.4661.

History: 1954 ACS 49, p. 98, Eff. Feb. 14, 1967.

R 408.4664 Patch bolts.

Rule 664. Patch bolts may be used where it is not possible to redrive rivets.

History: 1954 ACS 49, p. 99, Eff. Feb. 14, 1967.

R 408.4666 Circumferential cracks at girth seams.

Rule 666. Caution: Before attempting repairs, care shall be taken to investigate the cause of cracks of this type. Welding shall not be used if caustic embrittlement is indicated. Multiple or star cracks shall not be welded. If repair by welding is authorized, method for repairing fire cracks at girth seams shall be used.

History: 1954 ACS 49, p. 99, Eff. Feb. 14, 1967.

R 408.4667 Cracks between tube holes.

Rule 667. In repairing cracks of this type, welding shall be applied from both sides of the plate, if possible. The tubes to which the cracks extend and the tubes on each side of them shall be removed and the cracks chipped, ground, or gouged to provide the required welding groove. Tube holes shall be reamed before new tubes are installed.

History: 1954 ACS 49, p. 99, Eff. Feb. 14, 1967.

R 408.4668 Cracks in headers.

Rule 668. In repairing cracks of this type, welding may be applied from 1 side. A backing strip shall be used, if possible, to insure complete penetration at bottom of welding groove. For methods of repairing cracks in unstayed shells, drums and headers, see figure 9.

History: 1954 ACS 49, p. 99, Eff. Feb. 14, 1967.

R 408.4670 Cracks in unstayed furnaces.

Rule 670. Cracks of any length in unstayed furnaces of power boilers may be welded if the welds are post weld heat treated in accordance with these rules. Welds applied from both sides of the plate shall be used where possible. Welds applied from 1 side only shall be subject to the approval of the authorized inspector. A ductile weld free from slag inclusions, voids, cracks, or other defects shall be made. For methods of welding cracks in unstayed furnaces, see figure 10.

History: 1954 ACS 49, p. 99, Eff. Feb. 14, 1967; 1954 ACS 61, p. 57, Eff. Feb. 16, 1970.

R 408.4671 Preparing cracks for welded repair.

Rule 671. Cracks shall be chipped, ground, or gouged to provide required welding groove; root of weld shall be cleaned by chipping or gouging and the welding applied from both sides of the plate. Thermal stress-relieving is recommended.

History: 1954 ACS 49, p. 99, Eff. Feb. 14, 1967.

R 408.4672 Repair of cracks at knuckle or turn of flange of furnace opening.

Rule 672. Field repair of cracks at knuckle or turn of flange of furnace opening are prohibited unless specifically approved by the chief inspector.

History: 1954 ACS 49, p. 99, Eff. Feb. 14, 1967.

R 408.4674 Repair by welding of multiple or star cracks prohibited.

Rule 674. Cracks of any length in stayed areas may be repaired by fusion welding, except that multiple or star cracks radiating from rivet or staybolt holes shall not be welded.

History: 1954 ACS 49, p. 99, Eff. Feb. 14, 1967.

R 408.4675 Repair of cracks in stayed areas.

Rule 675. Before attempting repairs to cracks of this type the inner surface of the plate shall be carefully examined for possible excessive corrosion or grooving. Staybolts to which cracks may extend shall be removed and the cracks then chipped, ground, or gouged to provide the required welding groove. After welding, threaded staybolt holes shall be retapped and new staybolts properly driven and headed. Multiple or star cracks radiating from staybolt or rivet holes shall not be repaired by welding. For methods of repairing cracks in stayed plates, see figure 11.

History: 1954 ACS 49, p. 99, Eff. Feb. 14, 1967.

R 408.4676 Repairing corroded areas in stayed surfaces.

Rule 676. (1) Corroded areas in stayed surfaces may be built up by fusion welding provided the remaining plate has an average thickness of not less than 50% of the original thickness and further provided that the areas so affected are not sufficiently extensive to impair the safety of the object.

(2) If corroded area includes rivets or staybolts, they shall be removed before welding is applied. Threaded staybolt holes shall be retapped and rivet holes reamed before new staybolts are installed or rivets are driven. Welding shall not cover rivets or staybolt heads. For methods of reinforcing corroded areas in stayed plates, see figure 12.

History: 1954 ACS 49, p. 99, Eff. Feb. 14, 1967.

R 408.4677 Repairing corroded areas of tube sheets.

Rule 677. Corroded areas of tube sheets may be built up by welding where tubes act as stays. All tubes in such corroded areas shall be removed before welding is applied. After welding, the tube holes shall be reamed before new tubes are installed.

History: 1954 ACS 49, p. 99, Eff. Feb. 14, 1967.

R 408.4678 Repairing corrosion around manhole and handhole openings.

Rule 678. Corroded areas around manhole or handhole openings, in either stayed or unstayed plates, may be built up by fusion welding provided the average loss of thickness does not exceed 50% of the original plate thickness and also provided the area to be so repaired does not extend more than 3 inches from the edge of the hole. The corroded area shall be thoroughly cleaned before welding. No corroded area which exceeds in size the permissible area of an unreinforced opening or exceeding in average depth 50% of the plate required thickness shall be built up by welding. Larger areas in vessels which are subject to internal corrosion or erosion, but where the required thickness would be satisfactory for the pressure, may be built up under this rule. See figure 13.

History: 1954 ACS 49, p. 100, Eff. Feb. 14, 1967.

R 408.4679 Repairing corrosion in unstayed shells, drums, or headers.

Rule 679. Corroded areas in unstayed shells, drums, or headers may be built up by fusion welding provided that in the judgment of the authorized inspector, the strength of the structure has not been impaired.

History: 1954 ACS 49, p. 100, Eff. Feb. 14, 1967.

R 408.4680 Restoring original dimensions by welding.

Rule 680. (1) Edges of butt-straps, of plate laps and nozzles, or of connections attached by riveting may be restored to original dimensions by welding.

(2) Seal welding shall not be used except with the special approval of the authorized inspector and in no case where cracks are present in riveted areas. Indications of persistent or recurring leakage may be a sign of cracking. No welding shall be applied until a careful examination, including removal of rivets, if necessary, has been made of such areas.

(3) When approved by the authorized inspector, seal welding shall be applied according to the requirements of the applicable section of the ASME boiler and pressure vessel code. For methods of seal welding calking edges, see figure 14.

History: 1954 ACS 49, p. 100, Eff. Feb. 14, 1967.

R 408.4682 Seal welding tubes.

Rule 682. (1) The ends of tubes in fire-tube and water-tube boilers may be seal welded provided they have not been reduced more than 10% in thickness and the requirements of par. PFT-11 and PFT-12(b) of the ASME power boiler code or par. HW-713 of the ASME heating boiler code, whichever is applicable, are satisfied.

(2) Seal welding shall be applied in 1 light layer, if practicable, but not more than 2 layers should be used. Throat dimension shall not exceed 5/16 inch.

(3) In water-tube boilers, tubes may be seal welded on inside or outside of tube sheet. Flaring may be omitted if tube ends are seal welded.

(4) In fire-tube power boilers the requirements of par. PFT-12(b) of the ASME power boiler code shall be complied with. For methods of seal welding tube ends, see figure 15.

History: 1954 ACS 49, p. 100, Eff. Feb. 14, 1967.

R 408.4683 Re-ending and piecing tubes.

Rule 683. Re-ending or piecing tubes or pipes in either fire-tube or water-tube boilers is permitted provided the thickness of the tube or pipe has not been reduced by more than 10% from that required by the ASME code for the pressure to be carried. In all cases, the requirements of par. PW-27 and PW-28 (a), (b), (c), and (d) of the ASME power boiler code shall be met.

History: 1954 ACS 49, p. 100, Eff. Feb. 14, 1967.

R 408.4684 Quality and thickness of patch material.

Rule 684. The material used for patches shall be of the same general quality and have at least the minimum physical properties of the plate to be patched. The thickness of any patch shall be at least equal to, but not more than 1/8 inch greater than, the plate being patched.

History: 1954 ACS 49, p. 101, Eff. Feb. 14, 1967.

R 408.4686 Flush or butt-welded patches in unstayed areas.

Rule 686. Flush or butt-welded patches in unstayed shells, drums, or headers of power boilers shall be radiographed and stress-relieved to conform to the requirements of the ASME power boiler code for new construction. Subject to the approval of the authorized inspector, peening or other methods of stress-relieving may be substituted for thermal stress-relieving. Subject to compliance with this requirement, no limit is placed on dimensions or location of such patches nor on the thickness of the material. When the longest dimension of a patch does not exceed 16 times the plate thickness or a maximum of 8 inches, radiographing and stress-relieving are not required.

History: 1954 ACS 49, p. 101, Eff. Feb. 14, 1967.

R 408.4687 Fit-up of patches.

Rule 687. Before any effort is made to patch a bagged or deformed area, the original shape or curvature shall be restored as far as possible. Patch shall be rolled or pressed to proper shape or curvature. Edges shall align without overlap. Flush or butt-welded patches may be of any shape. An adequate radius shall, however, be provided at corners if patch is rectangular. Sharp corners shall be avoided. Patches shall be of material equal to the original construction in thickness and quality. For methods of flush or butt-welded patches in unstayed areas, see figure 16.

History: 1954 ACS 49, p. 101, Eff. Feb. 14, 1967.

R 408.4688 Flush or butt-welded patches in stayed areas.

Rule 688. (1) Flush or butt-welded patches or new sections may be applied to stayed plates without limitation of size or plate thickness.

Digitized by Google Original from UNIVERSITY OF MICHIGAN

(2) Patches shall be of material equal to the original in quality and thickness. Before applying patches of this type, defective metal shall be cut away until sound material is reached.

(3) Patch seams shall come between staybolt rows or riveted seams.

(4) In applying patches of this type, square corners shall be avoided. Ample radius shall be provided at corners.

(5) For methods of flush or butt-welded patches in stayed areas, see figure 17.

History: 1954 ACS 49, p. 101, Eff. Feb. 14, 1967.

R 408.4689 Lapped and fillet-welded patches.

Rule 689. (1) Lapped and fillet-welded patches may be applied to stayed plates provided they are not exposed to radiant heat. Lapped and fillet-welded patches may be applied on the pressure side of the sheet in unstayed areas provided the maximum diameter of the opening so repaired does not exceed 16 times the thickness of the plate, but in no case larger than 8 inches in diameter and fillet welds are applied on both sides of the patch. The patch must overlap the pressure side of the sheet a minimum of ½ inch.

(2) Patches shall be of material equal to the original in quality and thickness. If area to be patched includes a riveted seam, rivets shall be removed before patch is applied and new rivets driven before patch is welded at edges. New staybolts shall be installed in patched area. The heads of staybolts shall not be covered by welding.

(3) For methods of lap fillet-welded patches, see figure 18.

History: 1954 ACS 49, p. 101, Eff. Feb. 14, 1967.

R 408.4690 Replacing threaded stays with welded stays.

Rule 690. Threaded stays may be replaced by welded-in stays provided that in the judgment of the inspector the plate adjacent to the staybolt has not been materially weakened by deterioration or wasting away. All requirements of the applicable section of the ASME code governing welded-in stays shall be met, except that stress-relieving other than thermal may be used as provided in these rules.

History: 1954 ACS 49, p. 101, Eff. Feb. 14, 1967.

R 408.4691 Flush butt-welded head repair.

Rule 691. With this repair the old head is cut close to the point of tangency of the knuckle of the flange and the new head, previously drilled for tube holes and beveled for adequate welding groove, is butt-welded to flanged section of old head. Back-up ring inserted in sections if necessary shall be used to ensure welded penetration for full head thickness. See figure 19(1).

History: 1954 ACS 49, p. 101, Eff. Feb. 14, 1967.

R 408.4692 Lapped and fillet-welded head repair.

Rule 692. With this repair, the new head is lapped under the flange knuckle of old head, previously slotted as shown to admit new head, then fillet-welded at edge. See figure 19(2).

History: 1954 ACS 49, p. 102, Eff. Feb. 14, 1967.

R 408.4693 Segmental or pie-shaped butt-welded patch head repair.

Rule 693. Heads may be repaired with segmental or pie-shaped butt-welded patches, as shown in figure 19(3).

History: 1954 ACS 49, p. 102, Eff. Feb. 14, 1967.

R 408.4694 Repairing corroded manhole flange.

Rule 694. (1) A badly corroded manhole flange may be repaired by cutting out flanged section and inserting a ring-type frame as shown. Dimensions shall comply with requirements of par. PG-32 of the ASME power boiler code for power boilers and par. HG-323 of the ASME heating boiler code for heating boilers.

(2) Ring-type frame may be fabricated and stress-relieved in the shop, then welded in place. Rules for flush patches shall be complied with. Reinforcement weld dimensions and weld strength shall comply with the requirements of the ASME power boiler code. See figure 20.

History: 1954 ACS 49, p. 102, Eff. Feb. 14, 1967.

R 408.4695 Repair of handhole opening with reinforcing ring.

Rule 695. When corrosion has reduced thickness of plate around handhole opening by more than 50% (average), a reinforcing ring may be used as shown placed on the inside. See figure 20.

History: 1954 ACS 49, p. 102, Eff. Feb. 14, 1967.

R 408.4696 Furnace renewal.

Rule 696. The longitudinal seam in the furnace of a power boiler shall be double butt-welded and thermally stress-relieved. The final joint to each head may be stress-relieved by peening. The furnace may be welded into a riveted boiler by using adaptable end closures. A ringed furnace shall be thermally stress-relieved after longitudinal seam and rings have been applied. See figure 21.

History: 1954 ACS 49, p. 102, Eff. Feb. 14, 1967.

R 408.4697 Window patches in water tube power boilers.

Rule 697. (1) A window patch may be used, if necessary, to seal a hole cut in a water wall tube of a power boiler to provide access for welding the back side of a circumferential joint or to replace a small sharp bag.

(2) Window patches shall comply with the provisions of par. PW-27 and PW-28 of the ASME power boiler code.

(3) The patch shall be cut from tube of same size and thickness as the 1 being repaired. See figure 22.

History: 1954 ACS 49, p. 102, Eff. Feb. 14, 1967.

PART 7. BOILER BLOWOFF

R 408.4701 Construction in accordance with code and rules; reports.

Rule 701. (1) All blowoff tanks and blowoff separators for use in the state of Michigan shall be constructed in accordance with the ASME boiler and pressure vessel code, section VIII, "Unfired Pressure Vessels," and these rules and regulations herein provided for.

(2) The manufacturer must provide the boiler division with manufacturers' data reports. This data report signed by a licensed inspector holding a Michigan or national board commission, together with the stamp on the pressure vessel shall be the record denoting that the blowoff tank has been constructed in accordance with these rules and regulations.

(3) All blowoff tanks and blowoff separators for use in the state of Michigan shall be stamped "National Board," indicating inspection by a national board commissioned inspector and with the national board of boiler and pressure vessel inspector's serial number for the vessel. The words "National Board" may be abbreviated to "Nat'l. Bd." and "N.B."

History: 1954 ACS 49, p. 121, Eff. Feb. 14, 1967; 1954 ACS 56, p. 28, Eff. Nov. 14, 1968.

BLOWOFF TANKS, SEPARATORS, AND PIPING

R 408.4704 Blowoff tanks and separators; when required.

Rule 704. A blowoff tank or blowoff separator shall be required in the blowdown system of any steam boiler and any process boiler as defined in these rules and regulations except those exempted by R 408.4707 or except when the blowoff discharge is lead to a safe point as defined in R 408.4711. Blowoff separators may be used in conjunction with boilers designed for a maximum allowable pressure of 150 psig in lieu of boiler blowoff tanks required herein.

History: 1954 ACS 49, p. 121, Eff. Feb. 14, 1967.

R 408.4707 Blowoff tanks and separators; when not required.

Rule 707. A blowoff tank or blowoff separator is not required in the blowoff system of locomotive cranes, power shovels, floating equipment, or stationary steam boilers used solely for heating purposes at a pressure of 15 psig or less or any other steam boiler having not over 10 square feet of water heating surface designed for a pressure of 100 psig or less. The water from the blowdown system of such exempt boilers shall be directed to a safe point of discharge as defined in R 408.4711.

History: 1954 ACS 49, p. 121, Eff. Feb. 14, 1967.

R 408.4711 Safe discharge of water from blowdown system.

Rule 711. A safe point of discharge shall be a pond, marsh, or other similar points which are not subject to freezing and are enclosed and inaccessible.

History: 1954 ACS 49, p. 121, Eff. Feb. 14, 1967.

R 408.4715 Design, construction, and installation of blowoff tanks.

Rule 715. (1) A blowoff tank shall be designed and constructed in strict accordance with all of the applicable sections of the ASME boiler and pressure vessel code, dated 1977, which is incorporated herein by reference and may be inspected at the Lansing office of the department of labor. This code may be purchased at a cost of $1,200.00 from the American Society of Mechanical Engineers, 345 East 47th Street, New York, New York 10017, or from the

Michigan Department of Labor, 7150 Harris Drive, P.O. Box 30015, Lansing, Michigan 48909. The tank shall, in addition, be constructed of material not less than ⅜-inch thick with both heads preferably concave to pressure and in accordance with the design illustrated in figure 23 of this rule.

(2) The blowoff tank shall be sized in accordance with table 5.

(3) The blowoff tank shall be provided with adequate openings to facilitate internal cleaning and inspection.

(4) The blowoff tank shall be provided with the following minimum fittings and connection openings:

(a) A blowoff inlet connection.
(b) A water outlet connection.
(c) A vent connection.
(d) A drain connection.
(e) A cold water supply line.
(f) A thermometer connection.
(g) A pressure gauge.

(5) The blowoff tank shall be installed in a location that prevents it and its connected piping from freezing and shall be installed in a manner that permits both external and internal inspection.

History: 1954 ACS 49, p. 121, Eff. Feb. 14, 1967; 1954 ACS 67, p. 49, Eff. Mar. 31, 1971; 1954 ACS 86, p. 74, Eff. Jan. 16, 1976; 1954 ACS 98, p. 130, Eff. Jan. 24, 1979.

Editor's note: Figure 23, referred to in subrule (1), is located at the end of Part 6 of these rules. Table 5, referred to in subrule (2), follows R 408.4750.

R 408.4719 Size of pipe connections.

Rule 719. The size of the steam vent, blowoff line, and water outlet connections in the blowoff tank shall be in accordance with table 5.

History: 1954 ACS 49, p. 122, Eff. Feb. 14, 1967.

R 408.4723 Piping beyond boiler blow-off valves.

Rule 723. (1) The requirements for surface and bottom blowoff pipe and fittings beyond the boiler blowoff valves and to the blowoff tank or blowoff separator or other safe point of discharge shall be identical to the requirements of these rules for pipe and fittings between the boiler and the required blowoff valves. Installers under this rule shall not be required to hold an ASME symbol but shall hold a valid Michigan boiler installer's license. Any welded piping shall be documented on a Michigan MP-4A data form for fabricated blowoff piping.

(2) All continuous blowoff pipe and fittings from the boiler to the blowoff tank, blowoff separator, flash tank, or other point of discharge shall be of material required by these rules and shall be equal at least to the pressure requirements for the lowest set pressure of any safety valve on the boiler and with the corresponding saturated-steam temperature.

History: 1954 ACS 49, p. 122, Eff. Feb. 14, 1967; 1954 ACS 67, p. 50, Eff. Mar. 31, 1971; 1954 ACS 98, p. 132, Eff. Jan. 24, 1979.

R 408.4727 Blowoff tank inlet and wearing plate.

Rule 727. The inlet to the tank shall be located between the water level in the tank and the top of the tank. It is recommended that the blowdown enter tangentially and a wearing plate shall be attached to the shell of the tank, located symmetrically about the point of the water striking the shell of the tank. The wearing plate, equal to the thickness of the shell plate, shall extend approximately ⅓ of tank circumference, beyond the point of admission.

History: 1954 ACS 49, p. 122, Eff. Feb. 14, 1967.

R 408.4731 Blowoff tank vent.

Rule 731. The vent or steam escape line from the blowoff tank shall be attached to an opening placed at the highest possible location above the steam space. It shall be as direct as possible to the outside atmosphere without intervening stop valves and shall discharge at a point of safety not less than 7 feet above or distant from adjoining buildings, areaways, walkways, or fire escapes.

History: 1954 ACS 49, p. 122, Eff. Feb. 14, 1967.

R 408.4735 Blowoff tank water outlet line and aftercooler.

Rule 735. The water outlet line, if connected to discharge into a building sewer, shall contain an aftercooler to reduce the temperature of the water to at least 140 degrees Fahrenheit, if the admission of cooling water into the blowoff tank does not reduce the temperature of the discharged water to that temperature. The water outlet connection shall be connected to the blowoff tank so that the tank will remain half full of water after each boiler blowdown. The outlet connection shall have a water seal incorporated into its design. The vertical leg of the water seal shall extend to within 6 inches of the bottom of the tank.

History: 1954 ACS 49, p. 122, Eff. Feb. 14, 1967.

R 408.4739 Water discharge temperature not to exceed 140 degrees Fahrenheit.

Rule 739. If sufficient cooling water is not available to maintain the water discharge from the blowoff tank or blowoff separator at or below 140 degrees Fahrenheit, the blowoff valve shall be opened when blowing down, only to a point where the temperature of the discharged water will not exceed 140 degrees Fahrenheit. When adequate cooling water is available at the blowoff tank or blowoff separator, it shall be so connected to maintain the temperature of the discharge water at or below 140 degrees Fahrenheit, when the blowoff valves are full open. The water discharge through drains or blowoffs on low pressure boilers shall not enter a building sewer at temperatures exceeding 140 degrees Fahrenheit, and provisions shall be made for lowering higher temperatured water to this limit.

History: 1954 ACS 49, p. 122, Eff. Feb. 14, 1967.

R 408.4743 Discharge pressure from blowoff equipment.

Rule 743. The pressure of the blowdown leaving any type of blowoff equipment shall not exceed 5 psig.

History: 1954 ACS 49, p. 123, Eff. Feb. 14, 1967.

R 408.4747 Appliances.

Rule 747. Each blowoff tank installation shall be provided with the following appliances:

(a) A pressure gauge graduated from 0 to 30 psi shall be attached to the top of the steam space of the blowoff tank.

(b) A thermometer with a maximum scale reading of 300 degrees Fahrenheit shall be provided and it shall be located in the water outlet from the tank.

History: 1954 ACS 49, p. 123, Eff. Feb. 14, 1967.

R 408.4750 Special conditions.

Rule 750. Table 5 is based on using 100 feet of equivalent blowoff pipe and on the highest pressure in the particular category. If longer pipe and lower pressure than given in the category is used, the actual flow in pounds per hour may be

TABLE 7—Continued

Volumes In U.S. Gallons for Cylindrical Tanks with Semi-Elliptical Heads Horizontal or Vertical

Includes the Volume of the Shell
Includes the Volume of the Dished Part of Two Heads
Includes the Volume of the Length of Two Flanges as below

If Other Length of Flanges Are Used, Add or Deduct as the Case May Be, Using the "Volume Per Inch of Shell" Table Below.

Ins. I. D.	Vol. Per Foot of Shell	Vol. Per Inch of Shell	Flange Length Inches	LENGTH OF SHELL IN FEET AND INCHES

31½ Gallons Equal 1 Barrel

To find the capacity of tanks greater than the largest given in the table, look in the table for a tank of ½ of the given size and multiply its capacity by 4, or one of ⅓ its size and multiply its capacity by 9, etc.

BLOWOFF SEPARATORS

R 408.4756 Boiler blowoff separators.

Rule 756. A boiler blowoff separator consisting of a closed container equipped with internal baffles or an apparatus for the purpose of separating moisture from flash steam as it passes through the vessel may be used in conjunction with boilers designed for a maximum allowable pressure of not more than 150 psi.

History: 1954 ACS 49, p. 134, Eff. Feb. 14, 1967.

R 408.4762 Design and construction of blowoff separators.

Rule 762. A blowoff separator shall be designed and constructed as prescribed in the ASME boiler and pressure vessel code, section VIII, dated 1977, pressure vessels, which is incorporated herein by reference and may be inspected at the Lansing office of the department of labor. This section may be purchased at a cost of $65.00 from the American Society of Mechanical Engineers, 345 East 47th Street, New York, New York 10017, or from the Michigan Department of Labor, 7150 Harris Drive, P.O. Box 30015, Lansing, Michigan 48909.

History: 1954 ACS 49, p. 134, Eff. Feb. 14, 1967; 1954 ACS 67, p. 50, Eff. Mar. 31, 1971; 1954 ACS 86, p. 75, Eff. Jan. 16, 1976; 1954 ACS 98, p. 132, Eff. Jan. 24, 1979.

R 408.4768 Inspection at place of manufacture.

Rule 768. The blowoff separator shall be inspected at the place of manufacture by a licensed boiler inspector holding a Michigan or national board commission.

History: 1954 ACS 49, p. 135, Eff. Feb. 14, 1967.

R 408.4774 Manufacturers' data reports.

Rule 774. The manufacturer shall provide the boiler division with manufacturers' data reports. This data report, signed by a licensed inspector, together with the stamp on the blowoff separator, shall be the record denoting that the blowoff separator has been constructed in accordance with these rules and regulations.

History: 1954 ACS 49, p. 135, Eff. Feb. 14, 1967.

R 408.4780 Size of separator; piping, venting, and water temperature.

Rule 780. The blowoff separator shall be sized by selecting a separator having the blowoff inlet connection equal to or greater than the size of the largest blowoff connection on any 1 boiler. Inlet piping, venting, and water outlet temperature of such a system shall be in accordance with R 408.4723, R 408.4727, R 408.4731, R 408.4735, and R 408.4739.

History: 1954 ACS 49, p. 135, Eff. Feb. 14, 1967.

R 408.4786 Inspection openings.

Rule 786. The blowoff separator shall be provided with openings to permit internal inspection, the minimum size and number to be in accordance with the requirements of the ASME boiler and pressure vessel code, section VIII, unfired pressure vessels, paragraph UG-46.

History: 1954 ACS 49, p. 135, Eff. Feb. 14, 1967.

R 408.4792 Fittings and connections.

Rule 792. The blowoff separator shall be provided with the following minimum fittings and connection openings:

(a) A blowoff inlet connection.
(b) A water outlet connection.
(c) A vent connection.
(d) A cold water supply.
(e) A thermometer connection with a thermometer having a maximum scale reading of 300 degrees Fahrenheit.
(f) A pressure gauge connection.

History: 1954 ACS 49, p. 135, Eff. Feb. 14, 1967.

R 408.4798 Installation.

Rule 798. The blowoff separator shall be installed in a location that will protect it and its connected piping from freezing and shall also be installed in a manner that will permit both external and internal inspections.

History: 1954 ACS 49, p. 135, Eff. Feb. 14, 1967.

PART 8. CONTROLS

R 408.4801 Boiler burners and controls.

Rule 801. (1) The safe operation of automatically fired boilers depends upon reliable and proper operation and sequencing of the control equipment. Tests shall be performed by a plant operator in the presence of the inspector to demonstrate the proper functioning of the boiler and burner control equipment in accordance with the manufacturer's recommended sequence of control operations. In the event there are any malfunctions or doubt as to the safe operation of the equipment, the inspector shall require servicing of the equipment by authorized service personnel. Under no circumstances is the inspector to make any adjustments or repairs.

(2) Items to be given particular attention are:

(a) Pressure limit or temperature limit controls.
(b) Low water cutoff.
(c) Flame safeguard.
(d) Automatic ignition.
(e) Electrically operated oil and gas valves.
(f) Air and fuel pressure interlock controls.

History: 1954 ACS 49, p. 135, Eff. Feb. 14, 1967.

FUEL CUTOFFS AND FEEDWATER REGULATORS

R 408.4851 Applicability of rules.

Rule 851. (1) The following rules are intended to apply to all types of automatic electric low-water fuel cutoffs and electrically controlled feedwater-regulating devices used on boilers, as required by these rules.

(2) Where controls such as electrodes, probes, or other types are mounted directly into the boiler shell, the paragraphs in the rules relating to floats, float bowls, and piping shall not apply, but the operating level specified shall apply to controls of all types.

History: 1954 ACS 49, p. 136, Eff. Feb. 14, 1967.

R 408.4853 Marking of maximum allowable working pressure.

Rule 853. All automatic electric low-water fuel cutoff devices and electrically operated feedwater-regulating devices shall be plainly marked to indicate the maximum allowable working pressure. This pressure should appear on the name plate or housing, in letters not less than 5/16 inch in height; the pressure thus indicated shall be governed by the construction of the float balls, bellows, and other parts of the mechanisms.

History: 1954 ACS 49, p. 136, Eff. Feb. 14, 1967.

R 408.4856 Installation of feedwater-regulating devices.

Rule 856. The water feed valve, if operated from a float or electrode chamber, shall be sufficiently isolated or insulated from the boiler temperatures as to minimize the deposit of sludge or scale. All feedwater-regulating devices shall be connected to a boiler in such a manner that the feedwater will flow to the boiler through a separate connection and will not flow directly through the float chamber or through the water column or water gauge glass connections.

History: 1954 ACS 49, p. 136, Eff. Feb. 14, 1967.

R 408.4857 Feedwater piping and valves.

Rule 857. The feedwater piping and valve shall be large enough to permit the maintenance of a proper water level in the boiler under all conditions of operation. For boilers operated at pressures in excess of 15 psi, the feedwater piping between the automatic feed-regulating devices and the boiler shall be in accordance with the requirements of the ASME code, and stop and check valves shall be used as necessary (see par. PG-58 and PG-59). For boilers operated at 15 psi and less, the piping, fittings, and arrangement shall be in accordance with par. HG-705.

History: 1954 ACS 49, p. 136, Eff. Feb. 14, 1967.

R 408.4859 Low-water cutoff operation level.

Rule 859. The float or electrode chamber of an automatic electric low-water cutoff device shall be so located that the cutoff will operate to stop the firing of the boiler when the water level drops to a point not lower than the top of the lower gauge glass nut.

History: 1954 ACS 49, p. 136, Eff. Feb. 14, 1967; 1954 ACS 56, p. 29, Eff. Nov. 14, 1968.

R 408.4861 Installation of water gauge glasses.

Rule 861. Water gauge glasses for power boilers shall be installed in accordance with par. PG-63 and PFT-47; and for heating boilers in accordance with par. HG-602.

History: 1954 ACS 49, p. 136, Eff. Feb. 14, 1967.
Departmental note: Paragraph references in this and the following rules are to the ASME boiler and pressure vessel code.

R 408.4863 Low-water cutoffs for hot water boilers.

Rule 863. A low-water cutoff device for a hot water boiler shall be installed not lower than the lowest point allowed for the installation of this device on steam boilers, as determined by these rules.

History: 1954 ACS 49, p. 136, Eff. Feb. 14, 1967; 1954 ACS 56, p. 29, Eff. Nov. 14, 1968.

R 408.4865 Lowest permissible water level; low-water cutoff.

Rule 865. When 2 or more cutoffs are mounted on a single boiler, the lowest point of cutoff on the auxiliary control shall be not less than the lowest visible portion of the water gauge glass if the boiler is of the fire-tube type, or at the lowest permissible water level, on boilers of other types. The lowest permissible water level shall be as required by R 408.4869. Except where the float or electrode chamber serves also as a boiler water column, an operating mark or arrow shall be placed on the chamber to indicate the low-water cutoff level. The letters "LWC" (low-water cutoff) or other suitable terminology shall appear adjacent to the operating mark, and shall be cast, stamped, or otherwise permanently affixed. A low-water cutoff reference mark shall not be required on a float or electrode chamber which serves also as the water column, but such device shall be installed in accordance with par. PG-60 on power boilers and par. HG-603 on low-pressure heating boilers. If adjustability is provided in a control, the lowest limit of the low-water cutoff shall be as herein provided.

History: 1954 ACS 49, p. 136, Eff. Feb. 14, 1967.

R 408.4869 Minimum boiler water levels.

Rule 869. (1) Boilers of the horizontal fire tube type shall be so set that when the water is at the lowest reading in the water gauge glass, there shall be at least 3 inches of water over the highest point of the tubes, flues or crownsheets.

(2) Boilers of the water tube type shall be so set that the lowest visible part of the water glass shall be at least 2 inches above the lowest permissible water level which shall be that at which there will be no danger of overheating any part of the boiler when in operation at that level but which shall be not less than 6 inches above the bottom of any drum exposed to the products of combustion.

(3) Boilers shall be so designed that when minimum water levels are set as specified, there shall be adequate steam space to prevent carry over when the boilers are steaming at rated capacity.

History: 1954 ACS 49, p. 137, Eff. Feb. 14, 1967.

R 408.4871 Size and design of float chambers.

Rule 871. (1) Float chambers shall be of a size and design that will permit the accumulation of a moderate amount of sediment without impairing the proper functioning of the device.

(2) The design of the float or electrode chamber shall comply with the requirements of par. PG-8. Cast iron which complies with specification SA-278 may be used if the maximum working pressure of the boiler on which the device is installed does not exceed 250 psi. Malleable iron complying with specification SA-47 may be used if the boiler operating pressure does not exceed 350 psi. For higher pressures, steel complying with the applicable ASME code specifications shall be used. The design pressure shall be cast or stamped on each chamber, in letters not less than 5/16 inch in height.

History: 1954 ACS 49, p. 137, Eff. Feb. 14, 1967.

R 408.4873 Material, design, and testing of floats.

Rule 873. The floats shall be of corrosion-resisting material, preferably Monel or stainless steel, and shall have as great a displacement as possible to insure operation of the mechanism controlling the feed valve or low-water cutoff device. All floats shall be tested by the application of an external pressure equal to at least twice the maximum operating pressure of the boiler on which the device is to be installed. All operating parts exposed to water or steam shall be of a suitable corrosion-resisting material.

History: 1954 ACS 49, p. 137, Eff. Feb. 14, 1967.

R 408.4876 Electrical devices and wiring; ratings and installation.

Rule 876. (1) Electrical devices shall bear the approval of the underwriters' laboratories, or other nationally recognized inspection board or laboratories, and shall not carry loads in excess of the rating established by such organizations.

(2) Installation wiring shall conform to the national electrical code. Oil-, heat-, and water-resisting wiring suitable for boiler control service shall be used in installing all electrically operated feed-regulating or automatic electric low-water cutoff devices covered by these rules.

(3) Such devices shall be designed and located in a manner that will permit easy accessibility for cleaning, repairing, testing, and inspection. Installation diagrams and instructions shall be furnished by the manufacturer.

(4) All such devices for power boilers shall be installed in accordance with par. PG-60 and for heating boilers in accordance with par. HG-603.

History: 1954 ACS 49, p. 137, Eff. Feb. 14, 1967.

R 408.4879 Steam and water connections to float chambers.

Rule 879. The steam connections to a float chamber, including piping, fittings, and valves, shall be arranged so there will be no sag or pocket in the piping which might permit the accumulation of water. The steam connections to a float chamber and the water connection to the drains from a float chamber, including piping, fittings, and valves, shall comply with the requirements of par. PG-5, PG-9, PG-27, PG-58, PG-59, and PW-41. Where practicable, all connections and fittings at right-angle turns shall be provided with cross fittings having removable plugs for cleaning purposes. The upper surface of the water connection shall not be above the lowest permissible water level of the boiler, and no part of the connection shall be above the point of its attachment to the float chamber.

History: 1954 ACS 49, p. 137, Eff. Feb. 14, 1967.

R 408.4882 Minimum size of connecting pipes; shutoffs.

Rule 882. The minimum size of pipes connecting a water column to a boiler shall be 1 inch. Shutoffs, except as prohibited in ASME code par. HG-603, when used in the connecting pipes, shall be either outside-screw-and-yoke or lever-lifting type gate valves, or stop cocks having levers permanently fastened thereto and marked in line with the passageway, or of such other through construction as to prevent stoppage by deposits of sediment, and also constructed to indicate by the position of the operating mechanism whether open or closed. Such valves or cocks shall be locked or sealed open. Stop cocks when used shall be of a type having the plug held in place by a guard or gland.

History: 1954 ACS 49, p. 138, Eff. Feb. 14, 1967; 1954 ACS 56, p. 29, Eff. Nov. 14, 1968.

R 408.4885 Outlet connections on float chambers and connecting pipes.

Rule 885. No outlet connections, except for damper regulators, pressure controls, water columns, drains, or steam gauges, shall be placed on the float chamber or on the pipes connecting the float chamber to the boiler on which it is mounted.

History: 1954 ACS 49, p. 138, Eff. Feb. 14, 1967.

R 408.4888 Float chamber drain connections.

Rule 888. Float electrode chambers of these devices shall be equipped with suitable drain connections of not less than ¾-inch pipe size. This drain shall be piped to a safe point of discharge.

History: 1954 ACS 49, p. 138, Eff. Feb. 14, 1967.

R 408.4890 Testing.

Rule 890. The operation of the device shall be manually tested at least twice each 8 hours of normal operation by slowly draining the float chamber. Any improper functioning or defects should be corrected at once. Any device having an outside packed stem or operating shaft shall have the stem or shaft cleaned, and the packing replaced at least twice a year.

History: 1954 ACS 49, p. 138, Eff. Feb. 14, 1967.

R 408.4893 Over-travel of control mechanisms.

Rule 893. Float-operated water control or cutoff devices shall be equipped with fixed stops so designed as to prevent over-travel of control floats and rods which would unduly stress the control mechanisms, or the control mechanism shall be designed to permit such over-travel after operation of the mechanism.

History: 1954 ACS 49, p. 138, Eff. Feb. 14, 1967.

R 408.4895 Rescinded.

History: 1954 ACS 49, p. 138, Eff. Feb. 14, 1967; rescinded 1954 ACS 56, p. 29, Eff. Nov. 14, 1968.

PART 9. LOW-PRESSURE SIDE OF REDUCING VALVES

R 408.4901 Safety valves on low-pressure side of reducing valves.

Rule 901. The pressure-reducing valve is a throttling device, the design of which is based on certain diaphragm pressures opposed by spring pressure which, in turn, controls the opening through the valve. If the spring, the diaphragm, or any part of the reducing valve fails, steam will flow directly through the valve and the low-pressure equipment will be subjected to the boiler pressure. To properly protect the auxiliaries operating on the low-pressure side of the reducing valve against any possibility of higher pressures than those for which they were designed, safety valves of the proper relieving capacity, to maintain the lower pressure, shall be mounted on the low-pressure side of the reducing valve.

History: 1954 ACS 49, p. 138, Eff. Feb. 14, 1967.

R 408.4910 Capacity of low-pressure safety valves.

Rule 910. In most cases reducing valves used for the reduction of steam pressures have the same inlet and outlet diameters of pipe size. In case of failure of a reducing valve, the safety valve on the low-pressure side must have a capacity to take care of the volume of steam determined by the high-pressure side and the area of the pipe.

History: 1954 ACS 49, p. 138, Eff. Feb. 14, 1967.

R 408.4920 Separate connections for safety valves.

Rule 920. When more than 1 safety valve of a diameter equal to the pipe size to which it is connected is required, each safety valve connected to the pipe attached to the reducing valve shall have a separate connection to the pipe. It is not advisable to use 1 opening and attach 2 or more safety valves to it. It is not important that all the safety valves be mounted on the pipeline connecting the reducing valve to the auxiliaries. Safety valves will be equally effective if they are attached to some of the auxiliaries.

History: 1954 ACS 49, p. 138, Eff. Feb. 14, 1967.

R 408.4930 Area of bypass to be included in calculations.

Rule 930. All of the known reducing valves have a by-pass arrangement so that in case of failure the boiler pressure may be short-circuited into the low-pressure line without passing through the reducing valve. When determining the required relieving capacity of safety valves for the low-pressure side of the reducing valve, the area of the bypass must be taken into consideration. Therefore, there are 2 possibilities of introducing boiler pressure into low-pressure equipment:

(a) The failure of the reducing valve, so that the valve will remain wide open.

(b) The possibility of the bypass being open.

History: 1954 ACS 49, p. 139, Eff. Feb. 14, 1967.

R 408.4940 Reducing valve body flow restrictions.

Rule 940. In the design of the body of the reducing valve certain restrictions are introduced which reduce the flow area through the valve far below the full flow area of the pipe connecting to it. Various designs have been checked and the restriction of the flow area in the body of the valve varies with different designs, but in no case has a design been found that flowed more than 37½% of the volume of steam that would flow through the unrestricted pipe connecting to it, and in the lowest case it was found to be 29%. Therefore, it has been justifiably assumed that the flow area through a reducing valve shall be considered as ⅓ of the area of the pipe to which it is connected.

History: 1954 ACS 49, p. 139, Eff. Feb. 14, 1967.

R 408.4950 Bypass valve flow restriction.

Rule 950. There are no fixed rules for the size of pipe used for bypassing the reducing valve. For determining the amount of flow through the bypass there is always a hand-operated valve in the bypass. Assuming that it is of the globe type, a safe factor to be used for determining the flow of steam through the bypass would be to consider a flow restriction in the valve to equal approximately 50% of the area of the pipe connecting to it.

History: 1954 ACS 49, p. 139, Eff. Feb. 14, 1967.

R 408.4960 Pipe areas for computing safety valve size.

Rule 960. When determining the size of safety valves necessary to protect low-pressure equipment when either the reducing valve fails or the bypass is open, ⅓ of the area of the pipe connecting to the reducing valve, or ½ the area of the bypass line, whichever is the greater, should be used.

History: 1954 ACS 49, p. 139, Eff. Feb. 14, 1967.

R 408.4970 Factors in determining volume of steam flow.

Rule 970. The factors that are necessary to determine the volume of steam flow on the low-pressure side of a reducing valve are the differential in pressure

between the pressure on the high side and the low side and the area of the pipe connecting to the high side of the valve. It is practically impossible for the manufacturer to stamp the flow capacity upon a reducing valve as this will vary with the differential of pressure between the inlet and outlet.

History: 1954 ACS 49, p. 139, Eff. Feb. 14, 1967.

R 408.4980 Two-stage reducing valve stations.

Rule 980. The relief valve for 2-stage, reducing-valve stations shall be sized on the basis of the high-side pressure and the inlet size of the first reducing valve in the line. If an intermediate pressure line is taken off between the reducing valves, then this line and the final low side shall be protected by relief valves sized on the basis of the inlet size and pressure of the first reducing valve.

History: 1954 ACS 49, p. 139, Eff. Feb. 14, 1967.

R 408.4990 Reductions in pressure from inlet to outlet.

Rule 990. Tables 9 and 10 give the relieving capacity in pounds per hour per square inch at variable reductions of pressure varying from 400 psi inlet to 5 psi outlet. With the steam capacity flow being known between various pressure reductions, it is necessary that the inspector calculate the square inch area of the inlet pipe size. The footnote to the table includes a formula that shows its application. With this information the inspectors can readily calculate the proper size relief valves to be used on the low-pressure side of reducing valves.

History: 1954 ACS 49, p. 139, Eff. Feb. 14, 1967.

Note: The following formulas shall be used in connection with this table to calculate the required relieving capacity of safety valves installed on the low-pressure side of pressure-reducing valves. Use the formula that requires the larger relieving capacity.

$$W = \frac{1}{3} AC \text{ or } W = \frac{1}{2} A^1 C$$

where W = required safety valve relieving capacity.

A = internal area of the pipe size of the pressure-reducing valve (use pipe areas of Table 2).

A^1 = internal area of the pipe size of the by-pass line around the pressure-reducing valve.

C = orifice relieving capacity, pounds of steam per hour per square inch, for the given inlet and outlet pressures of the pressure-reducing valve (from this Table).

PART 15. HEARINGS

R 408.5501 Applicability of general administrative hearings statute.

Rule 1501. If a hearing procedure is not prescribed by Act No. 290 of the Public Acts of 1965, as amended, being §§408.751 to 408.776 of the Michigan Compiled Laws, or by these rules, Act No. 197 of the Public Acts of 1952, as amended, being §§24.101 to 24.110 of the Michigan Compiled Laws, or any other general act relating to administrative agency hearings, is applicable.

History: 1954 ACS 61, p. 57, Eff. Feb. 16, 1970.

R 408.5502 Hearing dates, notices, and adjournments.

Rule 1502. (1) The chairman of the board of boiler rules in action taken under subsection (6) of section 4; section 5; section 12; subsection (2) of section 14; and section 22 of Act No. 290 of the Public Acts of 1965 shall set a date for a hearing before the board. He shall notify the department of labor and other interested parties of the board's intended action and of the date, hour and place of the hearing by first class mail at least 10 days before the hearing date unless such time limit has been waived by stipulation of the director of labor and the affected employer in writing.

(2) The board may adjourn a hearing. An adjourned hearing shall be rescheduled for a time and place which the board deems most convenient for all the parties. Notices of an adjourned hearing shall conform to the requirements for initial notices of hearings.

History: 1954 ACS 61, p. 58, Eff. Feb. 16, 1970.

R 408.5503 Presiding officers and appearances.

Rule 1503. (1) The chairman of the board of boiler rules shall preside at a hearing before the board and shall conduct the hearing in such a manner as to protect the rights of the parties. If the chairman is unable to be present at a hearing, a member of the board designated by the chairman shall preside.

(2) An interested party who is notified to appear at a hearing shall be present in person but may be represented at the hearing by legal counsel or other authorized agent. When an interested party is not represented by legal counsel, the board shall advise the party of his rights, aid him in examining and cross-examining witnesses, and give every assistance compatible with an impartial discharge of its official duties.

History: 1954 ACS 61, p. 58, Eff. Feb. 16, 1970.

R 408.5504 Order of business at hearings.

Rule 1504. Generally the order of business at a hearing shall be as follows:

(a) Presentation of the case by the chief boiler inspector or other board representative.

(b) Cross-examination.

(c) Presentation of the case by the petitioning or aggrieved party.

(d) Cross-examination.

(e) Presentation of argument by both parties, if desired.

(f) The board may at any time direct the parties to file briefs relative to the applicable law.

History: 1954 ACS 61, p. 58, Eff. Feb. 16, 1970.

R 408.5505 Witnesses and evidence.

Rule 1505. (1) Witnesses at hearings before the board of boiler rules shall be sworn or affirmed to tell the truth before testifying, in respect to matters on which testimony is to be given. The board shall confine the evidence to the issues and shall not permit extraneous matter, colloquy or testimony not pertinent to the issues to be given on the record. It shall require the evidence to be presented in an orderly manner and the testimony of a witness shall be complete so far as possible without interruption. An interested party may present competent, relevant and material evidence and may cross-examine adverse witnesses.

(2) The testimony of a witness who is unable to appear and testify before the board at a regularly scheduled hearing may be taken at a time and place convenient to the residence of the witness by direction of the board. In proper cases, such testimony may be taken by interrogatories or depositions in accordance with the law applicable to depositions in civil actions pending in circuit courts of this state.

History: 1954 ACS 61, p. 58, Eff. Feb. 16, 1970.

R 408.5506 Statements, exhibits, and stipulations.

Rule 1506. (1) The chief boiler inspector and the interested parties affected by an action of the chief boiler inspector or the board of boiler rules which is the subject of a hearing may file written statements or exhibits with the board for its consideration before the date set for hearing. However, written statements or exhibits requested by the board may be submitted at the hearing.

(2) The chief boiler inspector, the board, and other affected parties may stipulate to any of the following:

(a) Withdrawal of a petition for board action which has been referred to the board at any time before issuance of a decision and order by the board.

(b) Facts; however, the board may make such independent inquiry into the facts as it deems advisable.

History: 1954 ACS 61, p. 58, Eff. Feb. 16, 1970.

R 408.5507 Determinations, decisions, and orders.

Rule 1507. (1) The chief boiler inspector or the board of boiler rules may rescind, withdraw, or modify their determinations at any time before issuance of a decision and order by the board.

(2) The board shall issue a written decision and order within 60 days after concluding a hearing, which shall set forth both the board's findings of fact and conclusions of law. Copies of the decision and order shall be mailed to or personally served on all interested parties. Certification of the proof of mailing or

personal service shall be made by the individual who mailed such copies or made such personal service and shall be made a part of the record. Copies of decisions and orders of the board shall be kept on file in the office of the board for 3 years.

(3) A final order of the board shall specify the date on or before which the required action shall be taken.

History: 1954 ACS 61, p. 59, Eff. Feb. 16, 1970.

OCCUPATIONAL SAFETY STANDARDS COMMISSION

GENERAL RULES

R 408.6171 Abrasive wheels.

Rule 171. The use, care, and protection of abrasive wheels shall comply with the American standard association's American standard safety code for the use, care, and protection of abrasive wheels, ASA B7.1-1964, a copy of which is on file in the Lansing office of the department of labor and which is available for public inspection.

History: 1954 ACS 56, p. 29, Eff. Nov. 14, 1968.
Editor's note: This standard, which formerly appeared as R 408.5171, was approved by the legislature by Senate Concurrent Resolution No. 139 of the 1969 Session.

ELEVATOR SAFETY BOARD

ELEVATORS

(By authority conferred on the elevator safety board by section 3 of Act No. 333 of the Public Acts of 1976, section 8 of Act No. 227 of the Public Acts of 1967, as amended, and sections 7, 9, and 387 of Act No. 380 of the Public Acts of 1965, being §§338.2153, 408.808, 16.107, 16.109, and 16.487 of the Michigan Compiled Laws)

PART 1. GENERAL PROVISIONS

R 408.8101 Scope.

Rule 101. These rules establish administrative and operational procedures for implementation of the elevator safety act of 1967. They establish, for protection of the general public, minimum safety requirements for inspection, construction, installation, alteration, maintenance, repair, and operation of elevators.

History: 1954 ACS 53, p. 23, Eff. Feb. 14, 1968.
Editor's note: Former R 408.8101—R 408.8107 transferred to R 408.3901—R 408.3907.

R 408.8103 Definitions.

Rule 103. (1) The definitions in the act are applicable to these rules.

(2) "Act" means the elevator safety act of 1967, which is Act No. 227 of the Public Acts of 1967 and §§408.801 to 408.824 of the Michigan Compiled Laws.

(3) "Inspection" means the official determination by a general inspector of the condition of all parts of the equipment on which the safe operation of an elevator depends.

(4) "Temporary inspection" means the inspection of a permanent elevator to be used on a temporary basis.

(5) "Examination" means a survey of the design and construction of elevators or elevator equipment by a dealer in elevators or elevator equipment, or an approved insurance company.

(6) "Special elevating device" includes other lifting or lowering apparatus which is guided as provided in section 3 of the act.

(7) "Hand powered 1-man elevator" means an elevator having a car platform area of not more than 5 square feet and a rated load of not more than 300 pounds and which is operated from the car only by pulling on a stationary rope located in the hoistway and passing through or adjacent to the car platform. It is for the exclusive use of certain designated operating and maintenance employees and installed in a grain or feed mill or similar structure not accessible to the general public.

(8) "Electrical powered 1-man elevator" means an elevator having a car platform area of not more than 5 square feet, a rated load of not more than 300 pounds and a rated speed of not more than 100 feet per minute. It is for the exclusive use of certain designated operating and maintenance employees and installed in a grain or feed mill, chemical or alcohol distillery, cement storage tower, radio tower, or a similar structure not accessible to the general public.

(9) "Belt manlift" means a power driven endless belt with steps and handholds for transporting persons in a vertical direction through successive floors or levels of a building or structure.

(10) "Standard" means the American national standards institute safety code for elevators, dumbwaiters, escalators and moving walks. ANSI A17.1-1971 and ANSI supplement A17.1a-1972 and ANSI supplement A17.1b-1973.

History: 1954 ACS 53, p. 23, Eff. Feb. 14, 1968; 1954 ACS 75, p. 58, Eff. May 9, 1973; 1954 ACS 82, p. 82, Eff. Feb. 7, 1975.

R 408.8108 Applicability of national standards.

Rule 108. The standards contained in the American national standards institute safety code for elevators, dumbwaiters, escalators and moving walks, ANSI A17.1-1971 and ANSI supplement A17.1a-1972 and ANSI supplement A17.1b-1973 are adopted and incorporated herein by reference as rules for elevators in this state. This code may be purchased at the American National Standards Institute, 1430 Broadway, New York, New York 10018 or the Michigan Department of Labor, 300 East Michigan Avenue, Lansing, Michigan 48926, at a cost of $11.75. A copy of this code and the general rules of the board are on file in the Lansing office of the department of labor and are available for public inspection.

History: 1954 ACS 75, p. 58, Eff. May 9, 1973; 1954 ACS 82, p. 82, Eff. Feb. 7, 1975.

R 408.8111 Existing freight elevators; classification.

Rule 111. Existing freight elevators are classified in these rules in accordance with the following descriptions:

(a) Class I—Only the operator or persons necessary to handle freight are allowed to ride.

(b) Class II—Not to be occupied by any person while the elevator is in motion, but may be occupied only for the purpose of loading or unloading freight.

(c) Class III—Not to be entered or occupied by any person at any time.

History: 1954 ACS 53, p. 24, Eff. Feb. 14, 1968.

R 408.8121 Registration of elevators.

Rule 121. An elevator shall be registered by the owner or user stating the location, type, capacity, name of manufacturer, and purpose for which it is used. This registration shall be made on a form furnished by the department.

History: 1954 ACS 53, p. 24, Eff. Feb. 14, 1968.

R 408.8122 Identification plates and tags.

Rule 122. (1) The holder of a certificate of operation shall permanently attach to the elevator in an approved area an identification plate showing the rated load and the serial number of each elevator.

(2) One serial number tag will be furnished and shall be permanently attached to the elevator machine controller.

(3) Identification plates and tags shall be furnished by the department and remain the property of the department.

History: 1954 ACS 53, p. 24, Eff. Feb. 14, 1968.

R 408.8123 Accident reports.

Rule 123. The holder of a certificate of operation shall notify the department within 48 hours of every accident involving personal injury or damage to the elevator. The department may investigate all such accidents.

History: 1954 ACS 53, p. 24, Eff. Feb. 14, 1968.

R 408.8124 Responsibility for elevator operation and maintenance.

Rule 124. (1) Responsibility for the operation and maintenance of elevators shall be as follows:

(a) The person, firm or corporation installing, repairing, relocating or altering an elevator shall be responsible for its operation and maintenance until the certificate of operation has been issued, except as provided for in R 408.8135 of these rules and shall be responsible for all tests of new, repaired, relocated and altered equipment until the certificate of operation has been issued.

(b) The holder of a certificate of operation or his duly appointed agent shall be responsible for the safe operation and proper maintenance of the elevator. The holder of the certificate of operation shall be responsible for all periodic inspections and tests, securing the renewal of the certificate of operation, and the compliance with correction orders.

(c) The licensed contractor holding a temporary certificate of operation shall be responsible for the safe operation and maintenance of the elevator during the period that the temporary certificate is in force.

(2) Safety tests shall be performed by personnel approved by the department.

History: 1954 ACS 53, p. 24, Eff. Feb. 14, 1968.

R 408.8131 Commissions of special elevator inspectors.

Rule 131. (1) A commission to inspect elevators in accordance with section 11 of the act may be issued by the director to a designated holder of a special certificate of competency when the fee has been paid and a written request is received from a company authorized to insure elevators in this state. Such a commission shall not be transferable. The commission shall be retained by the company and a commission credential card shall be issued to the special inspector. Both shall be returned when services of the inspector terminate.

(2) A commission shall expire annually on December 31. A commission may be renewed by payment of a renewal fee and return of the expired card and commission renewal form.

History: 1954 ACS 53, p. 24, Eff. Feb. 14, 1968.

R 408.8132 Examinations by elevator and equipment dealers and insurance companies.

Rule 132. Nothing in the act shall be construed to prevent the examination of elevators by dealers in elevators or elevator equipment or any approved insurance

company. Such examination shall not be deemed to be an inspection within the provisions of the act.

History: 1954 ACS 53, p. 25, Eff. Feb. 14, 1968.

R 408.8133 New, altered, or relocated elevators; when not to be used.

Rule 133. A new, altered, or relocated elevator shall not be placed into service until it has been inspected by, and tested in the presence of, a general inspector, except as provided in section 15 of the act.

History: 1954 ACS 53, p. 25, Eff. Feb. 14, 1968.

R 408.8134 Number of inspections.

Rule 134. An elevator shall be inspected at least once every 12 months by a general inspector. More frequent inspections may be scheduled at the discretion of the department.

History: 1954 ACS 53, p. 25, Eff. Feb. 14, 1968.

R 408.8135 Temporary use of permanent elevators during construction.

Rule 135. (1) A licensed elevator contractor may request a temporary certificate of operation to permit the use of a passenger or freight elevator before its completion for carrying workmen, authorized personnel or materials. Such elevator shall not be used until it has been approved by a general inspector, the required fee has been paid and a temporary certificate of operation has been obtained. Such certificate shall be issued for a period not to exceed 90 days. Renewals may be granted at the discretion of the department.

(2) Permanent elevators used temporarily during construction shall be inspected every 30 days.

History: 1954 ACS 53, p. 25, Eff. Feb. 14, 1968.

R 408.8136 Discontinuance of operation.

Rule 136. A general inspector may seal an elevator out of service and void the certificate of operation as provided in section 19 of the act or if any of the following conditions exist:

(a) The holder of the certificate of operation fails to pay the required fee.

(b) The holder of the certificate of operation fails to report an accident as required by these rules.

(c) The elevator has been constructed, installed, altered, maintained or repaired by a person, firm, or corporation not approved by the department.

History: 1954 ACS 53, p. 25, Eff. Feb. 14, 1968.

R 408.8137 Inspection reports and certificates of operation.

Rule 137. (1) A general inspector shall forward to the department a report of each inspection stating the condition of the elevator. The inspection report shall be filed with the department within 10 days after the inspection has been completed.

(2) A report indicating an elevator has been sealed out of service shall be forwarded to the department within 48 hours.

(3) The director shall issue a certificate of operation for a capacity not to exceed that named in the inspection report.

History: 1954 ACS 53, p. 25, Eff. Feb. 14, 1968.

R 408.8138 Correction orders.

Rule 138. (1) If upon inspection, an elevator is deemed to be in an unsafe condition, or the owner/user has not complied with these rules, the general inspector shall issue to the holder of the certificate of operation a written correction order stating corrections required and a time limit within which the correction order shall be complied with.

(2) If, in the judgment of the general inspector, failure to make such corrections would endanger human life, compliance with the correction order may be required immediately.

(3) Noncompliance with the correction order may subject the holder of the certificate of operation to the penalty provisions of the act.

History: 1954 ACS 53, p. 25, Eff. Feb. 14, 1968.

R 408.8141 Special elevating devices.

Rule 141. (1) Other elevating devices within the scope of the act shall meet the requirements established by the department and the rules promulgated by the board.

(2) These devices shall receive special consideration from the department as to the safety features incorporated into them before they may be approved for installation. A permit to install a special elevating device shall be obtained from the department in accordance with section 15 of the act.

History: 1954 ACS 53, p. 26, Eff. Feb. 14, 1968.

R 408.8145 Dormant elevators.

Rule 145. (1) An elevator which is inactive for 1 year shall be classified as a dormant elevator and placed out of service in the following manner:

(a) The hoisting cables shall be removed and the car and counterweights lowered into the pit.

(b) The power supply on a power elevator shall be permanently disconnected by removal and taping of power leads to disconnecting means.

(c) Landing entrances shall be protected by having the hoistway doors blocked in a closed position from inside the hoistway.

(2) Before a dormant elevator can be placed in service it shall be reinspected by the department and shall conform to rule 900.8 of the standard.

History: 1954 ACS 53, p. 26, Eff. Feb. 14, 1968.

R 408.8149 Examination for license or certificate of competency; journeyman.

Rule 149. The board may delegate to the elevator division the authority to administer the written or oral examinations, or both, required for journeymen's licenses. The minimum passing grade for an applicant for a license or a certificate of competency shall be 70%. An applicant who fails to attain the minimum passing grade is not eligible for re-examination for 60 days after the examination, except as otherwise required by the act or by special permission of the board. A new application form and payment of the prescribed fee is required each time an applicant is examined.

History: 1954 ACS 77, p. 134, Eff. Nov. 7, 1973; 1954 ACS 93, p. 34, Eff. Nov. 16, 1977.

R 408.8150 Elevator contractors' and journeymen's licenses; type classification.

Rule 150. Elevator contractors' licenses and elevator journeymen's licenses are classified as follows:

(a) Type A, which covers the construction, repair, installation, alteration, and maintenance of any type of elevating device within the scope of the act.

Digitized by Google Original from UNIVERSITY OF MICHIGAN

(b) Type B, which covers the repair and maintenance of any type of elevating device within the scope of the act.

(c) Type C, which covers specific installations designed for particular and special purposes for which the applicant can prove that he is qualified.

History: 1954 ACS 77, p. 135, Eff. Nov. 7, 1973; 1954 ACS 93, p. 34, Eff. Nov. 16, 1977.

R 408.8151 Fees.

Rule 151. (1) Fees shall be paid in accordance with the following schedule:

Commission to Inspect Elevators

Commission	$ 15.00
Commission renewal	10.00

Examinations for Certificates of Competency

Certificate of competency examination	$ 15.00

Elevator Contractor's Licenses

Elevator contractor's license	$ 30.00
Elevator contractor's examination	20.00
Elevator contractor's license renewal	30.00
Elevator journeyman license and renewal	10.00
Elevator journeyman written examination	15.00

Installation Permits

Passenger, freight, 1-man elevator, or dumbwaiter as follows:	
Base	$ 50.00
Plus $4.00 for each hoistway opening	
Escalator	75.00
Workmen's hoist—initial inspection	220.00
Tower rise	45.00
Private residence inclined lift	15.00
Belt manlift	80.00
Special elevating device	100.00
Wheelchair elevating device	5.00

A final inspection fee is included in the installation permit fee.

If a scheduled final inspection is cancelled without due notice to the department, or if the elevator is not complete in the judgment of the general inspector, an additional fee of $40.00 shall be charged to the elevator contractor.

Major Alteration Permits

Each alteration—1 item as outlined in sections 1200 and 1201 of the standard	$ 30.00
Each additional alteration as outlined in sections 1200 and 1201 of the standard	15.00
Maximum alteration fee	100.00

A final inspection fee is included in the major alteration permit fee.

Certificate of Operation

Certificate of operation—1 year	$ 15.00
Temporary certificate of operation	35.00

Inspection by General Inspector

Inspection	$ 15.00
Follow-up inspection caused by noncompliance of correction order	15.00

Appeals

Appeals to the board	$ 25.00

Special Services

The department may provide, upon written request, special services not otherwise covered in the fee structure. The charge for this service shall be at the rate of $15.00 per hour for travel incurred and consultation, not to exceed $100.00 in any 8-hour period.

(2) Fees required under the act shall be paid by cash, money order or certified check to the department. Money orders or certified checks shall be made payable to "Treasurer—State of Michigan."

History: 1954 ACS 53, p. 26, Eff. Feb. 14, 1968; 1954 ACS 78, p. 31, Eff. Mar. 13, 1974; 1954 ACS 87, p. 44, Eff. Apr. 7, 1976; 1954 ACS 93, p. 34, Eff. Nov. 16, 1977.

R 408.8152 Supervising employees.

Rule 152. (1) When a contractor's license is based on the qualification of a supervising employee, termination of employment of a supervising employee shall result in the suspension of the license 90 days subsequent to such termination of employment and the license shall remain suspended until another supervising employee is certified for the employer by the board. The supervising employee and the employer shall each notify the department in writing when the termination of the employment of the former occurs.

(2) A person serving as supervising employee of a contractor may not concurrently serve as supervising employee of another contractor. A supervising employee shall be employed on a full-time basis by the contractor.

History: 1954 ACS 77, p. 135, Eff. Nov. 7, 1973.

R 408.8153 Renewal of contractors' licenses and commissions.

Rule 153. A contractor's license and a commission which has expired may be renewed within 60 days after the date of expiration without examination upon payment of the required renewal fee. A contractor's license and a commission which is not so renewed is considered revoked.

History: 1954 ACS 77, p. 135, Eff. Nov. 7, 1973.

R 408.8161 Violations; penalties.

Rule 161. Any person, firm, or corporation who shall refuse to comply with, or who shall assist in the violation of, any of the provisions of these rules, or who, in any manner hinders, obstructs, resists, prevents, causes unreasonable delay, or in any manner interferes with the inspectors in the performance of any duty herein imposed, or shall refuse to permit such inspectors to perform their duty by refusing them entrance at reasonable hours to buildings or places for the purpose of enforcement of these rules, shall be subject to the fines and penalties as provided by the act.

History: 1954 ACS 53, p. 27, Eff. Feb. 14, 1968.

R 408.8171 Appeals to the board.

Rule 171. (1) Any person, firm or corporation aggrieved by any decision, ruling or order of the director or of the department may appeal within 15 days

Digitized by Google

from date of mailing of the decision, ruling or order to the board, for a hearing before the board in accordance with section 8(d) of the act. An appeal shall specify the reasons and the relief sought and shall be submitted to the director for presentation to the board.

(2) A fee of $25.00 shall be deposited with the department at the time the appeal is filed. Payment shall be by cash, money order or certified check made payable to "Treasurer—State of Michigan."

(3) The board shall set a time for hearing of the appeal and give notice by mail to the appellant at least 10 days prior to the date set for hearing.

(4) A request for an adjournment shall be filed in writing at least 5 days prior to the date set for hearing. The board, or the director, may for good cause shown grant an adjournment.

(5) If the appellant fails to appear at the time set for hearing, the board may proceed with the hearing and decide the case in the absence of the appellant. The board may affirm, modify or set aside the ruling of the department and shall notify the director and the appellant in writing of its decision. The department shall refund the appeal fee if a decision is rendered in favor of the appellant.

History: 1954 ACS 53, p. 27, Eff. Feb. 14, 1968.

R 408.8191 Rescission.

Rule 191. The code for elevators, dumbwaiters and escalators, being R 408.231 to R 408.473 of the Michigan Administrative Code and appearing on pages 4616 to 4675 of the 1954 volume of the Code, and the Michigan elevator code, being R 408.10001.0 to R 408.11714.3 of the Michigan Administrative Code and appearing on pages 475 to 698 of the 1957 Annual Supplement to the Code, are rescinded.

History: 1954 ACS 53, p. 27, Eff. Feb. 14, 1968.

PART 2. EXISTING INSTALLATIONS

GENERAL APPLICABILITY

R 408.8201 Applicability of rules and manual.

Rule 201. The following sections outline the minimum requirements, regular maintenance and approved safety practices for elevators as defined in section 3 of the act. All other approved existing features or components of the elevator shall comply with these rules and shall be maintained as described in the American standard inspectors' manual A 17.2-1960, published by the American society of mechanical engineers, a copy of which is on file in the Lansing office of the department of labor and which is available for public inspection.

History: 1954 ACS 53, p. 28, Eff. Feb. 14, 1968.

R 408.8203 Applicability of sections of standard.

Rule 203. The following sections of the standard shall apply to all existing installations:

(a) Electrical Wiring	Section 102
(b) Hydraulic Piping & Fittings	Section 318
(c) Safety Tests	Sections 900, 901, 902
(d) Maintenance and Repairs	Sections 1000, 1001
(e) Alterations	Sections 1100, 1101, 1102

History: 1954 ACS 53, p. 28, Eff. Feb. 14, 1968.

R 408.8205 Servicing and examination of power elevators; time; exception.

Rule 205. A power elevator, except a private residence elevator and a private residence inclined lift, shall be serviced and examined for defects by a licensed elevator journeyman at least once every 90 days.

History: 1954 ACS 93, p. 35, Eff. Nov. 16, 1977.

R 408.8206 Servicing and examination of power elevators; compliance with rules; exception.

Rule 206. A power elevator, except a private residence elevator and a private residence inclined lift, shall be serviced and examined in accordance with R 408.8201 to R 408.8203.

History: 1954 ACS 93, p. 36, Eff. Nov. 16, 1977.

PASSENGER ELEVATORS

R 408.8211 Enclosures of hoistways.

Rule 211. Rules 100.1 and 100.2 of the standard shall apply to enclosures of hoistways.

History: 1954 ACS 53, p. 28, Eff. Feb. 14, 1968.

R 408.8212 Projections into hoistway.

Rule 212. (1) Ledges, floor beams, sills, saddles, timbers, and other similar projections in front of car openings projecting more than 2 inches from the inside of the general surface of the hoistway enclosure shall be fitted with smooth, beveled guards set directly under the projections. The angle of such bevels or guard plates shall be not less than 60 degrees, and preferably 75 degrees from the horizontal.

(2) Windows, recesses, or offsets, except door lintels, in the general surface of the hoistway enclosure which are opposite car openings, shall be protected by curtain walls, grating or vertical bars, set flush with the general surface of the hoistway. Except to protect windows, such curtain walls, grating or vertical bars will not be required where a car gate on the car opening opposite such recess or offset is equipped with a mechanical lock which prevents opening of such gate except when the car is level with a hoistway door on that side.

History: 1954 ACS 53, p. 28, Eff. Feb. 14, 1968.

R 408.8213 Access to machine rooms and machinery spaces.

Rule 213. (1) A permanent, safe, and convenient means of access to elevator machine rooms and overhead machinery spaces shall be provided for authorized persons.

(2) Access doors to machine rooms shall be provided with locks and kept closed and locked.

(3) Access to an elevator machine room from the hoistway is prohibited.

History: 1954 ACS 53, p. 28, Eff. Feb. 14, 1968.

R 408.8214 Lighting and ventilation of machine rooms and spaces.

Rule 214. Rule 101.5 of the standard shall apply to lighting and ventilation of machine rooms and machinery spaces.

History: 1954 ACS 53, p. 28, Eff. Feb. 14, 1968.

R 408.8215 Storage of materials.

Rule 215. Rule 101.6 of the standard shall apply to storage of materials.

History: 1954 ACS 53, p. 28, Eff. Feb. 14, 1968.

R 408.8216 Foreign pipes.

Rule 216. The inspector shall order the removal, from existing elevator hoistways or machine rooms, of any pipe conveying gases, liquids, or vapors which, if discharged into the hoistway or machine room or ignited, might endanger life.

History: 1954 ACS 53, p. 28, Eff. Feb. 14, 1968.

R 408.8217 Enclosure of machine rooms.

Rule 217. Rules 101.1a and 101.1b of the standard shall apply to enclosure of machine rooms.

History: 1954 ACS 53, p. 29, Eff. Feb. 14, 1968.

R 408.8218 Guarding of exposed equipment.

Rule 218. Rule 104.1 of the standard shall apply to guarding of exposed equipment.

History: 1954 ACS 53, p. 29, Eff. Feb. 14, 1968.

R 408.8219 Pits and spaces below hoistways.

Rule 219. (1) Rule 106.1 of the standard shall apply to pits.

(2) Rule 109.1 of the standard shall apply to protection of spaces below hoistways.

History: 1954 ACS 53, p. 29, Eff. Feb. 14, 1968.

R 408.8220 Protection of hoistway-landing openings.

Rule 220. (1) Rule 110.1 of the standard shall apply, where applicable for passenger elevators, to protection of hoistway-landing openings.

(2) Exception: Present hoistway doors of wire glass may be continued in use if they are covered or replaced by unperforated metal of not less than no. 18 gauge sheet steel or equivalent material so supported and braced as to deflect not over 1 inch when subjected to a force of 100 pounds applied horizontally at any point. As an alternative to covering doors and to reduce the size of single vision panels, members of noncombustible material and substantial construction shall be securely fastened to the hoistway side of doors and located in such a manner as to reject a ball 6 inches in diameter.

History: 1954 ACS 53, p. 29, Eff. Feb. 14, 1968.

R 408.8221 Car and counterweight buffers.

Rule 221. Section 201 of the standard shall apply to car and counterweight buffers.

History: 1954 ACS 53, p. 29, Eff. Feb. 14, 1968.

R 408.8222 Door locks and keys.

Rule 222. (1) Rule 111.1a of the standard shall apply to hoistway door lock devices.

(2) Emergency key and keyways especially designed to prevent easy duplication, that will unlock the hoistway door nearest the bottom terminal landing to permit easy access to the top of the car and the bottom terminal landing to permit access to the pit irrespective of the position of the car, shall be provided for each elevator having a type of operation that operates the elevator from the landing side of the hoistway and the hoistway door interlocks keep the doors in the locked position when the car is not within the landing zone.

(3) Subrule (2) of this rule does not apply when access switches are provided.

History: 1954 ACS 53, p. 29, Eff. Feb. 14, 1968.

R 408.8223 Emergency release buttons.

Rule 223. Devices to render hoistway door interlocks or hoistway or car door or gate electric contacts inoperative are prohibited.

History: 1954 ACS 53, p. 29, Eff. Feb. 14, 1968.

R 408.8224 Door hold open devices.

Rule 224. Door hold open devices may be retained if the hoistway door closes before the elevator leaves the landing zone.

History: 1954 ACS 53, p. 29, Eff. Feb. 14, 1968.

R 408.8225 Plugged door contacts and locks.

Rule 225. The department shall require the relocation of car gate contacts, hoistway door or gate contacts or interlocks where such devices are found tied or blocked so to render them inoperative.

History: 1954 ACS 53, p. 29, Eff. Feb. 14, 1968.

R 408.8226 Closed position of hoistway doors, car doors, and gates.

Rule 226. Rule 111.8 of the standard shall apply to the closed position of hoistway doors, car doors and gates.

History: 1954 ACS 53, p. 29, Eff. Feb. 14, 1968.

R 408.8227 Platforms.

Rule 227. The underside of wood platforms and the exposed surfaces of wood platform stringers of passenger elevators shall be protected against fire by 1 of the following methods:

(a) Completely covering with sheet steel of at least no. 27 U.S. gauge or with equally fire-resistive material as determined by the department. Exposed joints and edges of sheet metal, where used, shall be folded.

(b) Painting with an approved fire-resistive paint.

History: 1954 ACS 53, p. 29, Eff. Feb. 14, 1968.

R 408.8228 Car enclosures, entrances, and doors.

Rule 228. (1) Rules 204.1 and 204.7 of the standard shall apply to car enclosures except for rule 204.7a(3).

(2) Rules 204.4 and 204.5 of the standard shall apply to car entrances protection.

(3) Section 112 of the standard shall apply to power doors.

(4) Rule 110.3a of the standard shall apply to door closers.

History: 1954 ACS 53, p. 30, Eff. Feb. 14, 1968; 1954 ACS 93, p. 36, Eff. Nov. 16, 1977.

R 408.8229 Car and counterweight safeties; governors; anti-creep.

Rule 229. (1) Section 205 of the standard shall apply to car and counterweight safeties.

(2) Section 206 of the standard shall apply to governors, except that governors of the type which are entirely dependent upon the friction between the governor rope and governor sheave for establishing the force necessary to operate the safeties are prohibited.

(3) Rule 321.3 of the standard shall apply to anti-creep for hydraulic elevators installed after June 14, 1957.

History: 1954 ACS 53, p. 30, Eff. Feb. 14, 1968.

R 408.8230 Relief valves.

Rule 230. A hydraulic elevator shall be provided with relief valves conforming to the following:

(a) The relief valve shall be located between the pump and the check valve and shall be of a type and so installed in a bypass connection that the valve cannot be shut off from the hydraulic system.

(b) The relief valve shall be preset to open at a pressure not greater than 125% of the working pressure at the pump.

(c) The size of the relief and bypass shall be sufficient to pass the maximum rated capacity of the pump without raising the pressure more than 20% above that at which the valve opens. Two or more relief valves may be used to obtain the required capacity.

(d) Relief valves having exposed pressure adjustment, shall have their means of adjustment sealed and tagged after being set to the correct pressure.

History: 1954 ACS 53, p. 30, Eff. Feb. 14, 1968.

R 408.8231 Operating and stopping devices.

Rule 231. (1) Operating devices shall be of the enclosed electrical type. Rope or rod operating devices actuated by hand, wheels, levers, or cranks may be retained if this operation is from within the car only and a continuous pressure electrical control button or switch is provided adjacent to the operating station in the car wired in such a manner that continuous manual pressure is required to operate the elevator.

(2) Section 209 of the standard shall apply to cable suspended elevator terminal stopping devices.

(3) Section 320 of the standard shall apply to hydraulic elevator terminal stopping devices.

(4) Rule 210.2e of the standard shall apply to emergency stop switches.

History: 1954 ACS 53, p. 30, Eff. Feb. 14, 1968.

R 408.8232 Emergency signal devices.

Rule 232. Rule 211.1 of the standard shall apply to emergency signal devices except for rule 211.1a1(b), (c), and (d).

History: 1954 ACS 53, p. 30, Eff. Feb. 14, 1968; 1954 ACS 93, p. 36, Eff. Nov. 16, 1977.

R 408.8233 Phase-reversal and failure protection for cable suspended elevators.

Rule 233. Rule 210.6 of the standard shall apply to phase-reversal and failure protection for cable suspended elevators.

History: 1954 ACS 53, p. 30, Eff. Feb. 14, 1968.

R 408.8234 Rectifying units supplying power to direct current motors.

Rule 234. Rule 210.10 of the standard shall apply to the use of rectifying units to supply power to direct current elevator motors.

History: 1954 ACS 53, p. 30, Eff. Feb. 14, 1968.

R 408.8235 Driving machines and brakes.

Rule 235. (1) Belt-drive and chain-drive machines are prohibited.

(2) Rule 210.8 of the standard shall apply to the application and release of driving machine brakes.

History: 1954 ACS 53, p. 30, Eff. Feb. 14, 1968.

R 408.8236 Hoist cables.

Rule 236. Section 212 of the standard shall apply to hoist cables.

History: 1954 ACS 53, p. 30, Eff. Feb. 14, 1968.

R 408.8237 Platform guards.

Rule 237. Rule 203.9 of the standard shall apply to guards.

History: 1954 ACS 53, p. 31, Eff. Feb. 14, 1968.

R 408.8238 Floatable and movable platforms.

Rule 238. Rule 210.12 of the standard shall apply to floatable and movable platforms.

History: 1954 ACS 53, p. 31, Eff. Feb. 14, 1968.

FREIGHT ELEVATORS—CLASS I

R 408.8241 Enclosures of hoistways.

Rule 241. (1) Rule 100.1a of the standard shall apply to fire-resistive construction.

(2) Exception: If in the judgment of the state or local fire enforcement authorities nonfire-resistive hoistway enclosures are safe, approval for their continued use may be secured from the department. Where a fire-resistive hoistway is not required, the hoistway shall be fully enclosed.

History: 1954 ACS 53, p. 31, Eff. Feb. 14, 1968.

R 408.8242 Projections into hoistways.

Rule 242. (1) All ledges, floor beams, sills, saddles, timbers, and other similar projections in front of car openings projecting more than 2 inches from the inside of the general surface of the hoistway enclosure shall be fitted with smooth, beveled guards set directly under the projection. The angle of such bevels or guard plates shall be not less than 60 degrees and preferably 75 degrees from the horizontal.

(2) Windows, recesses, or offsets, except door lintels, in the general surfaces of the hoistway enclosure, which are opposite car openings, shall be protected by curtain walls, grating or vertical bars, set flush with the general surface of the hoistway. Except to protect windows, the curtain walls, grating or vertical bars are not required where a car gate on the car opening opposite the recess or offset is equipped with a mechanical lock which prevents opening of the gate except when the car is level with a hoistway door on that side.

History: 1954 ACS 53, p. 31, Eff. Feb. 14, 1968.

R 408.8243 Access to machine rooms and machinery spaces.

Rule 243. (1) A permanent, safe, and convenient means of access to elevator machine rooms and overhead machinery spaces shall be provided for authorized persons.

(2) Access doors to machine rooms shall be provided with locks and kept closed and locked.

(3) Access to an elevator machine room from the hoistway is prohibited.

History: 1954 ACS 53, p. 31, Eff. Feb. 14, 1968.

R 408.8244 Lighting and ventilation of machine rooms.

Rule 244. Rule 101.5 of the standard shall apply to lighting and ventilation of machine rooms.

History: 1954 ACS 53, p. 31, Eff. Feb. 14, 1968.

R 408.8245 Storage of materials.

Rule 245. Rule 101.6 of the standard shall apply to storage of materials.

History: 1954 ACS 53, p. 31, Eff. Feb. 14, 1968.

R 408.8246 Enclosure of machine rooms.

Rule 246. Rules 101.1a and 101.1b of the standard shall apply to enclosure of machine rooms.

History: 1954 ACS 53, p. 31, Eff. Feb. 14, 1968.

R 408.8247 Foreign pipes.

Rule 247. The inspector shall order the removal, from existing elevator hoistways or machine rooms, of any pipe conveying gases, liquids, or vapors which, if discharged into the hoistway or machine room or ignited, might endanger life.

History: 1954 ACS 53, p. 31, Eff. Feb. 14, 1968.

R 408.8248 Hoistway entrance protection.

Rule 248. Hoistway doors or gates protecting the entrances of existing electric or electro-hydraulic elevators shall be equipped with approved type hoistway door combination mechanical locks and electric contacts, be not less than 6 feet in height and reject a ball 2 inches in diameter.

History: 1954 ACS 53, p. 31, Eff. Feb. 14, 1968.

R 408.8249 Emergency keys for unlocking hoistway doors.

Rule 249. (1) Emergency key and keyways especially designed to prevent easy duplication, that will unlock the hoistway door nearest the bottom terminal landing to permit easy access to the top of the car and the bottom terminal landing to permit access to the pit irrespective of the position of the car, shall be provided for each elevator having a type of operation that operates the elevator from the landing side of the hoistway and the hoistway door interlocks keep the doors in the locked position when the car is not within the landing zone.

(2) Exception: When access switches are provided.

History: 1954 ACS 53, p. 31, Eff. Feb. 14, 1968.

R 408.8250 Pits.

Rule 250. Rule 106.1 of the standard shall apply to pits.

History: 1954 ACS 53, p. 32, Eff. Feb. 14, 1968.

R 408.8251 Car and counterweight buffers.

Rule 251. Section 201 of the standard shall apply to car and counterweight buffers.

History: 1954 ACS 53, p. 32, Eff. Feb. 14, 1968.

R 408.8252 Wire glass hoistway doors and vision panels.

Rule 252. Present hoistway doors of wire glass may be continued in use if they are covered or replaced by unperforated metal of not less than no. 18 gauge sheet steel or equivalent material so supported and braced as to deflect not over 1 inch when subjected to a force of 100 pounds applied horizontally at any point. As an alternative to covering doors and to reduce the size of single vision panels, members of noncombustible material and substantial construction shall be securely fastened to the hoistway side of doors and located in such a manner as to reject a ball 6 inches in diameter.

History: 1954 ACS 53, p. 32, Eff. Feb. 14, 1968.

R 408.8253 Door hold open devices.

Rule 253. Door hold open devices may be retained on horizontal sliding doors if the hoistway door closes before the elevator leaves the landing zone.

History: 1954 ACS 53, p. 32, Eff. Feb. 14, 1968.

R 408.8254 Emergency release buttons.

Rule 254. Devices to render the hoistway door interlocks or hoistway or car door or gate electric contacts inoperative are prohibited.

History: 1954 ACS 53, p. 32, Eff. Feb. 14, 1968.

R 408.8255 Plugged door locks.

Rule 255. The department shall require the relocation of car gate contacts, hoistway door or gate contacts or interlocks where such devices are found tied or blocked so as to render them inoperative.

History: 1954 ACS 53, p. 32, Eff. Feb. 14, 1968.

R 408.8256 Power doors.

Rule 256. Section 112 of the standard shall apply to power doors.

History: 1954 ACS 53, p. 32, Eff. Feb. 14, 1968.

R 408.8257 Astragals.

Rule 257. Rule 110.1c3b of the standard shall apply to astragals.

History: 1954 ACS 53, p. 32, Eff. Feb. 14, 1968.

R 408.8258 Car enclosures.

Rule 258. (1) Rules 204.3 and 204.7 of the standard shall apply to car enclosures.

(2) Rule 204.1f of the standard shall apply to tops of car enclosures.

History: 1954 ACS 53, p. 32, Eff. Feb. 14, 1968.

R 408.8259 Car entrance protection.

Rule 259. (1) Entrances to electric or electro-hydraulic freight elevator cars, except the opening immediately adjacent to the operating device, shall be provided with a car gate or door. Car gates or doors shall be provided at all entrances under the following conditions:

(a) Elevators having lever, wheel, crank or cable operating devices.

(b) Elevators having automatic or continuous manual pressure operation from the landings.

(c) Where the distance between the hoistway side of a landing door opposite such entrance and the hoistway edge of the landing threshold exceeds 4 inches.

(2) Car gates or doors shall be at least 6 feet in height and shall reject a ball 2 inches in diameter.

(3) Car gates or doors shall be equipped with approved car gate or door electric contacts.

History: 1954 ACS 53, p. 32, Eff. Feb. 14, 1968.

R 408.8260 Car and counterweight safeties; governors.

Rule 260. (1) Section 205 of the standard shall apply to car and counterweight safeties.

(2) Section 206 of the standard shall apply to governors.

R 408.8271 Hoist cables.

Rule 271. Section 212 of the standard shall apply to hoist cables.

History: 1954 ACS 53, p. 33, Eff. Feb. 14, 1968.

FREIGHT ELEVATORS—CLASS II

R 408.8281 Hoistways and hoistway enclosures.

Rule 281. (1) Rule 100.1a of the standard shall apply to fire-resistive construction.

(2) Exception: If in the judgment of the state or local fire enforcement authorities nonfire-resistive hoistway enclosures and landing door assemblies are safe, approval for their continued use may be secured from the department.

(3) Nonfire-resistive enclosures shall be a minimum of 6 feet in height from each floor or landing and above the treads or adjacent stairways. Enclosures shall be so supported and braced as to deflect not over 1 inch when subjected to a force of 100 pounds and if of openwork construction shall be of noncombustible material and reject a ball 2 inches in diameter.

History: 1954 ACS 53, p. 33, Eff. Feb. 14, 1968.

R 408.8282 Machinery spaces.

Rule 282. (1) A permanent, safe, and convenient means of access to machine rooms and overhead machinery spaces shall be provided for authorized persons. Where the machine is located over the hoistway, a floor or working platform shall be provided of a strength and type of construction approved by the department.

(2) Access to elevator machinery spaces from the hoistway is prohibited.

(3) Enclosure construction of machinery spaces located outside the hoistway shall be approved by the department.

History: 1954 ACS 53, p. 34, Eff. Feb. 14, 1968.

R 408.8283 Hoisting machine supports.

Rule 283. Overhead machinery shall be supported from the underside, as approved by the department. Suspension by hooks, cables, chains, or similar devices shall be prohibited.

History: 1954 ACS 53, p. 34, Eff. Feb. 14, 1968.

R 408.8284 Hoistway entrance protection.

Rule 284. Entrances shall be provided with hoistway landing doors with structural requirements not less than those required for the hoistway enclosure. Hoistway landing doors shall be provided with approved mechanical locks and electric contacts.

History: 1954 ACS 53, p. 34, Eff. Feb. 14, 1968.

R 408.8285 Plugged door locks.

Rule 285. The department shall require the relocation of car gate contacts, hoistway door, or gate contacts or interlocks where such devices are found tied or blocked so as to render them inoperative.

History: 1954 ACS 53, p. 34, Eff. Feb. 14, 1968.

R 408.8286 Guide rails.

Rule 286. (1) Cars and counterweights shall be provided with guide rails of steel or straight grained seasoned wood free from knots, shakes, dry rot, or other structural imperfections.

(2) Guide rails shall be securely fastened and shall not deflect more than ⅛ inch. Guide rails shall withstand the application of the safety when stopping the car at rated speed with rated load.

History: 1954 ACS 53, p. 34, Eff. Feb. 14, 1968.

R 408.8287 Car frames and enclosures.

Rule 287. (1) Car frames shall be of a type of construction approved by the department.

(2) Cars shall be fully enclosed to a height of at least 6 feet on the sides not used for an entrance. The car cage or platform shall have headroom of not less than 6 feet 6 inches.

(3) Car enclosures shall be illuminated.

(4) Car gates or doors shall be provided and equipped with approved car gate or door electric contacts where the hoistway is not enclosed throughout its height.

History: 1954 ACS 53, p. 34, Eff. Feb. 14, 1968.

R 408.8288 Car safety devices.

Rule 288. (1) Car safety devices shall be provided.

(2) Rules 900.6 and 900.7 of the standard shall apply to car safety devices.

History: 1954 ACS 53, p. 34, Eff. Feb. 14, 1968.

R 408.8289 Capacity and speed.

Rule 289. (1) The rated load shall be not more than ½ of the rated capacity of the hoisting machine.

(2) The area of the platform shall be in proportion to the rated capacity of the machine as approved by the department.

History: 1954 ACS 53, p. 34, Eff. Feb. 14, 1968.

R 408.8290 Driving machines and sheaves.

Rule 290. (1) A driving machine shall be of the drum, traction, or direct connected plunger hydraulic type.

(2) An elevator having a winding-drum machine shall be provided with a slack-rope device equipped with a slack-rope switch of the enclosed manually reset type which shall cause the electric power to be removed from the elevator driving-machine motor and brake if the hoisting ropes become slack.

(3) Driving and deflecting sheaves shall be of metal. The diameter of sheaves shall not be less than 30 times the diameter of the hoisting cables. Where 8 x 19 steel cables are used this multiple may be reduced to 21.

History: 1954 ACS 53, p. 35, Eff. Feb. 14, 1968.

R 408.8291 Brakes.

Rule 291. (1) An electric hoisting machine shall be provided with electrically released spring applied brakes.

(2) Manually operated brakes are prohibited.

History: 1954 ACS 53, p. 35, Eff. Feb. 14, 1968.

R 408.8292 Hydraulics.

Rule 292. Plunger stops and relief valves are not required.

History: 1954 ACS 53, p. 35, Eff. Feb. 14, 1968.

R 408.8293 Operating and stopping devices.

Rule 293. (1) Operating devices shall be of the enclosed electrical type and shall be located on the landing side of the hoistway only.

(2) Upper and lower normal terminal stopping devices shall be provided and arranged to slow down and stop the car automatically, at or near the top and bottom terminal landings, with any load up to and including rated load in the car and from any speed attained in normal operation. Such devices shall function independently of the operation of the operating device. The device shall be so designed and installed that it will continue to function until the car reaches its extreme limits of travel.

History: 1954 ACS 53, p. 35, Eff. Feb. 14, 1968.

R 408.8294 Suspension means.

Rule 294. (1) Suspension means shall be as follows:

(a) The minimum number of hoisting cables used shall be 2.

(b) Where a car counterweight is used, the number of counterweight cables used shall be not less than 2.

(c) The factors of safety shall not be less than shown in rule 212.3 of the standard.

(d) The car and counterweight ends of car and counterweight wire cables, or the stationary hitch-ends where multiple cabling is used, shall be fastened so that all portions of the cable except the portion inside the cable sockets are readily visible.

(2) Fastenings shall be:

(a) By individual tapered babbitted cable sockets or nondeforming cable clamps with cable thimbles. U-bolt type cable clips or clamps are prohibited.

(b) The car ends, or the car or counterweight dead ends where multiple cabling is used, of all suspension wire cables of traction type elevators shall be provided with rods of a design which will permit individual adjustment of the cable length.

History: 1954 ACS 53, p. 35, Eff. Feb. 14, 1968.

R 408.8295 Access to pits.

Rule 295. (1) Safe and convenient access shall be provided to all pits, and shall conform to the following:

(a) Access may be by means of the lowest hoistway door or by means of a separate pit access door.

Digitized by Google Original from UNIVERSITY OF MICHIGAN

(b) Access to pits extending more than 4 feet below the sill of the pit access door shall be provided by means of fixed vertical ladders of incombustible material, located within reach of the access door. The ladder shall extend not less than 30 inches above the sill of the access door, or hand-grips shall be provided to the same height.

(c) Access to pits of elevators in multiple hoistways shall not be by means of a single hoistway door and ladder.

(d) Pits shall be accessible only to authorized persons.

(2) Where a separate pit access door is provided, it shall be self-closing and provided with a spring-type lock arranged to permit the door to be opened from inside the pit without a key. Such doors shall be kept locked.

History: 1954 ACS 53, p. 35, Eff. Feb. 14, 1968.

R 408.8296 Illumination of pits.

Rule 296. A permanent lighting fixture shall be provided in a pit which shall provide an illumination of not less than 5 foot candles at the pit floor. A light switch shall be provided and so located as to be accessible from the pit access door.

History: 1954 ACS 53, p. 36, Eff. Feb. 14, 1968.

FREIGHT ELEVATORS—CLASS III

R 408.8301 Hoistways and hoistway enclosures.

Rule 301. (1) Rule 100.1a of the standard shall apply to fire-resistive construction.

(2) Exception: If in the judgment of the state or local fire enforcement authorities nonfire-resistive hoistway enclosures and landing door assemblies are safe, approval for their continued use may be secured from the department.

(3) Nonfire-resistive enclosures shall be a minimum of 6 feet in height from each floor or landing and above the treads of adjacent stairways. Enclosures shall be so supported and braced as to deflect not over 1 inch when subjected to a force of 100 pounds and if of openwork construction shall be of noncombustible material and reject a ball 2 inches in diameter.

History: 1954 ACS 53, p. 36, Eff. Feb. 14, 1968.

R 408.8302 Machinery spaces.

Rule 302. (1) A permanent, safe, and convenient means of access to machine rooms and overhead machinery spaces shall be provided for authorized persons. Where the machine is located over the hoistway, a floor or working platform shall be provided of a strength and type of construction approved by the department.

(2) Access to elevator machinery space from the hoistway is prohibited.

(3) Enclosure construction of machinery spaces located outside the hoistway shall be approved by the department.

History: 1954 ACS 53, p. 36, Eff. Feb. 14, 1968.

R 408.8303 Hoisting machine supports.

Rule 303. Overhead machinery shall be fastened as approved by the department. Open hooks shall be prohibited.

History: 1954 ACS 53, p. 36, Eff. Feb. 14, 1968.

R 408.8304 Hoistway entrance protection.

Rule 304. (1) Entrances shall be provided with hoistway landing doors with structural requirements not less than those required for the hoistway enclosure.

(2) Hoistway landing doors shall be provided with approved mechanical locks and electric contacts.

History: 1954 ACS 53, p. 36, Eff. Feb. 14, 1968.

R 408.8305 Plugged door locks.

Rule 305. The department shall require the relocation of car gate contacts, hoistway door or gate contacts or interlocks where such devices are found tied or blocked so as to render them inoperative.

History: 1954 ACS 53, p. 36, Eff. Feb. 14, 1968.

R 408.8306 Guide rails.

Rule 306. (1) Cars and counterweights shall be provided with guide rails of steel or straight grained seasoned wood free from knots, shakes, dry rot or other structural imperfections.

(2) Guide rails shall be securely fastened and shall not deflect more than ⅛ inch.

History: 1954 ACS 53, p. 36, Eff. Feb. 14, 1968.

R 408.8307 Car frames and enclosures.

Rule 307. (1) Car frames shall be of a type of construction approved by the department.

(2) Car shall be enclosed to a height sufficient to contain the load.

(3) Car enclosures shall be illuminated.

(4) Car gates and doors shall be provided and equipped with approved car gate or door electric contacts where the hoistway is not enclosed throughout its height.

History: 1954 ACS 53, p. 36, Eff. Feb. 14, 1968.

R 408.8308 Capacity and speed.

Rule 308. (1) The rated load shall be not more than ½ of the rated capacity of the hoisting machine.

(2) The area of the platform shall be in proportion to the rated capacity of the machine as approved by the department.

(3) The maximum speed shall not exceed 50 feet per minute.

History: 1954 ACS 53, p. 36, Eff. Feb. 14, 1968.

R 408.8309 Driving machines and sheaves.

Rule 309. (1) A driving machine shall be of the drum, traction or hydraulic type.

(2) Driving and deflecting sheaves shall be of metal. The diameter of sheaves shall not be less than 30 times the diameter of the hoisting cables. Where 8 x 19 steel cables are used this multiple may be reduced to 21.

History: 1954 ACS 53, p. 37, Eff. Feb. 14, 1968.

R 408.8310 Brakes.

Rule 310. (1) An electric hoisting machine shall be provided with electrically released spring applied brakes. Approved existing mechanical brakes may be retained.

(2) Manually operated brakes are prohibited.

History: 1954 ACS 53, p. 37, Eff. Feb. 14, 1968.

R 408.8311 Hydraulics.

Rule 311. Plunger stops and relief valves are not required.

History: 1954 ACS 53, p. 37, Eff. Feb. 14, 1968.

R 408.8312 Operating and stopping devices.

Rule 312. (1) Operating devices shall be of the enclosed electrical type and shall be located on the landing side of the hoistway only.

(2) Upper and lower normal terminal stopping devices shall be provided and arranged to slow down and stop the car automatically, at or near the top and bottom terminal landings, with any load up to and including rated load in the car and from any speed attained in normal operation. Such devices shall function independently of the operation of the operating device. The device shall be so designed and installed that it will continue to function until the car reaches the extreme limits of travel.

History: 1954 ACS 53, p. 37, Eff. Feb. 14, 1968.

R 408.8313 Suspension means.

Rule 313. (1) Suspension means on installations subsequent to June 14, 1957, shall be as follows:

(a) The minimum number of hoisting cables used shall be 2.

(b) Where a car counterweight is used, the number of counterweight cables used shall be not less than 2.

(c) The factors of safety shall not be less than shown in rule 212.3 of the standard.

(d) The car and counterweight ends of car and counterweight wire cables, or the stationary hitch-ends where multiple cabling is used, shall be fastened in such a manner that all portions of the cable except the portion inside the cable sockets shall be readily visible.

(2) Fastenings shall be:

(a) By individual tapered babbitted cable sockets or nondeforming cable clamps with cable thimbles. U-bolt type cable clips or clamps are prohibited.

(b) The car ends, or the car or counterweight dead ends where multiple cabling is used, of all suspension wire cables of traction type elevators shall be provided with rods of a design which will permit individual adjustment of the cable length.

(3) Chains as a means of suspension may be retained on installations made prior to June 14, 1957.

History: 1954 ACS 53, p. 37, Eff. Feb. 14, 1968.

ONE-MAN ELEVATORS—HAND POWERED

R 408.8321 Nonfire-resistive enclosures.

Rule 321. Hoistway enclosures of wood or metal shall be provided on all landings accessible to the public. Enclosures may be of openwork construction and shall be of at least no. 13 gauge wire that rejects a 2-inch ball. Enclosures shall be a minimum of 6 feet in height from each floor or landing and above the treads of adjacent stairways.

History: 1954 ACS 53, p. 37, Eff. Feb. 14, 1968.

R 408.8322 Sheaves, supports, and cables.

Rule 322. (1) Sheaves shall be securely fastened. Supports for driving sheaves shall be sufficient to sustain the weight of the car, weight of the counterweight and rated load.

(2) The hoisting cables shall be of a length that will allow the counterweight to land before the car crosshead is within 12 inches from striking the overhead sheave supports. Sheaves shall be of the traction type.

History: 1954 ACS 53, p. 37, Eff. Feb. 14, 1968.

R 408.8323 Car and counterweight top and bottom clearances.

Rule 323. (1) Top car and counterweight clearances shall be a minimum of 12 inches.

(2) Car and counterweight bottom runby is not required.

History: 1954 ACS 53, p. 37, Eff. Feb. 14, 1968.

R 408.8324 Landing openings and hoistway doors.

Rule 324. (1) Where enclosures are required, landing doors shall be provided of a strength equal to or stronger than the requirements for the enclosures.

(2) Hoistway doors shall be so arranged that they may be opened by authorized persons by hand from the hoistway side when the car is at the landing.

History: 1954 ACS 53, p. 38, Eff. Feb. 14, 1968.

R 408.8325 Cars.

Rule 325. (1) Approved car buffers shall be provided.

(2) Car enclosures are not required.

(3) Car safeties shall be of the type operated as a result of the breakage of the hoist cables and shall engage both rails simultaneously. This type of safety shall be tested by obtaining the necessary slack rope to cause it to function with rated load on the car. This test shall be performed every 12 months or every 6 months if exposed to the weather.

History: 1954 ACS 53, p. 38, Eff. Feb. 14, 1968.

R 408.8326 Brakes.

Rule 326. A foot brake operated by a spring designed to apply automatically when the operator's foot is removed from the brake pedal shall be provided. The brakes shall engage both guide rails.

History: 1954 ACS 53, p. 38, Eff. Feb. 14, 1968.

R 408.8327 Hoisting cables.

Rule 327. (1) Only iron (low carbon steel) or steel wire cables with fibre cores, having the commercial classification "elevator wire cable," shall be used for suspension of elevator cars and suspension of counterweights. The wire material for cables shall be manufactured by the open-hearth or electric-furnace process or their equivalent.

(2) Suspension means shall be not less than 2⅜ inch diameter cables.

(3) Exception: A single cable of approved material may be retained until the crosshead is replaced.

(4) Cables shall be fastened in an approved manner.

History: 1954 ACS 53, p. 38, Eff. Feb. 14, 1968.

R 408.8328 Signs.

Rule 328. Signs reading "EMPLOYEES ONLY" with letters no less than 2 inches in height, shall be provided at all entrances.

History: 1954 ACS 53, p. 38, Eff. Feb. 14, 1968.

R 408.8329 Counterweight enclosures.

Rule 329. A counterweight located outside the hoistway shall be enclosed throughout its travel. If located inside the hoistway, it shall be guided. A fully enclosed counterweight shall be provided with a removable panel at the bottom landing to allow for maintenance and inspection of the counterweight and hitch.

History: 1954 ACS 53, p. 38, Eff. Feb. 14, 1968.

INCLINE LIFTS

R 408.8341 Rules applicable.

Rule 341. An existing incline lift shall meet the requirements of these rules for a new incline lift.

History: 1954 ACS 53, p. 38, Eff. Feb. 14, 1968.

OTHER KINDS OF ELEVATORS

R 408.8361 One-man electric powered.

Rule 361. An existing 1-man electric powered elevator shall meet the requirements of these rules for a new 1-man electric powered elevator.

History: 1954 ACS 53, p. 38, Eff. Feb. 14, 1968.

R 408.8362 Escalators.

Rule 362. Section 800 of the standard shall apply to escalators.

History: 1954 ACS 53, p. 38, Eff. Feb. 14, 1968.

R 408.8363 Belt manlifts.

Rule 363. An existing belt manlift shall meet the requirements of these rules for a new belt manlift.

History: 1954 ACS 53, p. 38, Eff. Feb. 14, 1968.

R 408.8364 Sidewalk elevators.

Rule 364. (1) Rules 400.2, 401.2, 401.3d, 401.4, 401.5, 401.5b, 401.6, 402.5b, 402.5c, 402.6, and 402.10 of the standard shall apply to sidewalk elevators.

(2) No one shall be permitted to ride a sidewalk elevator.

(3) A sidewalk elevator shall be operated in both directions by a switch on the sidewalk or other exterior area only. Operation shall be with a key operated continuous pressure type switch with key removable only when the switch is in the "off" position.

History: 1954 ACS 53, p. 38, Eff. Feb. 14, 1968.

R 408.8365 Dumbwaiters.

Rule 365. Section 700.0 of the standard shall apply to dumbwaiters as the department deems necessary for their safe operation.

History: 1954 ACS 53, p. 39, Eff. Feb. 14, 1968.

PART 3. NEW INSTALLATIONS

GENERAL APPLICABILITY

R 408.8401 Applicability of rules and manual.

Rule 401. The following sections outline the minimum requirements, regular maintenance and approved safety practices for elevators as defined in section 3 of the act. All other approved existing features or components of the elevator shall

comply with these rules and shall be maintained as described in the American standard inspectors' manual A 17.2-1960, published by the American society of mechanical engineers, a copy of which is on file in the Lansing office of the department of labor and which is available for public inspection.

History: 1954 ACS 53, p. 39, Eff. Feb. 14, 1968.

R 408.8403 Applicability of sections of standard.

Rule 403. The following sections of the standard shall apply to incline lifts, 1-man hand powered elevators, 1-man electric powered elevators, workmen's elevators, and belt manlifts:

(a) Electric Wiring	Section 102
(b) Hydraulic Piping & Fittings	Section 318
(c) Safety Tests	Sections 900, 901, 902
(d) Maintenance & Repairs	Sections 1000, 1001
(e) Alterations	Sections 1100, 1101, 1102

History: 1954 ACS 53, p. 39, Eff. Feb. 14, 1968.

PASSENGER AND FREIGHT ELEVATORS

R 408.8411 Passenger elevators.

Rule 411. Rules promulgated by the board and the American standard code for elevators A 17.1-1965 shall apply to passenger elevators.

History: 1954 ACS 53, p. 39, Eff. Feb. 14, 1968.

R 408.8415 Freight elevators.

Rule 415. Rules promulgated by the board and the American standard code for elevators A 17.1-1965 shall apply to freight elevators.

History: 1954 ACS 53, p. 39, Eff. Feb. 14, 1968.

ONE-MAN ELEVATORS—HAND POWERED

R 408.8421 Applicability.

Rule 421. This portion of the rules applies to hand powered, 1-man elevators used in grain mills, grain storage buildings, signal towers, chemical works and other buildings where it is necessary to have a 1-man elevator and where conformity to the requirements for passenger elevators would impose difficulty or hardship not warranted because of their limited use. One-man elevators shall not be accessible to the general public and shall be limited to use by employees only.

History: 1954 ACS 53, p. 39, Eff. Feb. 14, 1968.

R 408.8422 Hoistways and hoistway enclosures.

Rule 422. Rule 100.1 of the standard shall apply to hoistways and hoistway enclosures.

History: 1954 ACS 53, p. 39, Eff. Feb. 14, 1968.

R 408.8423 Sheave supports.

Rule 423. Sheaves shall be securely fastened and supported with a factor of safety as follows:

(a) For steel.....5

(b) For timber and reinforcing concrete 6

R 408.8424 Pits and spaces below hoistways.

Rule 424. (1) A pit of at least 12 inches in depth shall be provided below the lowest landing.

(2) Exception: If a hardship is created because of construction of the building, the department may approve the landing opening 12 inches above the building floor level, if a permanent ramp or steps from the building floor level to the lowest hoistway landing entrance is provided.

(3) Section 109 of the standard shall apply to protection of spaces below hoistways.

History: 1954 ACS 53, p. 40, Eff. Feb. 14, 1968.

R 408.8425 Car and counterweight clearances.

Rule 425. (1) When a car platform is level with the lowest landing, the car buffer striker plates shall not be in contact with the buffers.

(2) When the car platform is level with the top landing there shall be at least 24 inches between the top of the car crosshead and the nearest obstruction.

(3) When the counterweights are resting on their buffers, there shall be at least 18 inches between the top of the car crosshead and the nearest obstruction.

(4) When the car is resting on its buffers, there shall be at least 6 inches clearance between the top of the counterweight and the nearest obstruction.

(5) Section 108 of the standard shall apply to horizontal car and counterweight clearances.

History: 1954 ACS 53, p. 40, Eff. Feb. 14, 1968.

R 408.8426 Landing openings and thresholds.

Rule 426. (1) Section 110 of the standard shall apply to the protection of landing openings.

(2) A landing threshold shall be constructed and maintained to render it skid resistant. Illumination on the landing threshold shall be not less than 1 footcandle.

History: 1954 ACS 53, p. 40, Eff. Feb. 14, 1968.

R 408.8427 Hoistway door or gate locking and closing devices.

Rule 427. Hoistway doors and gates shall be self-closing and shall be provided with spring-type latches to hold them in the closed position. Latches shall be released only by the car when car is in the landing zone.

History: 1954 ACS 53, p. 40, Eff. Feb. 14, 1968.

R 408.8428 Car and counterweight guide rails, supports, fastenings, and buffers.

Rule 428. (1) Cars and counterweights shall be provided with guide rails of steel or straight grained seasoned wood free from knots, shakes, dry rot or other structural imperfections.

(2) Guide rails shall be securely fastened with through bolts or clips of strength, design and spacing as follows:

(a) The guide rails and their fastenings shall not deflect more than ¼ inch.

(b) The guide rails and their fastenings shall withstand the application of the safety, when stopping the car with rated load or when stopping the counterweight.

(c) Car and counterweight guide rails shall rest on suitable supports and extend at the top of the hoistway to prevent the guide shoes from running off the guide rails in case the car or counterweight travels beyond the terminal landings.

(3) Section 201 of the standard shall apply to car and counterweight buffers.

History: 1954 ACS 53, p. 40, Eff. Feb. 14, 1968.

R 408.8429 Counterweights.

Rule 429. Adequate counterweights shall be provided to maintain proper weight relationship between the counterweight and the car to operate the car efficiently. Sections of counterweights shall be carried in frames or secured between rails to prevent dislodgment throughout the length of travel.

History: 1954 ACS 53, p. 40, Eff. Feb. 14, 1968.

R 408.8430 Car frames and platforms.

Rule 430. A car frame and platform shall be of metal or sound, seasoned wood. Frame members shall be securely bolted and braced. With a uniformly distributed rated load the factor of safety shall not be less than 4 for metal and 6 for wood.

History: 1954 ACS 53, p. 40, Eff. Feb. 14, 1968.

R 408.8431 Car enclosures.

Rule 431. A car shall be enclosed on the sides not used for entrance. The car enclosure shall have headroom of not less than 6 feet 6 inches. The deflection of the enclosure shall be not more than ¼ inch when subjected to a force of 75 pounds applied perpendicularly to the car enclosure at any point. The enclosure shall be secured to the car platform or frame in such a manner that it cannot work loose or become displaced in normal operation.

History: 1954 ACS 53, p. 40, Eff. Feb. 14, 1968.

R 408.8432 Car entrance protection.

Rule 432. A car entrance shall be protected with a door or gate, and when in a closed position shall guard the full width of the car opening. The door or gate shall extend from a point not more than 1 inch above the car floor to a point at least 6 feet above the car floor, and when in a closed position shall reject a ball 3 inches in diameter.

History: 1954 ACS 53, p. 41, Eff. Feb. 14, 1968.

R 408.8433 Emergency exits.

Rule 433. A car shall be provided with an emergency exit providing egress from the car to the emergency ladder from any location in the hoistway.

History: 1954 ACS 53, p. 41, Eff. Feb. 14, 1968.

R 408.8434 Emergency ladders.

Rule 434. An emergency exit metal ladder shall:

(a) Be permanently installed in the hoistway continuous from the pit to the machine room. To protect the individual from the descending car, the ladder shall be designed and installed in an approved location.

(b) Be accessible from the car enclosure.

(c) Have rails not less than 2 inches by ½ inch and at least 16 inches apart.

(d) Have rails supported at intervals of not less than 10 feet.

(e) Have rails extending not less than 45 inches above machine room or roof line.

(f) Have rungs securely fastened in position.

(g) Have rungs with a diameter of not less than ⅞ inch and 12 inches apart.

(h) Have a top rung within 6 inches of the level of the machine room or roof line.

History: 1954 ACS 53, p. 41, Eff. Feb. 14, 1968.

R 408.8435 Car safety devices and governors.

Rule 435. (1) The car safety device shall be operated as a result of the breakage of the hoist cables or by a speed governor and be capable of stopping and sustaining car with the rated load.

(2) The applicable sections of rule 205.8a of the standard shall apply to governors.

(3) Rule 206.5 of the standard shall apply to governor cables.

(4) The governor shall be located where it cannot be struck by the car or counterweight in case of over-travel.

(5) Upon breakage of a hoist cable, broken rope safety devices shall operate without delay and shall engage both rails simultaneously.

History: 1954 ACS 53, p. 41, Eff. Feb. 14, 1968.

R 408.8436 Capacity.

Rule 436. The rated load shall not exceed 300 pounds.

History: 1954 ACS 53, p. 41, Eff. Feb. 14, 1968.

R 408.8437 Platform areas.

Rule 437. The inside net platform area shall not exceed 5 square feet.

History: 1954 ACS 53, p. 41, Eff. Feb. 14, 1968.

R 408.8438 Driving sheaves.

Rule 438. (1) The driving sheave shall be of the traction type. The cable grooves shall be machined.

(2) The driving sheave and deflecting sheave shall be of cast iron or steel.

(3) The driving sheave and deflecting sheave shall be of a diameter of not less than 30 times the diameter of the hoisting cable, except where 8 by 19 cables are used, the diameter of the sheaves may be reduced to 21 times the diameter of the cable.

(4) Rule 208.3 of the standard shall apply to the factor of safety.

(5) Set-screw fastenings shall not be used in lieu of keys or pins if the connection is subject to torque or tension.

(6) A friction-gearing or clutch mechanism is prohibited.

(7) A worm gearing having cast-iron teeth is prohibited.

History: 1954 ACS 53, p. 41, Eff. Feb. 14, 1968.

R 408.8439 Brakes.

Rule 439. (1) A foot brake shall be provided operated by a spring designed to apply automatically when the operator's foot is removed from the brake pedal.

(2) The brakes shall engage both guide rails.

History: 1954 ACS 53, p. 41, Eff. Feb. 14, 1968.

R 408.8440 Hoisting cables.

Rule 440. (1) Only iron (low carbon steel) or steel wire cables with fibre cores, having the commercial classification "elevator wire cable," shall be used for suspension of elevator cars and counterweights. The wire material for cables shall be manufactured by the open-hearth or electric furnace process.

(2) Suspension means shall be not less than 2 iron or steel wire ⅜-inch diameter cables.

(3) Rule 503.21 of the standard shall apply to the factor of safety, arc of contact, and method of fastening.

History: 1954 ACS 53, p. 41, Eff. Feb. 14, 1968.

R 408.8441 Data plates and signs.

Rule 441. (1) A permanent metal plate shall be placed upon the landing side of the crosshead of an elevator and bear the following information:

(a) The total weight of the car, including the safeties.

(b) The cable data required by rule 212.2a of the standard.

(2) A permanent metal sign reading "EMPLOYEES ONLY," with block letters not less than 2 inches in height shall be displayed at the ground floor landing.

History: 1954 ACS 53, p. 42, Eff. Feb. 14, 1968.

ONE-MAN ELEVATORS—ELECTRIC POWERED

R 408.8451 Applicability.

Rule 451. This portion of the rules applies to electric powered elevators used in grain mills, grain storage buildings, signal towers, chemical works and other buildings where it is necessary to have a 1-man elevator and where conformity to the requirements for passenger elevators would impose difficulty or hardship not warranted because of their limited use. One-man elevators shall not be accessible to the general public and shall be limited to use by employees only.

History: 1954 ACS 53, p. 42, Eff. Feb. 14, 1968.

R 408.8452 Hoistways and hoistway enclosures.

Rule 452. Section 100 of the standard shall apply to hoistways and hoistway enclosures.

History: 1954 ACS 53, p. 42, Eff. Feb. 14, 1968.

R 408.8453 Counterweights.

Rule 453. (1) Counterweights shall be provided and constructed as follows:

(a) Counterweights shall compensate the total weight of the car, plus 40% of rated capacity.

(b) Sections of counterweights, whether carried in frames or not, shall be secured by at least 1 tie rod passing through the holes in the sections. The tie rods shall have locknuts secured by cotter pins at each end.

(2) Counterweights shall be located in the hoistway of the elevator which they serve.

(3) Counterweight pit guards shall extend from a point 12 inches above the pit floor to a point not less than 7 feet nor more than 8 feet above such floor, and shall be fastened to a metal reinforced frame equal in strength and rigidity to no. 14 U.S. gauge sheet steel.

History: 1954 ACS 53, p. 42, Eff. Feb. 14, 1968.

R 408.8454 Guarding of exposed equipment.

Rule 454. Section 104 of the standard shall apply to guarding of exposed equipment.

History: 1954 ACS 53, p. 42, Eff. Feb. 14, 1968.

R 408.8455 Machinery and sheave beams, supports, and foundations.

Rule 455. Section 105 of the standard shall apply to machinery and sheave beams, supports, and foundations.

History: 1954 ACS 53, p. 42, Eff. Feb. 14, 1968.

R 408.8456 Pits and spaces below hoistways.

Rule 456. (1) A pit of at least 12 inches in depth shall be provided below the lowest landing.

Digitized by Google

(2) Section 109 of the standard shall apply to spaces below hoistways.

(3) Exception: If a hardship is created because of construction of the building, the department may approve the landing opening 12 inches above the building floor level if a permanent ramp or steps from the building floor level to the lowest hoistway landing entrance is provided.

History: 1954 ACS 53, p. 42, Eff. Feb. 14, 1968.

R 408.8457 Car and counterweight clearances.

Rule 457. (1) When the car platform is level with the lowest landing, the car buffer striker plates shall not be in contact with the buffers.

(2) When the car platform is level with the top landing there shall be at least 24 inches between the top of the car crosshead and the nearest obstruction.

(3) When the counterweights are resting on their buffers there shall be at least 18 inches between the top of the car crosshead and the nearest obstruction.

(4) When the car is resting on its buffers there shall be at least 6 inches clearance between the top of the counterweights and the nearest obstruction.

(5) Section 108 of the standard shall apply to horizontal car and counterweight clearances.

History: 1954 ACS 53, p. 42, Eff. Feb. 14, 1968.

R 408.8458 Landing openings and thresholds.

Rule 458. (1) Rule 110.1 of the standard shall apply to protection of landing openings of fire-resistive hoistways.

(2) Rule 100.1c of the standard shall apply to protection of landing openings of nonfire-resistive hoistways.

(3) A landing threshold shall be skid resistant.

(4) The illumination on a landing threshold shall be not less than 1 footcandle.

History: 1954 ACS 53, p. 43, Eff. Feb. 14, 1968.

R 408.8459 Locking devices.

Rule 459. Rules 111.4b, 111.4c, and 111.4d of the standard shall apply to locking devices.

History: 1954 ACS 53, p. 43, Eff. Feb. 14, 1968.

R 408.8460 Power operation of doors and gates.

Rule 460. Section 112 of the standard shall apply to power operation of hoistway doors and car doors and gates.

History: 1954 ACS 53, p. 43, Eff. Feb. 14, 1968.

R 408.8461 Car and counterweight guide rails, guard supports, and fastenings.

Rule 461. (1) Cars and counterweights shall be provided with guide rails of steel or straight grained seasoned wood free from knots, shakes, dry rot, or other structural imperfections.

(2) Guide rails shall be securely fastened with through bolts or clips of strength, design and spacing as follows:

(a) Guide rails and their fastenings shall not deflect more than ¼ inch under normal operation.

(b) Guide rails and their fastenings shall withstand the application of the safety when stopping the car with rated load or when stopping the counterweight.

(c) Guide rails shall rest on suitable supports and extend at the top of the hoistway to prevent the guide shoes from running off the guide rails in case the car or counterweight travels beyond the terminal landings.

History: 1954 ACS 53, p. 43, Eff. Feb. 14, 1968.

R 408.8462 Car and counterweight buffers.

Rule 462. Section 201 of the standard shall apply to car and counterweight buffers.

History: 1954 ACS 53, p. 43, Eff. Feb. 14, 1968.

R 408.8463 Car frames, platforms, and enclosures.

Rule 463. (1) A car frame and platform shall be of metal or sound, seasoned wood. Frame members shall be securely bolted and braced. With a uniformly distributed rated load the factor of safety shall not be less than 4 for metal and 6 for wood.

(2) A car shall be enclosed on the sides not used for entrance. The car enclosure shall have headroom of not less than 6 feet 6 inches. The deflection of the enclosure shall be not more than ¼ inch when subjected to a force of 75 pounds applied perpendicularly to the car enclosure at any point. The enclosure shall be secured to the car platform or frame in such a manner that it cannot work loose or become displaced in normal operation.

History: 1954 ACS 53, p. 43, Eff. Feb. 14, 1968.

R 408.8464 Car entrance protection.

Rule 464. A car entrance shall be protected with a door or gate that, when in a closed position, shall guard the full width of the car opening. The door or gate shall extend from a point not more than 1 inch above the car floor to a point at least 6 feet above the car floor, and when in a closed position shall reject a ball 3 inches in diameter.

History: 1954 ACS 53, p. 43, Eff. Feb. 14, 1968.

R 408.8465 Illumination.

Rule 465. An electric light shall be provided with a switch located adjacent to the control panel. Lamps shall be equipped with substantial guards to prevent breakage.

History: 1954 ACS 53, p. 43, Eff. Feb. 14, 1968.

R 408.8466 Emergency signals and exits.

Rule 466. (1) An elevator shall be provided with an electric signal bell clearly audible outside the hoistway, and operated from inside of the car.

(2) A car shall be provided with an emergency exit providing egress from the car to the emergency ladder from any location in the hoistway.

History: 1954 ACS 53, p. 44, Eff. Feb. 14, 1968.

R 408.8467 Emergency ladders.

Rule 467. An emergency exit metal ladder shall:

(a) Be permanently installed in the hoistway continuous from the pit to the machine room. To protect the individual from the descending car, the ladder shall be designed and installed in an approved location.

(b) Be accessible from the car enclosure.

(c) Have rails not less than 2 inches by ½ inch and at least 16 inches apart.

(d) Have rails supported at intervals of not less than 10 feet.

(e) Have rails extending not less than 45 inches above machine room or roof line.

(f) Have rungs securely fastened in position.

(g) Have rungs with a diameter of not less than ½ inch and 12 inches apart.

(h) Have a top rung within 6 inches of the level of the machine room or roof line.

History: 1954 ACS 53, p. 44, Eff. Feb. 14, 1968.

R 408.8468 Car safety devices and governors.

Rule 468. Sections 205 and 206 of the standard shall apply to car safety devices and governors.

History: 1954 ACS 53, p. 44, Eff. Feb. 14, 1968.

R 408.8469 Capacity.

Rule 469. The rated load shall not exceed 300 pounds.

History: 1954 ACS 53, p. 44, Eff. Feb. 14, 1968.

R 408.8470 Platform areas.

Rule 470. The inside net platform area shall not exceed 5 square feet.

History: 1954 ACS 53, p. 44, Eff. Feb. 14, 1968.

R 408.8471 Speed.

Rule 471. The rated speed shall not exceed 100 feet per minute.

History: 1954 ACS 53, p. 44, Eff. Feb. 14, 1968.

R 408.8472 Driving machines.

Rule 472. (1) A driving machine shall be of the traction type. The cable grooves shall be machined.

(2) Rule 208.3 of the standard shall apply to the factor of safety.

(3) Set-screw fastenings shall not be used in lieu of keys or pins if the connection is subject to torque or tension.

(4) The machine shall be designed for manual operation by means of a crank in the event of power failure. A suitable crank shall be provided near the machine.

(5) A friction-gearing or clutch mechanism is prohibited.

(6) A worm gearing having cast-iron teeth is prohibited.

History: 1954 ACS 53, p. 44, Eff. Feb. 14, 1968.

R 408.8473 Sheaves.

Rule 473. (1) The driving sheave and deflecting sheaves shall be of cast iron or steel.

(2) The driving sheave and deflecting sheaves shall be of a diameter of not less than 30 times the diameter of the hoisting cable.

(3) Exception: Where 8 x 19 steel cables are used, the diameter of the sheaves may be reduced to 21 times the diameter of the cable.

(4) Rule 208.3 of the standard shall apply to the factor of safety.

(5) Set-screw fastenings shall not be used in lieu of keys or pins if the connection is subject to torque or tension.

History: 1954 ACS 53, p. 44, Eff. Feb. 14, 1968.

R 408.8474 Hoisting machine brakes.

Rule 474. (1) Machines shall be equipped with electrically-released spring-applied brakes.

(2) A single ground or short circuit, a counter-voltage, or a motor field discharge shall not prevent the brake magnet from allowing the brake to set when the operating device is placed in the stop position.

History: 1954 ACS 53, p. 44, Eff. Feb. 14, 1968.

R 408.8475 Terminal stopping devices.

Rule 475. Section 209 of the standard shall apply to terminal stopping devices.

History: 1954 ACS 53, p. 44, Eff. Feb. 14, 1968.

R 408.8476 Operation, operation devices and control equipment.

Rule 476. (1) Rule 503.20 of the standard shall apply to operation, operation devices, and control equipment.

(2) Hand cable operation is prohibited.

History: 1954 ACS 53, p. 45, Eff. Feb. 14, 1968.

R 408.8477 Hoisting cables.

Rule 477. (1) Only iron (low carbon steel) or steel wire cables with fibre cores, having the commercial classification "elevator wire cable," shall be used for the suspension of elevator cars and counterweights. The wire material for cables shall be manufactured by the open-hearth or electric furnace process or their equivalent.

(2) Suspension means shall be not less than 2 iron or steel wire ⅜-inch diameter cables.

(3) Rule 503.21 of the standard shall apply to the factor of safety, arc of contact and method of fastening.

History: 1954 ACS 53, p. 45, Eff. Feb. 14, 1968.

R 408.8478 Data plates and signs.

Rule 478. (1) A metal plate shall be placed upon the landing side of the crosshead of each elevator bearing the following information:

(a) The total weight of the car, including safeties.

(b) The contract car speed in feet per minute at which the elevator is designed to travel.

(c) The cable data required by rule 212.2a.

(2) A permanent metal sign stating "EMPLOYEES ONLY," with block letters not less than 2 inches in height shall be displayed at the ground floor landing.

History: 1954 ACS 53, p. 45, Eff. Feb. 14, 1968.

BELT MANLIFTS

R 408.8481 Applicability of national standard and rules of board.

Rule 481. (1) The standards contained in the American national standards institute safety standards for manlifts, ANSI A90.1-1969 and ANSI supplement A90.1a-1972, are adopted and incorporated herein by reference as rules for belt manlifts in this state, with the exception of section 1 and rules 101(e), 103(d), 104(a)(b), and 200(c)(4). These rules may be purchased at American National Standards Institute, 1430 Broadway, New York, New York 10018, or the Michigan Department of Labor, 300 East Michigan Avenue, Lansing, Michigan 48926, at a cost of $3.00 and $1.00 respectively. A copy of these standards and the general rules of the board are on file in the Lansing office of the department of labor and are available for public inspection.

(2) This portion of the rules applies to manlifts used only to carry plant personnel in granaries, flour mills, parking garages and similar buildings or occupancies. Belt manlifts shall not be used by the public and, if located in buildings to which the public has access, shall be located in an enclosure protected by self-closing, spring locked doors. Keys to the doors shall be available only to employees. The use of belt manlifts during construction is prohibited.

(3) The hoistway enclosure shall comply to the approved fire codes and maintain the fire rating of the structure.

History: 1954 ACS 53, p. 45, Eff. Feb. 14, 1968; 1954 ACS 82, p. 82, Eff. Feb. 7, 1975.

R 408.8482 Rescinded.

History: 1954 ACS 53, p. 45, Eff. Feb. 14, 1968; rescinded 1954 ACS 82, p. 83, Eff. Feb. 7, 1975.

R 408.8483 Landings.

Rule 483. (1) Where the travel is 50 feet or more between floor landings, 1 or more emergency landings shall be provided so that there will be a landing for every 25 feet or less of manlift travel. Emergency landings shall be completely enclosed with an approved guard railing and toeboard.

(2) The travel of any single belt manlift installed after February 14, 1968, shall not exceed 100 feet.

History: 1954 ACS 53, p. 45, Eff. Feb. 14, 1968; 1954 ACS 82, p. 83, Eff. Feb. 7, 1975.

R 408.8484 Rescinded.

History: 1954 ACS 53, p. 46, Eff. Feb. 14, 1968; rescinded 1954 ACS 82, p. 83, Eff. Feb. 7, 1975.

R 408.8485 Protection of entrances and exits.

Rule 485. (1) A maze shall not permit direct passage between the enclosure and outer floor space.

(2) Rails shall be located at least 2 feet from the edge of the opening measured at right angles to the face of the belt. The intersection of the top rail and the end post at openings shall be a bend without sharp corners.

History: 1954 ACS 53, p. 46, Eff. Feb. 14, 1968; 1954 ACS 82, p. 83, Eff. Feb. 7, 1975.

R 408.8486 Guards for openings.

Rule 486. (1) The floor opening at each landing shall be guarded on sides not used for entrance or exit by guard rails and toeboard or by panels of wire mesh of not less than no. 10 U.S. gauge, expanded metal of not less than no. 13 U.S. gauge or sheet metal of equivalent strength or metal on a frame of angle iron not less than 1¼ by 1¼ by ⅛-inch or of 1¼-inch iron pipe.

(2) Guard rails or guards shall be at least 42 inches in height on the ascending side and 66 inches in height on the descending side. Guard rails shall be a double rail of 2 by 4 inch boards and a 1 by 6 inch toeboard or rail of a 1¼-inch iron pipe similarly arranged. Toeboards shall be 1 by 6 inch board or sheet metal ⅛ by 6 inch and shall be securely attached to the uprights.

(3) Guards may consist of vertical or horizontal bars which will reject a ball 6 inches in diameter. Rails or guards shall be located not more than 1 foot from the edge of the floor opening.

History: 1954 ACS 53, p. 46, Eff. Feb. 14, 1968.

R 408.8487—R 408.8491 Rescinded.

History: 1954 ACS 53, pp. 46, 47, Eff. Feb. 14, 1968; rescinded 1954 ACS 82, p. 83, Eff. Feb. 7, 1975.

R 408.8492 Belt fastenings.

Rule 492. (1) Belts shall be fastened by a lapped splice or shall be butt-spliced with a strap on the side of the belt away from the pulley.

(2) For lapped splices, the overlap of the belt at the splice shall be not less than 3 feet where the travel of the manlift does not exceed 100 feet and not less than 4 feet, if the travel exceeds 100 feet. Where butt splices are used the straps shall

extend not less than 3 feet on 1 side of the butt for a travel not in excess of 100 feet and 4 feet for a travel in excess of 100 feet.

(3) The minimum number of bolts for a belt width of 12 inches is 20, for a belt width of 14 inches is 23, and for a belt width of 16 inches is 27.

History: 1954 ACS 53, p. 47, Eff. Feb. 14, 1968; 1954 ACS 82, p. 83, Eff. Feb. 7, 1975.

R 408.8493 Down limit stops.

Rule 493. (1) In addition to the up limit stop required by the standard, an automatic down limit stop device requiring manual resetting shall be so installed as to cut off the power and apply the brake when a loaded step passes the lower terminal landing and before the loaded step has reached the point 12 inches below the lower terminal landing.

(2) It shall not be possible to reset the down limit stop from any step, and the limit stop shall be so located that a person resetting it shall have a clear view of both the up and down runs of the manlift.

History: 1954 ACS 53, p. 48, Eff. Feb. 14, 1968; 1954 ACS 82, p. 83, Eff. Feb. 7, 1975.

R 408.8494—R 408.8503 Rescinded.

PERSONNEL HOISTS

R 408.8511 Applicability of national standard and rules of board.

Rule 511. The standards contained in the American national standards institute safety standards for personnel hoists, ANSI A10.4-1973, are adopted and incorporated herein by reference as rules for personnel hoists in this state with the exception of rules 7.3, 17.6.3, 18.1.5.2, 19.16, 19.16.1, 19.16.2, 22.2, 22.3, 22.10, 22.10.1, 22.10.2, 22.10.3, 22.10.4, 22.10.5, 22.10.6, 22.10.7, 25.9.1, and 25.9.2. These rules may be purchased at American National Standards Institute, 1430 Broadway, New York, New York 10018, or the Michigan Department of Labor, 300 East Michigan Avenue, Lansing, Michigan 48926, at a cost of $2.75. A copy of these standards and the general rules of the board are on file in the Lansing office of the department of labor and are available for public inspection.

History: 1954 ACS 53, p. 50, Eff. Feb. 14, 1968; 1954 ACS 82, p. 83, Eff. Feb. 7, 1975.

R 408.8512 Location.

Rule 512. (1) This kind of elevator shall be installed not less than 12 feet from any other lifting or lowering apparatus.

(2) A hoistway shall not be located either partially or wholly over sidewalks or passageways.

History: 1954 ACS 53, p. 50, Eff. Feb. 14, 1968.

R 408.8513 Authorized uses.

Rule 513. (1) The only persons permitted to ride on a personnel hoist are workmen and other authorized personnel associated with the work being done.

(2) A personnel hoist may be used for carrying materials if it is designed and installed for the type of load to be used and if no passengers are carried during the time materials are being carried except those necessary to handle the materials.

(3) The load on a personnel hoist shall not exceed the maximum rated load established by the department.

History: 1954 ACS 53, p. 50, Eff. Feb. 14, 1968; 1954 ACS 82, p. 83, Eff. Feb. 7, 1975.

R 408.8514 Hoistway doors and gates.

Rule 514. (1) Every hoistway door shall be equipped with an approved interlock.

(2) Sliding doors and gates shall be constructed of metal and shall be of a design which will reject a ball 1½ inches in diameter.

History: 1954 ACS 53, p. 51, Eff. Feb. 14, 1968; 1954 ACS 82, p. 84, Eff. Feb. 7, 1975.

R 408.8515 Winding drum machines.

Rule 515. Winding drum machines may be used irrespective of car travel if the drums are grooved for hoisting wire rope. Grooves shall be machine finished and shall be of the helical or parallel type. Only 1 layer of rope shall be permitted on the drum.

History: 1954 ACS 53, p. 51, Eff. Feb. 14, 1968; 1954 ACS 82, p. 84, Eff. Feb. 7, 1975.

R 408.8516 Overhead protection.

Rule 516. A personnel hoist shall have overhead protection equivalent to 2-inch plank. The planks shall be secured. The exit cover shall be hinged and locked and open outward.

History: 1954 ACS 53, p. 51, Eff. Feb. 14, 1968; 1954 ACS 82, p. 84, Eff. Feb. 7, 1975.

R 408.8517 Wire rope.

Rule 517. (1) Hoisting and counterweight wire ropes shall be attached to cars and counterweights by means of zinc-coated or galvanized dropforged non-deforming cable clamps and wire rope thimbles, or by approved special fastening devices.

(2) When extra wire rope is carried on top of the frame of the hoisting platform, a drum and clamp tie-down or equivalent type anchor device which will not damage or deform the wire rope shall be used.

(3) Approved babbitted rope sockets may be provided.

History: 1954 ACS 53, p. 51, Eff. Feb. 14, 1968; 1954 ACS 82, p. 84, Eff. Feb. 7, 1975.

R 408.8518 Stop switches.

Rule 518. An approved type stop switch that can be locked out of use when the operator leaves the car and that does not require manual resetting of the control panels shall be provided in the car of every personnel hoist.

History: 1954 ACS 53, p. 51, Eff. Feb. 14, 1968; 1954 ACS 82, p. 84, Eff. Feb. 7, 1975.

R 408.8519 Rescinded.

History: 1954 ACS 53, p. 51, Eff. Feb. 14, 1968; rescinded 1954 ACS 82, p. 84, Eff. Feb. 7, 1975.

R 408.8520 Buffers.

Rule 520. Spring-type car and counterweight buffers shall be used for rated speeds not exceeding 300 feet per minute. For rated speeds of more than 200 feet per minute the buffer strokes shall conform to the following:

(a) 201-250 feet per minute—6-inch stroke.

(b) 251-300 feet per minute—9-inch stroke.

History: 1954 ACS 53, p. 51, Eff. Feb. 14, 1968.

R 408.8521—R 408.8523 Rescinded.

History: 1954 ACS 53, p. 51, Eff. Feb. 14, 1968; rescinded 1954 ACS 82, p. 84, Eff. Feb. 7, 1975.

R 408.8524 Limit of speed.

Rule 524. The rated speed shall not be more than 300 feet per minute.

History: 1954 ACS 53, p. 52, Eff. Feb. 14, 1968.

CONSTRUCTION PERSONNEL ELEVATORS

R 408.8525 Signal devices.

Rule 525. One of the following signal systems shall be provided:

(a) An approved signal device shall be provided to enable persons on each landing to signal the operator to stop, and an emergency bell shall be provided to signal the operator to return to the bottom landing.

(b) An approved type voice communication system shall be provided between the car and landings and the project manager or job site superintendent's office.

History: 1954 ACS 87, p. 45, Eff. Apr. 7, 1976.

WHEELCHAIR ELEVATING DEVICES

R 408.8531 Applicability of subpart.

Rule 531 (1) The rules in this subpart apply to an electric powered elevating device used to raise or lower a person in a wheelchair from 1 level to another, hereinafter in these rules referred to as a device. The device shall be restricted to 2 stories and shall serve not more than 2 landings.

(2) In addition to all applicable rules in this subpart all inclined devices shall also conform to all applicable rules in section 502 of the ANSI A17.1-1971 code for elevators, dumbwaiters, escalators and moving walks which is incorporated herein by reference and is available for inspection at the Lansing office of the Michigan department of labor. This standard may be purchased from the American Society of Mechanical Engineers, United Engineering Center, 345 East 47th Street, New York, New York 10017, or the Michigan Department of Labor, 300 East Michigan, Lansing, Michigan 48926, at a cost of $11.75 each.

History: 1954 ACS 78, p. 32, Eff. Mar. 13, 1974.

R 408.8532 Location, travel, and speed.

Rule 532. (1) A device may be installed adjacent to a porch, at the end of a ramp located over steps or in a stairwell.

(2) The rated speed of a device shall not exceed 40 feet per minute.

History: 1954 ACS 78, p. 33, Eff. Mar. 13, 1974.

R 408.8533 Guards and ramps.

Rule 533. (1) All exposed equipment on a device shall be guarded to protect against accidental contact which could cause bodily injury.

(2) An approved guard shall be provided on any side of the platform which is not guarded as provided in subrule (3).

(3) A metal guard not less than ⅛ inch thick and 6 inches high shall be provided the full width of the platform to prevent a wheelchair from rolling off the lower access end of the platform when in use. The guard may be actuated automatically by movement from the landing.

(4) A ramp shall be provided, as required, for access to and from the platform and shall safely carry the load.

History: 1954 ACS 78, p. 33, Eff. Mar. 13, 1974.

R 408.8534 Supports.

Rule 534. (1) The assembled unit of a device shall be supported and maintained in place so as to prevent any part from becoming loose or displaced.

(2) Adequate support shall be provided to maintain the device in a level position.

(3) The framework shall be securely anchored in place to the foundation.

History: 1954 ACS 78, p. 33, Eff. Mar. 13, 1974.

R 408.8535 Frames, platforms, and capacity.

Rule 535. (1) The frame of a device shall be constructed of metal.

(2) The platform shall be not more than 40 inches wide by 48 inches long.

(3) The rated capacity shall be not less than 350 pounds.

(4) A production model shall be subjected to a static load test to establish that all components of the device will withstand stresses of 5 times the rated load of the device, to ensure a factor of safety of at least 5. A registered professional engineer shall certify the safety factor and affix his signature and seal to the certification.

(5) All welding shall be in accordance with standards established by the American society of mechanical engineers' boiler and pressure vessel code, section 9, 1971 edition, dated July 1, 1971, together with addenda thereto dated December 31, 1971, June 30, 1972, December 31, 1972, and June 30, 1973, respectively, which are incorporated herein by reference and which are available for inspection at the Lansing office of the Michigan department of labor. These standards may be purchased from the American Society of Mechanical Engineers, United Engineering Center, 345 East 47th Street, New York, New York 10017, or from the Michigan Department of Labor, 300 East Michigan Avenue, Lansing, Michigan 48926, at a total cost of $19.00.

(6) Means shall be provided on vertically traveling devices to prevent access below the platform when it is in a raised position; or the platform shall have equipment which will open an electric contact in the control circuit and thus stop the down travel of the platform, if the platform is obstructed in its downward travel by a force of not more than 4 pounds.

History: 1954 ACS 78, p. 33, Eff. Mar. 13, 1974.

R 408.8536 Controls and electrical equipment.

Rule 536. (1) The operating control shall be of constant pressure type.

(2) A disconnecting means shall be provided that is not accessible to the general public.

(3) Electrical wiring and components in the device and its installation shall comply with the national electrical code ANSI C1-1971 (NFPA 70-1971) which is incorporated herein by reference and is available for inspection at the Lansing office of the Michigan department of labor. This standard may be purchased from the American National Standards Institute, 1430 Broadway, New York, New York 10018, or the Michigan Department of Labor, 300 East Michigan, Lansing, Michigan 48926, at a cost of $3.50 each.

(4) A slack cable switch shall be provided where applicable.

(5) An upper terminal stopping switch shall be provided to stop a device at the upper terminal landing.

(6) When deemed necessary by the enforcing authority a lower terminal stopping switch shall be provided to stop a device at the lower terminal landing.

History: 1954 ACS 78, p. 33, Eff. Mar. 13, 1974.

R 408.8537 Public assembly and institutional installations.

Rule 537. In addition to the requirements of R 408.8533 to R 408.8536, a device installed in a place of public assembly or in an institution shall be equipped with the following:

(a) A permanent weatherproof enclosure when exposed to the outside elements.

(b) An operating control of the constant pressure keyed-type. Only authorized persons shall have access to the keys.

History: 1954 ACS 78, p. 34, Eff. Mar. 13, 1974.

R 408.8538 Nonskid surfacing.

Rule 538. Related surfacing on which a wheelchair rolls when using a device shall be of the nonskid type.

History: 1954 ACS 78, p. 34, Eff. Mar. 13, 1974.

R 408.8539 Installation permits and acceptance inspections.

Rule 539. (1) An installation permit shall be obtained, before a device is installed. Installation shall be by an elevator contractor licensed by this state.

(2) An acceptance inspection shall be made by a general elevator inspector before the device is operated by the owner or user.

History: 1954 ACS 78, p. 34, Eff. Mar. 13, 1974.

R 408.8540 Installation instructions.

Rule 540. Printed installation instructions shall be supplied with each device and may be reviewed and approved by the board. They shall include the following:

(a) Construction of an upper terminal ramp or dock-like landing of adequate strength and rigidity, with substantial handrails on each side, for installations not contiguous to a porch or permanent foundation and requiring travel over steps or open areas for access to and from the device.

(b) A movable barrier at the upper terminal landing to prevent a wheelchair from rolling off the end of that landing while waiting for the device, when deemed necessary by the enforcing authority.

(c) The horizontal surface of the landings, upon which a wheelchair rolls, shall be constructed as to safely carry the weight.

(d) A terminal landing shall be permanently fastened in place.

History: 1954 ACS 78, p. 34, Eff. Mar. 13, 1974.

R 408.8540a Operation and maintenance manuals.

Rule 540a. (1) The manufacturer shall provide an operational manual for each device describing the function and operation of the components including instructions for correct use of the device.

(2) The manufacturer shall provide a maintenance manual for each device, including recommended maintenance procedures as follows:

(a) Types of lubricants required and frequency of application.

(b) Definitions and measurements to determine excessive wear.

(c) Recommended frequency of service to specific components.

History: 1954 ACS 78, p. 34, Eff. Mar. 13, 1974.

Editor's note: This rule appears in 1954 ACS 78, p. 34, as R 408.8541, but has been renumbered to avoid a conflict with R 408.8541, *which follows.*

INCLINE LIFTS

R 408.8541 Applicability of rules.

Rule 541. (1) The design, installation, and operation of incline lifts shall be subject to the approval of the department and the rules promulgated by the board.

(2) On and after September 1, 1971, these rules shall govern existing commercial installations and new commercial installations; further, they shall also govern new private installations, but they shall not govern private installations existing before September 1, 1971.

(3) The following rules shall not apply to private installations of incline lifts: R 408.8543, R 408.8545, R 408.8547, and R 408.8555.

(4) "Private installations" shall mean any incline lift restricted for use by the owner and his immediate family and their nonpaying guests. All other incline lift installations shall be classified as commercial.

History: 1954 ACS 53, p. 52, Eff. Feb. 14, 1968; 1954 ACS 68, p. 38, Eff. June 28, 1971.

R 408.8542 Engineers' approval.

Rule 542. The design of structural members and component parts for an incline lift submitted to the elevator safety division after September 1, 1971, shall bear the seal of approval of a registered professional engineer before issuance of a permit will be considered.

History: 1954 ACS 68, p. 38, Eff. June 28, 1971.

R 408.8543 Enclosures for runways and driving machines.

Rule 543. (1) The sides of an incline lift runway which is accessible to the general public shall be enclosed along its entire length. A minimum clearance of 2 feet shall be maintained between the enclosure and any moving part. The enclosure shall be of such size and material as will reject a 2-inch ball. The height of the enclosure shall be not less than 7 feet and so supported and braced as to deflect not over 1 inch when subjected to a force of 100 pounds applied horizontally at any point.

(2) Approved spring buffers shall be installed at the bottom of the runway.

(3) A driving machine and controller shall be located within a locked enclosure. This enclosure shall be so supported and braced so as to deflect not over 1 inch when subjected to a force of 100 pounds applied horizontally at any point.

History: 1954 ACS 68, p. 38, Eff. June 28, 1971.

R 408.8544 Electrical installations.

Rule 544. (1) A fused disconnect switch or a circuit breaker shall be installed within the machine enclosure and connected to the power supply line to each electric motor.

(2) An electrical fitting exposed to any weather conditions and any wiring shall conform to the requirements of the national electrical code, USAS C1-1968, which is hereby adopted by reference. This code may be purchased from the National Fire Protection Association, 60 Batterymarch Street, Boston, Massachusetts 02110, at a cost of $2.00 each or from the Michigan Department of Labor, 300 East Michigan Avenue, Lansing, Michigan 48926, at a cost of $2.00, plus handling charges.

History: 1954 ACS 68, p. 38, Eff. June 28, 1971.

R 408.8545 Landing entrance doors and gates.

Rule 545. (1) A landing opening of an incline lift shall be protected by a door or gate extending from a maximum of 1 inch above the floor to a minimum height of 7 feet and shall be self-closing.

(2) A landing door or gate shall be solid or may have openings of such size and material as will reject a ball of ¾ inch in diameter.

(3) A landing door or gate shall be provided with an approved type mechanical lock and electric contact or interlocks. Contact voltage shall not exceed 120 nominal volts.

(4) A landing door or gate shall be so supported and braced as to deflect not over 1 inch when subjected to a force of 100 pounds applied horizontally at any point. Grilles when used shall be not less than no. 13 steel wire gauge.

History: 1954 ACS 68, p. 38, Eff. June 28, 1971.

R 408.8546 Car doors and gates.

Rule 546. (1) A car shall have a car door or gate at each entrance which shall swing into the car or slide horizontally.

(2) A car door or gate shall be equipped with an approved type of mechanical lock and plug proof electrical contact.

(3) A car door or gate shall be at least 6 feet in height with a bottom clearance of not more than 1 inch, and shall be of such size and material as will reject a ball ¾ inch in diameter.

History: 1954 ACS 68, p. 39, Eff. June 28, 1971.

R 408.8547 Car enclosures and capacity.

Rule 547. (1) All sides of the car shall be permanently enclosed except the portion used as an entrance or entrances.

(2) The enclosures may be of wood, metal or other approved material and may be designed with open work material. An opening is not to be more than ¾ inch square and so supported and braced as to deflect not over 1 inch when subjected to a force of 100 pounds applied horizontally at any point.

(3) An enclosure shall be not less than 6 feet in height.

(4) A capacity sign which states the rated load shall be conspicuously located in the car.

(5) The rated load of a car shall be determined pursuant to the following table:

Maximum Inside Net Platform Areas for the Various Rated Loads

Rated Load lb.	Inside Net Platform Area sq. ft.	Rated Load lb.	Inside Net Platform Area sq. ft.
500	7.0	4500	46.2
600	8.3	5000	50.0
700	9.6	6000	57.7
1000	13.25	7000	65.3
1200	15.6	8000	72.9
1500	18.9	9000	80.5
1800	22.1	10000	88.0
2000	24.2	12000	103.0
2500	29.1	15000	125.1
3000	33.7	18000	146.9
3500	38.0	20000	161.2
4000	42.2	25000	196.5
		30000	231.8

History: 1954 ACS 68, p. 39, Eff. June 28, 1971.

R 408.8548 Car safety devices.

Rule 548. (1) An incline lift shall be equipped with an approved car safety device capable of stopping and holding the rated load.

(2) The maximum rated car speed shall be not more than 75 feet per minute.

(3) An installation shall be subject to a full load safety test at the time of final inspection which shall be witnessed by a general elevator inspector of the department.

(4) An installation shall be equipped with a safety operated switch on the car to automatically cut off the power from the machine and apply the brake when the safety sets.

(5) A power incline lift which has a winding drum type machine shall have a device which cuts off the power to the machine and applies the brakes if a cable becomes slack or breaks regardless of the position of the car on the runway. This device shall be arranged to stay in the open position until manually reset.

History: 1954 ACS 68, p. 39, Eff. June 28, 1971.

R 408.8549 Controls.

Rule 549. (1) The operating device shall be of an enclosed electrical type with constant pressure button and shall be located at each landing and on the car. Keyed "off" and "on" switches shall be provided at each landing.

(2) A car shall be equipped with an emergency stop switch which shall:

(a) Be of the manually opened and closed type.

(b) Have red operating handles or buttons.

(c) Be conspicuously and permanently marked, "Stop."

(d) Be positively opened mechanically and its opening shall not be solely dependent on springs.

History: 1954 ACS 68, p. 40, Eff. June 28, 1971.

R 408.8550 Final limit switches.

Rule 550. An incline lift shall have final limit switches opened only by the car and so located within the runway as to cut off power to the machine and apply the brake within the limits of the top and bottom overtravel.

History: 1954 ACS 68, p. 40, Eff. June 28, 1971.

R 408.8551 Normal terminal stopping devices.

Rule 551. (1) Upper and lower normal terminal stopping devices shall be provided and arranged to stop the car automatically at or near the top and bottom terminal landings with any load up to and including the rated load in the car and from any speed attained in normal operation. The devices shall function independently of the operating device and of the final terminal stopping device. The device shall be so designed and installed that it will continue to function until the final terminal stopping device operates.

(2) A drum machine shall be equipped with approved type machine limits.

History: 1954 ACS 68, p. 40, Eff. June 28, 1971.

R 408.8552 Machines and brakes.

Rule 552. (1) Machines shall be of the direct drive type.

(2) The brake shall be located either on the machine or main drive shaft. A mechanical speed retarder shall be provided which will limit the car speed to not more than 125% of the rated speed in case of a runaway car. The department may approve other types of overspeed devices.

(3) A hoisting motor shall have a manually reset type of electrical overload device.

History: 1954 ACS 68, p. 40, Eff. June 28, 1971.

R 408.8553 Cables and drums.

Rule 553. (1) The number of hoisting cables shall be not less than 2. The minimum diameter of the hoisting cable shall be not less than ⅜ inch. The cables shall be made of steel or comparable material approved by the department.

(2) The diameter of the hoisting drum shall not be less than 30 times the diameter of the hoisting cable. When the car is at its extreme limits of travel not less than 1½ turns of the cable shall remain on the drum.

(3) Cable fastenings shall be by at least 2 nondeforming-type clamps with cable thimbles or tapered babbitted rope sockets. U-bolt type cable clips or clamps are prohibited.

(4) A hoisting drum shall have machine-cut grooves with a corresponding groove for each cable.

(5) The factor of safety for a hoisting cable shall be not less than 7.

History: 1954 ACS 68, p. 40, Eff. June 28, 1971.

R 408.8554 Guides, tracks, and cables.

Rule 554. (1) An incline lift car shall run on approved metal guides, tracks, or cables which will not allow the car or its assembly to leave the guides, tracks, or cables.

(2) The guides, tracks, or cables and their supports shall be designed, spaced, and fastened so that the whole assembly will satisfactorily withstand, without undue deflection or permanent deformation, the application of the car safety when stopping the car with its rated load at its maximum obtainable speed.

History: 1954 ACS 68, p. 40, Eff. June 28, 1971.

R 408.8555 Periodic tests.

Rule 555. A full load maintenance test shall be performed annually on an incline lift to conform to the applicable rules of section 900 of the standard by a licensed elevator contractor who shall submit to the department a statement upon a form furnished by it certifying that the tests have been conducted and the results thereof. (See R 408.8103(10).)

History: 1954 ACS 68, p. 40, Eff. June 28, 1971.

R 408.8556 Factor of safety.

Rule 556. The factor of safety for all component parts except hoist cables of an incline lift shall be not less than 5 based on the rated load.

History: 1954 ACS 68, p. 41, Eff. June 28, 1971.

OTHER KINDS OF ELEVATORS

R 408.8561 Escalators.

Rule 561. Rules promulgated by the board and the American standard code for elevators A17.1-1965 shall apply to escalators.

History: 1954 ACS 53, p. 52, Eff. Feb. 14, 1968.

R 408.8562 Sidewalk elevators.

Rule 562. Rules promulgated by the board and the American standard code for elevators A17.1-1965 shall apply to sidewalk elevators.

History: 1954 ACS 53, p. 52, Eff. Feb. 14, 1968.

R 408.8563 Dumbwaiters.

Rule 563. Rules promulgated by the board and the American standard code for elevators A17.1-1965 shall apply to dumbwaiters.

History: 1954 ACS 53, p. 52, Eff. Feb. 14, 1968.

SEWER LIFT STATION PERSONNEL ELEVATORS

R 408.8571 Applicability.

Rule 571. The rules in this subpart apply to electric powered elevators used in sewage lift stations.

History: 1954 ACS 74, p. 81, Eff. Jan. 18, 1973.

R 408.8572 Public access.

Rule 572. A sewage lift station personnel elevator shall not be accessible to the general public and shall be limited to use by employees only.

History: 1954 ACS 74, p. 81, Eff. Jan. 18, 1973.

R 408.8573 Location, counterweights, and speed.

Rule 573. (1) The elevator may be installed in the entrance well.

(2) When counterweights and buffers are provided, the rules pertaining thereto shall apply.

(3) The rated speed of a car shall not exceed 35 feet per minute.

History: 1954 ACS 74, p. 81, Eff. Jan. 18, 1973.

R 408.8574 Guarding exposed equipment.

Rule 574. Exposed gears, sprockets, tape or rope sheaves, drums of selectors, floor controllers, signal machines and the ropes, chains or tapes for driving them shall be guarded to protect against accidental contact.

History: 1954 ACS 74, p. 81, Eff. Jan. 18, 1973.

R 408.8575 Supports and foundations.

Rule 575. (1) Machines, machinery and sheaves shall be supported and maintained in place so as to prevent any part from becoming loose or displaced.

(2) Supporting beams shall be of steel. Beams are not required under machines, sheaves and machinery or control equipment which are supported on floors provided that the floors are designed and installed to support the load imposed on the floor.

History: 1954 ACS 74, p. 81, Eff. Jan. 18, 1973.

R 408.8576 Distance from car platform to floor level.

Rule 576. The distance from the top of a car platform at the lowest landing shall be not more than 20 inches above the floor level. The means of descent from the car platform shall not constitute a hazard.

History: 1954 ACS 74, p. 81, Eff. Jan. 18, 1973.

R 408.8577 Car and counterweight clearances.

Rule 577. (1) When a car platform is level with the lowest landing, the car buffer striker plates shall not be in contact with the buffers.

(2) When the car is at its extreme limit of normal travel, there shall be not less than 6 inches between the top of the car crosshead and the nearest obstruction.

(3) When the counterweights are resting on their buffers, there shall be not less than 3 inches between the top of the car crosshead and the nearest obstruction.

(4) When the car is resting on its buffers there shall be not less than 3 inches clearance between the top of the counterweights and the nearest obstruction.

(5) The clearances between the car and the hoistway enclosure, hoistway sill or any obstruction shall be not less than ¾ inch.

(6) The clearance between the car platform sill and hoistway edge shall be not more than 5 inches.

(7) The underside of a projection into the hatch shall be beveled at an angle of not less than 75 degrees with the horizontal unless protected by a safety device to stop the ascending car.

(8) The top of the lower landing entrance shall be provided with a safety device to stop the ascending car if for any reason an overhanging obstruction on the car comes in contact with a shear hazard.

History: 1954 ACS 74, p. 81, Eff. Jan. 18, 1973.

R 408.8578 Landing openings.

Rule 578. (1) If an upper landing side entrance door is provided, the entrance shall be not less than 6½ feet in height.

(2) The top of the hoistway shall be provided with an overlapping, self-locking hinged cover designed to lock the closed side entrance door when the lift station is unoccupied.

History: 1954 ACS 74, p. 81, Eff. Jan. 18, 1973.

R 408.8579 Locking devices.

Rule 579. (1) The hinged cover and the upper landing side entrance door, when provided, shall be provided with a mechanical latch and an electrical contact designed to be operated from inside the hoistway.

(2) A locking device shall be provided to prevent the top hinged cover from locking the upper landing side entrance door when the lift station is occupied.

History: 1954 ACS 74, p. 82, Eff. Jan. 18, 1973.

R 408.8580 Guide rails.

Rule 580. (1) A car and counterweight shall be provided with guide rails of steel.

(2) A guide rail shall be securely fastened with through bolts or clips of strength, design and spacing as follows:

(a) A guide rail and its fastenings shall not deflect more than ¼ inch under normal operations.

(b) A guide rail and its fastenings shall withstand the application of the safety, when stopping the car with a rated load or when stopping the counterweights.

(c) A guide rail shall rest on supports and extend at the top of the hoistway to prevent the guide shoes from running off the guide rail in case the car or the counterweight travels beyond the terminal landings.

History: 1954 ACS 74, p. 82, Eff. Jan. 18, 1973.

R 408.8581 Frames, enclosures, platforms, capacity, and final limits.

Rule 581. (1) A car frame and platform shall be of metal. Frame members shall be securely bolted and braced. The factor of safety shall not be less than 4 with a uniformly distributed rate load.

(2) The car shall be enclosed to the extent necessary to afford reasonable protection.

(3) The platform area shall not exceed 5 square feet.

(4) The rated capacity shall be not less than 300 pounds.

(5) The limit of travel for the elevator shall be not more than 50 feet.

History: 1954 ACS 74, p. 82, Eff. Jan. 18, 1973.

R 408.8582 Emergency exits.

Rule 582. A car shall be provided with an emergency exit giving egress from the car to an emergency ladder from any location in the hoistway and shall be provided with electrical contacts to prevent movement of the car while the emergency exit is open.

History: 1954 ACS 74, p. 82, Eff. Jan. 18, 1973.

R 408.8583 Safeties and governors.

Rule 583. (1) A car shall be provided with a car safety capable of stopping and sustaining the car with a rated load.

(2) The car safety shall be of the inertia or other type approved by the board, operated as a result of the breakage of the hoisting mechanism or by a speed governor. A governor of the speed-governor type shall operate to set the safety at a speed of not more than 175 feet per minute and on breakage of the suspension means. The safety shall operate without appreciable delay and independently of the governor speed action.

(3) Where a speed governor is used, it shall be located where there is sufficient space for full movement of the governor parts and where the governor cannot be struck by the car or counterweight in case of overtravel.

(4) A safety operated switch shall be provided to open the motor-control circuit and the brake-control circuit before or at the time the safety applies.

(5) A governor rope shall be of iron, steel, Monel Metal or phosphor bronze not less than ¼ inch in diameter. Tiller-rope construction shall not be used for a governor rope.

(6) An elevator of the winding-drum type or roller chain drive type shall be provided with a slack-rope device of the manually reset type which will remove the power from the motor and brake if the car is obstructed in its descent and the hoisting chain or rope slackens.

(7) A car safety device which depends upon completion of maintenance of an electric circuit for application of the safety shall not be used. A car safety shall be applied mechanically.

(8) Cast iron shall not be used in construction of any part of a car safety, the breakage of which would result in failure of the safety to function to stop and sustain the car.

(9) A test of a car safety shall be made with a rated load in the car before the elevator is put into service. Governor operation of an instantaneous-type safety shall be tested at rated speed by tripping the governor by hand. A safety operated as the result of the breaking of the hoisting mechanism shall be tested by obtaining the necessary slack rope to cause it to function.

(10) An overspeed governor shall be provided for a traction machine.

History: 1954 ACS 74, p. 82, Eff. Jan. 18, 1973.

R 408.8585 Driving machines and sheaves.

Rule 585. (1) A sprocket, winding drum, traction sheave and overhead and deflecting sheave shall be of cast iron or steel. The diameter of a sheave shall not be less than 30 times the diameter of the wire hoisting rope. The rope grooves shall be machined, except where 8 x 19 steel ropes are used; where 8 x 19 steel ropes are

used, the diameter of drums and sheaves may be reduced to 21 times the diameter of the rope.

(2) The factor of safety, based on the static load, that is, the rated load plus the weight of the car or chains, ropes and counterweights, to be used in the design of a driving machine and sheave, shall be not less than:

(a) Eight for wrought iron and steel.

(b) Ten for cast iron, cast steel and other material.

(3) A set screw fastening shall not be used in lieu of a key or pin if the connection is subject to torque or tension.

(4) A friction-gearing or clutch mechanism shall not be used for connecting the sprockets, drum or sheaves to the main driving gear.

(5) Worm gearing having cast-iron teeth shall not be used.

(6) A driving machine shall be equipped with an electrically released spring-applied brake.

(7) A single ground or short circuit, a counter-voltage or a motor field discharge shall not prevent the brake magnet from allowing the brake to set when the operating device is placed in the stop position.

History: 1954 ACS 74, p. 83, Eff. Jan. 18, 1973.

R 408.8587 Terminal stopping devices.

Rule 587. (1) Upper and lower normal terminal stopping devices operated by a car shall be provided and shall be set to stop the car at, or near the upper and lower terminal landings. Upper and lower final terminal stopping devices operated by the car shall also be provided and shall be set to stop the car before it strikes either the overhead or obstruction at the lower floor level. A final terminal stopping device shall be provided on and operated by the driving machine of the winding drum type.

(2) The final terminal stopping device shall act to prevent movement of the car in both directions of travel. The normal and final terminal stopping devices shall not control the same switches on the controller unless 2 or more separate and independent switches are provided, 2 of which shall be closed to complete the motor and brake circuit in each direction of travel.

History: 1954 ACS 74, p. 83, Eff. Jan. 18, 1973.

R 408.8588 Operation and operation devices.

Rule 588. (1) The operation at top and bottom landings shall be of the constant pressure type.

(2) The car operating device shall be of the constant pressure push button type with the face of the button not to project beyond the face of the button plate; and it shall be of the 2 hand control type.

(3) An emergency stop switch shall be provided on or adjacent to the car operating panel. A stop switch shall be of the manually opened and manually closed type with a red handle or button and conspicuously marked "Stop." Spring failure shall not prevent opening of the switch where springs are used.

History: 1954 ACS 74, p. 83, Eff. Jan. 18, 1973.

R 408.8589 Control and operating circuits.

Rule 589. The design and installation of the control and operating circuits shall conform to the following:

(a) A control system which depends on completion or maintenance of an electric circuit shall not be used for:

(i) Interruption of the power and application of machine brake at the terminals.

(ii) Stopping of the car when the emergency stop switch in the car is opened or when any of the electrical protective devices operate.

(iii) Stopping the machine when the safety applies.

(b) A spring used to actuate a switch, contactor or relay to break the circuit in order to stop a car at the terminal shall be of the compression type.

(c) The failure of a single magnetically operated switch or relay or contactor to release or operate in the intended manner, or the occurrence of a single accidental ground, shall not permit the car to run.

History: 1954 ACS 74, p. 83, Eff. Jan. 18, 1973.

R 408.8590 Hoisting cables.

Rule 590. (1) Only iron, low carbon steel or steel wire cables with fibre cores, having the commercial classification "elevator wire cable," shall be used for suspension of an elevator car and counterweights. The wire material for a cable shall be manufactured by the open-hearth or electric furnace process or their equivalent.

(2) Suspension means shall be not less than 2 iron or steel wire cables having a diameter of not less than ¼ inch.

(3) The factor of safety of the suspension means shall be not less than 7.

(4) The arc of contact of a wire rope on a traction sheave shall be sufficient to produce adequate traction under all load conditions.

(5) A wire rope anchored to a winding drum shall have not less than 1 full turn of rope on the drum when the car or counterweight has reached its limit of possible overtravel.

(6) A car or counterweight wire rope shall not be lengthened or repaired by splicing.

(7) The winding-drum end of a car and counterweight wire rope shall be secured by a clamp on the inside of the drum.

(8) The car or counterweight end of a wire rope shall be fastened by return loop, by individual tapered babbitted sockets, or by an alternate method approved by the board. A clamp of the U-bolt type shall not be used.

History: 1954 ACS 74, p. 84, Eff. Jan. 18, 1973.

R 408.8591 Hoisting chains.

Rule 591. (1) Only roller chain made of high quality alloy, heat treated steel with the following characteristics is acceptable for hoisting chains:

(a) Prestressed.

(b) Shot peened.

(c) In-line blanking.

(d) Deep case hardening of pins and bushings.

(2) Suspension means shall not be less than 2 separate roller chains, each chain having a tensile strength of not less than 3,500 pounds.

(3) The factor of safety of the suspension means shall be not less than 7.

(4) A chain shall have not less than 6 inches of chain available beyond the normal stopping point when the car has reached its extreme limits of travel.

(5) A chain end shall be fastened by standard master links.

History: 1954 ACS 74, p. 84, Eff. Jan. 18, 1973.

R 408.8592 Wiring and lighting.

Rule 592. (1) Electric wiring shall be in rigid metal conduit or electrical metallic tubing.

(2) A traveling cable used between the car and hoistway wiring shall be type S.O. as prescribed in the American national standards institute standard ANSI C.1-1971 which is incorporated herein by reference and is available for inspection at the Lansing office of the Michigan department of labor. This standard may be purchased from the American National Standards Institute, 1430 Broadway, New York, New York 10018, or the Michigan Department of Labor, 300 East Michigan Avenue, Lansing, Michigan 48926, at a cost of $3.50 each.

(3) A fused disconnect main line switch externally operated shall be provided adjacent to the controller.

(4) Hoistway lighting shall be provided.

History: 1954 ACS 74, p. 84, Eff. Jan. 18, 1973.

R 408.8595 Inspection and tests.

Rule 595. (1) An existing installation and a new elevator installation, after being placed in service, shall be subjected to maintenance inspections and tests.

(2) Maintenance inspections and tests of elevator car and counterweight safeties and governors shall be made at intervals of not more than 12 months.

(3) The owner or his authorized agent shall have maintenance inspections and tests made by a person qualified to perform them in the presence of an inspector in the employ of or authorized by the department of labor, except where such an inspector is not available. When the required tests are made, the person or firm conducting the tests shall:

(a) Submit to the department a statement upon a form furnished by it certifying that the tests have been conducted and further certifying to the results thereof.

(b) Attach to the governor rope a tag marked to show the date of the test and the name of the person or firm who conducted it.

(4) The distance between any 100 continuous links of roller chain, measured from centerline of pin, shall not be more than + or - 1% of the rated pitch of the chain being tested. For example: 100 links of standard series single strand #40 roller chain, which has a pitch length of ½ inch shall not be more than 50½ inches or less than 49½ inches.

(5) The inspection of chain links shall be made at not less than 3 points picked at random.

History: 1954 ACS 74, p. 84, Eff. Jan. 18, 1973.

R 408.8596 Reshackling of hoisting ropes of drum-type machines.

Rule 596. The hoisting ropes of a power elevator having a drum-type driving machine with one-to-one roping shall be reshackled at the car ends at intervals not more than 24 months for a machine located below or at the side of the hoistway.

History: 1954 ACS 74, p. 85, Eff. Jan. 18, 1973.

PART 4. MODIFICATIONS OF AMERCIAN STANDARD SAFETY CODE

R 408.8601 Scope of part 4.

Rule 601. The rules in this part are modifications of certain identified rules of the American standard safety code for elevators, dumbwaiters, escalators and moving walks, A17.1-1965. Pursuant to section 6 of the act the rules as stated in this part shall apply rather than as stated in the standard.

History: 1954 ACS 53, p. 52, Eff. Feb. 14, 1968.

HAND AND POWER PASSENGER AND FREIGHT ELEVATORS AND DUMBWAITERS

R 408.8611 Fire-resistance ratings.

Rule 611. (1) The fire-resistance ratings of hoistway enclosures, doors and door assemblies where fire-resistive construction is required shall be not less than specified by local laws or ordinances.

(2) Where local laws and ordinances do not specify fire-resistance ratings, they shall be not less than 1 hour in fire-resistive buildings and ¾ hour in nonfire-resistive buildings. However, a hoistway enclosure in stories, other than the basement, of a dumbwaiter serving not more than 2 consecutive stories may be no. 16 U.S. gauge unperforated sheet steel or equal. (This rule modifies rule 100.1b of the standard.)

History: 1954 ACS 53, p. 52, Eff. Feb. 14, 1968.

R 408.8612 Pits; access and counterweight guards.

Rule 612. (1) Access to a pit extending more than 3 feet below the sill of the pit access door shall be provided by means of fixed vertical ladders of incombustible material, located within reach of the access door. The ladder shall extend not less than 42 inches above the sill of the access door, or handgrips shall be provided to the same height. (This rule modifies rule 106.1d2 of the standard.)

(2) Unperforated metal guards shall be installed in a pit on the open sides of all counterweights. (This rule modifies rule 103.2a of the standard.)

History: 1954 ACS 53, p. 52, Eff. Feb. 14, 1968.

R 408.8613 Access to hoistways for emergency purposes.

Rule 613. (1) The elevator shall have hoistway doors which are unlocked when closed with the car at floor, or locked but openable from landing by means effective only when car is in landing zone.

(2) The operating means for unlocking the door may be mounted in a receptacle with a breakable transparent cover clearly marked in letters at least ⅛ inch high "ELEVATOR DOOR KEY FOR FIRE DEPARTMENT AND EMERGENCY USE ONLY." The receptacle shall be located in an area in each building designated by the department. (This rule modifies rule 111.11 of the standard.)

History: 1954 ACS 53, p. 52, Eff. Feb. 14, 1968.

R 408.8614 Buffers and bumpers.

Rule 614. (1) Buffers of the spring, oil or equivalent type shall be installed under cars and counterweights of all elevators. (This rule modifies rule 201.1a of the standard.)

(2) Solid bumpers where buffers are required are prohibited. (This rule modifies rules 201.1b, 201.1c, and 201.2 of the standard.)

History: 1954 ACS 53, p. 53, Eff. Feb. 14, 1968.

R 408.8615 Car frame and platform connections.

Rule 615. Welding of parts upon which safe operation depends shall be done in accordance with rule 203.7c of the standard and as approved by the department. (This rule modifies rule 203.7c of the standard.)

History: 1954 ACS 53, p. 53, Eff. Feb. 14, 1968.

R 408.8616 Number of compartments in elevator cars.

Rule 616. The exceptions in rule 204.1d of the standard shall not apply.

History: 1954 ACS 53, p. 53, Eff. Feb. 14, 1968.

R 408.8617 Lights and illumination.

Rule 617. (1) Cars shall be provided with an electric light or lights with a total of not less than 2 lamps.

(2) The minimum illumination at the landing edge of the car platform, when the car and landing doors are open, shall be not less than the following:

(a) For passenger elevators, 5 footcandles.

(b) For freight elevators, 2½ footcandles.

(3) The location of fuses or circuit breakers for car lights shall be permanently posted at the elevator disconnect in the machine room. (This rule modifies rule 204.7a of the standard.)

History: 1954 ACS 53, p. 53, Eff. Feb. 14, 1968.

R 408.8618 Speed governors.

Rule 618. (1) Car safeties, and counterweight safeties where furnished, shall be actuated by separate speed governors, except that they are not required for the operation of safeties of sidewalk elevators having a rated speed of not more than 50 feet per minute. (See part IV, section 402, rule 402.7 of the standard.)

(2) The governor shall be located where it cannot be struck by the car or the counterweight in case of overtravel, and where there is adequate space for full movement of governor parts.

(3) Governors of the type which are entirely dependent upon friction between the governor rope and sheave for establishing the force necessary to operate the safeties are prohibited. (This rule modifies rule 206.1 of the standard.)

History: 1954 ACS 53, p. 53, Eff. Feb. 14, 1968.

R 408.8619 Overloading of freight elevators.

Rule 619. (1) A freight elevator shall not be loaded to exceed its rated load as specified on the capacity plate required by rule 207.3 of the standard except in case of:

(a) A static load on an elevator loaded and unloaded by industrial trucks as noted on car capacity or separate plate. (See rules 207.2b-3 and 207.3b-1b of the standard.)

(b) An elevator designed and installed in conformity with rule 207.7 of the standard to carry 1-piece loads exceeding its rated load.

(2) Where it is determined by the department that safe operation requires it, a load-weighing device conforming to rule 210.11 of the standard shall be installed. The device shall be so designed and installed that when the load on the elevator platform is in excess of rated load, it shall prevent the electric power from being applied to the elevator driving machine motor and brake. (This rule modifies rule 207.6 of the standard.)

History: 1954 ACS 53, p. 53, Eff. Feb. 14, 1968.

HYDRAULIC ELEVATORS

R 408.8631 Car safeties.

Rule 631. When it is determined by the department that safe operation requires it, car safeties shall be installed. (This rule modifies rule 315.1 of the standard.)

History: 1954 ACS 53, p. 53, Eff. Feb. 14, 1968.

R 408.8632 Flexible connections.

Rule 632. (1) Flexible hose and fitting assemblies or flexible couplings may be used for hydraulic connections. Where installed between the check valve or control valve and the cylinder, they shall conform to the following:

Digitized by Google Original from UNIVERSITY OF MICHIGAN

Generated for Susan K Kendall (Michigan State University) on 2018-09-05 16:48 GMT / http://hdl.handle.net/2027/mdp.49015002898253
Open Access, Google-digitized / http://www.hathitrust.org/access_use#oa-google

(a) Flexible hose and fitting assemblies shall not be installed within the hoistway or project into or through a wall. Installation shall be accomplished without introducing twist in the hose, and shall conform with the minimum bending radius specified in society of automotive engineers, SAE 100 R2 (June 1961) high pressure, steel wire reinforced, rubber covered hydraulic hose.

(b) Flexible hose and fitting assemblies shall have a bursting strength sufficient to withstand not less than 10 times working pressure. They shall be tested in the factory or in the field prior to installation at a pressure of at least 5 times working pressure and shall be marked with date and pressure of test.

(c) Hose shall otherwise conform to the requirements of SAE 100 R2 (June 1961) and shall be compatible with the fluid used therein.

(d) Hose fittings shall be of the nonreusable type.

(e) The hose and fitting assembly shall be permanently marked with the SAE hose type identification and the required replacement date which shall be not more than 6 years beyond the installation date.

(f) Flexible couplings shall be so designed and constructed that failure of the sealing element will not permit separation of the parts connected.

(2) The reason for this rule is to permit use of flexible connectors between check or control valves and the cylinder if the connecting means is properly designed, installed, inspected and replaced at specified intervals. (This rule modifies rule 318.1d of the standard.)

History: 1954 ACS 53, p. 53, Eff. Feb. 14, 1968.

R 408.8633 Material.

Rule 633. (1) Supply piping materials and fittings shall conform to the applicable provisions of the American standard code for pressure piping, B31.1-1955, published by the American society of mechanical engineers, a copy of which is on file in the Lansing office of the department of labor and which is available for public inspection.

(2) Exceptions to paragraph 1 of this rule.

(a) Cast iron shall not be used.

(b) Ductile iron conforming to American society for testing and materials, ASTM specifications A445-63-T, having minimum physical properties of 60,000 pounds per square inch tensile strength, 45,000 pounds per square inch yield strength, and 15% elongation may be used for supply piping and fittings.

(3) Flexible hydraulic hose and fitting assemblies, and flexible couplings shall conform to rule 318.1d of the standard. (This rule modifies rule 318.3a of the standard.)

History: 1954 ACS 53, p. 54, Eff. Feb. 14, 1968.

R 408.8634 Pipe supports and guards.

Rule 634. Piping shall be supported to eliminate undue stresses at joints and fittings, particularly at any section of the line subject to vibration. Exposed portions of supply piping directly below the space between the hoistway and car sill in the elevator pit shall be protected with an approved type of guard. (This rule modifies rule 318.1c of the standard.)

History: 1954 ACS 53, p. 54, Eff. Feb. 14, 1968.

R 408.8635 Cylinder and plunger heads.

Rule 635. Heads of cylinders, and heads of plungers subject to fluid pressure, shall conform to the following requirements:

Digitized by Google
Original from UNIVERSITY OF MICHIGAN
Generated for Susan K Kendall (Michigan State University) on 2018-09-05 16:48 GMT / http://hdl.handle.net/2027/mdp.49015002898253
Open Access, Google-digitized / http://www.hathitrust.org/access_use#oa-google

(a) The bottom head of a cylinder shall be of dished seamless construction, concave to pressure.

(b) They shall be designed and constructed in accordance with the applicable formulas in R 408.8635a but a steel head shall in no case have a thickness less than that required for the adjoining shell.

(c) A dished seamless head, convex to pressure, if used on a plunger, shall have a maximum allowable working pressure not more than 60% of that for heads of the same dimensions with pressure on the concave side.

(d) A reinforced head shall be designed and constructed so that the maximum stress at rated capacity shall not exceed 12,000 pounds per square inch for mild steel and ⅛ of the ultimate strength of material for other metals.

(e) A pressure head subjected to mechanical loads in addition to fluid pressure loads shall be so designed and constructed that the combined stresses will not exceed the limits specified in subdivisions (b) to (d).

(f) Heads as referred to in these rules means the actual bottom of the cylinder. (This rule modifies rule 317.3d of the standard.)

History: 1954 ACS 67, p. 50, Eff. Apr. 28, 1971.

R 408.8635a Cylinder and plunger head formulas.

Rule 635a. Heads of cylinders and heads of plungers subject to fluid pressure shall be designed and constructed in accordance with 1 of the following applicable formulas:

(a) Flat unreinforced heads.

$$t = d \frac{p}{4S}$$

(b) Dished seamless hemispherical heads, concave to pressure.

$$t = \frac{5pr}{6S}$$

(c) Dished seamless ellipsoidal heads, concave to pressure (ellipsoidal heads in which ½ of the minor axis equals ¼ the inside diameter of skirt.)

$$t = \frac{5pD}{6S}$$

where:

t = thickness of head in inches, minimum
d = diameter of head between supporting edges in inches
D = inside diameter of skirt in inches
p = working pressure in pounds per square inch
S = design stress in pounds per square inch (12,000 psi maximum for mild steel and ⅛ ultimate strength for other metals)
r = radius to which head is dished, measured on concave side in inches (not greater than d)

(This rule modifies rule 1202.3 of the standard.)

History: 1954 ACS 67, p. 51, Eff. Apr. 28, 1971.

R 408.8636 Safety bulkheads.

Rule 636. (1) "Safety bulkhead" means a closure at the bottom of a cylinder located above the cylinder head and provided with an orifice for controlling the loss of fluid in case of cylinder head failure.

(2) A cylinder shall be provided with a safety bulkhead, having an orifice of a size that would permit the car with capacity load to descend at a speed not greater

Generated for Susan K Kendall (Michigan State University) on 2018-09-05 16:48 GMT / http://hdl.handle.net/2027/mdp.49015002898253

Original from UNIVERSITY OF MICHIGAN

than 15 feet per minute nor less than 5 feet per minute. A space of not less than 1 inch shall be left between the welds of the safety bulkhead and the cylinder head. A safety bulkhead shall conform to R 408.8635. However, where a double cylinder design is used, the inner and outer cylinders shall have an orifice connecting each other with pressure in both and shall conform to R 408.8635. (This rule modifies rule 317.3 of the standard.)

History: 1954 ACS 67, p. 51, Eff. Apr. 28, 1971.

R 408.8636a Cylinder protection.

Rule 636a. (1) A cylinder shall be provided with approved corrosion protective wrappings and coatings which shall be protected against damage during installation.

(2) An outer cylinder casing is required on a new hydraulic elevator or where a cylinder is being replaced. This casing shall be made from not less than schedule 30 steel pipe. An expandable type concrete plug shall be poured in the bottom of a casing or a welded plate closer provided and water removed. Dry non-conductive material if needed shall be provided between cylinder and casing to secure position of the cylinder. (This rule modifies rule 317.3 of the standard.)

History: 1954 ACS 67, p. 51, Eff. Apr. 28, 1971.

R 408.8637 Wall thickness of supply piping, valves, and fittings.

Rule 637. The minimum wall thickness of supply piping, valves and fittings shall conform to the following:

(a) For working pressures up to 250 pounds per square inch, piping equal to standard schedule 40 steel pipe may be used without stress analysis.

(b) For working pressure of more than 250 pounds per square inch, the wall thickness shall be not less than that determined by the formula in rule 1202.4 of the standard.

(c) Plain end nonferrous pipe or tubing shall have a wall thickness not less than that determined by the formula in rule 1202.4 of the strength of the material used. (This rule modifies rule 318.3b of the standard.)

History: 1954 ACS 67, p. 51, Eff. Apr. 28, 1971.

R 408.8638 Shut off valves; gages; underground pipings; tags.

Rule 638. (1) A shut off valve shall be provided on a new or modernized hydraulic elevator and shall be installed in the cylinder supply line within the elevator machine room. Where the hoistway is remotely located from the machine room a shut off valve shall also be provided in the elevator pit.

(2) A new hydraulic machine shall be provided with the necessary permanent pressure gage snap-on fittings or permanent gages to allow pressure readings at each pump for checking operating pressures.

(3) Underground piping in connection with a new hydraulic elevator is prohibited. When a cylinder is replaced on an existing hydraulic elevator the corresponding piping if underground is prohibited unless approved by the director of labor.

(4) Tags provided by the department of labor shall be installed on new or replaced exposed hydraulic piping at intervals of not more than 10 feet. A tag provided by the department shall be attached to the cylinder head of a new or modernized hydraulic elevator, indicating the date of the installation and confirming that the hydraulic piping complies with these rules. (This rule modifies rule 318.3 of the standard.)

History: 1954 ACS 67, p. 52, Eff. Apr. 28, 1971.

R 408.8639 Inspection and test.

Rule 639. In addition to inspections and tests required by rule 901.2 of the standard, the following inspection and tests shall be made:

(a) A pressure tank, after being thoroughly cleaned as required by rule 1001.2a of the standard, shall be internally inspected and, after such inspection, shall be subjected to a hydrostatic test with 150% of working pressure applied for 1 minute.

(b) Piston rods of a roped hydraulic elevator or dumbwaiter, after being cleaned as required by rule 1001.2b of the standard, shall be exposed and inspected, and where pitted or worn to a diameter less than the root diameter of the threads shall be replaced.

(c) A cylinder shall be tested at intervals no longer than 36 months in the following manner:

(i) Test the relief valve setting (see rule 901.1b(3) of the standard) by first inching the empty car upward to engage the plunger stop ring, or to engage other suitable blocking provided, and then apply pressure from the pump to check the setting.

(ii) Put rated load in the car and locate it at any convenient level.

(iii) Open the disconnect switch and locate the elevation of the platform with respect to a convenient reference.

(iv) After at least 2 hours note the position of the platform with respect to the chosen reference.

(d) A change in car position during a test under subdivision (c) which cannot be accounted for by visible oil leakage or temperature change of the oil indicates a failure of some type requiring further inspections, tests, or repairs. (This rule modifies rule 901.3d of the standard.)

History: 1954 ACS 67, p. 52, Eff. Apr. 28, 1971.

R 408.8639a Travel limitation.

Rule 639a. The maximum vertical rise of a hydraulic elevator shall not exceed 50 feet.

History: 1954 ACS 82, p. 84, Eff. Feb. 7, 1975.

R 408.8639b Elevator machinery location.

Rule 639b. The elevator machinery for hydraulic elevators shall be not more than 25 feet from the elevator hoistway.

History: 1954 ACS 82, p. 84, Eff. Feb. 7, 1975.

PRIVATE RESIDENCE ELEVATORS

R 408.8641 Enclosure of hoistways.

Rule 641. A hoistway shall be solidly enclosed, except for exterior windows, throughout its height, without grille work or openings other than for landings or access doors. Enclosure shall be of sufficient strength to support in true alignment the hoistway doors and gates and their locking equipment, and shall conform to local laws and ordinances. (This rule modifies rule 503.1 of the standard.)

History: 1954 ACS 53, p. 54, Eff. Feb. 14, 1968.

R 408.8642 Protection of spaces below hoistways.

Rule 642. Where the space below the hoistway for an elevator car or counterweight is used for a passageway or is occupied by persons, or if unoccupied is not secured against unauthorized access, it shall conform to the following requirements:

(a) The car and counterweight shall be provided with safeties conforming to rule 503.15 of the standard and with spring buffers so designed that they will not be fully compressed when struck by the car with its rated load or by the counterweight traveling at 125% of rated speed, or at governor tripping speed where a governor-operated safety is used.

(b) Car and counterweight buffer supports shall be provided with sufficient strength to withstand without failure the impact resulting from buffer engagement at 125% of rated speed, or at governor tripping speed where a governor-operated safety is used. (This rule modifies rule 503.3a of the standard.)

History: 1954 ACS 53, p. 54, Eff. Feb. 14, 1968.

R 408.8643 Pits and buffers.

Rule 643. A pit shall be provided at the bottom of a hoistway at a minimum depth of 12 inches. Car and counterweight buffers shall be provided conforming to rule 201.1a of the standard. (This rule modifies rule 503.3b of the standard.)

History: 1954 ACS 53, p. 55, Eff. Feb. 14, 1968.

R 408.8644 Hoisting ropes outside hoistways.

Rule 644. Hoisting ropes located outside a hoistway shall be fully protected with a solid enclosure. (This rule modifies rule 503.7a of the standard.)

History: 1954 ACS 53, p. 55, Eff. Feb. 14, 1968.

R 408.8645 Hoistway doors and locks.

Rule 645. No means shall be provided or used to unlock a hoistway door or gate from the landing side when the car is not in the landing zone as specified in rule 503.8d of the standard except that access to a hoistway for emergency purposes shall conform to rule 111.11 of the standard. Closing of hoistway doors shall conform to rule 110.3a of the standard. (This rule modifies rule 503.8e of the standard.)

History: 1954 ACS 53, p. 55, Eff. Feb. 14, 1968.

R 408.8646 Lights in cars.

Rule 646. An electric light shall be provided to illuminate a car with the light control switch located in or adjacent to the operating device in the car. (This rule modifies rule 503.9 of the standard.)

History: 1954 ACS 53, p. 55, Eff. Feb. 14, 1968.

R 408.8647 Car-door and gate mechanical locks.

Rule 647. Rule 503.14e of the standard shall not apply to car door and gate mechanical locks. (This rule modifies rule 503.14e of the standard.)

History: 1954 ACS 53, p. 55, Eff. Feb. 14, 1968.

R 408.8648 Stopping devices.

Rule 648. Upper and lower normal terminal stopping devices operated by the car shall be provided and shall be set to stop the car at, or near, the upper and lower terminal landings. Upper and lower final terminal stopping devices operated by the car shall also be provided and shall be set to stop it before it strikes the overhead or pit bottom. If the driving machine is of the winding-drum or sprocket-chain-suspension type, a final terminal stopping device shall also be provided on and operated by the driving machine. (This rule modifies rule 503.19a of the standard.)

History: 1954 ACS 53, p. 55, Eff. Feb. 14, 1968.

ESCALATORS

R 408.8661 Clearances between balustrades and steps.

Rule 661. (1) The clearance on either side of the steps between the steps and the adjacent skirt guard shall be not more than 3/16 inch, and the sum of the clearances on both sides shall be not more than ¼ inch.

(2) Means shall be provided to cause the opening of the power circuit to the motor and brake when an object is caught between the step and skirt panel as the step approaches the lower combplate. (This rule modifies rule 802.3c of the standard.)

History: 1954 ACS 53, p. 55, Eff. Feb. 14, 1968.

R 408.8662 Adjacent escalators; protection against access.

Rule 662. Where the angles of inclination of adjacent escalators are parallel, the entrance to the area between balustrades at the upper and lower levels shall be fully protected against access. (Rule 802.3f is an addition to the standard.)

History: 1954 ACS 53, p. 55, Eff. Feb. 14, 1968.

R 408.8663 Lighting of machine rooms and pits.

Rule 663. Permanent artificial lighting shall be provided in a machine room. The lighting switch shall be so located that it can be operated without passing over or reaching over any part of the machinery. Permanent artificial lighting shall be provided in an escalator pit. (This rule modifies rule 806.1 of the standard.)

History: 1954 ACS 53, p. 55, Eff. Feb. 14, 1968.

R 408.8664 Access to interiors and pits.

Rule 664. Reasonable access to the interior of an escalator shall be provided for inspection and maintenance. A permanent steel ladder shall be provided in a lower pit extending more than 48 inches in depth. (This rule modifies rule 806.3 of the standard.)

History: 1954 ACS 53, p. 55, Eff. Feb. 14, 1968.

INSPECTION AND TESTING OF ELEVATORS, DUMBWAITERS AND ESCALATORS

R 408.8671 Acceptance inspection and tests.

Rule 671. All parts of the installation shall be inspected for conformity with requirements of the applicable code rules of part IX of the standard. The American standard practice for the inspection of elevators, inspectors' manual, ASA A17.2-1960, a copy of which is on file in the Lansing office of the department of labor and which is available for public inspection is recommended as a guide in making the inspection. Balance load and maximum normal speeds with maximum rated load and no load shall be determined and recorded on forms furnished by the department. (This rule modifies rule 900.1d of the standard.)

History: 1954 ACS 53, p. 56, Eff. Feb. 14, 1968.

R 408.8672 Governor tests.

Rule 672. The tripping speed of the governor, and the speed at which the governor overspeed switch operates, where provided, shall be tested. This may be done by removing the governor rope from the governor sheave and driving the governor by a hand or motor-driven device with a gradual acceleration in order to insure an accurate determination of the tripping speed or by other approved means. If the tripping speed of the governor does not conform to the require-

ments of part II, section 206, rule 206.2 of the standard, it shall be readjusted to conform, after which it shall be resealed. A tag shall be attached to the safety-releasing carrier in a permanent manner, giving the date of the safety test together with the name of the person or firm who performed the test. (This rule modifies rule 900.7d(1)e of the standard.)

History: 1954 ACS 53, p. 56, Eff. Feb. 14, 1968.

R 408.8673 Oil buffer tests.

Rule 673. Oil buffers shall be tested as specified in rule 900.3a, b(1) and c of the standard. A tag shall be attached to the buffer in a permanent manner, giving the date of the test together with the name of the person or firm who performed the test. (This rule modifies rule 900.7d(2) of the standard.)

History: 1954 ACS 53, p. 56, Eff. Feb. 14, 1968.

R 408.8674 Car and counterweight safeties and governors.

Rule 674. (1) Replacement of or change in type of car or counterweight safety or governor is considered a major alteration.

(2) Where a car or counterweight safety or overspeed governor is replaced or changed in type it shall meet the requirements of section 205 of the standard for such equipment and shall be tested as specified in rules 900.1 and 900.2 of the standard. Where the overspeed governor is replaced or changed in type it shall meet the requirements of part II, section 206 of the standard for such equipment and shall be tested as specified in rules 900.1 and 900.2 of the standard. (This rule modifies rule 1100.2g of the standard.)

History: 1954 ACS 53, p. 56, Eff. Feb. 14, 1968.

OPERATION OF ELEVATORS UNDER FIRE OR OTHER EMERGENCY CONDITIONS

R 408.8681 Automatic-operation elevators.

Rule 681. All new automatic-operation elevators serving 3 or more landings, or having a travel of 25 feet or more, shall conform to the following:

(a) A 3-position (on, off, and by-pass) key-operated switch shall be provided at the main floor for each single elevator or for each group of elevators. The key shall be removable only in the "on" and "off" positions. When the switch is in the "on" position, all elevators controlled by this switch, and which are on automatic service, shall return nonstop to the main floor. When the switch is in the "by-pass" position, it shall render the sensing devices (subdivision (b)) inoperative and restore normal operation, except that it shall not affect the operation of elevators that are operating on emergency service (subdivision (d)).

(i) An elevator traveling away from the main floor shall reverse at or before the next available floor without opening its doors.

(ii) Elevators equipped with automatic power-operated doors and standing at a floor other than the main floor, with doors open, shall close the doors without delay, and proceed to the main floor, and the doors shall open and remain open. Elevators equipped with manually-operated doors or with power-operated doors that do not close automatically shall operate in accordance with the requirements of R 408.8682.

(iii) Door reopening devices for power-operated doors which are sensitive to smoke, heat, or flame shall be rendered inoperative.

(iv) All car and corridor call buttons shall be rendered inoperative and all call registered lights and direction lanterns shall be extinguished and remain inoperative.

(v) A car stopped at a landing shall have its "emergency stop switch" rendered inoperative as soon as the doors are closed and it starts toward the main floor. A moving car, traveling to or away from the main floor, shall have its "emergency stop switch" rendered inoperative immediately.

(vi) A sensor in each elevator lobby, which, when activated, prevents cars from stopping at that floor, shall not be substituted for the above requirements.

(b) Sensing devices. In addition to the key-operated switch required in subdivision (a) above, smoke detectors shall be installed, in accordance with NFPA no. 72A, 1974 edition, article 370—automatic smoke alarm service, in each elevator lobby at each floor, except the main floor. The activation of a smoke detector in any elevator lobby, except the main floor lobby, shall cause all cars which are on automatic service in all groups serving that lobby to return nonstop to the main floor. The operation shall conform to the requirements of subdivision (a)(i) to (a)(v) of this rule. NFPA no. 72A, dated 1974, article 370, is incorporated herein by reference, and is available for inspection at the Lansing office of the Michigan department of labor. This standard may be purchased at a cost of $3.00 each plus mailing cost from National Fire Protection Association, 470 Atlantic Avenue, Boston, Massachusetts 02210. They may also be purchased at the same price from the Michigan Department of Labor, 300 East Michigan Avenue, Lansing, Michigan 48926.

Exceptions:

(i) Elevators in buildings which are completely protected by an automatic sprinkler system in accordance with NFPA no. 13-sprinkler systems-1974, which is incorporated herein by reference and is available for inspection at the Lansing office of the Michigan department of labor. This standard may be purchased at a cost of $4.00 each plus mailing cost from the National Fire Protection Association, 470 Atlantic Avenue, Boston, Massachusetts 02210. They may also be purchased at the same price from the Michigan Department of Labor, 300 East Michigan Avenue, Lansing, Michigan 48926.

(ii) Freight elevators located in or at openings into manufacturing areas.

(iii) Elevator lobbies at unenclosed landings.

(c) Elevators without a terminal landing at grade level shall be returned to that landing closest to grade level or other approved level and shall conform to the requirements of subdivisions (a), (b), (c), (d), (e), and (f) of this rule.

(d) All elevators having a travel of 70 feet or more and elevators having a terminal landing 70 feet or more above the lowest grade elevation surrounding the building shall be provided with the following operation:

A 2-position (off and on) key-operated switch shall be provided in or adjacent to an operating panel in each car, and it shall be effective only when the main floor key-operated switch (subdivision (a)) is in the "on" position or a sensing device has been activated and the car has returned to the main floor or other approved level. The key shall be removable only in the "off" position and, when in the "on" position, it shall place the elevator on emergency operation.

The operation of elevators on emergency service shall be as follows:

(i) An elevator shall be operable only by a person in the car.

(ii) Elevators shall not respond to elevator corridor calls.

(iii) The opening of power-operated doors shall be controlled only by continuous pressure "open" buttons or switches. If the switch or button is released prior to the doors reaching the fully open position the doors shall automatically reclose. Open doors shall be closed by either the registration of a car call or by pressure on "door close" switch or button.

(iv) An elevator shall be removed from emergency service by moving the

emergency service key-operated switch in the car to the "off" position with the car at the main floor.

(e) Multi-deck elevators shall conform to the requirements of subdivisions (a), (b), (c), (d), and (f), and to additional requirements as follows:

(i) The key-operated switch required by subdivision (a) may be located at either main lobby.

(ii) The key-operated switch in the car required by subdivision (d) for emergency service operation shall be located in the top deck. The elevators shall be provided with means for placing the lower deck out of service, including closing of car and hoistway doors. The lower deck shall be out of service before the emergency service operation from the top deck becomes effective. The means for placing the lower deck out of service shall be located in that deck or adjacent to the entrance in the corridor.

(f) The switches required by subdivisions (a) and (d) shall be operated by the same key, but which is not a part of a building master key system. There shall be a key for the main floor switch and for each elevator in the group, and these keys shall be kept on the premises by persons responsible for maintenance and operation of the elevators, in a location readily accessible to authorized persons, but not where they are available to the public. (This rule modifies rule 211.3a of the standard.)

History: 1954 ACS 87, p. 45, Eff. Apr. 7, 1976.

R 408.8682 Attendant-operated elevators.

Rule 682. Elevators operable only by a designated attendant in the car shall be provided with a signal system, consisting of both visual and audible types actuated at the main floor or other approved level, to alert the attendant to return nonstop to the main floor or other approved level. Provisions shall be made to alert the attendant in the same manner when a heat and smoke or products of combustion sensing device is activated. (This rule modifies rule 211.3b of the standard.)

History: 1954 ACS 87, p. 47, Eff. Apr. 7, 1976.

R 408.8683 Elevators arranged for dual operation.

Rule 683. Elevators arranged for dual operation shall, when on automatic operation, conform to R 408.8681, and shall when on operation by a designated attendant in the car, conform to R 408.8682. Where an automatic-operation elevator is on attendant service (independent, hospital, service, inspection, and other similar special operation), it shall be considered as being on operation by a designated attendant in the car. (This rule modifies rule 211.3c of the standard.)

History: 1954 ACS 87, p. 47, Eff. Apr. 7, 1976.

R 408.8684 Operating instructions.

Rule 684. Instructions for operation of elevators under fire and other emergency conditions shall be incorporated within the enclosure for the switch at the main floor required by R 408.8681 and R 408.8682, or shall be posted adjacent to it. Instructions shall be in letters not less than ¼ inch in height, and shall be permanently installed and protected against removal and defacement. (This rule modifies rule 211.3d of the standard.)

History: 1954 ACS 87, p. 47, Eff. Apr. 7, 1976.
